

## **Project update**

**April 15, 2021**

We are beginning the construction phase of this project. Currently we are beginning to set up the construction site at the West Point Treatment Plant. (See [map](#).) We will continue to provide updates to prepare the community for any impacts of the construction.

### **What to expect**

During the project, there will be increased vehicle traffic through Discovery Park to and from West Point Treatment Plant. Community members may notice construction-related traffic and noise, but work activities will otherwise be inside the boundaries of the treatment plant.

We will continue to provide updates to prepare the community for any impacts of the construction.
