Effect: Changes the shoreline environment designations on 180 properties that were acquired and placed in King County Parks’ inventory since the last major revision to shoreline designations. Designates 1) the Natural Shoreline Environment on all King County Parks’ natural land/ecological sites 2) the Conservancy Shoreline Environment on the other Parks’ sites classifications (active and multiuse parks, forest sites, and regional trails) and 3) Aquatic Shoreline Environment on portions of properties waterward of the ordinary high water mark. More than one upland shoreline designation may apply to each parcel. The proposed changes impact upland environment designations; existing aquatic designations on any given parcel would not change.
