Proposed No.: 2023-0440.2

STRIKING AMENDMENT TO PROPOSED ORDINANCE 2023-0440, VERSION

2

On page 16, beginning on line 353, strike everything through page 677, line 13358, and insert:

"BE IT ORDAINED BY THE COUNCIL OF KING COUNTY:

SECTION 1. Findings:

A. The last statutorily required comprehensive plan review and update mandated by the Washington state Growth Management Act ("the GMA") in RCW 36.70A.130 was met with the 2012 King County Comprehensive Plan in Ordinance 17485.

B. The Comprehensive Plan has been amended since 2012, including with adoption of the 2016 King County Comprehensive Plan, as amended.

C. The GMA requires King County to take action not later than December 31, 2024, to review and, if needed, revise its comprehensive plan and development regulations to ensure the plan and regulations comply with the requirements of the GMA. This ordinance adopts the 2024 King County Comprehensive Plan ("2024 update"), which is compliant with the GMA and completes ~~this statutorily required review and update~~ the requirements for the update in RCW 36.70A.130. Additional work on critical

18 areas regulations is ongoing, as allowed under the reasonable progress exception in RCW
19 36.70A.130(7)(b) and as described in subsection D. of this section.

20 D. The GMA requires counties to include best available science ("BAS") in
21 developing policies and development regulations to protect the functions and values of
22 critical areas; give special consideration to conservation or protection measures necessary
23 to preserve or enhance anadromous fisheries; ensure no net loss of ecological functions
24 and values; and consider critical areas regulations as part of the comprehensive plan
25 review and evaluation required by RCW 36.70A.130. The county began the BAS and
26 critical area regulatory review in 2022 in accordance with GMA requirements and state
27 guidance and developed draft updates in consultation with Indian tribes, state and federal
28 agencies, and community partners. Public notice of the potential areas of change was
29 provided in May 2022, June 2022, January 2023, and June 2023. The county's current
30 BAS review builds on the county's 2004 BAS review and was informed by GMA
31 requirements and state guidance documents, updated BAS for critical areas developed by
32 state natural resources agencies, supplemental scientific literature, county experience in
33 implementing critical areas regulations since 2004, consideration of the county's unique
34 land use context, and the need to meet sometimes competing GMA goals. A BAS and
35 critical areas regulatory review progress report that summarized the current BAS
36 requirements, BAS review approach, and identified regulatory changes under
37 consideration was published in December 2023. An initial BAS report and proposed
38 policy and code updates were published and transmitted to the Council in March 2024.
39 The final environmental impact statement for the 2024 update, which included evaluation
40 of potential changes to critical areas regulations, was published in November 2024. BAS

review was included in the identification and development of relevant critical areas and environmental policies for the 2024 update. The October 2024 Best Available Science Review and Updates to Critical Areas Protections report summarizes GMA requirements for review and inclusion of BAS in updates to comprehensive plan policies and codes, describes tribal consultation and community engagement, details the approach and scope for BAS review, reviews Comprehensive Plan considerations, and identifies regulatory updates and nonregulatory actions to strengthen protection and ensure no net loss of critical areas functions and values. Additional review and refinement of proposed critical areas regulations is ongoing. The county intends to complete the BAS review and updates to critical areas regulations in 2025 with additional opportunities for public input. Under the reasonable progress exception in RCW 36.70A.130(7)(b), the county has until December 2025 to complete this portion of the statutory update.

~~DE~~. The GMA and King County Code requires that King County adopt development regulations that are consistent with and implement the Comprehensive Plan. The changes to development regulations in this ordinance are needed to maintain conformity with the Comprehensive Plan. They bear a substantial relationship to and are necessary for the public health, safety, and general welfare of King County and its residents.

~~EE~~. The changes to zoning contained in this ordinance are needed to maintain conformity with the Comprehensive Plan, as required by the GMA. As such, they bear a substantial relationship to, and are necessary for, the public health, safety, and general welfare of King County and its residents.

~~FG.~~ The Shoreline Management Act of 1971, chapter 90.58 RCW, requires King County to develop and administer a shoreline master program. Ordinance 16985 and Ordinance 17485 adopted a comprehensive update of King County's shoreline master program as required by RCW 90.58.080(2). Ordinance 19034 adopted a periodic review of King County's shoreline master program as required by RCW 90.58.080(4).

~~GH.~~ The changes included in this ordinance for the shoreline master program constitute a locally initiated amendment allowed under WAC 173-26-090. Changes include updates to shoreline policies and development regulations. Those changes are required to be approved by the Washington state Department of Ecology before they become effective.

~~IH.~~ The 2024 update was developed using early and continuous public engagement, as required by the GMA and consistent with the scope of work for the update, approved in 2022 via Motion 16142.

~~J.~~ Ordinance 19384 directed the King County Growth Management Planning Council ("the GMPC") to review the Four-to-One program in the Countywide Planning Policies ("the CPPs"), Comprehensive Plan, and King County Code. The Four-to-One program, Comprehensive Plan, and King County Code amendments adopted in the 2024 update are substantially consistent with the GMPC recommendations for the program and the related changes in the CPPs.

~~KJ.~~ Motion 16287 directed the executive to complete a code study related to expanded multiunit ~~housing types~~developments in low- and medium-density urban residential zones, also known as "middle housing." As required by the motion, a draft of the code study was issued in June 2023 as part of the Public Review Draft of the 2024

update, and a final report and associated recommended King County Code changes were included in the transmittal of the 2024 update.

LK. The 2016 King County Comprehensive Plan launched a subarea planning program. Subarea plans are being created for the six rural ~~Community-community~~ Service-service Areas-areas ("CSAs") and for the five large urban unincorporated potential annexation areas. The subarea planning program recognizes the county's role as a local service provider in the unincorporated area, including for localized long-range planning. Many areas of unincorporated King County have not had subarea planning since the 1990s or earlier. The subarea planning program provides improved coordination, accountability, and service delivery in the area of long-range planning for unincorporated areas of King County.

ML. This ordinance adopts the Snoqualmie Valley/Northeast King County Subarea Plan as an element of the 2024 King County Comprehensive Plan, as well as related map amendments and modifications to property specific zoning conditions.

NM. Ordinance 19613 adopted a moratorium prohibiting subdivisions of residentially zoned land in the Fall City Rural Town ~~of Fall City~~ and directed the executive to produce a work plan to address the issues and circumstances necessitating the moratorium. As required by the moratorium, the report and associated recommended King County Code and zoning changes were included in the transmittal of the Snoqualmie Valley/Northeast King County Subarea Plan, and incorporated into this ordinance.

ON. Vashon-Maury Island Subarea Plan Workplan Action 1 adopted in Ordinance 18623, as amended, directs the executive to comprehensively review and

update the property-specific development conditions, which are also known as P-Suffixes, and special district overlays, which are also known as SDOs, on Vashon-Maury Island. Workplan Action 1 required a report and a proposed ordinance to implement the recommendations in the report be transmitted to the Council for consideration by June 30, 2022. Due to the COVID-19 pandemic, the timeline for completing the final evaluation was delayed beyond the required date. In 2022, the scope of work for the 2024 update directed inclusion of the report and King County Code changes as part of the 2024 update. As required by the subarea plan and scope of work, the report and associated recommended King County Code changes were included in the transmittal of the 2024 update.

PE. Ordinance 18623 adopted the Vashon Rural Town Affordable Housing Special District Overlay ("the Vashon affordable housing overlay") and directed the executive to complete a series of written evaluations assessing the efficacy of the scope and standards of the Vashon affordable housing overlay. As required by Ordinance 18623, preliminary evaluations were issued in 2018, 2019, and 2020. A draft of the fourth and final required evaluation of the Vashon affordable housing overlay was required to be completed within ninety days of the occurrence of one the following, whichever comes first: issuance of the first permit necessary for construction that would result in a cumulative total of one hundred twenty affordable housing units within the overlay; or four years after the effective date of Ordinance 18623, which would have been December 26, 2021. No permits have been issued up to now utilizing the Vashon affordable housing overlay. Due to the COVID-19 pandemic, the timeline for completing the draft final evaluation was delayed beyond four years and ninety days of the effective

date of Ordinance 18623, which would have been March 24, 2022. In 2022, the scope of work for the 2024 update directed inclusion of a report on the fourth and final evaluation and any recommended implementing zoning and King County Code changes as part of the 2024 update. As required by Ordinance 18623 and the scope of work, the report and implementing zoning and King County Code changes were included in the transmittal of the 2024 update.

Q. The GMA calls for "containing or otherwise controlling rural development," among other goals for the rural area. The Regional Growth Strategy anticipates rural growth to be no more than one percent of all growth within King County. Policies in chapter 3 of the Comprehensive Plan carryover those goals and apply them to the rural unincorporated area. The GMA, VISION, and the Comprehensive Plan also have goals for rural economic opportunity and lifestyle choices at low densities and intensities, and at rural levels of service. The 2024 Comprehensive Plan adopts several provisions that reduce or minimize growth in the rural area while also allowing for important cultural, economic, and rural lifestyle opportunities, including, but not limited to:

1. Not expanding the Urban Growth Area boundary, or converting any RA zoned land to a higher density zone;

2. Continuing a prohibition on new rural towns and rural neighborhood commercial centers and maintaining policies that require limiting growth in the rural area and natural resource lands;

3. Clarifying policies that:

a. require agencies providing services in the rural area and natural resource
lands to establish standards that do not require substantial investment in public
infrastructure in these areas; and

b. scale site improvements for commercial and industrial developments to
protect rural character;

4. Calling for rural affordable housing strategies to allow for workforce housing,
aging in place, and provision of housing needed in the rural area, at an appropriate size
and scale that protects rural character;

5. Reducing the size of accessory dwelling units in the RA zone by removing an
allowance to use a TDR as a way to increase the allowable size, and reducing the
numbers of accessory dwelling units by adding a requirement that a detached accessory
dwelling unit be considered a primary unit when a lot is subdivided;

6. Lowering the residential density allowed in the rural NB zones by half, from
a maximum of eight units per acre to a maximum of four units per acre, and establishing
new size limits for nonresidential uses allowed in these areas;

7. Limiting new opportunities for workforce housing in the Snoqualmie Pass
Rural Town to a demonstration project, inclusionary housing, or to developments
purchasing TDRs;

8. Limiting the base density in the Vashon Rural Town to twelve units per acre
for the CB zone;

9. Removing barriers to developing in the urban area, including reducing
regulatory barriers to building housing, providing further incentives to build child

daycare facilities, and removing outdated development conditions that reduced feasibility of building in the urban area; and

10. Placing further limits on the use of the Four-to-One Program and strengthening the protections on the rural area portions of Four-to-One proposals.

R. The 2024 Comprehensive Plan includes changes to address housing and service needs of all residents of King County. Where those uses, such as healthcare and residential care services or daycares, are allowed in the rural area or natural resource lands, they are allowed with a variety of size and scale conditions that protect rural character. These conditions include minimum lot sizes, maximum floor areas, operational limits such as hours of operation or restrictions on the number of customers served, and protections for active agricultural production.

S. Further, changes proposed to the rural towns, including establishing consistent R-4 zoning by removing small pockets of existing R-1 zoning, and clarifying that minimum density does apply within the rural towns that have sewer service, both create further clarity in the zoning administration and provide for workforce housing within two communities with unique circumstances: Vashon Rural Town, which is only accessible via boat or plane, and Snoqualmie Pass Rural Town, which is an employment base but far from other population centers.

TP. The 2016 King County Comprehensive Plan, as amended, included Work Plan Action 17, which directed the executive to update the residential density incentive program in K.C.C. chapter 21A.34 in the 2024 update, as recommended by the related code study included in the transmittal of the 2020 update to the 2016 King County Comprehensive Plan. As required by Work Plan Action 17, this ordinance adopts

updates to the residential density incentive program regulations, which repeals the program and replaces it with updated regulations in the ~~voluntary~~-inclusionary housing program in K.C.C. chapter 21A.48.

UQ. As part of the 2024 Comprehensive Plan update, the land use designation and zoning classifications were reviewed on parcel 1522049162 and the surrounding area in urban unincorporated King County near Kent. The site is the location of a pet cemetery, which was designated as a historic landmark in 2022. The current Industrial land use designation and zoning classification on the parcel does not allow the cemetery uses on the site as permitted or conditional uses. Urban residential zoning, and a corresponding land use designation, would allow the cemetery uses on the site to become legal conforming uses. The zoning of other cemeteries in unincorporated urban King County was also analyzed, based on a survey of cemeteries completed by the King County historic preservation program. The survey identified two cemeteries in the Potential Annexation Areas for Carnation and Duvall; however, because those ~~are~~ have a land use designation of Cities in the Rural Area Urban Growth Area, they have different zoning considerations not applicable to this site within the contiguous Urban Growth Area. The survey identified one other currently operating urban unincorporated cemetery, which is also near Kent and has a R-1 zone classification; this was found to be a good model for the zoning of the pet cemetery site. A R-1 zone classification also best supports the historic designation by not imposing zoning that would allow for and incentivize more-intensive uses or densities on the site; the R-1 zone is the least-intensive zone classification allowed in the continuous Urban Growth Area. This zoning is supported by Comprehensive Plan ~~P~~olicies P-221 and P-222.

~~V~~R. The King County Comprehensive Plan and King County ~~S~~strategic Celimate
~~A~~ction Plan call on the county to act with urgency in addressing the climate crisis.
Increasing the generation of renewable energy and reducing greenhouse gas emissions
associated with waste are both critical to this effort. Specifically, the Comprehensive
Plan calls on King County to:

1. Reduce greenhouse gas emissions from its operations and actions to meet
ambitious emissions reduction targets (~~Policies~~Policy E-202, E-203);
2. Achieve carbon neutrality within its solid waste division (Policy E-205);
3. Encourage the use of renewable energy and support its expansion through
development regulations and incentive programs (Policy E-209);
4. Make properties it owns available for renewable energy production (Policy F-
304);
5. Maximize the capture, use, and marketing of renewable energy at the Cedar
Hills landfill (Policy F-50~~75~~86);
6. Provide leadership in, and foster the development and increased use of, clean,
renewable, and alternative fuel and energy technologies, such as anaerobic digestion and
co-digestion of organic material, with a particular emphasis on creating renewable natural
gas (Policy F-50~~86~~87);
7. Work with industry partners to reduce energy and fossil fuel use and
greenhouse gas emissions while promoting green jobs, products, and services (Policy E-
241);
8. Encourage development of markets for reusable and recyclable materials
(Policy F-44~~24~~25);

244 9. Allow for renewable energy technologies in the rural area (~~Policy R-322~~9);

245 10. Allow for infrastructure in the rural area that requires a rural location or that
246 provides or supports infrastructure for nearby residents (~~Policy R-32~~34);

247 11. Allow for siting of green energy and distributed energy resources, while
248 considering appropriate use of land and associate impacts, including protection of
249 designated ~~Natural-natural Resource-resource Lands-lands~~ and open spaces (~~Policy F-~~
250 51~~7~~5); and

251 12. Make land use decisions that consider the impacts of renewable energy
252 siting with open space, agriculture, and housing needs (~~Policy F-510~~08).

253 WS. The creation of a green energy overlay contributes to all of these goals in
254 subsection RV. of this section by reducing permitting barriers to generating renewable
255 energy and reducing greenhouse gas emissions from waste. The green energy overlay is
256 appropriate for this chosen area because it is:

257 1. Sited on parcels with a long history of waste management and mineral
258 extraction uses, making them unsuitable for housing, agriculture, or public open space;

259 2. Within one thousand feet of utility corridors, making it uniquely sited to
260 provide energy to surrounding residents and the region while reducing transportation
261 costs and emissions; and

262 3. Adjacent to the Cedar Hills Landfill, a prime source of emissions that can be
263 captured and put to beneficial use as renewable natural gas.

264 X. The GMA was amended by Chapter 228, Laws of Washington 2023, to
265 require a climate change and resiliency element as part of the next periodic update. For
266 King County, this includes an update to the transportation element and incorporate a

climate change and resiliency element into the King County Comprehensive Plan as part of the 2029 midpoint update. The climate change and resiliency element will include greenhouse gas emissions reduction and resiliency subelements. The transportation element will include a multimodal level of service, which will align with provisions of VISION for a multimodal level of service standard.

Y. Within the White Center unincorporated activity center, there is a core street, along on 16th Avenue SW between SW Roxbury Street and SW 100th Street. This area, and the Top Hat area of North Highline subarea geography, as described in the Environmental Impact Statement ("EIS") for the 2024 Comprehensive Plan, as pre-war urban centers that are organized within a grid of streets, with compact rectangular lots centered around a main street with commercial buildings on both sides. The EIS states, "[m]ain street commercial buildings tend to be 1 or 2 stories high, sometimes with apartments above a commercial ground floor. They tend to be oriented towards the street or sidewalk and have large windows, creating an engaging pedestrian environment. Such buildings are often "zero lot line" buildings, meaning their side walls touch, and they typically have limited off-street parking. Relatively affordable rents in older commercial buildings are supportive of small, independent businesses and often serve as cultural anchors for local communities." This unique character of these areas is not found elsewhere in urban unincorporated King County.

Z. The North Highline Community Service Area Subarea Plan ("North Highline Plan") includes a guiding principle to "support a thriving and equitable economy, with racially and ethnically diverse, community-minded small business owners, entrepreneurs, and employers." The North Highline Plan supports the preservation of the unique and

thriving White Center historic core. Several North Highline Plan policies call for preserving the small size and scale of existing businesses and allowing for new commercial spaces for small business needs, in the core of the White Center unincorporated activity center. This core street character is an aspect of this geography that the County has taken steps to protect, including adoption of existing regulations on maximum tenant size, pedestrian-oriented design standards, and sign regulations.

AA. As part of the development of the North Highline design standards in Ordinance 19687, a consultant's report noted aspects of the existing character that the community valued included its "welcoming storefronts with weather protection and lighting," "color and signage add character to this business," "[l]ocal pride can be seen in this 'White Center' mural," and "[f]abric and scale of White Center main street," as examples. Existing businesses include small businesses that provide goods and services to the surrounding residents, and are a draw for the rest of the county and region. The consultant's report states that "[t]he North Highline Subarea has a distinctive character and neighborhood form composed of its buildings, public realm, landscape, natural environment, and the infrastructure that supports it. These guidelines are intended to preserve the desirable existing design characteristics and support future enhancements to meet the community's vision by accomplishing these specific goals." This includes, "traditional neighborhood-scale commercial pattern," "human scale," "visible cultural diversity," and "historic and traditional elements" in the neighborhood composition.

BB. As of November 2024, there are no formula businesses, as defined by this ordinance, in the Top Hat neighborhood, and only one formula business in the core street of the White Center unincorporated activity center.

CC. The Vashon Rural Town is an historical settlement that provides for more intensive commercial uses and has developed in a main street pattern similar to White Center and Top Hat. As described in Chapter 3 of the Comprehensive Plan, each of the County's three "Rural Towns has unique features and needs, and therefore different standards may be appropriate for each, while meeting the purposes described above." "Vashon, accessible mainly by ferry and limited in terms of water supply, has natural constraints upon the type and intensity of development that can occur." Further, the Vashon-Maury Island Community Service Area Subarea Plan ("Vashon-Maury Island Plan") establishes a guiding principle to "[p]lan the Rural Town of Vashon as the mixed use and vibrant center of the community." The Vashon Rural Town includes the Town Core and Vashon Center, where most commercial businesses are located. - Policy LU-3 in the Vashon-Maury Island Plan calls for development of these areas to "maintain rural character" and provide "compact, pedestrian-friendly development." Policy LU-5 also calls for reduced parking in the Vashon Town Core. The main street character of the Vashon Rural Town is an aspect of this geography that the County has taken steps to protect, including adoption of existing regulations on pedestrian-oriented design, height restrictions, and allowed uses.

DD. As of November 2024, in the Vashon Rural Town, there is only one eating and drinking formula business establishment, and two legally nonconforming gasoline service stations. The eating and drinking establishment recently located in the Vashon Rural Town, highlighting the need to protect the unique character of the Vashon Rural Town from any further formula businesses. Market conditions have changed and made it more feasible to locate formula businesses in these locations.

EE. This ordinance furthers the vision, guiding principles, and policies of the Comprehensive Plan, subarea plans, and adopted development regulations, by prohibiting formula businesses within these areas of North Highline and in the Vashon Rural Town. This regulation on the location and design of formula business establishments is intended to maintain the existing main street character, the diversity of the each of these community's unique commercial areas, the breadth of commercial options available to residents, and the resiliency of the community's vibrant, small-scale, diversified commercial character, and to thereby protect and ensure the community's quality. Once multiple formula businesses locate in a community, that unique character is irreparably lost and cannot be recaptured. Small, independent businesses cannot compete with pricing and the marketing power of formula businesses, pushing them out, along with the distinctive character that comes with the individual design, product offerings, and marketing approaches made by small businesses.

SECTION 3. Ordinance 11955, Section 5, as amended, and K.C.C. 2.16.055 are hereby amended to read as follows:

A. The department of local services is responsible for managing and being fiscally accountable for the permitting division and the road services division. The department shall also administer the county roads function as authorized in applicable sections of Titles 36 and 47 RCW and other laws, regulations, and ordinances as may apply. Consistent with Motion 15125, the department shall:

1. Work in partnership with each county council district to focus on coordinating, enhancing and improving municipal services provided to the county's unincorporated areas. To effectuate this partnership, the executive shall routinely and proactively meet and collaborate with councilmembers representing the unincorporated area about potential organizational, operational, and other changes to county programs or services that will affect unincorporated area residents;

2. Be available to brief the council's standing and regional committees on issues related to unincorporated area local services;

3. Develop and implement programs and strategies that emphasize:

- a. improving the coordination of local services by county agencies through increased collaboration;
- b. strengthening partnerships between the county, communities, and other entities;
- c. improving the delivery, responsiveness, and quality of local services to the people, businesses, and communities of unincorporated King County through unified accountability;

2. Each subarea plan shall be developed consistent with the King County Comprehensive Plan and shall:

- a. be based on a scope of work established with the community;
- b. establish a long-range vision, guiding principles, and policies to implement that vision. Policies in the subarea plan shall be consistent with and not redundant to policy direction in the Comprehensive Plan;

c. establish performance metrics and monitoring for implementation of the subarea plan. The performance metrics and monitoring shall be:

(1)(a) for subarea geographies that have a subarea plan adopted as of December 2022, reviewed and jointly reported on by December 30, 2024, and every two years thereafter; and

(b) for subarea geographies that do not have a subarea plan adopted as of December 2022, reviewed and reported on the timelines established in subsection B.2.c.(1)(a) of this section beginning no sooner than two years after adoption; and

(2) informed and monitored by the community and the council;

d. use the tools and resources developed by the office of equity and racial and social justice to develop the scope of work and to develop, review, amend, adopt, and implement the subarea plan, including, but not limited to, community engagement, language access, and equity impact review tools. The county shall use, at minimum, the ~~("County engages in dialogue" and)~~ "County and community work together" levels of engagement as outlined in the office of equity and racial and social justice's Community Engagement Guide for the scoping, development, review, amendment, adoption, and implementation of the subarea plan. The county shall include as an appendix to the subarea plan information detailing the community engagement completed during the development of the subarea plan and how the community engagement meets the requirements of this subsection B.2.d.;

g. review the land use designations and zoning classifications in the subarea geography, including all special district overlays and property-specific development conditions, and transmit map amendments necessary to implement land use and zoning updates and the vision, guiding principles, and policies within the subarea plan ~~((; and~~

~~h. incorporate by reference the community needs list and associated performance metrics as required in subsection C. of this section)).~~

3. Before transmittal of the subarea plan to the council, the executive shall coordinate and collaborate with the councilmember office or councilmember offices who represent the subarea geography on development of the subarea plan.

4. Each subarea plan shall be transmitted to the council for possible adoption as established in the schedule in the Comprehensive Plan and K.C.C. Title 20.

C.1. The department shall also manage the development and implementation of the list of services, programs, facilities, and capital improvements that are identified by the community, known as a community needs list, for each of the subarea geographies in subsection B. of this section. The community needs list shall be the responsibility of the executive to implement. The department of local services, in coordination with the community, shall be responsible for monitoring the implementation of the community needs list.

2. Each community needs list shall:

a. be consistent with and implement the subarea plan described in subsection

B. of this section and other county plans;

water for a considerable length of time and then release it by evaporation, plant
transpiration, or infiltration into the ground or to hold runoff for a short ~~((period of))~~ time
and then release it to the conveyance system.

V. "Full drainage review" means the evaluation required by K.C.C. 9.04.030 for
any proposed project, unless the project is subject to simplified drainage review, directed
drainage review, targeted drainage review, or large project drainage review, that:

1. Would result in two thousand square feet or more of new impervious surface,
replaced impervious surface, or new plus replaced impervious surface; or
2. Would result in seven thousand square feet or more of land disturbing
activity.

W. "Groundwater" means all water found in the soil and stratum beneath the land
surface or beneath the bed of any surface water.

X. "High-use site" means the area of a commercial, industrial, or road
intersection site that generates a higher than average number of vehicle turnovers or has

other characteristics that generate the potential for chronic oil accumulation. "High use site" includes:

1. The area of a commercial or industrial site subject to:

- a. an expected daily traffic count greater than one hundred vehicles per one thousand square feet of gross building area;
- b. petroleum storage or transfer in excess of one thousand five hundred gallons per year, not including routine heating oil storage or transfer at the end-user point of delivery; or
- c. use, storage, or maintenance of a fleet of twenty-five or more diesel or jet fuel vehicles each weighing over ten tons; or

Y. "Hydraulically connected" means connected through surface flow or water features such as wetlands or lakes.

Z. "Impervious surface" means a hard surface area that either prevents or retards the entry of water into the soil mantle as under natural conditions before development or that causes water to run off the surface in greater quantities or at an increased rate of flow from the flow present under natural conditions before development. Common impervious surfaces include, but are not limited to, roofs, walkways, patios, driveways, parking lots, storage areas, areas that are paved, graveled, or made of packed or oiled earthen materials or other surfaces that similarly impede the natural infiltration of surface water or stormwater. For purposes of applying the impervious surface thresholds in this

chapter, permeable pavement, vegetated roofs, and underdrained pervious surfaces are considered "impervious surface," while an open uncovered flow control or water quality facility is not.

AA. "Improvement" means a permanent, human-made, physical change to land or real property including, but not limited to, buildings, streets, driveways, sidewalks, crosswalks, parking lots, water mains, sanitary and storm sewers, drainage facilities, and landscaping.

"Land disturbing activity" includes, but is not limited to, demolition, construction, clearing, grading, filling, excavation, and compaction. "Land disturbing activity" does not include tilling conducted as part of agricultural practices, landscape maintenance, or gardening.

CC. "Lake management plan" means a plan describing the lake management recommendations and requirements adopted by public rule for managing water quality within individual lake basins.

1040 there are no significant hydrologic impacts. "Maintenance" includes the repair or
1041 replacement of nonfunctional facilities or the replacement of existing structures with
1042 different types of structures, if the repair or replacement is required by one or more
1043 environmental permits or to meet current engineering standards and the functioning

MM. "Pollution-generating impervious surface" means an impervious surface considered to be a significant source of pollutants in stormwater runoff. "Pollution-generating impervious surface" includes: those surfaces subject to vehicular use; industrial activities; or storage of erodible or leachable materials, wastes, or chemicals and that receive direct rainfall or the run-on or blow-in of rainfall. A covered parking area would be included if runoff from uphill could regularly run through it or if rainfall could regularly blow in and wet the pavement surface. Metal roofs are also considered pollution-generating impervious surface unless they are treated to prevent leaching. Roofs exposed to the venting of significant amounts of dusts, mists, or fumes from manufacturing, commercial, or other indoor activities are also included, as are vegetated roofs exposed to pesticides, fertilizers, or loss of soil.

NN. "Pollution-generating pervious surface" means a nonimpervious surface considered to be a significant source of pollutants in stormwater runoff. "Pollution-generating pervious surfaces" include: surfaces subject to vehicular use, industrial activities, storage of erodible or leachable materials, wastes or chemicals, and that receive direct rainfall or the run-on or blow-in of rainfall; or surfaces subject to the use of pesticides and fertilizers to the loss of soil. "Pollution-generating pervious surface" includes, but is not limited to, the lawn and landscaped areas of a residential, commercial, or industrial site or land use, golf course, park, sports field, and county-standard grassed modular grid pavement.

PP. "Project site" means the portion of a site and any ~~((offsite))~~ off-site areas subject to proposed project activities, alterations, and improvements including those required by this chapter.

QQ. "Redevelopment project" means a project that proposes to add, replace, or modify impervious surface for purposes other than a residential subdivision or maintenance on a site that:

1. Is already substantially developed in a manner that is consistent with its current zoning or with a legal nonconforming use; or

2. Has an existing impervious surface coverage of thirty-five percent or more.

RR. "Replaced impervious surface" means an existing impervious surface proposed to be removed and reestablished as impervious surface, excluding impervious surface removed for the sole purpose of installing utilities or performing maintenance.

1101 For structures, "removed" means the removal of buildings down to the foundation. For
1102 other impervious surfaces, "removed" means the removal down to base course or bare

1118 Water Design Manual; and

1119 2. Meets the simplified drainage requirements and BMPs specified in the
1120 Surface Water Design Manual, including flow control BMPs, construction stormwater
1121 pollution prevention BMPs, and drainage plan submittal requirements.

1122 VV. "Site" means a single parcel, or either two or more contiguous parcels that
1123 are under common ownership or documented legal control, or a portion of single parcel

1124 under documented legal control separate from the remaining parcel, used as a single
1125 parcel for a proposed project for purposes of applying for authority from King County to
1126 carry out a proposed project. For projects located primarily within dedicated rights-of-
1127 way, "site" includes the entire width of right-of-way subject to improvements proposed
1128 by the project.

1129 WW. "Stormwater" means the water produced during precipitation or snowmelt,
1130 ~~((which))~~ that runs off, soaks into the ground, or is dissipated into the atmosphere.

1144 2. Is contained within the basin of the stream or water body.

1145 AAA. "Surface water" means the water that exists on land surfaces before,
1146 during, and after stormwater runoff occurs and includes, but is not limited to, the water

found on ground surfaces and in drainage facilities, rivers, streams, springs, seeps, ponds, lakes, wetlands, and Puget Sound. ~~((H))~~ "Surface water" also includes shallow groundwater.

BBB. "Surface Water Design Manual" means the manual, and supporting documentation referenced or incorporated in the manual, describing surface and stormwater design and analysis requirements, procedures, and guidance. SECTION 12. Ordinance 9163, Section 5, as amended, and K.C.C. 9.04.060 are hereby amended to read as follows:

A. A proposed project required to have drainage review by K.C.C. 9.04.030 must meet each of the following core requirements, which are described in detail in the Surface

Water Design Manual. Projects subject only to simplified drainage review that meet the
simplified drainage requirements and BMPs specified in the Surface Water Design
Manual, including flow control BMPs, construction stormwater pollution prevention
BMPs and drainage plan submittal requirements are deemed to comply with the
following core requirements:

1. Core requirement 1: Discharge at the natural location. All stormwater runoff
and surface water from a project shall be discharged at the natural location so as not to be
diverted onto, or away from, downstream properties. The manner in which stormwater
runoff and surface water are discharged from the project site shall not create a significant
adverse impact or significantly aggravate an existing adverse impact to downhill
properties or drainage facilities as specified in the discharge requirements of the Surface
Water Design Manual;

2. Core requirement 2: Offsite analysis. The initial application submittal for
proposed projects shall include an offsite analysis report that assesses potential offsite
drainage and water quality impacts associated with development of the proposed site and
proposes appropriate mitigations to those impacts. This initial submittal shall include, at
minimum, a Level One downstream analysis as described in the Surface Water Design
Manual. If impacts are identified, the proposed projects shall meet any applicable
problem-specific requirements as specified in the Surface Water Design Manual;

3. Core requirement 3: Flow control facilities. Proposed projects that would
result in five thousand square feet or more of new plus replaced impervious surface or
three quarters of an acre or more of new pervious surface shall provide flow control
facilities to control stormwater runoff generated by new impervious surface, new

pervious surface, replaced impervious surface and any existing impervious surface added
on or after January 8, 2001, as specified in the Surface Water Design Manual. Flow
control facilities shall meet the area-specific flow control facility requirements and the
flow control facility implementation requirements applicable to the project site as
specified in the Surface Water Design Manual. Projects subject to area-specific flow
control facility requirements shall meet one of the flow control facility performance
criteria listed in a. through c. of this subsection A.3., as directed by the Surface Water
Design Manual:

a. Level One shall match the predeveloped site's peak discharge rates for the
two-year and ten-year return periods;

b. Level Two shall meet Level One criteria and also match the predeveloped
site's discharge durations for the predeveloped peak discharge rates between the fifty
percent of the two-year peak flow through the fifty-year peak flow; or

c. Level Three shall meet Level Two criteria and also match the predeveloped
site's peak discharge rate for the one hundred-year return period;

4. Core requirement 4: Conveyance system. All engineered conveyance system
elements for proposed projects shall be analyzed, designed and constructed to provide the
minimum level of protection against overtopping, flooding, erosion and structural failure
as specified by the conveyance requirements for new and existing systems and
conveyance implementation requirements described in the Surface Water Design Manual;

5. Core requirement 5: Construction stormwater pollution prevention. All
proposed projects that will conduct construction activities onsite or offsite or will clear,
grade or otherwise disturb the site shall provide stormwater pollution prevention controls,

spill controls, and erosion and sediment controls-to-prevent, reduce or eliminate the
discharge of pollutants including sediment to onsite or adjacent drainage facilities,
adjacent properties and surface water or groundwater. Erosion and sediment controls
shall be applied in accordance with K.C.C. chapter 16.82 and as specified by the
temporary erosion and sediment control measures and performance criteria and
implementation requirements in the King County Surface Water Design Manual;
6. Core requirement 6: Maintenance and operation. Maintenance of all
drainage facilities in compliance with King County maintenance standards is the
responsibility of the applicant or property owner as described in the Surface Water
Design Manual, except those facilities for which King County assumes maintenance and
operation as described in K.C.C. 9.04.115 and 9.04.120 and the Surface Water Design
Manual;
7. Core requirement 7: Financial guarantees and liability. All drainage
facilities constructed or modified for projects, except downspout infiltration and
dispersion systems for single family residential lots, must comply with the liability
requirements of K.C.C. 9.04.100 and the financial guarantee requirements of K.C.C. Title
27A;
8. Core requirement 8: Water quality facilities. Proposed projects that would
result in five thousand square feet or more of new plus replaced pollution generating
impervious surface or three quarters of an acre or more of new pollution-generating
pervious surface, or that are redevelopment projects that would result in a total of five
thousand square feet or more of new and replaced pollution-generating impervious
surface, shall provide water quality facilities to treat polluted stormwater runoff generated

by new or replaced pollution-generating impervious surface, new pollution-generating
pervious surface and any existing pollution-generating impervious surface added on or
after January 8, 2001, as specified in the Surface Water Design Manual. However,
pervious surfaces are specifically excluded if there is a good faith agreement with the
King Conservation District to implement a farm management plan for agricultural uses,
and pervious areas for other uses are specifically excluded if King County department of
local services, permitting division, approves a landscape management plan that controls
solids, pesticides, fertilizers and other erodible or leachable materials leaving the site.
Water quality facilities shall meet the area-specific water quality facility requirements
and the water quality implementation requirements applicable to the project site as
specified in the Surface Water Design Manual. The facilities specified by these
requirements are designed to reduce pollutant loads according to the applicable annual
average performance goals listed in a. through d. of this subsection A.8. for ninety-five
percent of the annual average runoff volume:

a. for basic water quality: remove eighty percent of the total suspended solids;

b. for enhanced basic water quality: remove sixty percent dissolved zinc and
thirty percent of dissolved copper;

c. for sensitive lake protection: remove fifty percent of the total phosphorus;
and

d. for sphagnum bog protection: remove fifty percent of the total phosphorus
and forty percent of the total nitrate plus nitrite. The discharge shall maintain a pH of
less than 6.5 and an alkalinity of less than ten milligrams per liter.

_____ 9. Core requirement 9: Flow control BMPs. Proposed projects that would
result in two thousand square feet or more of new plus replaced impervious surface or
seven thousand square feet or more of land disturbing activity shall provide flow control
BMPs that use processes such as infiltration, dispersion, storage, evaporation,
transpiration, forest retention and reduced impervious surface footprint to mimic pre-
developed hydrology and minimize stormwater runoff generated by new impervious
surface, new pervious surface, replaced impervious surface and any existing impervious
surface added on or after January 8, 2001, as specified in the Surface Water Design
Manual. Flow control BMPs shall be applied to manage stormwater runoff from the
aforementioned surfaces to the maximum extent feasible using lists of flow control BMPs
specific to the project location, size and impervious coverage; or as required to
demonstrate that developed discharge durations from the surfaces match predeveloped
durations for those surfaces for the range of predeveloped discharge rates from eight
percent of the two-year peak flow to fifty percent of the two-year peak flow as specified
in the Surface Water Design Manual.

_____ B. A proposed project required by K.C.C. 9.04.030 to have drainage review shall
meet any of the following special requirements that apply to the site and that are
described in detail in the Surface Water Design Manual. The department performing
drainage review as specified in K.C.C. 9.04.070 shall verify if a proposed project is
subject to and must meet any of the following special requirements.

_____ 1. Special requirement 1: Other adopted area-specific requirements. If a
proposed project is in a designated critical drainage area, or is in an area included in an
adopted master drainage plan, basin plan, salmon conservation plan, stormwater

compliance plan, flood management plan, lake management plan or shared facility plan,
then the proposed project shall meet the applicable drainage requirements of the critical
drainage area, master drainage plan, basin plan, salmon conservation plan, stormwater
compliance plan, flood management plan, lake management plan or shared facility plan;

2. Special requirement 2: Floodplain/floodway delineation. If a proposed
project contains or is adjacent to a stream, lake, wetland or closed depression, or if other
King County regulations require study of flood hazards relating to the proposed project,
the one hundred year floodplain boundaries and floodway shall be determined and
delineated on the site improvement plans and profiles and any final maps prepared for the
proposed project. The flood hazard study shall be prepared as specified in the Surface
Water Design Manual;

3. Special requirement 3: Flood protection facilities. If a proposed project
contains or is adjacent to a stream that has an existing flood protection facility, such as a
levee, revetment or berm, or proposes to either construct a new or modify an existing
flood protection facility, then the flood protection facilities shall be analyzed and
designed as specified in the Surface Water Design Manual;

4. Special requirement 4: Source Control. If a proposed project requires a
commercial building or commercial site development permit, then water quality source
controls shall be applied to prevent rainfall and runoff from coming into contact with
pollutants to the maximum extent practicable. Water quality source controls shall be
applied in accordance with K.C.C. chapter 9.12, the King County stormwater pollution
prevention manual and the Surface Water Design Manual. All structural source controls

shall be identified on the site improvement plans and profiles or final maps prepared for
the proposed project; and

5. Special requirement 5: Oil control. If a proposed project is any of the
following, then oil control shall be applied to all runoff from the high-use portion of a site
as specified in the Surface Water Design Manual:

a. a project that creates a high-use site;
b. a redevelopment project proposing one hundred thousand dollars or more of
improvements to an existing high-use site; or
c. a redevelopment project that results in new plus replaced pollution-
generating impervious surface of five thousand square feet or more or new pollution-
generating pervious surface of three quarters of an acre or more.

C.1. An adjustment to the requirements contained in this section or other
requirements in the Surface Water Design Manual may be proposed. The resulting
development shall be subject to all of the remaining terms and conditions of this chapter
and the adjustment shall:

a. produce a compensating or comparable result in the public interest; and
b. meet this chapter's objectives of safety, function, appearance, environmental
protection and maintainability based upon sound engineering judgment.

2. If complying with subsection C.1.a. of this section will deny all reasonable
use of a property, the best practicable alternative shall be obtained as determined by the
department of local services permitting division manager or designee according to the
adjustment process defined in the Surface Water Design Manual.

3. Requests for adjustments that may conflict with the requirements of any other King County division shall require review and concurrence with that division. The director shall coordinate to resolve conflicts between adjustments to the Surface Water Design Manual and requirements of other divisions.

4. A request for an adjustment is a Type 1 land use decision as provided for in K.C.C. 20.20.020 and shall be processed in accordance with the procedures specified in the Surface Water Design Manual.

5. The county may require monitoring of experimental designs and technology or untested applications proposed by the applicant in order to determine compliance with subsection C.1. of this section and the approved plans and conditions.

6. The applicant may appeal an adjustment decision by following the appeal procedures as specified in the Surface Water Design Manual.

~~((D. The drainage review requirements in this section and in the Surface Water Design Manual may be modified or waived under the procedures in K.C.C. 21A.55.060.))~~

2. Grading that produces less than two thousand square feet of new impervious surface on a single site added after January 1, 2005, or that produces less than two thousand square feet of replaced impervious surface or less than two thousand square feet of new plus replaced impervious surface after October 30, 2008. For purposes of this subsection ~~((C-))~~ E.2., "new impervious surface" and "replaced impervious surface" are defined in K.C.C. 9.04.020.

A.1. ~~((The county developed a strategic climate action plan in 2012 to establish long-term targets and guide actions within county services and operations to reduce greenhouse gas emissions and adapt to a changing climate. In accordance with this chapter, the executive updates the strategic climate action plan.))~~ In order to guide the county's climate-related objectives and strategies, the executive shall develop an updated strategic climate action plan at least every five years. Each update to the strategic climate action plan shall be developed with an environmental justice framework in partnership with those communities disproportionately impacted by climate change and in a manner consistent with ~~((Ordinance 16948, which establishes the county's fair and just principle))~~ K.C.C. 2.10.200, 2.10.210, 2.10.220, and 2.10.230. The strategic climate action plan shall include the following:

a. the identification of specific goals, strategies, measures, targets, and priority actions for county services and operations to reduce emissions consistent with the countywide goal of reducing greenhouse gas emissions ~~((twenty-five percent by 2020,))~~ fifty percent by 2030, seventy-five percent by 2040, and ((eighty)) ninety-five percent by 2050, with net-zero emissions through carbon sequestration and other strategies by that year, compared to a 2007 baseline. The strategic climate action plan should address five goal areas for reducing greenhouse gas emissions: transportation and land use; building and facilities energy; green building; consumption and materials management, including

2165 the environmental purchasing program; and forestry and agriculture. Each goal area shall
2166 address environmental justice and ensure that the strategies promote an equitable
2167 distribution of any environmental benefit. The strategic climate action plan should
2168 establish explicit and, whenever possible, quantifiable connections between the
2169 overarching climate goals and specific strategies and actions;

2170 b.(1) a green jobs strategy. For purposes of this subsection A., a "green job"
2171 means ~~((one that generates an income large enough to support a household in King~~
2172 ~~County and provides a benefit to the environment))~~ a living wage position providing
2173 environmental benefits, such as clean energy deployment, in high-demand industry
2174 sectors such as construction, manufacturing, transportation, and professional services.

2175 The intent of the green jobs strategy is to encourage the development of green jobs along
2176 the career spectrum.

2177 (2) the green jobs strategy shall be developed in consultation with members
2178 of the King County climate and equity community taskforce identified in subsection

2179 A.1. ~~((b.(2)(f))c.~~ of this section, labor and workforce development organizations directed

2180 in subsection A. ~~((7-))5.~~ of this section, and representatives of an environmental justice

2181 and climate equity organization, education, business, building managers, utilities,
2182 scientists with knowledge of the latest research on strategies to reduce emissions, tribes,

2183 local governments, and regional groups such as the King County-Cities Climate

2184 Collaboration and the Puget Sound Regional Council, and shall include:

2185 (a) specific actions King County and its partners can take to increase the
2186 number of green jobs and apprenticeships throughout the region, including jobs in energy

2187 efficiency, renewable energy, green vehicles₁ and carbon sequestration, and King County
2188 administrative, executive, policy₂ and technical jobs;

2189 (b) a proposal for and budget to develop a green job pipeline that focuses
2190 especially on communities that have historically been underserved, and is informed by
2191 recommendations of the climate and equity community task force;

2192 (c) identification of the industry sectors and job types with high-demand
2193 green jobs in King County; and

2194 (d) actions King County can take to develop the green energy skills of King
2195 County's own workforce, such as collaboration on development of apprenticeship and
2196 pre-apprenticeship programs in sectors including energy efficiency, electrification,
2197 electric vehicle maintenance, the maintenance of electric vehicle infrastructure₃ and
2198 carbon sequestration technologies; ~~((and~~

2199 ~~((e) an initial green jobs strategy in the 2020 Strategic Climate Action Plan~~
2200 ~~update, with findings and recommendations along with recommended next steps for~~
2201 ~~refining the green jobs strategy as part of plan implementation, biennial budgets and~~
2202 ~~future plan updates; and~~

2203 ~~((f)))~~ c. a community-driven strategy to achieve sustainable and resilient
2204 communities. In order to achieve a community driven strategy, the executive shall
2205 convene and partner with the King County climate and equity community task force to
2206 develop the sustainable and resilient community strategy. The King County climate and
2207 equity community task force shall be a racially and ethnically diverse group representing
2208 various communities in King County that are on the frontline of climate change. The task

2209 force shall develop goals and guide priority areas for climate action based on community
2210 values and concerns. The sustainable and resilient community strategy shall:

2211 ~~((i+))~~ (1) identify how climate change will impact communities of color, low-
2212 income communities, and those disproportionately impacted by climate change;

2213 ~~((ii+))~~ (2) identify opportunities to take actions to address those impacts that
2214 could include increasing the number of affordable housing units, developing pathways to
2215 green jobs, preventing neighborhood displacement, increasing access to green spaces,
2216 providing access to zero emissions mobility options, improving food security, reducing
2217 pollution, and addressing health disparities; and

2218 ~~((iii+))~~ (3) based on assessment of climate impacts and extreme weather
2219 events like heat waves on vulnerable communities, make recommendations for
2220 preparedness strategies and actions to include in county emergency response plans, the
2221 flood ~~hazard~~ management plan, and the regional hazard mitigation plan;

2222 ~~((e+))~~ d. the current assessment of climate change impacts in King County and
2223 identification of goals, strategies, measures, targets, and priority actions within county
2224 services and county operations to address climate change impacts. Each goal and
2225 strategy shall address environmental justice and ensure that the strategies promote an
2226 equitable distribution of any environmental benefit;

2227 ~~((f+))~~ e. performance measures and related targets for both operational
2228 emissions and implementation of priority strategies, including the green job strategy, that
2229 advance the strategic climate action plan and provide for assessment of progress relative
2230 to overarching climate goals at the community scale; and

2231 ~~((e.))~~ f. an assessment of cost effectiveness for key county services and
2232 operations building on the pilot cost effectiveness assessment in the 2015 strategic
2233 climate action plan update.

2234 2. ~~((Consistent with the county's strategic planning cycle, updates will occur at
2235 least every five years, unless more frequent updates are needed to respond to changing
2236 information about emissions sources, performance relative to targets, new technologies,
2237 or a changing regulatory context.))~~ The executive shall transmit the 2025 update(s) to
2238 the strategic climate action plan to the council for adoption by motion. All subsequent
2239 updates shall be transmitted to the council for adoption by ordinance.

2240 3. In developing future updates to the strategic climate action plan, the
2241 executive shall continue to review climate change-related plans being developed by other
2242 municipalities, including the city of Seattle's climate action plan, and identify
2243 opportunities and strengthen recommendations for partnership with cities, businesses, and
2244 nonprofit organizations to advance actions to reduce greenhouse gas emissions and
2245 prepare for and respond to climate change impacts.

2246 4. ~~((The council recognizes that science related to climate change and successful
2247 climate solutions is evolving, and each update to the strategic climate action plan should
2248 build upon and refine the strategies, activities and performance targets in accordance with
2249 best available science, practices and progress toward emissions reductions targets.~~

2250 5. ~~Future updates shall include the requirements of subsection A.1. of this
2251 section.~~

2252 6)). Progress in achieving strategic climate action plan performance measure
2253 targets and accomplishment of priority actions identified in subsection A.1. of this

2254 section, as well as findings outlining recommendations for changes in policies, priorities,
2255 and capital investments, shall be reported and transmitted to council ~~((biennially))~~ with
2256 the update of the strategic climate action plan and at the midpoint between updates. The
2257 progress report shall be included as part of the report required in K.C.C. 18.50.010.

2258 ~~((7.))~~ 5. The executive shall convene a strategic climate action plan labor
2259 advisory council ~~((or))~~ and seek input from county labor and workforce development
2260 organizations, including the Martin Luther King, Jr. County Labor Council of
2261 Washington, the Seattle Building and Construction Trades Council, and the Workforce
2262 Development Council of Seattle-King County, on recommendations for policies,
2263 programs, and partnerships to strengthen pathways to local green jobs and to provide
2264 guidance on each update.

2265 6. The executive shall ~~collaborate-consult~~ with Indian tribes, and shall
2266 collaborate with cities in King County through the King County-Cities Climate
2267 Collaboration, on each update to the strategic climate action plan.

2268 B. Future updates to climate-related objectives and strategies should be informed
2269 by the most-recently adopted strategic climate action plan.

2270 C. The executive ~~((must transmit))~~ shall electronically file the legislation and
2271 reports required ~~((to be submitted))~~ by this section ~~((in the form of a paper original and an~~
2272 ~~electronic copy))~~ with the clerk of the council, who shall retain ~~((the original))~~ an
2273 electronic copy and provide an electronic copy to all councilmembers, the council chief
2274 of staff, and the lead staff for the transportation, economy, and environment committee or
2275 its successor.

2276 SECTION 3430. The following should constitute a new chapter in K.C.C. Title
2277 18, to follow K.C.C. chapter 18.35:

- 2278 A. K.C.C. 28.30.010, as recodified by this ordinance;
- 2279 B. K.C.C. 28.30.020, as recodified by this ordinance; and
- 2280 C. K.C.C. 28.30.030, as recodified by this ordinance.

2281 SECTION 3531. The following are hereby recodified as new sections in K.C.C.
2282 chapter 18.xx (the new chapter created in section 34-30 of this ordinance):

- 2283 A. K.C.C. 28.30.010;
- 2284 B. K.C.C. 28.30.020; and
- 2285 C. K.C.C. 28.30.030, as amended by this ordinance.

2286 SECTION 3632. Ordinance 17971, Section 4, as amended, and K.C.C. 28.30.030
2287 are hereby amended to read as follows:

- 2288 A. The King County Metro transit carbon offset and environmental attributes
2289 program is hereby created and shall be administered by the Metro transit department.
- 2290 B. Transit carbon offsets shall be reviewed by an ~~((an))~~ independent third-party
2291 organization with proven experience in emission mitigation activities to ensure that
2292 transit carbon offsets meet the requirements of RCW 36.01.250.
- 2293 C. The Metro transit department shall make carbon offsets or environmental
2294 attributes available for purchase by individuals or public or private entities, if doing so is
2295 likely to be financially beneficial to the department.
- 2296 D. The wastewater treatment division and the solid waste division shall evaluate
2297 the purchase of Metro transit department carbon offsets, as necessary, to achieve the
2298 requirements of this chapter.

E. When purchasing carbon offsets, the wastewater treatment division and the solid waste division shall ensure the offsets meet the requirements of RCW 36.01.250. In purchasing offsets, the wastewater treatment division and the solid waste divisions shall purchase offsets from the Metro transit department before purchasing carbon offsets from outside of the county if Metro transit department offsets are comparably priced.

F. Revenue from the sale of carbon offsets or environmental attributes shall be used by the Metro transit department solely for the purposes of reducing greenhouse gas emissions through ~~((providing additional transit service hours))~~ mobility services or investments that reduce the greenhouse gas emissions from transit operations beyond standard operations, thereby achieving additionality.

G. The executive shall ensure that transit carbon offsets or other environmental attributes are not double counted in calculating the greenhouse gas emissions for King County.

SECTION 33. Ordinance 13694, Section 5, and K.C.C. 19A.04.030 are hereby amended to read as follows:

Applicant: a property owner, ~~((or))~~ a public agency, or public or private utility that owns a right-of-way or other easement or has been adjudicated the right to such easement ~~((pursuant to))~~ in accordance with RCW ~~((8.12.090))~~ 8.08.040, or any person or entity designated or named in writing by the property or easement owner to be the applicant, in an application for a development proposal, permit, or approval.

NEW SECTION. SECTION 34. There is hereby added to K.C.C. chapter 19A.04 a new section to read as follows:

Microsubdivision: a short subdivision involving a division or redivision of land into two lots, tracts, parcels, or sites for the purpose of the sale, lease, or transfer of ownership.

SECTION 35. Ordinance 17841, Section 1, and K.C.C. 19A.04.205 are hereby amended to read as follows:

"Large lot segregation" means the division of land into lots or tracts each one of which is one-sixteenth of a section of land or larger, or forty acres or larger if the land is not capable of description as a fraction of a section of land. However, for purposes of computing the size of a lot that borders on a street or road, the lot size shall be expanded to include that area that would be bounded by the center line of the road or street and the side lot lines of the lot running perpendicular to such center line. Also, within the resource zones, each lot or tract shall be of a size that meets the minimum lot size requirements of K.C.C. ((21A.12.040.A-)) Title 21A for the respective zone.

SECTION 36. Ordinance 13694, as amended, and K.C.C. 19A.04.310 are hereby amended to read as follows:

Short subdivision: inside the Urban Growth Area, a division or redivision of land into nine or fewer lots, tracts, parcels, or sites for the purpose of the sale, lease, or transfer of ownership. Outside the Urban Growth Area, a division or redivision of land into four or fewer lots, tracts, parcels, or sites for the purpose of sale, lease, or transfer of ownership. A microsubdivision is a type of short subdivision.

SECTION 37. Ordinance 13694, Section 42, as amended, and K.C.C. 19A.08.070 are hereby amended to read as follows:

- 2343 A. A property owner may request that the department determine whether a lot
2344 was legally created. The property owner shall demonstrate to the satisfaction of the
2345 department that a lot was created in compliance with applicable state and local land
2346 segregation statutes or codes in effect at the time the lot was created.
- 2347 B. A lot shall be recognized as a legal lot:
- 2348 1. If before October 1, 1972, it was:
- 2349 a. conveyed as an individually described parcel to separate, noncontiguous
2350 ownerships through a fee simple transfer or purchase; or
- 2351 b. recognized as a separate tax lot by the county assessor;
- 2352 2. If created by a recorded subdivision before June 9, 1937, and it was served by
2353 one of the following before January 1, 2000:
- 2354 a. an approved sewage disposal; or
- 2355 b. an approved water system; ~~((or~~
- 2356 ~~e. a road that was:~~

- 2363 3. If created by an approved short subdivision, including engineers subdivisions;
- 2364 4. If created by a recorded subdivision on or after June 9, 1937; or

5. If created through the following alternative means of lot segregation provided for by state statute or county code:

- a. at a size five acres or greater, created by a record of survey recorded between August 11, 1969, and October 1, 1972, and that did not contain a dedication;
- b. at a size twenty acres or greater, created by a record of survey recorded before January 1, 2000, and not subsequently merged into a larger lot;
- c. at a size forty acres or greater created through a larger lot segregation made in accordance with RCW 58.18.010, approved by King County and not subsequently merged into a larger lot. Within the F zone, each lot ~~((of))~~ or tract shall be of a size that meets the minimum lot size requirements of ~~((K.C.C. 21A.12.040.A))~~ section 228 of this ordinance;

d. through testamentary provisions or the laws of descent after August 10, 1969; or

e. as a result of deeding land to a public body after April 3, 1977.

C. In requesting a determination, the property owner shall submit evidence, deemed acceptable to the department, such as:

1. Recorded subdivisions or division of land into four lots or less;
2. King County documents indicating approval of a short subdivision;
3. Recorded deeds or contracts describing the lot or lots either individually or as part of a conjunctive legal description ~~((e.g.)),~~ such as Lot 1 and Lot 2~~((+))~~; or
4. Historic tax records or other similar evidence, describing the lot as an individual parcel. The department shall give great weight to the existence of historic tax records or tax parcels in making its determination.

Formatted: Strikethrough

D. Once the department has determined that the lot was legally created, the department shall continue to acknowledge the lot as such, unless the property owner reagggregates or merges the lot with another lot or lots in order to:

1. Create a parcel of land that would qualify as a building site, or
2. Implement a deed restriction or condition, a covenant, or court decision.

E. The department's determination shall not be construed as a guarantee that the lot constitutes a building site as defined in K.C.C. 19A.04.060. Testamentary lots created after December 31, 1999, and before January 1, 2019, are exempt from meeting the minimum lot area requirements in K.C.C. ~~Title 21A((12.030 and 21A.12.040))~~ for the applicable ~~((zoning district)) zone~~, if all other federal, state, and local statutes and regulations are met. All other testamentary lots shall be required to meet all federal, state, and local statutes and regulations, including minimum lot area requirements in K.C.C. ~~Title 21A((12.030 and 21A.12.040))~~.

Formatted: Strikethrough

F. Reaggregation of lots after January 1, 2000, shall only be the result of a deliberate action by a property owner expressly requesting the department for a permanent merger of two or more lots through a boundary line adjustment under K.C.C. chapter 19A.28.

SECTION 38. Ordinance 13694, Section 56, as amended, and K.C.C. 19A.12.020 are hereby amended to read as follows:

A. Preliminary subdivision approval shall be effective for a period of sixty months.

B. Preliminary subdivision approval shall be considered the basis upon which the applicant may proceed toward development of the subdivision and preparation of the final plat subject to all the conditions of the preliminary approval.

C. If the ~~((final plat))~~ subdivision is being developed in divisions, and final plats for all of the divisions have not been recorded within the time limits provided in this section, preliminary subdivision approval for all unrecorded divisions shall become void. The preliminary subdivision for any unrecorded divisions ~~((must again))~~ shall be submitted again to the department with a new application, subject to the fees and regulations applicable at the time of submittal.

D. ~~((An urban planned development permit, fully contained community permit, or development agreement approved pursuant to K.C.C. chapter 21A.39 may extend the preliminary approval period beyond sixty months for any preliminary subdivision approved simultaneous or subsequent to the urban planned development permit or fully contained community permit. Such extensions may be made contingent upon satisfying conditions set forth in the urban planned development permit, fully contained community permit or development agreement. In no case shall the extended preliminary approval period exceed the expected buildout time period of the urban planned development or fully contained community as provided in the urban planned development permit, fully contained community permit or development agreement. This section shall apply to any approved urban planned development permit, fully contained community permit or development agreement in existence on January 1, 2000, or approved subsequent to January 1, 2000.~~

~~E. For any plat with more than four hundred lots that is also part of the county's four to one program, the preliminary subdivision approval shall be effective for eighty-four months. This subsection applies to any preliminary plat approved by either the council or the hearing examiner, or both, on or after January 1, 1998, that relates to a four to one program with proposed plats containing more than four hundred lots.~~

~~F. For any plat with more than fifty lots where fifty percent or more of those lots will constitute affordable housing which is housing for those that have incomes of less than eighty percent of median income for King County as periodically published by the United States Department of Housing and Urban Development, or its successor agency, and at least a portion of the funding for the project has been provided by federal, state or county housing funds, the preliminary subdivision shall be effective for seventy two months. This subsection applies to any plat that has received preliminary approval on or after January 1, 1998.~~

~~G.1. For any plat that has received preliminary approval on or after December 1, 2003, the preliminary subdivision approval shall be valid for a period of eighty four months. The department may make revisions to the fee estimate issued by the department under K.C.C. 27.02.065.~~

~~2. For any plat that received preliminary approval on or after December 1, 2003, pursuant to K.C.C. 21A.55.060, the preliminary subdivision approval shall be valid for a period of one hundred and eight months. The department may make revisions to the fee estimate issued by the department under K.C.C. 27.02.065.~~

~~3. This subsection shall retroactively apply to any plat that has received preliminary approval on or after December 1, 2003. This subsection expires December~~

31, 2014.)) An applicant for a preliminary ~~plat~~ subdivision approved on or after January 1, 2015, who files a written request for extension with the director at least thirty days before the expiration of the preliminary subdivision, shall be granted a one-time, one-year extension- dated from the original preliminary approval date. Any ~~subdivision-plat~~ not recorded within the time set forth in this subsection is null and void and the applicant is required to resubmit a new preliminary subdivision for approval, subject to all current regulations.

SECTION 39. Ordinance 13694, Section 57, as amended, and K.C.C 19A.12.030 are hereby amended as follows:

A. A request to revise a ((~~plat, short plat~~)) preliminary subdivision, preliminary short subdivision, or binding site plan that has received preliminary approval shall be submitted to the department.

B. Proposed revisions to a preliminary subdivision that would result in a substantial change, as determined by the department, shall be treated as a new application for purposes of vesting and transportation concurrency and shall be reviewed as Type 3 land use decision under K.C.C. 20.20.020.

C. Proposed revisions to a preliminary short subdivision, or binding site plan that would result in a substantial change, as determined by the department, shall be treated as a new application for purposes of vesting and, where applicable, transportation concurrency, and shall be reviewed as Type 2 land use decision ((~~pursuant to~~)) under K.C.C. 20.20.020, except that a proposed revisions to a microsubdivision in the urban area shall be reviewed as a Type I land use decision under K.C.C. 20.20.020.

Formatted: Strikethrough

D. For the purpose of this section, a substantial change includes, but is not limited to:

1. The creation of additional lots;
2. The reduction or elimination of open space;
3. A change in use;
4. A change in points of ingress or egress; and
5. A change to conditions of approval ~~((of an approved preliminary subdivision, preliminary short subdivision or binding site plan))~~ that leads to environmental impacts that were not addressed in the original approval.

E. Proposed changes to a preliminary subdivision, preliminary short subdivision, or binding site plan that do not result in a substantial change, as determined by the department, shall be treated as a minor changed and may be approved administratively by the department.

F. For purposes of this section, minor changes include, but are not limited to:

1. Changes to engineering design standards necessitated by changed circumstances, such as reconfiguration or reduction of lots;
2. Changes in lot dimensions that are consistent with the underlying zone;
3. A decrease in the number of lots to be created so long as the minimum lot size and minimum density of the underlying zone is maintained;
4. Changes in timing of phased plans; and
5. Changes to engineering design that reduce construction related impacts and do not eliminate off-site improvements specifically required as a condition of preliminary approval.

SECTION 3940. Ordinance 13694, Section 80, as amended, and K.C.C.

19A.28.020 are hereby amended to read as follows:

Adjustment of boundary lines between adjacent lots shall be consistent with the following review procedures and limitations:

A. Applications for boundary line adjustments shall be reviewed as a Type 1 permit as provided in K.C.C. chapter 20.20. The review shall include examination for consistency with the King County zoning code, K.C.C. Title 21A., shoreline master program regulations, ((K.C.C. chapter 21A.25,)) applicable board of health regulations, and, for developed lots, fire and building codes;

B. A lot created through a large lot segregation shall be consistent with the underlying zoning and shall not be reduced to less than twenty acres within ten years of the large lot segregation approval unless it is subdivided in accordance with K.C.C. chapter 19A.12;

C. ~~((Any adjustment of boundary lines must be approved by the department before the transfer of property ownership between adjacent legal lots shall not occur until the boundary line adjustment is approved;))~~ Transfer of property ownership between adjacent legal lots shall not occur until the boundary line adjustment is approved;

D. A boundary line adjustment proposal shall not:

1. Result in the creation of an additional lot; ~~((or))~~

2. Result in the creation of more than one additional building site in the rural area and natural resource lands or two additional building sites in the urban area;

3. Result in a lot that does not qualify as a building site ~~((pursuant to))~~ under this title;

~~((3-))~~ 4. Relocate an entire lot from one parent parcel into another parent parcel;

2522 ~~((4.))~~ 5. Reduce the overall area in a plat or short plat devoted to open space;
2523 ~~((5.))~~ 6. Be inconsistent with any restrictions or conditions of approval for a
2524 recorded plat or short plat;
2525 ~~((6.))~~ 7. Involve lots ~~((which))~~ that do not have a common boundary; ~~((or))~~
2526 ~~((7.))~~ 8. Circumvent the subdivision or short subdivision procedures ~~((set forth))~~
2527 in this title. Factors ~~((which))~~ that indicate that the boundary line adjustment process is
2528 being used in a manner inconsistent with statutory intent include: numerous and frequent
2529 adjustments to the existing lot boundary, a proposal to move a lot or building site to a
2530 different location, and a large number of lots being proposed for a boundary line
2531 adjustment; or
2532 9. Circumvent standards or procedures in K.C.C. Title 21A;
2533 E. The elimination of lines between two or more lots shall, in all cases, ~~((shall))~~
2534 be considered a minor adjustment of boundary lines and shall not be subject to the
2535 subdivision and short subdivision provisions of this title or to K.C.C. 19A.28.030. The
2536 format and requirements of a minor adjustment under this subsection shall be specified
2537 by the department;
2538 F. Recognized lots in an approved site plan for a conditional use permit, special
2539 use permit, ~~((urban planned development,))~~ or commercial site development permit shall
2540 be considered a single site and no lot lines on the site may be altered by a boundary line
2541 adjustment to transfer density or separate lots to another property not included in the
2542 original site plan of the subject development; and
2543 G. Lots that have been subject to a boundary line adjustment process that resulted
2544 in the qualification of an additional building site shall not be ~~((permitted))~~ allowed to

utilize the boundary line adjustment process again for five years to create an additional building site.

SECTION 4041. Ordinance 18810, Section 3, and K.C.C. 20.08.037 are hereby amended to read as follows:

"Area zoning and land use study" means a study that reviews the land use designations and zoning classifications for a specified set of properties. "Area zoning and land use studies" are typically focused on a ~~((broader set of policies than a subarea study))~~ specific set of possible zoning and land use changes, and do not look at the larger range of issues that a subarea plan would include. "Area zoning and land use studies" consider specific potential changes to land use or zoning, or both, and analyze such requests based on surrounding land use and zoning, current infrastructure and potential future needs, and consistency with the King County Comprehensive Plan, ~~((e))Countywide ((p))Planning ((p))Policies,~~ and the Growth Management Act, chapter 36.70A RCW.

3348 ¹ See K.C.C. 20.44.120.C. for provisions governing procedural and substantive SEPA
3349 appeals and appeals of Type 2, 3, and 4 decisions.

3350 ² When an application for a Type 2 decision is combined with other permits requiring
3351 Type 3 or 4 land use decisions under this chapter, the examiner, not the director, makes
3352 the decision.

3353 ³ A shoreline permit, including a shoreline variance or conditional use, is appealable to
3354 the state Shorelines Hearings Board and not to the hearing examiner.

3355 ⁴ Approvals that are consistent with the Comprehensive Plan may be considered by the
3356 council at any time. Zone reclassifications that are not consistent with the

3357 Comprehensive Plan require a site-specific land use map amendment and the council's
3358 hearing and consideration shall be scheduled with the amendment to the Comprehensive
3359 Plan under K.C.C. 20.18.040 and 20.18.060.

3360 F. The definitions in K.C.C. 21A.45.020 apply to this section.

3361 SECTION 6258. Ordinance 16950, Section 10, as amended, and K.C.C.
3362 20.20.035 are hereby amended to read as follows:

3363 When an applicant is required by K.C.C. ~~((chapter))~~ Title 21A((-08)) to conduct a
3364 community meeting, under this section, before filing of an application, notice of the
3365 meeting shall be given and the meeting shall be conducted as follows:

3366 A. At least two weeks in advance, the applicant shall:

3367 1. Publish notice of the meeting in the local paper and mail and email to the
3368 department; and

3369 2. Mail notice of the meeting to all property owners within five hundred feet or
3370 at least twenty of the nearest property owners, whichever is greater, as provided in
3371 K.C.C. 21A.26.170 of any potential sites, identified by the applicant for possible
3372 development, to be discussed at the community meeting. The mailed notice shall, at a
3373 minimum, contain a brief description and purpose of the proposal, approximate location
3374 noted on an assessor map with address and parcel number, photograph or sketch of any
3375 existing or proposed structures, a statement that alternative sites proposed by ~~((citizens))~~
3376 the public can be presented at the meeting that will be considered by the applicant, a
3377 contact name and telephone number to obtain additional information, and other
3378 information deemed necessary by the department of local services, permitting division.

3379 Because the purpose of the community meeting is to promote early discussion, applicants

3380 shall ~~((to))~~ note any changes to the conceptual information presented in the mailed
3381 notices when they submit ~~((an))~~ applications;

3382 B. At the community meeting at which at least one employee of the department
3383 of local services, permitting division, assigned by the permitting division manager or
3384 designee, shall be in attendance, the applicant shall provide information relative to the
3385 proposal and any modifications proposed to existing structures or any new structures and
3386 how the proposal is compatible with the character of the surrounding neighborhood.

3387 ~~((An))~~ C. ~~((An))~~ At time of application, the applicant shall ~~((also))~~ provide ~~((with~~
3388 ~~the applicant's application))~~ a list of meeting attendees~~((s))~~ and those receiving mailed
3389 notice of the meeting and a record of the published meeting notice; and

3390 ~~((C.))~~ D. The applicant shall, in the notice required under subsection A.2. of this
3391 section, and at the community meeting required under subsection B. of this section,
3392 advise that persons interested in the applicant's proposal may monitor the progress of the
3393 permitting of that proposal by contacting the department or by viewing the department's
3394 website, the address of which will be provided in the notice and at the community
3395 meeting.

3396 SECTION 5963. Ordinance 12196, Section 16, as amended, and K.C.C.
3397 20.20.090 are hereby amended to read as follows:

3398 A. In accordance with K.C.C. 20.20.100, the department shall provide notice of:

3399 1. ~~((Hs-f))~~ Final Type 1 decisions subject to SEPA, including the threshold
3400 determination, if any;

3401 2. ~~((Hs))~~ Type 2 decisions; and

3402 3. ~~((Hs))~~ Type 3 and 4 recommendations.

B. The notice shall include the applicable procedures for either an administrative appeal to, or further consideration by, the examiner.

C. The notice shall be provided to:

1. The applicant;
2. If required by SEPA, the Department of Ecology and to agencies with jurisdiction as defined in chapter 197-11 WAC;
3. If required by chapter 90.58 RCW, the Department of Ecology and the Attorney General;
4. Any person who, before the decision or recommendation, had requested notice of the decision or recommendation from, or submitted comments to, the department; and
5. Owners of record of property in an area within five hundred feet of the site. The area shall be expanded when the department determines it is necessary to send mailed notices to at least twenty different property owners.

D. Except for decisions regarding shoreline substantial development permits, shoreline variances and shoreline conditional uses, which are only appealable to the state Shorelines Hearings Board, any administrative appeal or further consideration by the examiner is subject to K.C.C. chapter 20.22.

SECTION 6064. Ordinance 12196, Section 17, as amended, and K.C.C. 20.20.100 are hereby amended to read as follows:

A. The department shall issue its Type 3 or Type 4 recommendation to the office of the hearing examiner within one hundred fifty days from the date the department notifies the applicant that the application is complete. The periods for action by the

3426 examiner shall be governed by K.C.C. chapter 20.22 and the rules for conducting the
3427 examiner process adopted under K.C.C. 20.22.230.

3428 B.1. Except as otherwise provided in subsection B.2. of this section, the
3429 department shall issue its final decision on a Type 1 or Type 2 decision within one
3430 hundred twenty days from the date the department notified the applicant that the
3431 application is complete.

3432 2. The following periods apply to the type of land use permit indicated:

- | | | |

| a. | New residential building permits | 90 days |
| b. | Residential remodels | 40 days |
| c. | Residential appurtenances, such as decks and garages | 15 days |

| h. | Type 2 temporary use permit for a homeless encampment | 40 days |

3433 C. The following periods shall be excluded from the times specified in
3434 subsections A., B., and H. of this section:

3435 1.a. Any period during which the applicant has been requested by the
3436 department, the hearing examiner, or the council to correct plans, perform required

3437 studies, or provide additional information, including road variances and ~~((variances))~~
3438 adjustments required under K.C.C. chapter 9.04. The period shall be calculated from the
3439 date of notice to the applicant of the need for additional information until the earlier of
3440 the date the county advises the applicant that the additional information satisfies the
3441 county's request or fourteen days after the date the information has been provided. If the
3442 county determines that corrections, studies, or other information submitted by the
3443 applicant is insufficient, it shall notify the applicant of the deficiencies and the procedures
3444 of this section shall apply as if a new request for information had been made.

3445 ~~((a-))~~ b. The department shall set a reasonable deadline for the submittal of
3446 corrections, studies, or other information, and shall provide written notification to the

3449 ~~((b-))~~ c. When granting a request for a deadline extension, the department shall
3450 give consideration to the number of days between the department receiving the request
3451 for a deadline extension and the department ~~((mailing))~~ providing electronic notice of its
3452 decision regarding that request;

3453 2. The period during which an environmental impact statement is being
3454 prepared following a determination of significance under chapter 43.21C RCW, as ~~((set~~

3457 permit;

4. Any period during which an applicant fails to post the property, if required by this chapter, following the date notice is required until an affidavit of posting is provided to the department by the applicant;

5. Any time extension mutually agreed upon by the applicant and the department; and

6. Any time during which there is an outstanding fee balance that is sixty days or more past due.

D. Failure by the applicant to submit corrections, studies, or other information acceptable to the department after two written requests under subsection C. of this section shall be cause for the department to cancel or deny the application.

E. The time limits established in this section shall not apply if a proposed development:

1. Requires either: an amendment to the Comprehensive Plan or a development regulation; or modification or waiver of a development regulation as part of a demonstration project;

2. ~~((Requires approval of a new fully contained community as provided in RCW 36.70A.350, master planned resort as provided in RCW 36.70A.360, or the siting of))~~ Is an essential public facility as provided in RCW 36.70A.200; or

3. Is revised by the applicant, when the revisions will result in a substantial change in a project's review requirements, as determined by the department, in which case the period shall start from the date at which the revised project application is determined to be complete.

F. The time limits established in this section may be exceeded on more complex projects. If the department is unable to issue its Type 1 or Type 2 decision or its Type 3 or Type 4 recommendation within the time limits established by this section, it shall provide written notice of this fact to the applicant. The notice shall include a statement of reasons why the time limits have not been met and an estimated date for issuance of the notice of a Type 1 or Type 2 decision or a Type 3 or Type 4 recommendation.

G. The department shall require that all plats, short plats, building permits, clearing and grading permits, conditional use permits, special use permits, site development permits, shoreline substantial development permits, or binding site plans(~~(or urban planned development permits, or fully contained community permits)~~), issued for development activities on or within five hundred feet of designated agricultural lands, forest lands, or mineral resource lands, contain a notice that the subject property is within or near designated agricultural lands, forest lands, or mineral resource lands, on which a variety of commercial activities may occur that are not compatible with residential development for certain periods of limited duration.

H. To the greatest extent practicable, the department shall make a final determination on all permits required for a Washington state Department of Transportation project on a state highway as defined in RCW 46.04.560 with an estimated cost of less than five hundred million dollars no later than ninety days after receipt of a complete permit application.

SECTION 6+65. Ordinance 12196, Section 19, as amended, and K.C.C. 20.20.120 are hereby amended to read as follows:

The ~~((director))~~ department shall ~~((issue a citizens guide to))~~ produce guides describing permit processing, including making an appeal or participating in a hearing. The department shall make them available to the public and shall post them to its website.

B.1.a. The property is potentially zoned under K.C.C. 21A.04.170 for the reclassification being requested; or

~~((2-))~~ b. An adopted subarea plan~~((subarea study,))~~ or an area zoning and land use study specifies that the property shall be subsequently considered through an individual reclassification application; or

~~((3-))~~ 2. The requested reclassification is based on ~~((changed))~~ a substantial change in unincorporated area conditions, including but not limited to:

a. the availability of public facilities or infrastructure;

b. development patterns on surrounding parcels; or

c. the quantity or quality of critical areas, not caused by actions of the applicant; and

C. That the classification would not harm or diminish the surrounding area.

SECTION ~~6367~~. Ordinance 9544, Section 16, as amended, and K.C.C. 20.22.180 are hereby amended to read as follows:

For a proposed preliminary ~~((plat))~~ subdivision, the examiner decision shall include findings as to whether:

A. Appropriate provisions are made for the public health, safety, and general welfare and for such open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools, and school grounds, and all other relevant facts, including sidewalks and other planning features that assure safe walking conditions for students who walk to and from school; ~~((and))~~

B. The public use and interest will be served by platting the subdivision and dedication; and

C. When a subdivision uses transfer of development rights to exceed base density, the additional density does not create unmitigated impacts beyond those created by development at base density.

SECTION 6468. Ordinance 10511, Section 7, as amended, and K.C.C. 20.36.100 are hereby amended to read as follows:

A. The definitions in this section apply throughout this section, as well as in K.C.C. 20.36.040 and K.C.C. ~~((20.30.190))~~ 20.36.190, unless the context clearly requires otherwise.

B. To be eligible for open space classification under the public benefit rating system, a property ~~((must))~~ shall contain one or more qualifying open space resources and have at least five points as determined under this section. The department shall review each application and recommend award of credit for current use of the property.

Formatted: Strikethrough

In making the recommendation, the department shall utilize the point system described in subsections C. and D. of this section.

C. The following open space resources are each eligible for the points indicated:

1. Active trail linkage - fifteen or twenty-five points. "Active trail linkage" means land in private ownership through which the owner agrees to allow ~~((nonmotorized))~~ public passage for active transportation, as defined in K.C.C. 14.01.xxx ~~(the new section created by section 21-17 of this ordinance)~~, for the purpose of providing a connection between trails within the county's regional trails system and local or regional attractions or points of interest, for trail users including equestrians, pedestrians, bicyclists, and other users. "Local or regional attractions or points of interest" include other trails, parks, waterways, or other recreational and open space attractions, retail centers, arts and cultural facilities, transportation facilities, residential concentrations, or similar destinations. The linkage ~~((must))~~ shall be open to passage by the general public and the property owner shall enter into an agreement with the county consistent with applicable parks and recreation division policies to grant public access. To receive twenty-five points, the property owner shall enter into an agreement with the county regarding improvement of the trail, including trail pavement and maintenance. To receive fifteen points, the property owner shall agree to allow a soft-surface, nonpaved trail. The parks and recreation division is authorized to develop criteria for determining the highest priority linkages for which it will enter into agreements with property owners;

2. Aquifer protection area - five points. "Aquifer protection area" means property that has a plant community in which native plants are dominant and that includes an area designated as a critical aquifer recharge area under K.C.C. chapter

3570 21A.24 or applicable city critical aquifer recharge area regulations. At least fifty percent
3571 of the enrolling open space area or a minimum of one acre of open space shall be
3572 designated as a critical aquifer recharge area. If the enrolling open space area does not
3573 have a plant community in which native plants are dominant, ~~((a plan for))~~ revegetation
3574 ~~((must be submitted))~~ shall occur subject to a revegetation plan ~~((be submitted))~~ reviewed
3575 and approved by the department~~((, and must be implemented according to the plan's~~
3576 ~~proposed schedule of activities))~~;

3577 3. Buffer to public or current use classified land - three points. "Buffer to public
3578 or current use classified land" means land that has a plant community in which native
3579 plants are dominant or has other natural features, such as streams or wetlands, and that is
3580 abutting and provides a buffer to a publicly owned park, trail, or forest, to land legally
3581 required to remain in a natural state, to a state or federal highway, or to a property
3582 participating in a current use taxation program under chapters 84.33 or 84.34 RCW. The
3583 buffer ~~((must))~~ shall be at least fifty feet long and fifty feet in wide. Public roads may
3584 separate the public land, or land in private ownership classified under chapters 84.33 or
3585 84.34 RCW, from the buffering land, if the entire buffer is at least as wide and long as the
3586 adjacent section of the road easement. Landscaping or other nonnative vegetation may
3587 not separate the public land or land enrolled under chapters 84.33 or 84.34 RCW from the
3588 native vegetation buffer. The department may grant an exception to the native vegetation
3589 requirement for property along parkways with historic designation, upon review and
3590 recommendation of the historic preservation officer of King County or the local
3591 jurisdiction in which the property is located. Eligibility for this exception does not
3592 extend to a property where plantings are required or existing plant communities are

3593 protected under local zoning codes, development mitigation requirements, or other local
3594 regulations;

3595 4. Ecological enhancement land – eighteen points. "Ecological enhancement
3596 land" means open space lands undergoing recovery of significantly degraded or lost
3597 ecological function or processes. The following requirements shall be met:

3598 a. A jurisdiction, natural resource agency, or appropriate organization has
3599 committed to sponsoring the ecological enhancement project, with secured funding in
3600 place before the application's public hearing;

3601 b. The ecological enhancement project ~~((must))~~ shall include removing
3602 significant human-made structures, alterations, or impediments such as shoreline
3603 armoring, roads, culverts, and wetland fill that are detrimental to significant wildlife or
3604 salmonid habitat. The intent of the removal ~~((must))~~ shall be to reestablish natural
3605 function or processes to the project area;

3606 c. The owner is responsible for providing and implementing an ecological
3607 enhancement plan for the proposed project. The approved enhancement plan ~~((must))~~
3608 shall include at least a statement of purpose, detailed description of work to be done, site
3609 map of the project area, and specific timeline for the enhancement activities to be
3610 completed; ~~((and must be approved))~~. The enhancement plan is subject to approval by
3611 the department; and

3612 d. The owner shall annually provide to the department a monitoring report
3613 detailing the enhancement efforts' success for five years following enrollment. The
3614 owner shall also provide any additional monitoring reports required by K.C.C. 20.36.190.
3615 The monitoring report ~~((must))~~ shall describe the progress and success of the

enhancement project and ~~((must))~~ shall include photographs to document the success.

Land receiving credit for this category may not receive credit for the rural stewardship land or resource restoration categories;

5. Equestrian-pedestrian-bicycle trail linkage - thirty-five points. "Equestrian-pedestrian-bicycle trail linkage" means land in private ownership that the property owner allows the public to use as an off-road trail linkage for equestrian, pedestrian, or other ~~((nonmotorized))~~ active transportation, as defined in K.C.C. 14.01.xxx (the new section created by section 24-17 of this ordinance), uses, or that provides a trail link from a public right-of-way to a trail system. Use of motorized vehicles is prohibited on trails receiving a tax reduction for this category, except for maintenance or for medical, public safety, or police emergencies. Public access is required only on that portion of the property containing the trail. The landowner may impose reasonable restrictions on access that are mutually agreed to by the landowner and the department, such as limiting use to daylight hours. To be eligible as an equestrian-pedestrian-bicycle trail linkage, the owner shall provide a trail easement to an appropriate public or private entity acceptable to the department. The easement shall be recorded with the King County recorder's office or its successor. In addition to the area covered by the trail easement, adjacent land used as pasture, barn, or stable area and any corral or paddock may be included, if an approved and implemented farm management plan is provided. Land necessary to provide a buffer from the trail to other nonequestrian uses, land that contributes to the aesthetics of the trail, such as a forest, and land set aside and marked for off road parking for trail users may also be included as land eligible for current use taxation. Those portions of private roads, driveways, or sidewalks open to the public for this purpose may

3639 also qualify. Fencing and gates are not allowed in the trail easement area, except those
3640 that are parallel to the trail or linkage;

3641 6. Farm and agricultural conservation land - five points. "Farm and agricultural
3642 conservation land" means land previously classified as farm and agricultural land under
3643 RCW 84.34.020 that no longer meets the criteria of farm and agricultural land, or
3644 traditional farmland not classified under chapter 84.34 RCW that has not been
3645 irrevocably devoted to a use inconsistent with agricultural uses and has a high potential
3646 for returning to commercial agriculture. The property ~~((must))~~ shall be used for farm and
3647 agricultural activities or have a high probability of returning to agriculture and the
3648 property owner ~~((must))~~ shall commit to returning the property to farm or agricultural
3649 activities by implementing a farm management plan. An applicant ~~((must))~~ shall have an
3650 approved farm management plan in accordance with K.C.C. 21A.24.051 that is
3651 acceptable to the department and that is being implemented according to its proposed
3652 schedule of activities before receiving credit for this category. Farm and agricultural
3653 activities ~~((must))~~ shall occur on at least one acre of the property. Eligible land ~~((must))~~
3654 shall be zoned to allow agricultural uses and be owned by the same owner or held under
3655 the same ownership. Land receiving credit for this category may not receive credit for
3656 the contiguous parcels under separate ownership category;

3657 7. Forest stewardship land - five points. "Forest stewardship land" means
3658 property that is managed according to an approved forest stewardship plan and that is not
3659 enrolled in the designated forestland program under chapter 84.33 RCW. The property
3660 ~~((must))~~ shall contain at least four acres of contiguous forestland, which may include land
3661 undergoing reforestation, according to the approved plan. The owner shall have and

implement a forest stewardship plan approved by the department. The forest stewardship plan may emphasize forest retention, harvesting₂ or a combination of both. Land receiving credit for this category may not receive credit for the resource restoration or rural stewardship land categories;

8. Historic landmark or archeological site: buffer to a designated site - three points. "Historic landmark or archaeological site: buffer to a designated site" means property adjacent to land constituting or containing a designated county or local historic landmark or archeological site, as determined by King County's historic preservation officer or by a manager of a certified local government program in the jurisdiction in which the property is located. A property (~~((must))~~) shall have a plant community in which native plants are dominant and provide a significant buffer for a designated landmark or archaeological site listed on the county or other certified local government list or register of historic places or landmarks. "Significant buffer" means land and plant communities that provide physical, visual, noise₂ or other barriers and separation from adverse effects to the historic resources due to adjacent land use;

9. Historic landmark or archeological site: designated site – five points. "Historic landmark or archaeological site: designated site" means land that constitutes or contains a historic landmark designated by King County or other certified local government program in the jurisdiction in which the property is located. Historic landmarks include buildings, structures, districts₂ or sites of significance in the county's historic or prehistoric heritage, such as Native American settlements, trails, pioneer settlements, farmsteads, roads, industrial works, bridges, burial sites, prehistoric and historic archaeological sites₂ or traditional cultural properties. A property (~~((must))~~) shall

be listed on a county or other certified local government list or register of historic places or landmarks for which there is local regulatory protection. Eligible property may include property that contributes to the historic character within designated historic districts, as defined by the historic preservation officer of King County or other certified local government jurisdiction. The King County historic preservation officer shall make the determination on eligibility;

10. Historic landmark or archeological site: eligible site - three points.

"Historic landmark or archaeological site: eligible site" means land that constitutes or contains a historic property that has the potential of being designated by a certified local government jurisdiction, including buildings, structures, districts, or sites of significance in the county's historic or prehistoric heritage, such as Native American settlements, pioneer settlements, farmsteads, roads, industrial works, bridges, burial sites, prehistoric and historic archaeological sites, or traditional cultural properties. To be eligible, the historic preservation officer of King County or other certified local government program in the jurisdiction in which the property is located shall determine the property meets the jurisdiction's criteria for designation and listing on the county or other local register of historic places or landmarks for which there is local regulatory protection. Eligible property may include contributing property within designated historic districts. Property listed ~~((on))~~ in the state or national Registers of Historic Places may qualify under this category;

11. Public recreation area - five points. "Public recreation area" means land

devoted to providing active or passive recreation use or that complements or substitutes for recreation facilities characteristically provided by public agencies. Use of motorized

vehicles is prohibited, except for golf carts on golf courses, for maintenance, or for medical, public safety, or police emergencies. The facilities ~~((must))~~ shall be open to the general public or to specific public user groups, such as youth, seniors ~~((citizens))~~, or people with disabilities. A property ~~((must))~~ shall be identified by the responsible agency within whose jurisdiction the property is located as meeting the definition of public recreation area. The property owner ~~((must))~~ shall use any best practices defined in K.C.C. chapter 21A.06. If a fee is charged for use, it ~~((must))~~ shall be comparable to the fee charged by a similar public facility;

12. Rural open space - five points. "Rural open space" means an area of ten or more contiguous acres of open space located outside of the ~~((u))~~Urban ~~((g))~~Growth ~~((a))~~Area as identified in the King County Comprehensive Plan that:

- a. has a plant community in which native plants are dominant; or
- b. is former open farmland, woodlots, scrublands, or other lands that are in the process of being replanted with native vegetation and for which the property owner is implementing an approved farm management, ecological enhancement, forest stewardship, rural stewardship, or resource restoration plan acceptable to the department;

13. Rural stewardship land - five points. "Rural stewardship land" means land zoned RA (rural area), A (agricultural), or F (forest), that has an implemented rural stewardship plan under K.C.C. chapter 21A.24 acceptable to the department. On RA-zoned properties, the approved rural stewardship plan ~~((must))~~ shall meet the goals and standards of K.C.C. 21A.24.055. On A- and F-zoned properties, credit for this category is allowed if the plan meets the goals of K.C.C. 21A.24.055. A rural stewardship plan includes, but is not limited to, identification of critical areas, location of structures and

3731 significant features, site-specific best management practices, a schedule for
3732 implementation₂ and a plan for monitoring as provided in K.C.C. 21A.24.055. To be
3733 eligible as rural stewardship land, the open space ~~((must))~~ shall be at least one acre and
3734 feature a plant community in which native plants are dominant or be in the process of
3735 native vegetation restoration, reforestation₂ or enhancement. Land receiving credit for
3736 this category may not receive credit for the ecological enhancement land, resource
3737 restoration₂ or forest stewardship land categories;

3738 14. Scenic resource, viewpoint or view corridor – five points.

3739 a. "Scenic resource" means an area of natural or recognized cultural features
3740 visually significant to the aesthetic character of the county. The site ~~((must))~~ shall be
3741 significant to the identity of the local area, ~~((must))~~ be visible to a significant number of
3742 the general public from public rights-of-way, ~~((must))~~ be of sufficient size to
3743 substantially preserve the scenic resource value₂ and ~~((must))~~ enroll at least ten acres of
3744 open space.

3745 b. A "viewpoint" means a property that provides a view of an area visually
3746 significant to the aesthetic character of the county. A site ~~((must))~~ shall provide a view of
3747 a scenic natural or recognized cultural resource in King County or other visually
3748 significant area, ~~((must))~~ allow unlimited public access₂ and ~~((must))~~ be identified by a
3749 permanent sign readily visible from a road or other public right-of-way.

3750 c. A "view corridor" means a property that contributes to the aesthetics of a
3751 recognized view corridor critical to maintaining a public view of a visually significant
3752 scenic natural or recognized cultural resource. The site ~~((must))~~ shall contain at least one
3753 acre of open space that contributes to a view corridor visible to the public and that

3754 provides views of a scenic natural resource area or recognized cultural resource
3755 significant to the local area. The ~~((King County historic preservation officer or officer of~~
3756 ~~another certified local government program in the jurisdiction in which the property is~~
3757 ~~located must find the recognized))~~ site shall have a significant cultural areas ~~((to be~~
3758 ~~significant and must find that the site))~~ and contain((s)) significant inventoried or
3759 designated historic properties, as determined by the King County historic preservation
3760 officer or officer of another certified local government program in the jurisdiction in
3761 which the property is located in. Eligibility is subject to determination by the department
3762 or applicable jurisdiction;

3763 15. Significant plant or ecological site - five points. "Significant plant or
3764 ecological site" means an area that meets the criteria for Element Occurrence established
3765 under the Washington Natural Heritage Program authorized by chapter 79.70 RCW. An
3766 Element Occurrence is a particular, on-the-ground observation of a rare species or
3767 ecosystem. An eligible site ~~((must))~~ shall be listed as an Element Occurrence by the
3768 Washington Natural Heritage Program or be identified as a property that meets the
3769 criteria for an Element Occurrence. The identification ~~((must))~~ shall be confirmed by a
3770 qualified expert acceptable to the department in order to qualify. The department shall
3771 notify the Washington Natural Heritage Program of any verified Element Occurrence on
3772 an enrolling property. Commercial nurseries, arboretums, or other maintained garden
3773 sites with native or nonnative plantings are ineligible for this category;

3774 16. Significant wildlife or salmonid habitat - five points.

3775 a. "Significant wildlife or salmonid habitat" means:

3776 (1) an area used by animal species listed as endangered, threatened, sensitive,
3777 or candidate by the Washington state Department of Fish and Wildlife or Department of
3778 Natural Resources or used by species of local significance that are listed by the King
3779 County Comprehensive Plan or a local jurisdiction;

3780 (2) an area where the species listed in subsection C.16.a.(1) of this section are
3781 potentially found with sufficient frequency for critical ecological processes, such as
3782 reproduction, nesting, rearing, wintering, feeding, or resting, to occur;

3783 (3) a site that meets the criteria for priority habitats as defined by the
3784 Washington state Department of Fish and Wildlife and that is so listed by the King
3785 County Comprehensive Plan or by the local jurisdiction in which the property is located;
3786 or

3787 (4) a site that meets criteria for a wildlife habitat conservation area as defined
3788 by the department or a local jurisdiction.

3789 b. To be eligible, the department, by its own determination or by expert
3790 determination acceptable to the department, (~~(must)~~) shall verify that qualified species are
3791 present on the property or that the land fulfills the functions described in subsection
3792 C.16.a. of this section. To receive credit for salmonid habitat, the owner shall provide a
3793 buffer at least fifteen percent greater in width than required by any applicable regulation.
3794 Property consisting mainly of disturbed or fragmented open space determined by the
3795 department as having minimal wildlife habitat significance is ineligible;

3796 17. Special animal site - three points. "Special animal site" means a site that
3797 includes a wildlife habitat network identified by the King County Comprehensive Plan or
3798 individual jurisdictions through the Growth Management Act, chapter 36.70A RCW, or a

3799 biodiversity area and corridor identified by the Washington state Department of Fish and
3800 Wildlife's priority habitats and species project as of the date of the application(~~(--The~~
3801 ~~property must be))~~ as identified by King County or local or state jurisdiction or by expert
3802 verification acceptable to the department or local jurisdiction. Property consisting mainly
3803 of disturbed or fragmented open space determined by the department to have minimal
3804 wildlife habitat significance is ineligible for this category;

3805 18. Surface water quality buffer – five, eight₂ or ten total points. "Surface water
3806 quality buffer" means an undisturbed area that has a plant community in which native
3807 plants are dominant abutting a lake, pond, stream, shoreline, wetland₂ or marine waters on
3808 or abutting the property, that provides buffers beyond that required by any applicable
3809 regulation. To receive five points, the buffer (~~((must))~~) shall be at least fifty percent wider
3810 than the buffer required by any applicable regulation. To receive eight points, the buffer
3811 (~~((must))~~) shall be at least two times the required width. To receive ten points, the buffer
3812 (~~((must))~~) shall be at least three times the required width. The qualifying buffer (~~((must))~~)
3813 shall be longer than twenty-five feet and (~~((must))~~) shall be preserved from clearing or
3814 maintenance, unless this area is part of a department-approved ecological enhancement,
3815 farm management, forest stewardship, rural stewardship₂ or resource restoration plan.
3816 Grazing use by livestock on such land is prohibited;

3817 19. Urban open space - five points.

3818 a. "Urban open space" means land located within the boundaries of a city or
3819 within the (~~((u))~~)Urban (~~((g))~~)Growth (~~((a))~~)Area that has a plant community in which native
3820 plants are dominant and that under the applicable zoning is eligible for more₂intensive

3821 development or use. The enrolling area (~~((must))~~ shall be at least one acre, or be at least
3822 one-half acre if the land meets one of the following criteria:

3823 (1) the land conserves and enhances natural or scenic resources;
3824 (2) the land protects streams or water supply;
3825 (3) the land promotes conservation of soils, wetlands, beaches, or tidal
3826 marshes;

3827 (4) the land enhances the value to the public of adjacent parks, forests,
3828 wildlife preserves, nature reservations or sanctuaries, or other open space;

3829 (5) the land enhances recreation opportunities for the general public; or

3830 (6) the land preserves visual quality along highways, roads, and streets or
3831 scenic vistas.

3832 b. Owners of noncontiguous properties that together meet the minimum
3833 acreage requirement may jointly apply under this category if each property is closer than
3834 seventy-five feet to one other property in the application and if each property contains an
3835 enrolling open space area at least as large as the minimum zoned lot size; and

3836 20. Watershed protection area - five points. "Watershed protection area" means
3837 property contributing to the forest cover that provides run-off reduction and groundwater
3838 protection. The property (~~((must))~~ shall consist of contiguous native forest or be in the
3839 process of reforestation. The enrolling forested area (~~((must))~~ shall consist of additional
3840 forest cover beyond that required by county or applicable local government regulation
3841 and (~~((must))~~ shall be at least one acre or sixty-five percent of the property acreage,
3842 whichever is greater. If reforestation or improvements to the forest health are necessary,
3843 the property owner shall provide and implement an ecological enhancement, a forest

3844 stewardship, resource restoration, or rural stewardship plan that addresses this need and is
3845 acceptable to the department.

3846 D. Property qualifying for an open space category in subsection C. of this section
3847 may receive credit for additional points as follows:

3848 1. Conservation easement or historic preservation easement - eighteen points.

3849 "Conservation easement or historic preservation easement" means land on which an
3850 easement is voluntarily placed that restricts, in perpetuity, further potential development
3851 or other uses of the property. The easement (~~((must be approved))~~) is subject to approval
3852 by the department and shall be recorded with the King County recorder's office or its
3853 successor. The easement (~~((must))~~) shall be conveyed to the county or to an organization
3854 acceptable to the department, such as a land trust or conservancy. Historic preservation
3855 easements (~~((must also be approved))~~) are subject to approval by the historic preservation
3856 officer of King County or of the local government jurisdiction in which the property is
3857 located. An easement required by zoning, subdivision conditions, or other land use
3858 regulation is not eligible unless an additional substantive easement area is provided
3859 beyond that otherwise required;

3860 2. Contiguous parcels under separate ownership - two points.

3861 a. "Contiguous parcels under separate ownership" means at least two or more
3862 parcels under different ownership where either:

3863 (1) the enrolling parcels and open space acreage abut each other without a
3864 significant human-made barrier separating them; or

3865 (2) the enrolling parcels do not abut each other, but abut a publicly owned
3866 open space, without a significant human-made barrier separating the publicly owned open
3867 space and the open space portion of the parcels seeking open space classification.

3868 b. Award of this category requires a single application by multiple owners and
3869 parcels with identical qualifying public benefit rating system resources. Only a single
3870 application fee is required.

3871 c. Contiguous parcels of land with the same qualifying public benefit rating
3872 system resources are eligible for treatment as a single parcel if open space classification
3873 is sought under the same application except as otherwise prohibited by the farm and
3874 agricultural conservation land category. Each parcel need not meet the minimum acreage
3875 requirements for a resource category so long as the total area of all enrolling land
3876 combined meets any required minimum acreage requirements. The owners of each
3877 parcel included in the application (~~((must))~~) shall agree to identical terms and conditions
3878 for enrollment in the program.

3879 d. Individual parcels or portions of parcels may be withdrawn or removed from
3880 open space classification, consistent with all applicable rules and regulations. The
3881 continued eligibility of all parcels and associated acreage remaining in open space
3882 classification accepted under the same application is dependent upon the continued
3883 qualification for a resource category or categories.

3884 e. Points are awarded for each participating owner above one owner and accrue
3885 to all owners of a single application. The withdrawal or removal of all enrolled acreage
3886 associated with an owner results in the loss of two points for each remaining owner;

3887 3. Easement and access – thirty-five points. "Easement and access" means that
3888 the property has at least one qualifying open space resource, unlimited public access or
3889 limited public access due to resource sensitivity, and a conservation easement or historic
3890 preservation easement in perpetuity in a form and with conditions acceptable to the
3891 department. ~~((To be eligible, a))~~A property ~~((must))~~ shall only be eligible in this category
3892 if it receives credit for an open space category and for the conservation easement or
3893 historic easement in perpetuity category. The owner ~~((must))~~ shall agree to allow public
3894 access to the portion of the property designated for public access in the easement. An
3895 easement required by zoning, subdivision conditions, or other land use regulation is not
3896 eligible, unless there is additional easement area beyond that required. Credit for this
3897 category may not overlap with the equestrian-pedestrian-bicycle trail linkage;

3898 4. Public access - points depend on type and frequency of access allowed.
3899 "Public access " means the general public is allowed access on an ongoing basis for uses
3900 such as recreation, education, or training. Access ~~((must))~~ shall be allowed on the portion
3901 of the property that is designated for public access. The landowner may impose
3902 reasonable restrictions on access, such as limiting use to daylight hours, agreed to by the
3903 department. No physical barriers may limit reasonable public access or negatively affect
3904 an open space resource. A property owner shall demonstrate that the property is open to
3905 public access and is used by the public. Award of public access points for historic
3906 properties is subject to approval by ((F))the historic preservation officer of King County
3907 or a certified officer of another local government jurisdiction in which the property is
3908 located ~~((must approve the award of public access points for historic properties))~~. The

property owner may be required to furnish and maintain signage according to county specifications.

a. Unlimited public access - five points. Year-round access by the general public is allowed without special arrangements with the property owner.

b. Limited public access because of resource sensitivity - five points. Access may be reasonably limited by the property owner due to the sensitive nature of the resource, with access provided only to appropriate user groups. The access allowed should generally be for an educational, scientific, or research purpose and may require special arrangements with the owner.

c. Seasonally limited public access - three points. Access by the public is allowed only for part of the year due to seasonal conditions, as mutually agreed to by the landowner and the department.

d. Environmental education access - three points. The landowner enters into an agreement with a school, with an organization with 26 U.S.C. Sec. 501(c)(3) tax status, or, with the agreement of the department, with another community organization that allows membership by the general public to provide environmental education to its members or the public at large. The department (~~(must agree)~~) shall verify that the enrolled portion of the property has value for environmental education purposes.

e. None or members-only - zero points. No public access is allowed or the access is allowed only by members of the organization using or owning the land; and

5. Resource restoration – five points. "Resource restoration" means restoration of an enrolling area of property benefiting an area in an open space resource category. Emphasis is placed on the restoration of native vegetation associated with anadromous

fish rearing habitat, riparian zones, migration corridors and wildlife, forest, stream, and wetland habitats. The owner shall provide and implement a restoration plan approved by the department. The plan may be developed in cooperation with a natural resource expert or agency. The approved restoration plan ~~((must))~~ shall, at a minimum, include a purpose statement, a description of restoration work to be done, a detailed site map of the area to be restored, a specific timeline for the restoration activities to be completed and a monitoring schedule for the restoration project's first five years. Historic resource restoration ~~((must be approved))~~ is subject to approval by the King County historic preservation officer or officer of another certified local government in the jurisdiction in which the property is located and ~~((must))~~ shall be accompanied by a long-term maintenance plan. The owner shall also provide to the department a yearly monitoring report for at least five years following enrollment in the public benefit rating system program. The report ~~((must))~~ shall describe the progress and success of the restoration project and ~~((must))~~ shall include photographs to document the success. Land receiving credit for this category may not receive credit for the ecological enhancement land, forest stewardship land, or rural stewardship land categories.

SECTION 6569. Ordinance 15137, Section 10, as amended, and K.C.C. 20.36.190 are hereby amended to read as follows:

A. ~~((The definitions in K.C.C. 20.36.100 apply to this section.~~
B.)) A property may achieve a maximum ninety-percent reduction in appraised value for that portion of the land enrolled in the public benefit rating system. A plant community where native plants are dominant that does not independently contain a qualifying open space resource can participate if it is contiguous to and provides a benefit

3955 to a portion of the property being awarded credit for a qualifying open space priority
3956 resource. The department shall evaluate the property for the presence of open space
3957 resource categories. Abutting parcels of land with the same open space resources, owned
3958 by one or more landowners, may be eligible for consideration as a single parcel if open
3959 space classification is sought under the same application; however, property pursuing
3960 credit for the farm and agricultural conservation land category, which ~~((must))~~ shall be
3961 owned by the same owner or held under the same ownership. For buffer measurements
3962 under this chapter, the width is the distance perpendicular to the edge of the resource and
3963 the length of the buffer is parallel to the resource. The entire buffer width may be
3964 averaged to qualify for a resource category.

3965 ~~((C-))~~ B. The presence or occurrence of an eligible open space resource may be
3966 verified by:

- 3967 1. Reference to a recognized source, such as:
- 3968 a. the natural heritage data base;
 - 3969 b. the state office of historic preservation;
 - 3970 c. state, national, county, or city registers of historic places;
 - 3971 d. the Washington state recreation and conservation office inventory of dry
3972 accretion beach and shoreline features;
 - 3973 e. a shoreline master program;
 - 3974 f. parks and recreation studies; or
 - 3975 g. studies by the state Department of Fish and Wildlife or Department of
3976 Natural Resources;

2. Reference to a map developed by the county or other recognized authority;
or

3. Using the best available source, such as a recognized expert in the particular
resource being reviewed.

~~((D-))~~ C. When more than one reasonable interpretation can be supported by the
text of this chapter, the department may make a determination relating to the open space
resource definitions and eligibility standards in accordance with the purpose and intent of
this chapter. The department may calculate the appropriate area of land to receive credit
for a particular priority resource to support the assessor's determination of the
accompanying tax reduction for each priority resource.

~~((E-))~~ D. Management or preservation of the open space resources is a condition
for acceptance into the program. Each open space resource ~~((must))~~ shall be maintained
in the same or better condition as it was when approved for enrollment. The property
owner shall not engage in any activity that reduces the value of the open space resource,
unless that activity is required for public safety and is conducted lawfully under
appropriate permits. As a condition of enrollment into the program, the department may
require the owner to develop a plan acceptable to the department to restore any property
whose open space resources are degraded. In addition, if an existing approved plan for
farm and agricultural conservation land, ecological enhancement land, forest stewardship
land, rural stewardship land, or resource restoration category has a management schedule
or management goals that are out of date or otherwise require change, the owner is
responsible for revising the plan. Plan revisions are subject to review and approval by
~~((F))~~the department ~~((must review and accept any plan revisions))~~.

~~((F.))~~ E. The county may base acceptance of property into the public benefit rating system on specific conditions or requirements being met, including, but not limited to, granting easements.

~~((G.))~~ F. Except as otherwise provided in this chapter, the following properties or areas are not eligible for open space classification:

1. Improvements or structures on eligible open space land;
2. Properties that do not contain a qualifying open space resource;
3. Open space areas protected by a native growth, forest retention, or other covenant that is required as part of a development process or subdivision, or required by zoning or other land use regulations; however, such an area is eligible as ecological enhancement, or forest stewardship or rural stewardship land if implementation of the associated plan provides resource improvements within the enrolling open space. Such an area is also eligible as public recreation area, equestrian-pedestrian-bicycle, or active trail linkage due to the public's use and benefit. Additionally:

a. Enrollment of at least ten percent additional open space acres, beyond that restricted or required by applicable covenant or regulation, is necessary to qualify for additional resource categories not referenced in this subsection ~~((G.))~~E.3. but not including those additional resource categories referenced in subsection ~~((G.))~~E.3.b. of this section; and

b.~~((.))~~ The minimum ten percent additional open space acres provided ~~((must be acceptable))~~ shall, to the satisfaction of the department, (and), feature a plant community where native plants are dominant or should be dominant after implementing an approved farm management, ecological enhancement, forest stewardship, resource

4023 restoration, or rural stewardship plan associated with the approved open space resource or
4024 bonus category;

4025 4. Any portion of a property dominated by or whose resource value is
4026 compromised by invasive plant species, unless the department has received a resource
4027 restoration, rural stewardship, ecological enhancement, farm management, or forest
4028 stewardship plan and determined that the plan adequately addresses the invasive plant
4029 species concern and is being implemented; and

4030 5. Homesite and other areas developed for residential or personal use, such as
4031 garden, landscaping and driveway, except for historic resources.

4032 ~~((H.))~~ G. The department may monitor the participating portion of the property to
4033 evaluate its current use and continuing compliance with the conditions of enrollment.

4034 1. Monitoring may include scheduled, physical inspections of the property and
4035 in-office review using aerial photography, mapping software, or other available
4036 technologies.

4037 2. Program staff may require an owner of enrolled property to submit a
4038 monitoring report on an annual or less frequent basis. The report ~~((must))~~ shall include a
4039 brief description of how the property still qualifies for each awarded resource category,
4040 photographs from established points on the property, and any owner observations by the
4041 owner. The owner ~~((must))~~ shall submit this report to the department by email, the
4042 program's website, or by other mutually agreed upon method. An environmental
4043 consultant need not prepare this report.

4044 3. An owner of property receiving credit for farm and agricultural conservation
4045 land, ecological enhancement land, forest stewardship land, or rural stewardship land, all

of which require a stewardship or management plan, shall annually provide a monitoring report that describes progress in implementing the plan and includes a brief description of activities taken to implement the plan and photographs from established points on the property. The owner shall submit this report to the department by email or by other mutually agreed upon method. An environmental consultant need not prepare this report.

~~((H))~~ H. Failure by the owner to meet the conditions of the approval or to maintain the uses of the property that were the basis for the original approval is grounds for the department to reevaluate the property under the public benefit rating system. If the reevaluation shows the property or a portion of the property is no longer eligible to participate in the program, the county shall take action to remove the current use classification and determine the amount of deferred taxes, interest, and penalty owed by the landowner. If the reevaluation shows the property or a portion thereof is no longer eligible as approved but that the property still qualifies for one or more public benefit rating system resource categories, then the overall credit award shall be adjusted to reflect the reevaluation. The new credit award may result in a current use assessment at a lower percentage of appraised value than was originally approved. A landowner may appeal a determination under this subsection by following K.C.C. 20.36.130.B.

SECTION 6670. Ordinance 6949, Section 7, as amended, and K.C.C. 20.44.050 are hereby amended to read as follows:

The procedures and standards for preparation of environmental impact statements and other environmental documents pursuant to WAC 197-11-400 through 197-11-460 and 197-11-600 through 197-11-640 are adopted, subject to the following:

A. Pursuant to WAC 197-11-408(2)(a), all comments on determinations of significance and scoping notices shall be in writing, except where a public meeting on EIS scoping occurs pursuant to WAC 197-11-410(1)(b).

B. Pursuant to WAC 197-11-420, 197-11-620, and 197-11-625, the county department acting as lead agency shall be responsible for preparation and content of an EIS and other environmental documents. The department shall contract with consultants as necessary for the preparation of environmental documents. The department may consider the opinion of the applicant regarding the qualifications of the consultant but the department shall retain sole authority for selecting persons or firms to author, co-author, provide special services or otherwise participate in the preparation of required environmental documents.

C. Consultants or subconsultants selected by King County to prepare environmental documents for a private development project proposal shall not: act as agents for the applicant in preparation or acquisition of associated underlying permits; have a financial interest in the proposal for which the environmental document is being prepared; or perform any work or provide any services for the applicant in connection with or related to the proposal.

D. The department shall establish and maintain one or more lists of qualified consultants who are eligible to receive contracts for preparation of environmental documents for project proposals. Separate lists may be maintained to reflect specialized qualifications or expertise. When the department requires consultant services to prepare environmental documents for project proposals, the department shall select a consultant from the lists and negotiate a contract for such services. The department director may

waive these requirements as provided for in rules adopted to implement this section.

~~((Subject to K.C.C. 20.44.145 and p))~~Pursuant to K.C.C. chapter 2.98, the department of local services shall adopt public rules that establish processes to: create and maintain a qualified consultant list; select consultants from the list; remove consultants from the list; provide a method by which applicants may request a reconsideration of selected consultants based upon costs, qualifications or timely production of the environmental document; and waive the consultant selection requirements of this chapter on any basis provided by K.C.C. chapter 2.93.

E. All costs of preparing the environment document shall be borne by the applicant. ~~((Subject to K.C.C. 20.44.145 and p))~~Pursuant to K.C.C. chapter 2.98, the department of local services shall promulgate administrative rules that establish a trust fund for consultant payment purposes, define consultant payment schedules, prescribe procedures for treating interest from deposited funds, and develop other procedures necessary to implement this chapter.

F. In the event an applicant decides to suspend or abandon the project, the applicant must provide formal written notice to the department and consultant. The applicant shall continue to be responsible for all ~~((monies))~~ monies expended by the division or consultants to the point of receipt of notification to suspend or abandon, or other obligations or penalties under the terms of any contract let for preparation of the environmental documents.

4115 that could be implemented or required; and unavoidable significant adverse impacts.
4116 Unless otherwise agreed to by the applicant, a final environmental impact statement shall
4117 be issued by the department within two hundred seventy days following the issuance of a
4118 DS for the proposal, except for public projects and nonproject actions, unless the
4119 department determines at the time of issuance of the DS that a longer period will be
4120 required because of the extraordinary size of the proposal or the scope of the environmental
4121 impacts resulting therefrom; ~~((provided that))~~ the additional time shall not exceed ninety
4122 days unless agreed to by the applicant.

C. ~~((Within the urban growth area, substantive SEPA authority to condition or deny new development proposals or other actions shall be used only in cases where specific adverse environmental impacts are not addressed by regulations as set forth below or unusual circumstances exist. In cases where the county has adopted the following regulations to systematically avoid or mitigate adverse impacts, those standards and regulations will normally constitute adequate mitigation of the impacts of new development: K.C.C. chapter 9.04, Surface Water Runoff Policy, K.C.C. chapter 9.08, Surface Water Management Program, K.C.C. chapter 9.12, Water Quality, K.C.C. chapter 14.42, King County Road Standards, K.C.C. chapter 16.82, Clearing and Grading, K.C.C. chapter 21A.12, Development Standards—Density and Dimensions, K.C.C. chapter 21A.14, Development Standards—Design Requirements, K.C.C. chapter 21A.16, Development Standards—Landscaping and Water Use, K.C.C. chapter 21A.18, Development Standards—Parking and Circulation, K.C.C. chapter 21A.20, Development Standards—Signs, K.C.C. chapter 21A.22, Development Standards—Mineral Extraction, K.C.C. chapter 21A.24, Critical Areas, K.C.C. chapter 21A.26, Development Standards—Communication Facilities, K.C.C. chapter 21A.28, Development Standards—Adequacy of Public Facilities and Services. Unusual circumstances related to a site or to a proposal,~~

as well as environmental impacts not mitigated by the regulations listed in this subsection, will be subject to site specific or project specific SEPA mitigation.

This subsection shall not apply if the county's development regulations cited in this subsection are amended after April 22, 1996, unless the amending ordinance contains a finding, supported by documentation, that the requirements for environmental analysis, protections, and mitigation measures in this chapter, provide adequate analysis of and mitigation for the specific adverse environmental impacts to which the requirements apply.

D. Outside the urban growth area, in the course of project review, including any required environmental analysis, the responsible official may determine that requirements for environmental analysis, protection, and mitigation measures in the county's development regulations or comprehensive plans adopted under chapter 36.70A RCW and in other applicable local, state, or federal laws and rules provide adequate analysis and mitigation for specific adverse environmental impacts of the project, if the following criteria are met:

1. In the course of project review, the responsible official shall identify and consider the specific probable adverse environmental impacts of the proposed action and then make a determination whether these specific impacts are adequately addressed by the development regulations. If they are not, the responsible official shall apply mitigation consistent with the applicable requirements of the comprehensive plan, subarea plan element of the comprehensive plan, or other local, state, or federal rules or laws; and

~~2. The responsible official bases or conditions its approval on compliance with these requirements or mitigation measures.~~

~~E.)~~ Any decision to approve, deny, or approve with conditions pursuant to RCW 43.21C.060 shall be contained in the responsible official's decision document. The written decision shall contain facts and conclusions based on the proposal's specific adverse environmental impacts, or lack thereof, as identified in an environmental checklist, EIS, threshold determination, other environmental document including an executive department's staff report and recommendation to a decision maker, or findings made pursuant to a public hearing authorized or required by law or ordinance. The decision document shall state the specific plan, policy, or regulation that supports the SEPA decision and, if mitigation beyond existing development regulations is required, the specific adverse environmental impacts and the reasons why additional mitigation is needed to comply with SEPA.

~~(F.)~~ D. This chapter shall not be construed as a limitation on the authority of King County to approve, deny, or condition a proposal for reasons based upon other statutes, ordinances, or regulations.

B. Upon receipt of an application for a development proposal located on or adjacent to a historic resource listed in the King County Historic Resource Inventory, the director shall follow the following procedure:

1. The development proposal application shall be circulated to the King County historic preservation officer for comment on the impact of the project on historic resources and for recommendation on mitigation. This includes all permits for alterations to historic buildings, alteration to landscape elements, new construction on the same or abutting lots, or any other action requiring a permit ((which)) that might affect the historic character of the resource. Information required for a complete permit application to be circulated to the historic preservation officer shall include:

C. Upon receipt of an application for a development proposal ((which)) that
affects a King County landmark or an historic resource that has received a preliminary
determination of significance as defined by K.C.C. 20.62.020.V., the application

SECTION 7570. Ordinance 10870, Section 17, as amended, and K.C.C.

21A.02.070 are hereby amended to read as follows:

A. All references to the Standard Industrial Classification (SIC) are to the titles
and descriptions found in the Standard Industrial Classification Manual, 1987 edition,
prepared by United States Office of Management and Budget, which is hereby adopted
by reference. The ((SIC)) is used, with modifications to suit the purposes of this
title, to list and define land uses authorized to be located in the various zones consistent
with the ((comprehensive plan)) land use map.

B. The SIC categorizes each land use under a general two-digit major group number, or under a more specific three- or four-digit industry group or industry number. A use shown on a land use table with a two-digit number includes all uses listed in the SIC for that major group. A use shown with a three-digit or four-digit number includes only the uses listed in the SIC number for that industry group or industry.

C. An asterisk ~~(())~~, shown as "*"(())" in the SIC number column of a land use table means that the SIC definition for the specific land use identified has been modified by this title. The definition may include one or more SIC ~~((subclassification))~~ numbers, or may define the use without reference to the SIC.

D. The ~~((D))~~ director shall determine whether a proposed land use not specifically listed in a land use table or specifically included within a SIC ~~((classification))~~ number is allowed in a zone. The director's determination shall be based on whether ~~((or not))~~ permitting the proposed use in a particular zone is consistent with the purposes of this title and the zone's purpose ~~((as set forth))~~ established in K.C.C. chapter 21A.04, by considering the following factors:

1. The physical characteristics of the use and its supporting structures, including but not limited to scale, traffic, and other impacts, and hours of operation;

2. Whether ~~((or not))~~ the use complements or is compatible with other uses ~~((permitted))~~ allowed in the zone; and

3. The SIC ~~((classification))~~ number, if any, assigned to the business or other entity that will carry on the primary activities of the proposed use.

E. If a proposed land use subject to subsection D. of this section is an essential public facility under the Growth Management Act, it shall be evaluated using the special

use permit process ~~and consistent with the Growth Management Act, the King County~~
~~Countywide Planning Policies, and the King County Comprehensive Plan.~~

SECTION 7176. Ordinance 10870, Section 27, as amended, and K.C.C.

21A.04.060 are hereby amended to read as follows:

A. The purpose of the rural zone (RA) is to provide for an area-wide long-term rural character and to minimize land use conflicts with nearby agricultural or forest production districts or mineral extraction sites. These purposes are accomplished by:

1. Limiting residential densities and ~~((permitted))~~ allowed uses to those that are compatible with rural character and nearby resource production districts and sites and are able to be adequately supported by rural service levels;

2. Allowing small-scale farming and forestry activities and tourism and recreation uses that can be supported by rural service levels and that are compatible with rural character;

3. Increasing required setbacks to minimize conflicts with adjacent agriculture, forest, or mineral zones; and

4. Requiring tracts created through clustering ~~((development))~~ to be designated as permanent ~~((open space))~~ natural area or as permanent resource use.

B. Use of this zone is appropriate in the rural area~~((s))~~ designated by the Comprehensive Plan as follows:

1. RA-2.5 in the rural area~~((s))~~ where the predominant lot pattern is below five acres in size for lots established ~~((prior to))~~ before the adoption of the 1994 Comprehensive Plan;

4496 2. RA-5 in the rural area((s)) where ((the predominant lot pattern is five acres or
4497 greater but less than ten acres in size and the area is generally environmentally
4498 unconstrained¹));

4499 a. the land is more than a quarter mile from designated natural resource lands;

4500 b. the land is physically suitable for development with minimal critical areas;

4501 and

4502 c. ~~this-the~~ density would not harm or diminish the surrounding area, burden
4503 infrastructure, increase development pressure, or be inconsistent with the development
4504 patterns promoted by the Comprehensive Plan;

4505 3.a. RA-10 in the rural area((s)) where ((the predominant lot pattern is ten acres
4506 or greater but less than twenty acres in size. RA-10 is also applied on land that is
4507 generally environmentally constrained, as defined by county, state or federal law, to
4508 protect critical habitat and regionally significant resource areas (RSRAs). The RA-10
4509 zone is also applied to lands within one quarter mile of a forest or agricultural production
4510 district or an approved long-term mineral extraction site.));

4511 (1) the land is adjacent to or within one-quarter mile of designated natural
4512 resource lands;

4513 (2) the land contains moderate or significant critical areas; or

4514 (3) a density of one dwelling unit per five acres would harm or diminish the
4515 surrounding area, burden infrastructure, increase development pressure, or be inconsistent
4516 with the development patterns promoted by the Comprehensive Plan; and

b. On Vashon-Maury Island, RA-10 zoning shall be maintained on areas zoned RA-10 as of 1994 and on areas with a predominant lot size of ten acres or greater that are identified on the Areas Highly Susceptible to Groundwater Contamination map; and

4. RA-20 in Rural Forest Focus (~~(Districts)~~) Areas designated by the King County Comprehensive Plan. This level of density should also be considered when a larger parcel with an agricultural, forestry, or mineral land use designation is redesignated to a rural area land use designation.

SECTION 7277. Ordinance 10870, Section 28, as amended, and K.C.C. 21A.04.070 are hereby amended to read as follows:

A. B. Use of this zone is appropriate in ~~((urban areas, rural towns or in rural city expansion areas))~~ the Urban Growth Area for Cities in the Rural Area designated by the Comprehensive Plan ~~((, when such areas do not have adequate public facilities and services or are not yet needed to accommodate planned growth, do not yet have detailed land use plans for urban uses and densities, or are designated as sites for a potential urban planned development or new fully contained communities))~~.

8237 B. Development conditions for the North Highline residential density and
8238 dimensional standards.
8239 1. Density applies only to dwelling units and not to sleeping units.
8240 2. This maximum density is allowed in the following circumstances:
8241 a. for a duplex through a transfer of development right in accordance with
8242 K.C.C. 21A.08.030.B.12.; or
8243 b. for a development with nine or fewer units through a transfer of
8244 development rights;
8245 3. This maximum is allowed in the following circumstances:
8246 a. for a development with nine or fewer units on a site located within a half-
8247 mile watershed of a high-capacity or frequent transit stop as mapped by the Metro transit
8248 department; or
8249 b. through the inclusionary housing program in K.C.C. chapter 21A.48.
8250 4. The minimum density shall be calculated consistent with K.C.C. 21A.12.060
8251 and K.C.C. 21A.12.087.
8252 5. These standards may be modified under the provisions for zero-lot-line and
8253 townhouse developments in K.C.C. chapter 21A.14.
8254 6. The setback distance shall be measured along the center line of the driveway
8255 from the access point to such garage, carport, or fenced area to the street property line.
8256 7. This maximum height is allowed in the following circumstances:

a. for a building on slopes exceeding a fifteen percent finished grade;
b. through the inclusionary housing regulations in accordance with K.C.C.
chapter 21A.48; or
c. for a structure that provide one additional foot of street and interior setback
for each foot above the base height.
8.a. Portions of a nonresidential structure may exceed the base height if one
additional foot of street and interior setback is provided for each foot above the base
height.
b. Netting, fencing, and related support structures used to contain golf balls on
a golf course or golf driving range are exempt from additional interior setback
requirements. In recreation and multiuse parks, golf ball netting, fencing and related
support structures shall not exceed one-hundred twenty-five feet, unless a golf ball
trajectory study requires a higher fence.
9. The impervious surface maximum applies to each individual lot. Impervious
surface does not include access easements serving neighboring property and driveways to
the extent that they extend beyond the street setback due to location within an access
panhandle or due to the application of King County Code requirements to locate features
over which the applicant does not have control. Impervious surface area standards for:
a. individual lots in the R-4 through R-6 zones that are less than nine thousand
seventy-six square feet in area shall be subject to the applicable provisions of the nearest
comparable R-6 or R-8 zone;
b. a lot may be increased beyond the total amount allowed in this chapter
subject to approval of a conditional use permit; and

c. regional uses shall be established at the time of permit review.

10. This maximum density is allowed for developments with child daycares

under section 239 of this ordinance.

11. For cottage housing developments only:

a. the base height is twenty-five feet; and

b. buildings that have pitched roofs with a minimum slope of six over twelve
may achieve a maximum height of thirty feet at the ridge of the roof.

-12. Developments may be subject to the North Highline urban design standards
in K.C.C. chapter 21A.60, which may modify these standards.

13. The street and interior setbacks for nonresidential development, except for
fences and backstops, are as follows:

a. nonresidential uses with less than two thousand five hundred square feet of
floor area shall be subject to the setbacks of the underlying zone;

b. government and institutional uses shall be thirty feet;

c. battery energy storage systems not defined as accessory uses under K.C.C.
21A.06.015, 21A.06.020, or 21A.06.025 shall be thirty feet;

d. regional uses shall be established at the time of permit review;

e. utility facilities shall be subject to the setbacks of the underlying zone;

f. where a setback is identified for a specific land use in the applicable zone,
that setback shall apply; and

g. all other nonresidential development exceeding two thousand five hundred
square feet of floor area shall be fifteen feet.

SECTION 176. Ordinance 19687, Section 14, and K.C.C. 21A.60.060 is hereby amended to read as follows:

A. Developments shall provide landscaping consistent with K.C.C. chapter 21A.16, except as provided in this chapter and as follows:

1. New and substantially improved developments subject to the North Highline urban design standards ~~((of this chapter))~~ in K.C.C. 21A.60.060, as recodified by this ordinance, K.C.C. 21A.60.010, as recodified by this ordinance, K.C.C. 21A.60.040, as recodified by this ordinance, K.C.C. 21A.60.050, as recodified by this ordinance, K.C.C. 21A.60.070, as recodified by this ordinance, K.C.C. 21A.60.080, as recodified by this ordinance, K.C.C. 21A.60.090, as recodified by this ordinance, K.C.C. 21A.60.030, as recodified by this ordinance, K.C.C. 21A.60.100, as recodified by this ordinance, and K.C.C. 21A.60.110, as recodified by this ordinance, are required to meet a minimum GreenCenter score of 0.3. a. If multiple elements listed in subsection C. of this section occupy the same area, such as groundcover under a tree, count the full square footage or equivalent square footage of each element;

Formatted: Font: 12 pt, Strikethrough

b. Landscaping elements in the right-of-way between the property line and the roadway may be counted, but only if they are approved by the manager of the road services division of the department of local services;

c. Elements listed in subsection C. of this section that are provided to satisfy any other requirements of K.C.C. Title 21A may be counted;

d. For vegetated walls, use the square footage of the portion of the wall covered by vegetation. All vegetated wall structures shall be constructed of durable materials, provide adequate planting areas for plant health, provide irrigation for the planting areas, and provide appropriate surfaces or structures that enable plant coverage; and

e. For small shrubs, small plantings, and grass, square footage is determined by the area of the portion of a horizontal plane that lies under the element.

2. Add together all the products calculated under subsection B.1. of this section to determine the GreenCenter numerator; and

3. Divide the GreenCenter numerator by the parcel size to determine the GreenCenter score.

A.1. The required number of off-street parking spaces shall be provided in accordance with the table in this section. If a parking standard for a use is not specified in this chapter, the Director shall establish the minimum parking requirement.

2. Off-street parking ratios shall be based on the usable or net floor area, exclusive of nonoccupied areas. For the purposes of calculating parking, "nonoccupied areas" include, but are not limited to, building maintenance areas, storage areas, closets, or restrooms.

3. If the calculation for determining the number of off-street parking spaces results in a fraction, the number of off-street parking spaces shall be rounded to the nearest whole number with fractions of 0.50 or greater rounded up and fractions below 0.50 rounded down.

B. Development conditions for the Skyway-West Hill residential density and

dimensional standards.

1. Density applies only to dwelling units and not to sleeping units.

2. This maximum density is allowed in the following circumstances:

a. for a duplex through a transfer of development right in accordance with

K.C.C. 21A.08.030.B.12.;

- b. for a development with nine or fewer units through a transfer of development rights; or
- c. for a development with nine or fewer units on a site located within a half-mile walkshed of a high-capacity or frequent transit stop as mapped by the Metro transit department.
3. This maximum is allowed through the inclusionary housing program in K.C.C. chapter 21A.48.
4. The minimum density shall be calculated consistent with K.C.C. 21A.12.060 and K.C.C. 21A.12.087.
5. These standards may be modified under the provisions for zero-lot-line and townhouse developments in K.C.C. chapter 21A.14.
6. The setback distance shall be measured along the center line of the driveway from the access point to such garage, carport, or fenced area to the street property line.
7. This maximum height is allowed in the following circumstances:
- a. for a building on slopes exceeding a fifteen percent finished grade;
- b. through the inclusionary housing regulations in accordance with K.C.C. chapter 21A.48; or
- c. for a structure that provide one additional foot of street and interior setback for each foot above the base height.
- 8.a. Portions of a nonresidential structure may exceed the base height if one additional foot of street and interior setback is provided for each foot above the base height.
- b. Netting, fencing, and related support structures used to contain golf balls on

a golf course or golf driving range are exempt from additional interior setback requirements. In recreation and multiuse parks, golf ball netting, fencing and related support structures shall not exceed one-hundred twenty-five feet, unless a golf ball trajectory study requires a higher fence.

9. The impervious surface maximum applies to each individual lot. Impervious surface does not include access easements serving neighboring property and driveways to the extent that they extend beyond the street setback due to location within an access panhandle or due to the application of King County Code requirements to locate features over which the applicant does not have control. Impervious surface area standards for:

a. individual lots in the R-4 through R-6 zones that are less than nine thousand seventy-six square feet in area shall be subject to the applicable provisions of the nearest comparable R-6 or R-8 zone;

b. a lot may be increased beyond the total amount allowed in this chapter subject to approval of a conditional use permit; and

c. regional uses shall be established at the time of permit review.

10. This maximum density is allowed for developments with child daycares under section 239 of this ordinance.

11. For cottage housing developments only:

a. the base height is twenty-five feet; and

b. buildings that have pitched roofs with a minimum slope of six over twelve may achieve a maximum height of thirty feet at the ridge of the roof.

12. Reserved.

13. The street and interior setbacks for nonresidential development, except for

fences and backstops, are as follows:

a. nonresidential uses with less than two thousand five hundred square feet of floor area shall be subject to the setbacks of the underlying zone;

b. government and institutional uses shall be thirty feet;

c. battery energy storage systems not defined as accessory uses under K.C.C. 21A.06.015, 21A.06.020, or 21A.06.025 shall be thirty feet;

d. regional uses shall be established at the time of permit review;

e. utility facilities shall be subject to the setbacks of the underlying zone;

f. where a setback is identified for a specific land use in the applicable zone, that setback shall apply; and

g. all other nonresidential development exceeding two thousand five hundred square feet of floor area shall be fifteen feet.

NEW SECTION. SECTION 199.

A.1. This section establishes the density and dimensional standards for commercial and industrial zones in in Skyway-West Hill. Measurement methods are identified in K.C.C. chapter 21A.12.

42. The matrix identifies zones in the vertical columns and corresponding development standards for each zone are in the horizontal rows. The matrix cells contain the minimum dimensional requirements of the zone.

23. The parenthetical numbers in the matrix identify conditions, requirements, notes, or modifiers that correspond to the text in subsection B. of this section. A blank cell indicates that there are no specific requirements. If more than one standard appears in a cell, each standard shall be applicable to any applicable parenthetical number.

(1) for mixed-use developments; or

(2) standalone townhouses on property zoned NB and designated commercial
outside of center.

2. This maximum density is allowed in the following circumstances:

a. for a mixed-use development with nine or fewer units through a transfer of
development rights; or

b. for a mixed-use development with nine or fewer units on a site located
within a half-mile walkshed of a high-capacity or frequent transit stop as mapped by the
Metro transit department.

3. This maximum is allowed for a mixed-use development through the
inclusionary housing program in K.C.C. chapter 21A.48.

4. Gasoline service station pump islands shall be placed no closer than twenty-
five feet to street property lines.

5.a. Required on property lines adjoining RA, UR, and R zones.

b. Required on property lines adjoining R zones for industrial uses established

9002 by conditional use permits.

9003 c. Required on property lines adjoining R zones unless a standalone townhouse

9004 development on property designated commercial outside of center is adjacent to a

9005 property developed with an existing townhouse development.

9006 d. Required on property lines adjoining R zones only for a social service agency

9007 office reusing a residential structure in existence on January 1, 2010.

9008 6. Developments under the inclusionary housing program in K.C.C. chapter

9009 21A.48 shall not be subject to a floor area ratio maximum.

9010 7. This maximum height allowed only for:

9011 a. mixed-use developments; and

9012 b. standalone townhouse development in the NB zone on property designated

9013 commercial outside of center.

9015 additional foot of street and interior setback is provided for each foot above the base

9016 height.

9017 b. Netting, fencing, and related support structures used to contain golf balls on

9018 a golf course or golf driving range are exempt from additional interior setback

9019 requirements. In recreation and multiuse parks, golf ball netting, fencing, and related

9020 support structures shall not exceed one-hundred twenty-five feet, unless a golf ball

9021 trajectory study requires a higher fence.

9022 9. The impervious surface area may be increased beyond the total amount

9023 allowed in this chapter subject to approval of a conditional use permit.

9024 10. Additional floor area ratio is allowed for developments with child daycares

under section 239 of this ordinance.

11. Upper-level step backs are required for any facade facing a pedestrian street for any portion of the structure greater than forty-five feet in height. The upper-level step back shall be at least one foot for every two feet of height above forty-five feet, up to a maximum of ten feet. The first four feet of horizontal projection of decks, balconies with open railings, eaves, cornices, and gutters are allowed in required step backs.

NEW SECTION. SECTION 200.

A. The landscaping standards in K.C.C. chapter 21A.16 shall apply, except as provided in this section.

B. In the Skyway unincorporated activity center, perimeter landscaping along streets may be waived, if street trees and other pedestrian-related amenities are provided.

NEW SECTION. SECTION 201.

A. The parking standards in K.C.C. chapter 21A.18 shall apply, except as provided in this section.

B. In the CB zone of the Skyway unincorporated activity center, relief from K.C.C. 21A.18.110.A.4. that may be granted by the director shall only allow use of on-street parallel parking in front of or adjacent to the subject parcel for the parking spaces that cannot be accommodated to the rear or sides of buildings.

C. In the NB zone of the Skyway unincorporated activity center:

- a. required off-street parking and access shall be to rear or side of building; and
- b. on-street parking within two hundred and fifty feet of the site may be counted toward the off-street parking requirement for the commercial uses.

NEW SECTION. SECTION 202.

A. In the NB and O zones in Skyway-West Hill, the following design standards apply:

1. Main building entrances shall be oriented to public streets;

2. Building facades of ground floor retail, general business service, and professional office land uses that front onto a street shall incorporate windows into at least thirty percent of the building facade surface area and overhead protection above all building entryways;

3. Building shall comprise at least seventy-five percent of the total street frontage for a property and if applicable, at least seventy-five percent of the total pedestrian route frontage for a property;

4. Buildings facades shall not be comprised of uninterrupted glass curtain walls or mirrored glass;

5. For developments on Rainier Avenue S, vehicle access shall be limited to the rear access alley or rear access street where such an alley or street exists; and

6. For developments on Rainier Avenue S, the ground floor (at grade) of buildings shall be located no more than five feet from the sidewalk or sidewalk improvement, but shall not encroach on the public right-of-way. For buildings existing before August 20, 2020, with setbacks greater than five feet and that have substantial improvements made to them after August 20, 2020, a minimum five-foot-wide pedestrian walkway shall be constructed that connects the main building entrance to the public sidewalk or sidewalk improvement.

B. In the CB zone in the Skyway unincorporated activity center, the following design standards apply:

9071 1. Main building entrances shall be oriented to the public street;
9072 2. At the ground floor (at grade), buildings shall be located no more than five
9073 feet from the sidewalk or sidewalk improvement, but shall not encroach on the public
9074 right-of-way. For buildings existing before August 20, 2020, with setbacks greater than
9075 five feet and that have substantial improvements made to them after August 20, 2020, a
9076 minimum five-foot-wide pedestrian walkway shall be constructed that connects the main
9077 building entrance to the public sidewalk or sidewalk improvement;
9078 3. Building facades shall comprise at least seventy-five percent of the total street
9079 frontage for a property and if applicable, at least seventy-five percent of the total

B. Development conditions for the urban area residential density and dimensional standards.

1. Density applies only to dwelling units and not to sleeping units.

2. This maximum density is allowed in the following circumstances:

a. for a duplex through a transfer of development right in accordance with

K.C.C. 21A.08.030.B.12.;

b. for a development with nine or fewer units through a transfer of

development rights; or

c. for a development with nine or fewer units on a site located within a half-

mile walkshed of a high-capacity or frequent transit stop as mapped by the Metro transit

department.

3. This maximum is allowed through the inclusionary housing program in

K.C.C. chapter 21A.48.

4. The minimum density shall be calculated consistent with K.C.C. 21A.12.060 and K.C.C. 21A.12.087.

5. These standards may be modified under the provisions for zero-lot-line and townhouse developments in K.C.C. chapter 21A.14.

6. The setback distance shall be measured along the center line of the driveway from the access point to such garage, carport, or fenced area to the street property line.

7. This maximum height is allowed in the following circumstances:

a. for a building on slopes exceeding a fifteen percent finished grade;

b. through the inclusionary housing regulations in accordance with K.C.C. chapter 21A.48; or

c. for a structure that provide one additional foot of street and interior setback for each foot above the base height.

8.a. Portions of a nonresidential structure may exceed the base height if one additional foot of street and interior setback is provided for each foot above the base height.

b. Netting, fencing, and related support structures used to contain golf balls on a golf course or golf driving range are exempt from additional interior setback requirements. In recreation and multiuse parks, golf ball netting, fencing and related support structures shall not exceed one-hundred twenty-five feet, unless a golf ball trajectory study requires a higher fence.

9. The impervious surface maximum applies to each individual lot. Impervious surface does not include access easements serving neighboring property and driveways to

the extent that they extend beyond the street setback due to location within an access
panhandle or due to the application of King County Code requirements to locate features
over which the applicant does not have control. Impervious surface area standards for:
a. individual lots in the R-4 through R-6 zones that are less than nine thousand
seventy-six square feet in area shall be subject to the applicable provisions of the nearest
comparable R-6 or R-8 zone;
b. a lot may be increased beyond the total amount allowed in this chapter
subject to approval of a conditional use permit; and
c. regional uses shall be established at the time of permit review.

NEW SECTION. SECTION 206.

A.1. This section establishes the density and dimensional standards for commercial and industrial zones in the urban area outside of North Highline and Skyway-West Hill. Measurement methods are identified in K.C.C. chapter 21A.12.

42. The matrix identifies zones in the vertical columns and corresponding development standards for each zone are in the horizontal rows. The matrix cells contain the minimum dimensional requirements of the zone.

23. The parenthetical numbers in the matrix identify conditions, requirements, notes, or modifiers that correspond to the text in subsection B. of this section. A blank cell indicates that there are no specific requirements. If more than one standard appears in a cell, each standard shall be applicable to any applicable parenthetical number.

1.a. Density applies only to dwelling units and not to sleeping units.

b. These densities are allowed only:

(1) for mixed-use developments; or

(2) standalone townhouses on property zoned NB and designated commercial outside of center.

2. This maximum density is allowed in the following circumstances:

a. for a mixed-use development with nine or fewer units through a transfer of development rights; or

b. for a mixed-use development with nine or fewer units on a site located within a half-mile walkshed of a high-capacity or frequent transit stop as mapped by the Metro transit department.

3. This maximum is allowed for a mixed-use development through the inclusionary housing program in K.C.C. chapter 21A.48.

4. Gasoline service station pump islands shall be placed no closer than twenty-five feet to street property lines.

5.a. Required on property lines adjoining RA, UR, and R zones.

b. Required on property lines adjoining RA, UR, and R zones for industrial uses established by conditional use permits.

c. Required on property lines adjoining R zones unless a standalone townhouse

development on property designated commercial outside of center is adjacent to a
property developed with an existing townhouse development.

d. Required on property lines adjoining R zones only for a social service
agency office reusing a residential structure in existence on January 1, 2010.

6. Developments under the inclusionary housing program in K.C.C. chapter

7. This maximum height allowed only for:

a. mixed-use developments; and

b. standalone townhouse development in the NB zone on property designated
commercial outside of center.

8.a. Portions of a nonresidential structure may exceed the base height if one
additional foot of street and interior setback is provided for each foot above the base
height.

b. Netting, fencing, and related support structures used to contain golf balls on
a golf course or golf driving range are exempt from additional interior setback
requirements. In recreation and multiuse parks, golf ball netting, fencing, and related
support structures shall not exceed one-hundred twenty-five feet, unless a golf ball
trajectory study requires a higher fence.

9. The impervious surface area may be increased beyond the total amount
allowed in this chapter subject to approval of a conditional use permit.

10. Additional floor area ratio is allowed for developments with child daycares
under section 239 of this ordinance.

11. Upper-level step backs are required for any facade facing a pedestrian street

for any portion of the structure greater than forty-five feet in height. The upper-level step back shall be at least one foot for every two feet of height above forty-five feet, up to a maximum of ten feet. The first four feet of horizontal projection of decks, balconies with open railings, eaves, cornices, and gutters are allowed in required step backs.

B. Development conditions for the Snoqualmie Pass and Vashon Rural Towns residential density and dimensional standards.

1. Density applies only to dwelling units and not to sleeping units.

2. This maximum density is allowed in the following circumstances only in the Snoqualmie Pass Rural Town:

a. for a duplex through a transfer of development right in accordance with K.C.C. 21A.08.030.B.12.; or

b. for a development with nine or fewer units through a transfer of development rights.

3. This maximum may be achieved through the inclusionary housing program in K.C.C. chapter 21A.48 in the Snoqualmie Pass Rural Town.

4. The minimum density shall be calculated consistent with K.C.C. 21A.12.060 and K.C.C. 21A.12.087.

5. These standards may be modified under the provisions for zero-lot-line and townhouse developments in K.C.C. chapter 21A.14.

6. The setback distance shall be measured along the center line of the driveway from the access point to such garage, carport, or fenced area to the street property line.

7. This maximum height is allowed in the following circumstances:

a. for a building on slopes exceeding a fifteen percent finished grade;

b. through the inclusionary housing regulations in accordance with K.C.C. chapter 21A.48; or

c. for a structure that provide one additional foot of street and interior setback for each foot above the base height.

8.a. Portions of a nonresidential structure may exceed the base height if one additional foot of street and interior setback is provided for each foot above the base height.

b. Netting, fencing, and related support structures used to contain golf balls on a golf course or golf driving range are exempt from additional interior setback requirements. In recreation and multiuse parks, golf ball netting, fencing and related support structures shall not exceed one-hundred twenty-five feet, unless a golf ball trajectory study requires a higher fence.

9. The impervious surface maximum applies to each individual lot. Impervious surface does not include access easements serving neighboring property and driveways to the extent that they extend beyond the street setback due to location within an access panhandle or due to the application of King County Code requirements to locate features over which the applicant does not have control. Impervious surface area standards for:

a. individual lots in the R-4 through R-6 zones that are less than nine thousand seventy-six square feet in area shall be subject to the applicable provisions of the nearest comparable R-6 or R-8 zone;

b. a lot may be increased beyond the total amount allowed in this chapter subject to approval of a conditional use permit; and

c. regional uses shall be established at the time of permit review.

10. Reserved.

11. For cottage housing developments only:

a. the base height is twenty-five feet; and

b. buildings that have pitched roofs with a minimum slope of six over twelve

may achieve a maximum height of thirty feet at the ridge of the roof.

12.a. Lots smaller than one-half acre shall comply with the standards of the nearest comparable R-4 through R-8 zone.

b. Lots that are one-half acre or larger shall have a maximum impervious surface area of at least ten thousand square feet.

c. Lots over one acre may have an additional five percent for buildings related to agricultural or forestry practices.

d. Lots between one-half acre and two acres may have an additional ten percent for structures that are determined to be medically necessary consistent with K.C.C. 21A.32.170.

13. The street and interior setbacks for nonresidential development, except for fences and backstops, are as follows:

a. nonresidential uses with less than two thousand five hundred square feet of floor area shall be subject to the setbacks of the underlying zone;

b. government and institutional uses shall be thirty feet;

c. battery energy storage systems not defined as accessory uses under K.C.C. 21A.06.015, 21A.06.020, or 21A.06.025 shall be thirty feet;

d. regional uses shall be established at the time of permit review;

e. utility facilities shall be subject to the setbacks of the underlying zone;

f. where a setback is identified for a specific land use in the applicable zone, that setback shall apply; and

g. all other nonresidential development exceeding two thousand five hundred square feet of floor area shall be fifteen feet.

14.a. Clustering in accordance with K.C.C. 21A.14.040 shall be required for subdivisions and short subdivisions in the R-1 zone if the property is located within or contains one or more of the following:

- (1) alluvial fan hazard areas;
- (2) critical aquifer recharge area;
- (3) moderate or severe coal mine hazard areas;
- (4) flood hazard areas;
- (5) landslide hazard areas;
- (6) the riparian area of a type S or F aquatic area;
- (7) steep slope hazard area;
- (8) category I or II wetlands or their buffers;
- (9) existing or planned public parks or trails, or connections to such facilities;

or

- (10) an urban separator or wildlife habitat network designated by the Comprehensive Plan.

b. The development shall be clustered away from critical areas or the axis of designated corridors such as urban separators or the wildlife habitat network to the extent possible and the natural area shall be placed in a separate tract. Natural area tracts shall be permanent and shall be dedicated to a homeowners association or other suitable organization, as determined by the director, and meet the requirements in K.C.C. 21A.14.040. On-site critical area and buffers and designated urban separators shall be placed within the natural area tract to the extent possible. Passive recreation, with no development of recreational facilities, and natural-surface pedestrian and equestrian trails

are acceptable uses within the natural area tract.

15. Height and setback requirements shall not apply to regional transit authority facilities.

16. Lots smaller than fifteen thousand square feet shall comply with standards of the R-4 zone.

17. Properties in the Vashon Town Core, as adopted in the Vashon-Maury Island Community Service Area Subarea Plan in Attachment H to this ordinance, shall have a maximum height limit of three floors. Floors above the second floor shall be step back an additional ten feet from the street property line in this section.

NEW SECTION. SECTION 213.

A.1. This section establishes the density and dimensional standards for commercial and industrial zones in the Snoqualmie Pass and Vashon Rural Towns. Measurement methods are identified in K.C.C. chapter 21A.12.

22. The matrix identifies zones in the vertical columns and corresponding development standards for each zone are in the horizontal rows. The matrix cells contain the minimum dimensional requirements of the zone.

23. The parenthetical numbers in the matrix identify conditions, requirements, notes, or modifiers that correspond to the text in subsection B. of this section. A blank cell indicates that there are no specific requirements. If more than one standard appears in a cell, each standard shall be applicable to any applicable parenthetical number.

B. Development conditions for the Fall City residential and commercial density and dimensional standards.

1.a. Density applies only to dwelling units and not to sleeping units.

b. These densities are allowed only for mixed-use developments.

2. This maximum density may be achieved when at least ten percent of the total dwelling units are affordable to households at or below eighty percent AMI for ownership or sixty percent AMI for rental.

3. Reserved.

4. Gasoline service station pump islands shall be placed no closer than twenty-five feet to street property lines.

5. Required on property lines adjoining R zones.

6. The setback distance shall be measured along the center line of the driveway from the access point to such garage, carport, or fenced area to the street property line.

7.a. Buildings are limited to two floors, plus an optional basement;

b. The elevation of the ground floor may be elevated a maximum of six feet above the average grade of the site along the front facade of the building;

c. If the ground floor is designed to accommodate nonresidential uses, the elevation of the ground floor should be placed near the elevation of the sidewalk to minimize the need for stairs and ramps; and

d. If the ground floor is designed to accommodate nonresidential space, the height of the ceiling, as measured from finished floor, shall be no more than eighteen feet.

8. This maximum height is only for:

a. buildings with pitched roofs with a minimum slope of six over twelve; or

b. duplexes and houseplexes within two-hundred and fifty feet of the CB zone.

9.a. The impervious surface maximum applies to each individual lot. Impervious surface does not include access easements serving neighboring property and driveways to the extent that they extend beyond the street setback due to location within an access panhandle or due to the application of King County Code requirements to locate features over which the applicant does not have control. Impervious surface area standards for a lot with a detached garage set back further from the street than the footprint of the residence may be increased five percent for driveway access; and

b. A lot may be increased beyond the total amount allowed in this chapter subject to approval of a conditional use permit.

10. Reserved.

B. Development conditions for the rural area and natural resource lands density and dimensional standards

1. Density applies only to dwelling units and not to sleeping units.

2. For sites with a building listed in the National Register of Historic Places or

designated as a King County landmark in accordance with K.C.C. 20.62.070, dwelling
units in excess of the base density may be allowed if all dwelling units are:

- a. located within the historic building; and
- b. limited to a maximum of five, subject to approval by the historic
preservation officer and, where required, review and approval by the landmarks
commission in accordance with K.C.C. 20.62.080.

3. This density may only be achieved on RA-2.5 zoned parcels receiving density
from rural forest focus areas through a transfer of development rights under K.C.C.
chapter 21A.37.

4. Reserved.

5.a. Residences shall have a setback of at least one hundred feet from any
property line adjoining A, M, or F zones or existing extractive operations. However,
residences on lots less than one hundred fifty feet in width adjoining A, M, or F zones or
existing extractive operations shall have a setback from the rear property line equal to
fifty percent of the lot width and a setback from the side property equal to twenty-five
percent of the lot width.

b. Except for residences along a property line adjoining A, M, or F zones or
existing extractive operations, lots between one acre and two and one-half acres in size
shall conform to the requirements of the R-1 zone and lots under one acre shall conform
to the requirements of the R-4 zone.

6.a. For lots between one acre and two and one-half acres in size, the setback
requirements of the R-1 zone shall apply.

b. For lots under one acre, the setback requirements of the R-4 zone shall

apply.

c. In the F zone, scaling stations shall be located thirty-five feet and residences shall be set back thirty feet from property lines.

7. Reserved.

8.a. Portions of a nonresidential structure may exceed the base height if one additional foot of street and interior setback is provided for each foot above the base height.

b. Netting, fencing, and related support structures used to contain golf balls on a golf course or golf driving range are exempt from additional interior setback requirements. In recreation and multiuse parks, golf ball netting, fencing and related support structures shall not exceed one-hundred twenty-five feet, unless a golf ball trajectory study requires a higher fence.

9. The impervious surface maximum applies to each individual lot. Impervious surface does not include access easements serving neighboring property and driveways to the extent that they extend beyond the street setback due to location within an access panhandle or due to the application of King County Code requirements to locate features over which the applicant does not have control. Impervious surface area standards for:

a. a lot may be increased beyond the total amount allowed in this chapter subject to approval of a conditional use permit; and

b. regional uses shall be established at the time of permit review.

10. Setback requirements in the mineral zone are established in K.C.C. 21A.22.060.

11. The minimum lot area does not apply to lot clustering proposals as provided

10198 in K.C.C. chapter 21A.14.

10199 12.a. Lots smaller than one-half acre shall comply with the standards of the
10200 nearest comparable R-4 through R-8 zone.

10201 b. Lots that are one-half acre or larger shall have a maximum impervious
10202 surface area of at least ten thousand square feet.

10203 c. Lots over one acre may have an additional five percent for buildings related
10204 to agricultural or forestry practices.

10205 d. Lots between one-half acre and two acres may have an additional ten
10206 percent for structures that are determined to be medically necessary consistent with
10207 K.C.C. 21A.32.170.

10208 13. The street and interior setbacks for nonresidential development, except for
10209 fences and backstops, are as follows:

10210 a. nonresidential uses shall be thirty feet;

10211 b. government and institutional uses shall be thirty feet;

10212 c. battery energy storage systems not defined as accessory uses under K.C.C.
10213 21A.06.015, 21A.06.020, or 21A.06.025 shall be thirty feet;

10214 d. regional uses shall be established at the time of permit review;

10215 e. utility facilities shall be subject to the setbacks of the underlying zone; and

10216 f. where a setback is identified for a specific land use in the applicable zone,
10217 that setback shall apply.

10218 14. Applicable only to lots containing less than one acre of lot area.

10219 Development on lots containing less than fifteen thousand square feet of lot area shall
10220 comply with the standards of the nearest comparable R-4 through R-8 zone.

15. Reserved.

16. Reserved.

17. Subdivisions and short subdivisions in R-1 and RA zones within the North Fork and Upper Issaquah Creek subbasins of the Issaquah Creek Basin, as identified in the Issaquah Creek Basin and Nonpoint Action Plan, and the portion of the Grand Ridge area of the Snoqualmie Valley/Northeast King County subarea geography that drains to Patterson Creek shall have a maximum impervious surface area of eight percent. The maximum impervious surface area for each lot shall be recorded on the face of the plat. The impervious surface of roads is excluded from the maximum impervious area. Where both lot- and plat-specific impervious surface limits apply, the more restrictive shall apply.

b. This density is allowed for a mixed-use development on a property with a designation of rural neighborhood commercial center.

2. This maximum density is allowed within existing buildings listed in the National Register of Historic Places or designated as a King County landmark, for multiunit developments.

_____ 3. Reserved.

_____ 4. Gasoline service station pump islands shall be placed no closer than twenty-five feet to street property lines.

_____ 5.a. Required on property lines adjoining RA, UR, or R zones.

_____ b. Required on property lines adjoining RA and R zones only for a social service agency office reusing a residential structure in existence on January 1, 2010.

_____ 10. Reserved.

_____ 11. Upper-level step backs are required for any facade facing a pedestrian street for any portion of the structure greater than forty-five feet in height. The upper-level step back shall be at least one foot for every two feet of height above forty-five feet, up to a maximum of ten feet. The first four feet of horizontal projection of decks, balconies with

open railings, eaves, cornices, and gutters are allowed in required step backs.

_____ ~~SECTION 477258.~~ Ordinance 10870, Section 395, as amended, and K.C.C.

21A.16.100 are hereby amended to read as follows:

The following alternative landscape options may be allowed, subject to county
approval, only if they accomplish equal or better levels of screening, or when existing
conditions on or adjacent to the site, such as significant topographic differences,

vegetation, structures, or utilities would render application of this chapter ineffective or result in scenic view obstruction:

A. The amount of required landscape area may be reduced to ensure that the total area for required landscaping, and/or the area remaining undisturbed for the purpose of wildlife habitat or corridors does not exceed ~~((15))~~ fifteen percent of the net developable area of the site. For the purpose of this subsection A., the net developable area of the site shall not include areas deemed unbuildable due to their location within sensitive areas and any associated buffers~~((:))~~;

B. The average width of the perimeter landscape strip may be reduced up to ~~((25))~~ twenty-five percent along any portion where:

1. Berms at least three feet in height or architectural barriers at least six feet in height are incorporated into the landscape design; or

2. The landscape materials are incorporated elsewhere on-site;

C. ~~((In pedestrian district overlays, street perimeter landscaping may be waived provided a site plan, consistent with the applicable adopted area zoning document, is approved that provides street trees and other pedestrian-related amenities;~~

~~D.))~~ Landscaping standards for uses located in a rural town or rural neighborhood ~~((business))~~ commercial centers designated by the ~~((e))~~ Comprehensive ~~((p))~~ Plan may be waived or modified by the director if deemed necessary to maintain the historic character of the area. Where a ~~((local or))~~ subarea plan with design guidelines has been adopted, the director shall base the landscaping modifications on the policies and guidelines of such plan~~((:))~~;

~~((F.))~~ D. When an existing structure precludes installation of the total amount of required site perimeter landscaping, such landscaping material shall be incorporated on another portion of the site~~((:))~~;

~~((F.))~~ E. Single-stemmed deciduous tree species that cannot generally be planted and established in larger sizes may have a caliper of less than 1.5 inches; ~~((and))~~

~~((G.))~~ F. The number of trees and shrubs to be provided in required perimeter and parking area landscaping may be reduced up to ~~((25))~~ twenty-five percent when a development uses landscaping materials consisting of species typically associated with the Puget Sound Basin in the following proportions:

1. Seventy-five percent of groundcover and shrubs~~((:))~~; and
2. Fifty percent of trees~~((:))~~;

~~((H.))~~ G. The department shall, ~~((pursuant to))~~ in accordance with K.C.C. chapter 2.98, develop and maintain an advisory listing of trees recommended for new plantings. Such list shall describe their general characteristics and suitability, and provide guidelines for their inclusion within required landscape areas; and

H. Crops may be planted in place of up to twenty-five percent of required Type II or Type III landscaping in a commercial, residential, or institutional development site.

SECTION 178259. Ordinance 10870, Section 406, as amended, and K.C.C. 21A.18.020 are hereby amended to read as follows:

A. Before an occupancy permit may be granted for any new or enlarged building or for a change of use in any existing building, the use shall be required to meet the requirements of this chapter. In addition, K.C.C. 21A.18.110~~((:))~~I. and J. establish

11557 residential parking limitations applicable to existing~~((, as well as))~~ and new~~((,))~~
11558 residential uses.

11559 B. If this chapter does not specify a parking requirement for a land use, the
11560 director shall establish the minimum requirement based on a study of anticipated parking
11561 demand. Transportation demand management actions taken at the site shall be considered
11562 in determining anticipated demand. If the site is located in an unincorporated activity
11563 center or community business center, the minimum requirement shall be set at a level less
11564 than the anticipated demand, but at no less than seventy-five percent of the anticipated
11565 demand. In the study, the applicant shall provide sufficient information to demonstrate
11566 that the parking demand for a specific land use will be satisfied. Parking studies shall be
11567 prepared by a professional engineer with expertise in traffic and parking analyses, or an
11568 equally qualified individual as authorized by the director.

11569 C. If the required amount of off-street parking has been proposed to be provided
11570 off-site, the applicant shall provide written contracts with affected landowners showing
11571 that required off-street parking shall be provided in a manner consistent with this chapter.
11572 The contracts shall be reviewed by the director for compliance with this chapter, and if
11573 approved, the contracts shall be recorded with the records and licensing services division
11574 as a deed restriction on the title to all applicable properties. These deed restrictions may
11575 not be revoked or modified without authorization by the director.

11576 D. Upon request from the ~~((proponent of any use subject to the this chapter))~~
11577 applicant, the director may waive or modify the requirements of this chapter for uses
11578 located in a rural town, rural neighborhood commercial center, any commercial zone
11579 located in ~~((a))~~ the rural area geography or natural resource ~~((production district))~~ lands

Formatted: Strikethrough

~~((designated by the Comprehensive Plan))~~ lands, or any agricultural product production, processing or sales use allowed in the A or F zones; ~~((the director may waive or modify this chapter))~~, in order to protect or enhance the historic character of the area, to reduce the need for pavement or other impervious surfaces, to recognize the seasonal nature of any such activity, or to minimize the conversion of agriculturally productive soils. Where a ~~((neighborhood or))~~ subarea plan with design guidelines that includes the subject property has been adopted, the director shall base allowable waivers or modifications on the policies and guidelines in such a plan.

SECTION 179260. Ordinance 10870, Section 407, as amended, and K.C.C. 21A.18.030 are hereby amended to read as follows:

If a parking ratio is not specified in K.C.C. chapters 21A.xx, 21A.xx, 21A.xx, 21A.xx, 21A.xx, or 21A.xx (the chapters created by sections 170, 195, 203, 209, 217, and 224 of this ordinance), special district overlay, or property-specific development conditions, parking shall be provided using the table in subsection A.4. of this section.

2. Off-street parking ratios ((expressed as number of spaces per square foot means)) shall be based on the usable or net ((square footage of)) floor area, exclusive of ((non-public)) non-occupied areas. ((Non-public)) For the purposes of this section, "non-occupied areas" include, but are not limited to, building maintenance areas, storage areas, closets, or restrooms.

3. If the ~~((formula))~~ calculation for determining the number of off-street parking spaces results in a fraction, the number of off-street parking spaces shall be rounded to the nearest whole number with fractions of 0.50 or greater ~~((rounding))~~ rounded up and fractions below 0.50 ~~((rounding))~~ rounded down.

4. Minimum Required Parking Spaces.

12100 b. fifty feet from any other zoned property, except when adjacent to another
12101 use regulated under this chapter; and

12130 SECTION 269. Ordinance 11621, Section 53, as amended, and K.C.C.

12131 21A.24.386 are hereby amended to read as follows:

12132 The following standards apply to development proposals and alterations on sites
12133 containing wildlife habitat network:

12134 A. Unless allowed as an alteration exception under K.C.C. 21A.24.070, only the
12135 alterations identified in K.C.C. 21A.24.045 are allowed in the wildlife habitat network;

12136 B. The wildlife habitat network is sited to meet the following conditions:

12137 1. The network forms one contiguous tract or setback area that enters and exits
12138 the property where the network crosses the property boundary;

12139 2. To the maximum extent practical, the network maintains a width of three-
12140 hundred feet. The network width shall not be less than one-hundred-fifty feet at any
12141 point; and

_____ 3. The network is contiguous with and includes critical areas and their buffers;

_____ 4. To the maximum extent practical, the network connects isolated critical areas
or habitat; and

_____ 5. To the maximum extent practical, the network connects with wildlife habitat
network segments, open space tracts or wooded areas on adjacent properties, if present;

_____ C. The wildlife habitat network tract must be permanently marked in accordance
with this chapter;

_____ D. An applicant proposing recreation, forestry or any other use compatible with
preserving and enhancing the habitat value of the wildlife habitat network located within
the site must have an approved management plan. The applicant shall include and record
the approved management plan for a binding site plan or subdivision with the covenants,
conditions, and restrictions (CCRs), if any. Clearing within the wildlife habitat network
in a tract or tracts is limited to that allowed by an approved management plan;

_____ E. If the wildlife habitat network is contained in a setback area, a management
plan is not required. Clearing is not allowed within a wildlife habitat network within a
setback area on individual lots, unless the property owner has an approved management
plan;

_____ F. In urban planned developments, fully contained communities, binding site
plans, subdivisions and short subdivisions a homeowners association or other entity
capable of long term maintenance and operation shall monitor and assure compliance
with any approved management plan;

~~If a property owner is unable to subdivide an RA((-))-zoned parcel twenty acres or smaller at the density allowed under ((K.C.C. 21A.12.030)) this title after application of the requirements of this chapter, the director may approve modifications to requirements for critical area buffers if:~~

Formatted: Strikethrough

~~A. The applicant demonstrates that after the use of all provisions of this title, including but not limited to, clustering and buffer averaging, reduction in critical area buffers required by this chapter is necessary to achieve the density allowed under ((K.C.C. 21A.12.030)) this title;~~

~~B. To the maximum extent practical, the subdivision or short subdivision design has the least adverse impact on the critical area and critical area buffer;~~

~~C. The modification does not pose an unreasonable threat to the public health, safety, or welfare on or off the development proposal site and is consistent with the general purposes of this chapter and the public interest; and~~

D. The applicant provides mitigation to compensate for the adverse impacts to critical areas and buffers resulting from any modification to critical area buffers approved under this section.

SECTION ~~186271~~. Ordinance 3688, Section 303 and K.C.C. 21A.25.050 are hereby amended to read as follows:

A. The requirements of the shoreline master program apply to all uses and development occurring within the shoreline jurisdiction. The King County shoreline jurisdiction consists of shorelines, shorelines of statewide significance, and shorelands as defined in RCW 90.58.030 and K.C.C. chapter 21A.06, and the one-hundred-year floodplain.

B. The shoreline jurisdiction does not include Indian tribal reservation lands and lands held in trust by the federal government for tribes. Nothing in the King County shoreline master program or action taken under that program shall affect any treaty right to which the United States is a party.

C. The lakes and segments of rivers and streams constituting the King County shoreline jurisdiction are set forth in Attachment H to Ordinance 19146. The King County shoreline jurisdiction is shown on a map adopted in chapter 6 of the King County Comprehensive Plan. If there is a discrepancy between the map and the criteria established in subsection A. of this section, the criteria shall constitute the official King County shoreline jurisdiction. The county shall update the shoreline master program to reflect the new designation within three years of the discovery of the discrepancy.

NEW SECTION. SECTION ~~187272~~. There is hereby added to K.C.C. chapter 21A.25 a new section to read as follows:

When a critical area report is required by this chapter, the applicant shall submit a report documenting the presence, type, and function of critical areas. If the development proposal will affect only a part of the development proposal site, the department may limit the scope of the critical area report to include only that part of the site that is affected by the development proposal. The report shall document how the proposal avoids and minimizes impacts to the greatest extent feasible and document measures taken to mitigate unavoidable impacts to ensure the proposal causes no net loss of ecological function. The applicant may combine a critical area report with any studies required by other laws and regulations.

SECTION 188273. Ordinance 16958, Section 31, as amended, and K.C.C. 21A.25.100 are hereby amended to read as follows:

A. The shoreline use table in this section determines whether a specific use is allowed within each of the shoreline environments. The shoreline environment is located on the vertical column and the specific use is located on the horizontal row of the table. The specific uses are grouped by the shoreline use categories in WAC 173-26-241. The specific uses are defined by those uses in K.C.C. chapter 21A.08. The table should be interpreted as follows:

1. If the cell is blank in the box at the intersection of the column and the row, the use is prohibited in that shoreline environment;
2. If the letter "P" appears in the box at the intersection of the column and the row, the use may be allowed within the shoreline environment;

3. If the letter "C" appears in the box at the intersection of the column and the row, the use may be allowed within the shoreline environment subject to the shoreline conditional use review procedures specified in K.C.C. 21A.44.100((?));

4. If a number appears in the box at the intersection of the column and the row, the use may be allowed subject to the appropriate review process in this section, the general requirements of this chapter and the specific development conditions indicated with the corresponding number in subsection C. of this section. If more than one number appears after a letter, all numbers apply((?));

5. If more than one letter-number combination appears in the box at the intersection of the column and the row, the use is allowed in accordance with each letter-number combination((?));

6. A shoreline use may be allowed in the aquatic environment only if that shoreline use is allowed in the adjacent shoreland environment((?)); and

7. This section does not authorize a land use that is not allowed by the underlying zoning, but may add additional restrictions or conditions or prohibit specific land uses within the shoreline jurisdiction. When there is a conflict between the ((permitted)) allowed land uses in K.C.C. chapter 21A.08 and shoreline uses in this section, preference for shoreline uses shall first be given to water-dependent uses, then to water related uses, and finally to water enjoyment uses. All uses in the shoreline jurisdiction ((must)) shall comply with all relevant county code provisions and with the King County Shoreline Master Program.

C. Development conditions:

1. In the Natural environment, limited to low intensity agriculture, such as livestock use with an animal unit density of no more than one per two acres in the shoreline jurisdiction, seasonal hay mowing and related activities, and horticulture not to exceed twenty percent of the site area located within the shoreline jurisdiction.

2.a. The supporting infrastructure for aquaculture may be located landward of the aquaculture operation, subject to the limitations of K.C.C. Title 21A.

b. The aquaculture operation (~~(must)~~) shall meet the standards in K.C.C. 21A.25.110.

c. In aquatic areas adjacent to the residential shoreline environment, net pen facilities shall be located no closer than one thousand five hundred feet from the ordinary high water mark of this environment, unless the department allows a specific lesser distance that it determines is appropriate based upon a visual impact analysis. Other types of floating culture facilities may be located within one thousand five hundred feet of the ordinary high water mark if supported by a visual impact analysis.

d. In aquatic areas adjacent to the rural shoreline environment, net pen facilities shall be located no closer than one thousand five hundred feet from the ordinary high water mark of this environment, unless the department allows a specific lesser distance that it determines is appropriate based upon a visual impact analysis.

e. In the natural shoreline environment and aquatic areas adjacent to the natural shoreline environment, commercial net pens are prohibited and other aquaculture activities are limited to activities that do not require structures, facilities, or mechanized

12276 harvest practices and that will not alter the natural systems, features, or character of the
12277 site.

12278 f. Farm-raised geoduck aquaculture requires a shoreline substantial
12279 development permit if a specific project or practice causes substantial interference with
12280 normal public use of the surface waters.

12281 g. A conditional use permit is required for new commercial geoduck
12282 aquaculture only, consistent with WAC 173-26-241(3)(b). All subsequent cycles of
12283 planting and harvest shall not require a new conditional permit.

SECTION 189274. Ordinance 16985, Section 32, as amended, and K.C.C. 21A.25.110 are hereby amended to read as follows:

An applicant for an aquaculture facility ~~((must))~~ shall use the sequential measures in K.C.C. 21A.25.080. The following standards apply to aquaculture:

- A. Unless the applicant demonstrates that the substrate modification will result in

12500 an increase in native habitat diversity, aquaculture that involves little or no substrate
12501 modification shall be given preference over aquaculture that involves substantial
12502 substrate modification and the degree of proposed substrate modification shall be limited
12503 to the maximum extent practical.

12504 B. The installation of submerged structures, intertidal structures and floating
12505 structures shall be limited to the maximum extent practical.

12506 C. Aquaculture proposals that involve substantial substrate modification or
12507 sedimentation through dredging, trenching, digging, mechanical clam harvesting or other
12508 similar mechanisms, shall not be ~~((permitted))~~ allowed in areas where the proposal would
12509 adversely impact critical saltwater habitats.

12510 D. Aquaculture activities that after implementation of mitigation measures would
12511 have a significant adverse impact on natural, dynamic shoreline processes or that would
12512 result in a net loss of shoreline ecological functions shall be prohibited.

12513 E. Aquaculture should not be located in areas that will result in significant
12514 conflicts with navigation or other water-dependent uses.

12515 F. Aquaculture facilities shall be designed, located and managed to prevent the
12516 spread of diseases to native aquatic life or the spread of new nonnative species.

12517 G. Aquaculture practices shall be designed to minimize use of artificial chemical
12518 substances and shall use chemical compounds that are least persistent and have the least
12519 impact on plants and animals. Herbicides and pesticides shall be used only in
12520 conformance with state and federal standard and to the minimum extent needed for the
12521 health of the aquaculture activity.

12522 H. Noncommercial native salmon net pen facilities that involve minimal

supplemental feeding and limited use of chemicals or antibiotics as provided in subsection G. of this section may be located in King County marine waters if they are consistent with subsections S. and Y. of this section and are:

1. Native salmon net pens operated by tribes with treaty fishing rights;
2. For the limited penned cultivation of wild salmon stocks during a limited portion of their lifecycle to enhance restoration of native stocks; or
3. For rearing to adulthood in order to harvest eggs as part of a captive brood stock recovery program for endangered species.

I. If uncertainty exists regarding potential impacts of a proposed aquaculture activity and for all experimental aquaculture activities, unless otherwise provided for, the department may require baseline and periodic operational monitoring by a county-approved consultant, at the applicant's expense, and shall continue until adequate information is available to determine the success of the project and the magnitude of any probable significant adverse environmental impacts. Permits for such activities shall include specific performance measures and provisions for adjustment or termination of the project at any time if monitoring indicates significant, adverse environmental impacts that cannot be adequately mitigated.

J. Aquaculture developments approved on an experimental basis shall not exceed five acres in area, except land-based projects and anchorage for floating systems, and three years in duration. The department may issue a new permit to continue an experimental project as many times as it determines is necessary and appropriate.

K. The department may require aquaculture operations to carry liability insurance in an amount commensurate with the risk of injury or damage to any person or property

as a result of the project. Insurance requirements shall not be required to duplicate requirements of other agencies.

L. If aquaculture activities are authorized to use public facilities, such as boat launches or docks, King County may require the applicant to pay a portion of the cost of maintenance and any required improvements commensurate with the use of those facilities.

M. New aquatic species that are not previously cultivated in Washington state shall not be introduced into King County saltwaters or freshwaters without prior written approval of the Director of the Washington state Department of Fish and Wildlife and the Director of the Washington Department of Health. This prohibition does not apply to: Pacific, Olympia, Kumamoto, Belon or Virginica oysters; Manila, Butter, or Littleneck clams; or Geoduck clams.

N. Unless otherwise provided in the shoreline permit issued by the department, repeated introduction of an approved organism after harvest in the same location shall require approval by the county only at the time the initial aquaculture use permit is issued. Introduction, for purposes of this section, shall mean the placing of any aquatic organism in any area within the waters of King County regardless of whether it is a native or resident organism within the county and regardless of whether it is being transferred from within or without the waters of King County.

O. For aquaculture projects, ~~((over-water))~~ overwater structures shall be allowed only if necessary for the immediate and regular operation of the facility. ~~((Over-water))~~ Overwater structures shall be limited to the ~~((s))~~ storage of necessary tools and apparatus in containers of not more than three feet in height, as measured from the surface of the

12569 raft or dock.

12570 P. Except for the sorting or culling of the cultured organism after harvest and the
12571 washing or removal of surface materials or organisms before or after harvest, no
12572 processing of any aquaculture product shall occur in or over the water unless specifically
12573 approved by permit. All other processing and processing facilities shall be located
12574 landward of the ordinary high water mark.

12575 Q. Aquaculture wastes shall be disposed of in a manner that will ensure strict
12576 compliance with all applicable governmental waste disposal standards, including, but not
12577 limited to, the Federal Clean Water Act, Section 401, and chapter 90.48 RCW, Water
12578 Pollution Control. No garbage, wastes or debris shall be allowed to accumulate at the site
12579 of any aquaculture operation.

12580 R. Unless approved in writing by the National Marine Fisheries Service or the
12581 U.S. Fish and Wildlife Service, predator control shall not involve the killing or
12582 harassment of birds or mammals. Approved controls include, but are not limited to,
12583 double netting for seals, overhead netting for birds and three-foot high fencing or netting
12584 for otters. The use of other nonlethal, nonabusive predator control measures shall be
12585 contingent upon receipt of written approval from the National Marine Fisheries Service
12586 or the U.S. Fish and Wildlife Service, as required.

12587 S. Finfish net pens and rafts shall meet the following criteria in addition to the
12588 other applicable regulations of this section:

12589 1. Finfish net pens shall not be located in Quartermaster Harbor. For the
12590 purposes of this subsection, Quartermaster Harbor" means the area of Puget Sound north
12591 of a straight line drawn from the southwest tip of Vashon-Maury Island, which is Piner

Point, to the southeast tip of Vashon-Maury Island, which is Neill Point;

2. Finfish net pens shall meet, at a minimum, state approved administrative guidelines for the management of net pen cultures. In the event there is a conflict in requirements, the more restrictive requirement shall prevail;

3. Finfish net pens shall not occupy more than two surface acres of water area, excluding booming and anchoring requirements. Anchors that minimize disturbance to substrate, such as helical anchors, shall be employed. Such operations shall not use chemicals or antibiotics;

4. Aquaculture proposals that include new or added net pens or rafts shall not be located closer than one nautical mile to any other aquaculture facility that includes net pens or rafts. The department may authorize a lesser distance if the applicant demonstrates to the satisfaction of the department that the proposal will be consistent with the environmental and aesthetic policies and objectives of this chapter and the shoreline master program. The applicant shall demonstrate to the satisfaction of the department that the cumulative impacts of existing and proposed operations would not be contrary to the policies and regulations of the program;

5. Net cleaning activities shall be conducted on a frequent enough basis so as not to violate state water quality standards. When feasible, the cleaning of nets and other apparatus shall be accomplished by air drying, spray washing or hand washing; and

6. In the event of a significant fish kill at the site of a net pen facility, the finfish aquaculture operator shall submit a timely report to public health – Seattle & King County, environmental health division, and the department stating the cause of death and shall detail remedial actions to be implemented to prevent reoccurrence.

T. All floating and submerged aquaculture structures and facilities in navigable waters shall be marked in accordance with United States Coast Guard requirements.

U. The rights of treaty tribes to aquatic resources within their usual and accustomed areas shall be addressed through direct coordination between the applicant and the affected tribes through the permit review process.

V. Aquaculture structures and equipment shall be of sound construction and shall be so maintained. Abandoned or unsafe structures and equipment shall be removed or repaired promptly by the owner. Where any structure might constitute a potential hazard to the public in the future, the department shall require the posting of a bond commensurate with the cost of removal or repair. The department may abate an abandoned or unsafe structure in accordance with K.C.C. Title 23.

W. Aquaculture shall not be approved where it will adversely impact eelgrass and macroalgae.

X. Commercial salmon net pens and nonnative marine finfish aquaculture are prohibited.

Y. Finfish net pens shall be consistent with the applicable aquaculture regulations in this section and shall meet the following criteria and requirements:

1. Each finfish net pen application shall provide a current, peer-reviewed science review of environmental issues related to finfish net pen aquaculture;

2. The department shall only approve a finfish net pen application if the department determines the scientific review demonstrates:

a. that the project construction and activities will achieve no net loss of ecological function in a manner that has no significant adverse short-term impact and no

documented adverse long-term impact to applicable elements of the environment, including, but not limited to, habitat for native salmonids, water quality, eel grass beds, other aquaculture, other native species, the benthic community below the net pen or other environmental attributes; and

b. that the finfish net pen does not involve significant risk of cumulative adverse effects, including, but not limited to, risk of interbreeding with wild salmon or reduction of genetic fitness of wild stocks, parasite or disease transmission or other adverse effects on native species or threatened or endangered species and their habitats;

3. The department's review shall:

a. include an assessment of the risk to endangered species, non-endangered species, and other biota that could be affected by the finfish net pen; and

b. evaluate and model water quality impacts utilizing current information, technology, and assessment models. The project proponent shall be financially responsible for this water quality assessment;

4. Finfish net pens shall be designed, constructed and maintained to prevent escapement of fish in all foreseeable circumstances, including, but not limited to, tide, wind and wave events of record, floating and submerged debris, and tidal action;

5. Finfish net pens shall not be located:

a. within three hundred feet of an area containing eelgrass or a kelp bed;
b. within one thousand five hundred feet of an ordinary high water mark; or
c. in a designated Washington state Department of Natural Resources aquatic reserve;

6. A finfish net pen may not be used to mitigate the impact of a development

proposal; and

7. For finfish net pens that are not noncommercial native salmon net pens, the conditional use permit for the net pen ~~((must))~~ shall be renewed every five years. An updated scientific review shall be conducted as part of the renewal and shall include a new risk assessment and evaluation of the impact of the operation of the finfish net pen during the previous five years.

Z. Geoduck aquaculture shall be consistent with WAC 173-26-241(3)(b).

B. Public access shall:

1. Connect to other public and private public access and recreation facilities on adjacent parcels to the maximum extent practical;
2. Be sited to ensure public safety is considered; and

3. Be open to the general public;

C. Public access is not required if the applicant demonstrates to the satisfaction of the department that public access would be incompatible with the proposed use because of safety or security issues, would result in adverse impacts to the shoreline environment that cannot be mitigated or there are constitutional or other legal limitations that preclude requiring public access;

D. Public pedestrian and bicycle pathways and recreation areas constructed as part of a private development proposal should enhance access and enjoyment of the shoreline and provide features in scale with the development, such as:

1. View points;

2. Places to congregate in proportion to the scale of the development;

3. Benches and picnic tables;

4. Pathways; and

5. Connections to other public and private public access and recreation facilities; and

E. Private access from single detached residences to the shoreline shall:

SECTION 191276. Ordinance 16985, Section 39, as amended, and K.C.C.

21A.25.160 are hereby amended to read as follows:

A. The shoreline modification table in this section determines whether a specific shoreline modification is allowed within each of the shoreline environments. The shoreline environment is located on the vertical column and the specific use is located on the horizontal row of the table. The specific modifications are grouped by the shoreline modification categories in WAC 173-26-231. The table should be interpreted as follows:

1. If the cell is blank in the box at the intersection of the column and the row, the modification is prohibited in that shoreline environment;

2. If the letter "P" appears in the box at the intersection of the column and the row, the modification may be allowed within the shoreline environment;

3. If the letter "C" appears in the box at the intersection of the column and the row, the modification may be allowed within the shoreline environment subject to the shoreline conditional use review procedures specified in K.C.C. 21A.44.100;

4. If a number appears in the box at the intersection of the column and the row, the modification may be allowed subject to the appropriate review process indicated in this section and the specific development conditions indicated with the corresponding number immediately following the table, and only if the underlying zoning allows the modification. If more than one number appears at the intersection of the column and row, both numbers apply;

5. If more than one letter-number combination appears in the box at the intersection of the column and the row, the modification is allowed within that shoreline environment subject to different sets of limitations or conditions depending on the review process indicated by the letter, the specific development conditions indicated in the development condition with the corresponding number immediately following the table;

| <u>Minor Repair of Existing Pier or Dock</u> | | <u>Requirements</u> | |
|--|---|--|--|
| (1) | <u>Replacement pilings or moorage piles</u> | (a) | <u>Must use materials as described under subsection G.1.h(3) of this section</u> |
| | | (b) | <u>Must minimize the size of pilings or moorage piles and maximize the spacing between pilings to the extent allowed by site-specific engineering or design considerations</u> |
| (2) | <u>Replacement of 50 percent or more of the decking or 50</u> | <u>Must replace any solid decking surface of the pier or dock located within 30 feet of the OHWM with a grated surface material that</u> | |

| | <u>substructure</u> | <u>material</u> |

b. Other repairs to existing legally established moorage facilities where the nature of the repair is not described in this subsection shall be considered minor repairs and are permitted, consistent with all other applicable codes and regulations. If cumulative repairs of an existing pier or dock would make a proposed repair exceed the threshold for a replacement pier established in subsection G.3. of this section, the repair proposal shall be reviewed under subsection G.1. of this section for a new pier or dock, except as described in subsection G.3.b. of this section for administrative approval of alternative design;

H. Boatlifts, personal watercraft lifts, boatlift canopies, and moorage piles may be permitted as an accessory to piers and docks, subject to the following regulations:

| | | <u>d.</u> | <u>Must consist of rock or precast concrete blocks</u> |
| | | <u>e.</u> | <u>Must only be used to anchor the boatlift</u> |
| | | <u>f.</u> | <u>Minimum amount of fill is used to anchor the boatlift</u> |

I. Moorage buoys shall meet the following conditions:

1. Buoys shall not impede navigation;

2. The use of buoys for moorage of recreational and commercial vessels is

preferred over pilings or float structures;

3. Buoys shall be located and managed in a manner that minimizes impacts to

eelgrass and other aquatic vegetation;

4. Preference should be given mid-line float or all-rope line systems that have the least impact on marine vegetation;

5. New buoys that would result in a closure of local shellfish beds for future harvest shall be prohibited; and

6. No more than four buoys per acre are allowed;

J.1. A boat lift, dock, pier, moorage pile or buoy, float, launching facility, or other overwater structure or device shall meet the following setback requirements:

a. All piers, docks, boatlifts, and moorage piles for detached dwelling unit use shall comply with the following location standards:

| <u>New Pier, Dock, Boatlift, and Moorage Pile or Buoy</u> | | <u>Minimum Setback Standards</u> |
|---|--|--|
| <u>(1)</u> | <u>Side property lines</u> | <u>15 feet</u> |

b. Joint-use structures may abut property lines when the property owners sharing the moorage facility have mutually agreed to the structure location in a contract recorded with the King County division of records and elections to run with the

properties. A copy of the contract must accompany an application for a building permit or a shoreline permit.

2. An overwater structure may abut property lines for the common use of adjacent property owners

K. On marine shorelines, a new, repaired, or replaced pier, dock, or float for residential uses shall meet the following requirements:

| | | <u>d.</u> | <u>If the float is removed seasonally, the floats shall be stored above mean high/higher water/ordinary high water line at a department approved location;</u> |
| | | <u>e.</u> | <u>Flotation for the float shall be fully enclosed and contained in a shell, such as polystyrene tubs not shrink wrapped or sprayed coatings, that prevents breakup or loss of the flotation material into the water and is not readily subject to damage by ultraviolet radiation or abrasion caused by rubbing against piling or waterborne debris;</u> |

(2) For a joint-use float, a maximum of 8 piling or helical screw or "duckbill" anchors can be installed to hold the float in place. (3) If anchors and anchor lines need to be used, the anchor lines shall not rest on the substrate at any time. | | | c. | <u>Piers, docks, and platform lifts must be fully grated or contain other materials that allow a minimum of fifty percent light transmittance through the material;</u> |
| | | d. | <u>Grating openings shall be oriented lengthwise in the east-west direction to the extent practicable and the structures themselves should be oriented to maximize natural light penetration;</u> |

| <u>8.</u> | <u>Mitigation</u> | | <u>Plantings or other mitigation as provided in subsection L. of this section;</u> |

L. New, expanded, replacement, or repaired piers, docks, floats, boatlifts, boat canopies, and moorage piles or buoys shall comply with the following:

1. Existing habitat features, such as large and small woody debris and substrate material, shall be retained and new or expanded moorage facilities placed to avoid disturbance of such features;

2. Invasive weeds, such as milfoil, may be removed as provided in K.C.C. chapter 21A.24; and

3. In order to mitigate the impacts of new or expanded moorage facilities, the applicant shall plant site-appropriate emergent vegetation and a buffer of vegetation a minimum of ten feet wide along the entire length of the lot immediately landward of ordinary high water mark. Planting shall consist of native shrubs and trees and, when possible, emergent vegetation. At least five native trees will be included in a planting plan containing one or more evergreen trees and two or more trees that like wet roots, such as willow species. Such planting shall be monitored for a period of five years consistent with a monitoring plan approved in accordance with K.C.C. chapter 21A.24. This subsection is not intended to prevent reasonable access through the shoreline critical area buffer to the shoreline, or to prevent beach use of the shoreline critical area;

M. Except as otherwise provided for covered boat lifts under subsection H. of this section, covered docks or piers, covered moorages, and covered floats are not permitted waterward of the ordinary high water mark; and

N. No dwelling unit may be constructed on a dock or pier. A water related or water enjoyment use may be allowed on a dock, pier, or other over-water structure only as part of a mixed-use development and only if accessory to and in support of a water-dependent use.

SECTION 193279. Ordinance 16985, Section 47, as amended, and K.C.C. 21A.25.220 are hereby amended to read as follows:

A. The shoreline dimensions table in subsections B. and C. of this section establishes the shoreline standards within each of the shoreline environments. The shoreline environment is located on the vertical column and the density and dimensions

standard is located on the horizontal row of the table. The table should be interpreted as follows:

1. If the cell is blank in the box at the intersection of the column and the row, the standards are the same as for the underlying zoning.

2. If the cell has a number in the box at the intersection of the column and the row, that number is the density or dimension standard for that shoreline environment.

3. If the cell has a parenthetical number in the box at the intersection of the column and the row, that parenthetical number identifies specific conditions ~~((immediately following the table))~~ in subsection C. of this section that ~~((are related))~~ apply to the density and dimension standard for that environment.

B. The dimensions enumerated in this section apply within the shoreline jurisdiction. If there is a conflict between the dimension standards in this section and ~~((K.C.C. chapter 21A.12))~~ dimensional standards elsewhere in this title, the more restrictive shall apply.

SECTION 194280. Ordinance 13129, Section 2, as amended, and K.C.C.
21A.27.010 are hereby amended to read as follows:

A. When a new transmission support structure is proposed, a community meeting
shall be convened by the applicant ~~((prior to))~~ before submittal of an application.

~~((A-))~~ B. At least two weeks in advance, notice of the meeting shall be provided
as follows:

1. Published in the local paper and mailed to the department, and
2. Mailed notice shall be provided to all property owners within five hundred
feet or at least twenty of the nearest property owners, whichever is greater, as required by
K.C.C. 21A.26.170 of any potential sites, identified by the applicant for possible
development, to be discussed at the community meeting. When the proposed
transmission support structure exceeds a height of one hundred twenty feet, the mailed

13141 notice shall be provided to all property owners within one thousand feet. The mailed
13142 notice shall at a minimum contain a brief description and purpose of the project, the
13143 estimated height, approximate location noted on an assessor map with address and parcel
13144 number, a photo or sketch of the proposed facility, a statement that alternative sites
13145 proposed by ~~((citizens))~~ the public can be presented at the meeting that will be considered
13146 by the applicant, a contact name and telephone number to obtain additional information,
13147 and other information deemed necessary by King County. Because the purpose of the
13148 community meeting is to promote early discussion, applicants are encouraged to note any
13149 changes to the conceptual information presented in the mailed notice when they submit
13150 an application.

13151 ~~((B-))~~ C. At the community meeting at which at least one employee of the
13152 department of local services, permitting division, assigned by the permitting division
13153 manager or designee, shall be in attendance, the applicant shall provide information
13154 relative to existing transmission support structures and other nonresidential structures,
13155 such as water towers and electrical transmission lines, within one-quarter mile of
13156 potential sites, and shall discuss reasons why those existing structures are unfeasible.
13157 Furthermore, any alternative sites within one-quarter mile, identified by community
13158 members and provided to the applicant in writing at least five days in advance of the
13159 meeting, shall be evaluated by the applicant to the extent possible given the timeframe,
13160 and discussed at the meeting. A listing of the sites, identified in writing and provided to
13161 the applicant at or before the community meetings, shall be submitted to the department
13162 with the proposed application. Applicants shall also provide a list of meeting attendees

and those receiving mailed notice and a record of the published meeting notice at the time of application submittal.

SECTION 281495. Ordinance 13129, Section 11, as amended, and K.C.C. 21A.27.110 are hereby amended to read as follows:

A. The mounting of antenna upon existing structures, such as light and power poles, located within publicly or privately maintained street, utility, and railroad rights-of-way((s)) is permitted outright. If an existing structure within a street, utility, or railroad rights-of-ways cannot accommodate an antenna due to structural deficiency or does not have the height required to provide adequate signal coverage, the structure may be replaced with a new structure that will serve the original purpose and will not exceed the original height by forty feet. However, minor communication facilities within street, utility, and railroad right-of-way that propose the construction of a separate structure used solely for antenna shall be subject to the zoning provisions applicable to the property abutting the portion of right-of-way where the structure is proposed except that the setbacks specified in the zoning code shall not apply. Setbacks shall be those specified in the road design standards. In cases where the abutting property on either side of the right-of-way has different zoning, the more restrictive zoning provisions shall apply.

B. The placement of antenna on existing or replacement structures within street, utility, or railroad rights-of-way is the preferred alternative in residential neighborhoods and in the ((Rural Areas)) rural area and natural resource lands and the feasibility of such placement shall be considered by the county whenever evaluating a proposal for a new transmission support structure, except for a new structure that is proposed to collocate antenna for two or more separate service providers.

13186 SECTION 196282. Ordinance 10870, Section 512, as amended, and K.C.C.

13187 21A.28.020 are hereby amended to read as follows:

13188 A. All new development proposals including any use, activity, or structure
13189 allowed by K.C.C. chapter 21A.08 that requires King County approval shall be
13190 adequately served by the following facilities and services ~~((prior to the time of))~~ before
13191 occupancy, recording, or other land use approval, as further specified in this chapter:

13192 1. ~~((s))~~ Sewage disposal;

13193 2. ~~((w))~~ Water supply;

13194 3. ~~((s))~~ Surface water management;

13195 4. ~~((r))~~ Roads and access;

13196 5. ~~((f))~~ Fire protection service; and

13197 6. ~~((s))~~ Schools.

13198 B. All new development proposals for building permits, plats, short plats, ~~((urban~~
13199 ~~planned developments, fully contained communities))~~ and binding site plans, that will be
13200 served by a sewer or water district, shall include a certificate of water availability and a
13201 certificate of sewer availability to demonstrate compliance with this chapter and other
13202 provisions of the King County Code, the King County Comprehensive Plan, and the
13203 Growth Management Act.

13204 C. Regardless of the number of sequential permits required, ~~((the provisions of))~~
13205 this chapter shall be applied only once to any single development proposal. If changes
13206 and modifications result in impacts not considered when the proposal was first approved,
13207 the county shall consider the revised proposal as a new development proposal.

SECTION ~~197~~283. Ordinance 10870, Section 513, as amended, and K.C.C.

21A.28.030 are hereby amended to read as follows:

All new development shall be served by an adequate public or private sewage disposal system, including both collection and treatment facilities as follows:

A. A public sewage disposal system is adequate for a development proposal ~~((provided that))~~ only if:

1. For the issuance of a building permit, preliminary ~~((plat))~~ subdivision or short ~~((plat))~~ subdivision approval, or other land use approval, the applicant demonstrates that the site of the proposed development is or can be served by an existing disposal system consistent with K.C.C. Title 13, and the disposal system has been approved by the department as being consistent with applicable state and local design and operating guidelines;

2. For the issuance of a certificate of occupancy for a building or change of use permit, the approved public sewage disposal system as ~~((set forth))~~ required in subsection A.1. of this section is installed to serve each building or lot;

3. For recording a final plat, final short plat, or binding site plan, the approved public sewage disposal system ~~((set forth))~~ required in subsection A.1. of this section shall be installed to serve each lot respectively~~((;))~~ or a bond or similar security shall be deposited with King County for the future installation of an adequate sewage disposal system. The bond may be assigned to a utility to assure the construction of the facilities within two years of recording; and

4. For a zone reclassification (~~((or urban planned development permit))~~), the timing of installation of required sewerage improvements shall be contained in the approving ordinance as specified in K.C.C. 20.22.250; and

B. A private individual sewage system is adequate, if an on-site sewage disposal system for each individual building or lot is installed to meet the requirements and standards of ~~((the department of))~~ public health ~~— Seattle & King County~~ as to lot size, soils, and system design ~~((prior to))~~ before issuance of a certificate of occupancy for a building or change of use permit.

NEW SECTION. SECTION 198284. There is hereby added to K.C.C. chapter 21A.28 a new section to read as follows:

Developments using a community on-site sewage system or large on-site sewage system may be allowed only in the following circumstances in the rural area and natural resource lands:

A. Existing on-site systems are failing within an area and public health - Seattle & King County concurs that long-term individual on-site sewage system repairs are not feasible or water quality is threatened by the presence of or potential health hazards resulting from inadequate on-site wastewater disposal methods;

B. An authorized public agency will manage the system;

C. The system is designed only to serve existing structures and lots.

Modifications to existing ~~uses-structures~~ and lots shall not be allowed if the modification triggers an expansion of sewage capacity above the original approval of the system.

D. The system shall not be used to exceed base density for the zone, special district overlays, or P-suffix conditions. Substandard vacant lots shall be combined to the extent feasible to meet rural density policies and regulations;

E. A system serving residentially developed lots cannot be used to:

1. Expand existing nonresidential uses in size or scale;
2. Establish new nonresidential uses; or
3. Serve commercially zoned properties; and

F. For a system serving commercially developed lots:

1. The system is used only to serve commercially zoned properties;
2. Zoning, special district overlays, or Property-specific development conditions are imposed that establish a range of allowed uses that can be adequately served by the system at the time of its construction; and
3. The allowed uses are not more expansive than those allowed in the underlying zone.

SECTION 499285. Ordinance 10870, Section 514, as amended, and K.C.C. 21A.28.040 are hereby amended to read as follows:

All new development shall be served by an adequate public or private water supply system as follows:

A. A public water system is adequate for a development proposal only if:

1. For the issuance of a building permit, preliminary ((plat)) subdivision or short plat-subdivision approval, or other land use approval, the applicant demonstrates that the site of the proposed development is or can be served by an ((the)) existing water supply system ((available to serve the site)) that:

C. Facilities to meet future demand shall be designed to meet the adopted standards of service. If sufficient funding is not projected to be available to fully fund a school district capital facilities plan ~~((which))~~ that meets the standard of service, the school district's capital plan should document the reason for the funding gap.

The chair of the committee shall provide a copy of each report to the respective school district.

13496 E. Each school district shall ~~((also submit an annual))~~ annually report on their use

SECTION 221304. Ordinance 17710, Section 14, as amended, and K.C.C. 21A.32.250 are hereby amended to read as follows:

For those recreational ~~((marijuana))~~ cannabis production and processing facilities requiring a conditional use permit under this title, as part of the permit review process, the department may require the applicant to submit an odor management plan for any areas of indoor processing or ventilation of any structure used to produce or process ~~((marijuana))~~ cannabis. The purpose of such a plan is to minimize odors and fumes from chemicals or products used in or resulting from either production or processing, or both, of ~~((marijuana))~~ cannabis.

SECTION 222305. Ordinance 13274, Section 1, as amended, and K.C.C. 21A.37.010 are hereby amended to read as follows:

A. The purpose of the transfer of development rights ("TDR") program is to transfer residential density from eligible sending sites to eligible receiving sites through a voluntary process that permanently preserves urban, rural, and resource lands that provide a public benefit. The TDR provisions are intended to supplement land use regulations, resource protection efforts, and open space acquisition programs and to encourage increased residential development density or increased commercial square footage, especially inside cities, where it can best be accommodated with the least impacts on the natural environment and public services by:

1. Providing an effective and predictable incentive process for property owners of rural area, natural resource ~~and~~ urban separator, and other eligible urban land to preserve lands with a public benefit as described in K.C.C. 21A.37.020; and

2. Providing an efficient and streamlined administrative review system to ensure that transfers of development rights to receiving sites are evaluated in a timely way and balanced with other county goals and policies, and are adjusted to the specific conditions of each receiving site.

B. The TDR provisions in this chapter shall only apply to TDR receiving site development proposals ~~and~~

~~1. S)~~ submitted on or after September 17, 2001, and applications for approval of TDR sending sites submitted on or after September 17, 2001 ~~and~~

~~2. For properties within the Skyway West Hill or North Highline ((community service area)) subarea geographies, only as provided in K.C.C. chapter 21A.48).~~

C. For the purposes of this chapter, "conservation easement" includes other similar encumbrances.

SECTION 223306. Ordinance 13274, Section 3, as amended, and K.C.C. 21A.37.020 are hereby amended to read as follows:

A. For the purpose of this chapter, sending site means the entire tax lot or lots qualified under this subsection. Sending sites shall:

1. Contain a public benefit such that preservation of that benefit by transferring residential development rights to another site is in the public interest;

2. Meet at least one of the following criteria:

a. designation in the King County Comprehensive Plan or a functional plan as an

14207 defined in RCW 84.34.020;

14208 e. identification as habitat for federally listed endangered or threatened species in

14209 a written determination by the King County department of natural resources and parks,

14210 Washington state Department of Fish and Wildlife, United States Fish and Wildlife

14211 Services or a federally recognized tribe that the sending site is appropriate for

14212 preservation or acquisition;

14214 or zoned R-1; or

14215 g.(1) designation in the King County Comprehensive Plan as urban residential
14216 medium or urban residential high;
14217 (2) zoned R-4, R-6, R-8, R-12, R-18, R-24, or R-48; and

14220 exceeds the minimum lot area for construction requirements in K.C.C. 21A.12.100 for
14221 the zone in which the sending site is located. For purposes of this subsection, lots divided
14222 by a street are considered contiguous if the lots would share a common lot line if the
14223 street was removed. This provision may be waived by the interagency committee if the
14224 total acreage of a rural area or natural resource land sending site application exceeds one
14225 hundred acres; and
14226 4. Not be in public ownership, except:
14227 a. as provided in K.C.C. 21A.37.110.C.;

14229 of Natural Resources as state grant or state forest lands; ~~((or))~~
14230 c. for lands that are managed by King County for purposes of residential or
14231 commercial development; or
14232 d. for lands participating in the county's forest carbon program established by
14233 K.C.C. chapter 18.35.
14234 B. For the purposes of the TDR program, acquisition means obtaining fee simple
14235 rights in real property or a property right in a form that preserves in perpetuity the public
14236 benefit supporting the designation or qualification of the property as a sending site. A

sending site shall be maintained in a condition that is consistent with the criteria in this section under which the sending was qualified.

C. If a sending site has any outstanding code violations, the person responsible for code compliance should resolve these violations, including any required abatement, restoration, or payment of civil penalties, before a TDR sending site may be qualified by the interagency review committee created under K.C.C. 21A.37.070. However, the interagency may qualify and certify a TDR sending site with outstanding code violations if the person responsible for code compliance has made a good faith effort to resolve the violations and the proposal is in the public interest.

D. For lots on which the entire lot or a portion of the lot has been cleared or graded in accordance with a Class II, III, or IV special forest practice as defined in chapter 76.09 RCW within the six years before application as a TDR sending site, the applicant (~~must~~) shall provide an affidavit of compliance with the reforestation requirements of the Forest Practices Act, and any additional reforestation conditions of their forest practice permit. Lots on which the entire lot or a portion of the lot has been cleared or graded without any required forest practices or county authorization, shall be not qualified or certified as a TDR sending site for six years unless the six-year moratorium on development applications has been lifted or waived or the landowner has a reforestation plan approved by the Washington state Department of Natural Resources and King County.

SECTION 224307. Ordinance 13274, Section 5, as amended, and K.C.C. 21A.37.030 are hereby amended to read as follows:

A. Receiving sites shall be:

1. King County unincorporated urban sites, except as limited in subsection D. of this section, zoned R-4 through R-48, NB, CB, RB₂ or O(~~(, or any combination thereof)~~).

The sites may also be within potential annexation areas established under the

~~((e))~~Countywide ~~((p))~~Planning ~~((p))~~Policies; ~~((e))~~

2. Sites in rural towns, when in accordance with the inclusionary housing program in K.C.C. chapter 21A.48, the TDR maximum density standards in K.C.C. 21A.12.030 for the applicable zone as established by this title, or the duplex allowances in K.C.C. 21A.08.030, and except as limited in subsection E. of this section;

3. Cities where new growth is or will be encouraged under the Growth Management Act and the countywide planning policies and where facilities and services exist or where public investments in facilities and services will be made, or

~~((3-))~~4. RA-2.5 zoned parcels, except as limited in subsection E. of this section, that meet the criteria listed in this subsection A.~~((3-))~~4. may receive development rights transferred from rural forest focus areas, and accordingly may be subdivided and developed at a maximum density of one dwelling per two and one-half acres. Increased density allowed through the designation of rural area receiving areas shall:

a. ~~((must))~~ be eligible to be served by domestic Group A public water service;

b. ~~((must))~~ be located within one-quarter mile of an existing predominant pattern of rural lots smaller than five acres in size;

c. ~~((must))~~ not adversely impact ~~((regionally or locally significant resource areas or))~~ critical areas;

d. ~~((must))~~ not require public services and facilities to be extended to create or encourage a new pattern of smaller lots;

Formatted: Strikethrough

e. ~~((must))~~ not be located within rural forest focus areas; and

f. ~~((must))~~ not be located on Vashon~~((Island or))~~ Maury Island.

B. Except as provided in this chapter, development of an unincorporated King County receiving site shall remain subject to all zoning code provisions for the base zone, except TDR receiving site developments shall comply with dimensional standards of the zone with a base density most closely comparable to the total approved density of the TDR receiving site development.

C. Except as otherwise provided in this title, ~~((A))~~ an unincorporated King County receiving site may accept development rights from one or more sending sites, as follows:

1. ~~((For short subdivisions, u))~~ Up to the maximum density ~~((permitted))~~ allowed under ~~((K.C.C. 21A.12.030 and 21A.12.040))~~ this title; and

2. For ~~((formal))~~ subdivisions, only ~~((as authorized in a subarea study that includes a comprehensive analysis of the impacts of receiving development rights))~~ if the hearing examiner finds that the additional density from use of TDRs at the proposed subdivision does not create unmitigated impacts beyond those created by development at base density.

D. Property located within the outer boundaries of the Noise Remedy Areas as identified by the Seattle-Tacoma International Airport may not accept development rights.

E. Property located within the shoreline jurisdiction or located on Vashon~~Maury~~ Island ~~((or Maury Island may))~~ shall not accept development rights.

SECTION 225308. Ordinance 13274, Section 6, as amended, and K.C.C. 21A.37.040 are hereby amended to read as follows:

Formatted: Strikethrough

A. The number of residential development rights that an unincorporated sending site is eligible to send to a receiving site shall be determined by applying the TDR sending site base density established in subsection D. of this section to the area of the sending site, after deducting the area associated with any existing development allowed to remain under the terms of the conservation easement conserving the site, any retained development rights, and any portion of the sending site already in a conservation easement ~~((or other similar encumbrance))~~. For each existing dwelling unit or retained development right, the sending site area shall be reduced by an area equivalent to the base density for that zone ~~((under K.C.C. 21A.12.030))~~.

Formatted: Strikethrough

B. Any fractions of development rights that result from the calculations in subsection A. of this section shall ~~((not be included in the final determination of total development rights available for transfer))~~ be rounded up to the next largest whole number if the calculation results in a fraction of 0.5 or greater, or shall be rounded down to the next smallest whole number if the calculation results in a fraction less than 0.5.

C. For purposes of calculating the amount of development rights a sending site can transfer, the amount of land contained within a sending site shall be determined as follows:

1. If the sending site is an entire tax lot, the square footage or acreage shall be determined by:

- a. ~~((by))~~ the King County department of assessments records; ~~((or))~~
- b. ~~((by))~~ geographic information system mapping confirmed by King County;

or

c. a survey funded by the applicant that has been prepared and stamped by a surveyor licensed in the state of Washington; and

2. If the sending site consists of a lot that is divided by a zoning boundary, the square footage or acreage shall be calculated separately for each zoning classification. The square footage or acreage within each zoning classification shall be determined by the King County record of the action that established the zoning and property lines, such as an approved lot line adjustment. When such records are not available or are not adequate to determine the square footage or acreage within each zoning classification, TDR program staff shall calculate, and the department of local services, permitting division, shall ~~((calculate))~~ confirm, the square footage or acreage through the geographic information system ~~((GIS))~~ mapping system.

D. For the purposes of the ~~((transfer of development rights-))~~TDR~~((+))~~ program only, the following TDR sending site base densities apply:

1. Sending sites designated in the King County Comprehensive Plan as urban separator ~~((and))~~ or zoned R-1 shall have a base density of four dwelling units per acre;

2. Sending sites zoned RA-2.5 shall have a base density of one unit for each two and one-half acres. Sending sites zoned RA-2.5 that are vacant and are smaller than 1.25 acres shall be allocated one additional TDR for each vacant lot that is smaller than 1.25 acres;

3. Sending sites zoned RA-5 or RA-10 shall have a base density of one dwelling unit per five acres. Vacant sending sites that are zone RA-5 and are smaller than two and one-half acres or that are zoned RA-10 and are smaller than five acres shall be allocated

14350 one additional TDR for each vacant lot that is smaller than two and one-half acres or five
14351 acres, respectively;

14352 4. Sending sites zoned RA and that have a designation under the ~~((King~~
14353 ~~County))~~ Shoreline Master Program of conservancy or natural shoreline environment
14354 shall be allocated one additional TDR per legal lot;

Formatted: Strikethrough

14355 5. Sending sites zoned A-10 and A-35 shall have a base density of one dwelling
14356 unit per five acres for transfer purposes only;

14357 6. Sending sites zoned F within the forest production district shall have a base
14358 density of one dwelling unit per eighty-acres or one dwelling unit per each lot that is
14359 between fifteen and eighty acres in size. A TDR sending site zoned F that is awarded
14360 certified TDRs under K.C.C. 21A.37.070 may be qualified for one additional TDR for
14361 each legal lot that is eligible to create a verified carbon credits under K.C.C. chapter
14362 18.35. Certification of any additional TDRs qualified under this subsection D.6. ~~of this~~
14363 ~~section~~ is contingent upon applicant enrolling in a verified carbon program under K.C.C.
14364 chapter 18.35, which shall occur within five years of initial sending site certification,
14365 subject to interagency committee review and approval; ~~((or))~~

14366 7. Vacant marine shoreline sending sites without any hard shoreline stabilization
14367 shall be allocated one additional TDR per legal lot; and

14368 8. Sending sites in the urban unincorporated area that meet the criteria in K.C.C.
14369 21A.37.020.A.2.g. shall be allocated TDRs that are equivalent to the ~~((zoning))~~ base
14370 density established for the zone in ~~((K.C.C. 21A.12.030))~~ this title for every one acre of
14371 gross land area.

E. A sending site zoned RA, A₂ or F may send one development right for every legal lot larger than five thousand square feet that was created on or before September 17, 2001, with no retained development rights, if that number is greater than the number of development rights determined under subsection A. of this section. A sending site zoned R-1 may send one development right for every legal lot larger than two thousand five hundred square feet that was created on or before September 17, 2001, with no retained development rights, if that number is greater than the number of development rights determined under subsection A. of this section.

F. The number of development rights that a ~~((King County unincorporated))~~ rural area or natural resource ~~((s))~~ land sending site is eligible to send to a ~~((King County))~~ incorporated urban area receiving site shall be determined through the application of a conversion ratio established by King County and the ~~((incorporated municipal jurisdiction))~~ city or town. The conversion ratio will be applied to the number of available sending site development rights determined under subsection A. or E. of this section.

G. Development rights from one sending site may be allocated to more than one receiving site and one receiving site may accept development rights from more than one sending site.

H. The determination of the number of residential development rights a sending site has available for transfer to a receiving site shall be valid for transfer purposes only, shall be documented in a TDR qualification report prepared by the department of natural resources and parks and sent to the applicant. The qualification report ~~((and))~~ shall be considered a final determination, not to be revised due to changes to the sending site's

zoning, and shall be valid unless conditions on the sending site property that would affect the number of development rights the sending site has available for transfer have changed.

I. Each residential ~~((transferable development right))~~ TDR that originates from a sending site zoned RA, A₂ or F shall be designated "Rural" and is equivalent to two additional units above base density in eligible receiving sites located in unincorporated urban King County. Each residential ~~((transferable development right))~~ TDR that originates from a sending site zoned R-1 or designated as urban separator shall be designated "Urban" and is equivalent to one additional unit above base density. Each residential ~~((transferable development right))~~ TDR that originates from a sending site in urban unincorporated area lands meeting the criteria in K.C.C. 21A.37.020.A.2.g. shall be designated "Urban" and is equivalent to one additional unit above the base density.

SECTION 226309. Ordinance 14190, Section 7, as amended, and K.C.C. 21A.37.050 are hereby amended to read as follows:

A. Following the transfer of residential development rights, a sending site may subsequently accommodate remaining residential dwelling units, if any, on the buildable portion of the parcel or parcels or be subdivided, consistent with the ~~((zoned))~~ base density ~~((provisions of the density and dimensions tables))~~ in K.C.C. 21A.12.030 and ~~21A.12.040~~ for the applicable zone as established by this title, the allowable dwelling unit calculations in K.C.C. 21A.12.070₁ and other King County development regulations. Any remaining residential dwelling units and associated accessory units shall be located in a single and contiguous reserved residential area that shall be adjacent to any existing development or roadways on the property. The reserved residential area shall ~~((be equal~~

Formatted: Strikethrough

14418 ~~to~~) not exceed the acreage associated with the minimum lot size of the zone for each
14419 remaining residential dwelling unit. For sending sites zoned RA, the subdivision
14420 potential remaining after a density transfer may only be actualized through ~~((a clustered~~
14421 ~~subdivision, short subdivision or binding site plan))~~ clustering that creates a permanent
14422 preservation tract as large or larger than the portion of the subdivision set aside as lots.
14423 Within rural forest focus areas, resource use tracts shall be at least fifteen acres of
14424 contiguous forest land.

14425 B. Only those nonresidential uses directly related to, and supportive of the
14426 criteria under which the site qualified are allowed on a sending site.

14427 C. The applicable limitations in this section shall be included in the sending site
14428 conservation easement.

14429 SECTION 227310. Ordinance 14190, Section 8, as amended, and K.C.C.
14430 21A.37.060 are hereby amended to read as follows:

14431 A. ~~((Prior to))~~ Before issuing a certificate for ~~((transferable development rights~~
14432 ~~to))~~ TDRs for a sending site, the department of natural resources and parks ~~((;))~~ or its
14433 successor, shall record deed restrictions in the form of a conservation easement

14436 permitting division ~~((;))~~ or its successor, shall establish and maintain an internal tracking
14437 system that identifies all certified ~~((transfer of developments rights))~~ TDR sending sites.

14438 B. A conservation easement granted to the county or other appropriate land
14439 management agency and that meets the requirements of K.C.C. 21A.37.050 shall be
14440 required for land contained in the sending site. The conservation easement shall be

documented by a map. The conservation easement shall be placed on the entire lot or lots. The conservation easement shall identify limitations in perpetuity on future residential and nonresidential development consistent with this chapter, as follows:

1. A conservation easement~~((, which))~~ that contains the easement map~~((,))~~ shall be recorded on the entire sending site to indicate development limitations on the sending site;

2. For a sending site zoned A-10 or A-35, the conservation easement shall be consistent in form and substance with the purchase agreements used in the agricultural land development rights purchase program. The conservation easement shall preclude subdivision of the subject property but may permit not more than one dwelling per sending site, and shall permit agricultural uses as provided in the A-10 or A-35 zone;

3. For a rural area sending site, the conservation easement shall allow for restoration, maintenance, or enhancement of native vegetation. A present conditions report shall be required to document the location of existing structures and existing native vegetation and the baseline conservation values of protected property at the time the conservation easement is put in place. If residential development will be allowed on the site under the conservation easement, the present conditions report shall be used to guide the location of residential development;

4. For a sending site qualifying as habitat for federal listed endangered or threatened species, the conservation easement shall protect habitat and allow for restoration, maintenance, or enhancement of native vegetation. A present conditions report shall be required to document the location of existing structures. If existing or future residential development will be allowed on the site under the conservation

easement, the present conditions report shall be used by the owner to guide the location of residential development; and

5.a. For a sending site zoned F, the conservation easement shall encumber the entire sending site. ~~((Lots between fifteen acres and eighty acres in size are not eligible to participate in the TDR program if they include any existing dwelling units intended to be retained, or if a new dwelling unit is proposed.))~~ For eligible lots between fifteen acres and eighty acres in size, the sending site ~~((must))~~ shall include the entire lot. For lots greater than eighty acres in size, the sending site shall be a minimum of eighty acres.

b. The conservation easement shall permit forestry uses subject to a forest stewardship plan prepared by the applicant and approved by the county for ongoing forest management practices. The ~~((F))~~forest ~~((S))~~stewardship ~~((P))~~plan shall serve as a present conditions report documenting the baseline conditions of the property and shall include a description of the site's forest resources and the long term forest management objectives of the property owner~~((, and shall not impose standards that exceed Title 222 WAC))~~.

c. Lots between fifteen acres and eighty acres in size are not eligible to participate in the TDR program if they include any existing dwelling units intended to be retained, or if a new dwelling unit is proposed.

amenity funds, then, unless the funds have been used for substitute amenities by
agreement of the city and King County, those funds, plus interest, shall be returned to

A. The purpose of the erosion hazards near sensitive water bodies special district overlay (~~district~~), which is SO-190, is to provide a means to designate sloped areas posing erosion hazards which drain directly to lakes or streams of high resource value which are particularly sensitive to the impacts of increased erosion and the resulting sediment loads from development.

B. The following development standards shall be applied in addition to all applicable requirements of K.C.C. chapter 21A.24 to development proposals located within erosion hazards near a sensitive water bodies special district overlay:

1. A no-disturbance area shall be established on the sloped portion of the special district overlay to prevent damage from erosion. Land clearing or development shall not occur in the no-disturbance area, except for the clearing activities listed in subsection a. Clearing activities listed in subsection a. shall only be permitted if they meet the requirements of subsection b.

a. Clearing activities may be permitted as follows:

i. for the construction of single (~~family~~) detached residences on pre-existing separate lots;

ii. for the construction of utility corridors to service existing development along existing rights-of-way including any vacated portions of otherwise contiguous rights-of-way;

iii. for the construction of roads providing sole access to buildable property and associated utility facilities within those roadways; or

iv. for the construction of development within an isolated no-disturbance area of two acres or less in size. The isolated no-disturbance area is either geologically

separated from other no-disturbance areas or lies completely within a separate drainage
subbasin and is, therefore, hydrologically isolated from the rest of the no-disturbance area.
b. The clearing activities listed in subsection a. may be permitted only if the
following requirements are met:
i. a report which meets the requirements of K.C.C. 21A.24.120 shall show that
the clearing activities will not subject the area to risk of landslide or erosion and that the
purpose of the no-disturbance area is not compromised in any way;
ii. the clearing activities shall be mitigated, monitored, and bonded consistent
with the mitigation requirements applicable to sensitive areas regulated in K.C.C. chapter
21A.24;
iii. the clearing activities are limited to the minimal area and duration necessary
for construction; and
iv. the clearing activities are consistent with K.C.C. chapter 21A.24.
2. The upslope boundary of the no-disturbance area lies at the first obvious break
in slope from the upland plateau over onto the steep valley walls. The downslope boundary
of this zone includes those areas designated as erosion or landslide hazard areas pursuant to
K.C.C. 21A.24.220 and K.C.C. 21A.24.280. The sensitive areas folio indicates the general
location of these hazard areas, but it cannot be used to specify the areas' precise boundaries.
Maps of the approximate boundaries of these no-disturbance zones shall be available at the
department. ((Single family or multi family r))Residential density from the no-disturbance
area may be reallocated onto any buildable portion of the site ((pursuant to)) consistent
with K.C.C. ((21A.12.080,)) 21A.12.070 or transferred to other sites pursuant to K.C.C.
chapter 21A.36;

3. New development proposals for sites which drained predeveloped runoff to the no-disturbance zone shall evaluate the suitability of onsite soils for infiltration. All runoff from newly constructed impervious surfaces shall be retained on-site unless this requirement precludes the ability to meet applicable minimum density requirements in ~~((K.C.C. chapter 21A.12))~~ this title. When minimum density cannot be met, runoff shall be retained on-site as follows:

Formatted: Strikethrough

a. Infiltration of all site runoff shall be required in granular soils as defined in the ~~((King County))~~ Surface Water Design Manual.

Formatted: Strikethrough

b. Infiltration of downspouts shall be required in granular soils and in soil conditions defined as allowable in the Surface Water Design Manual when feasible to fit the required trench lengths on-site;

c. When infiltration of downspouts is not feasible, downspout dispersion trenches shall be required when minimum flow paths defined in the Surface Water Design Manual can be met onsite or into adjacent open space; and

d. When dispersion of downspouts is not feasible, downspouts shall be connected to the drainage system via perforated pipe.

maximum lot coverage should be specified for subsequent residential building permits on individual lots.

6. If the application of this section would deny all reasonable use of property, the applicant may apply for a reasonable use exception pursuant to K.C.C. 21A.24.070.B.

7. The director may modify the property-specific development standards required by B.1 through B.5 of this section, when a development proposal complies with the following:

a. The proposed development is subject to public/private partnerships such as an approved community block grant or other such water quality program designed to improve water quality in the basin.

b. The proposed development is designated by King County, in consultation with the Lake Sammamish Management Committee, as a demonstration project designed to implement best management practices and state of the art technology that assures the greatest possible improvement to water quality, and

c. A site-specific study is conducted by the applicant and approved by the director, which demonstrates that the proposed development substantially increases water quality by showing the following:

(1) water quality on-site is improved;

(2) the development project will not subject downstream channels to increased risk of landslide or erosion;

(3) the development project will not subject the nearest sensitive water body to additional erosion hazards; and

(4) the project is consistent with element a. and b. above, and provides predictable improvements to the water quality of Lake Sammamish.

SECTION 332. Ordinance 12823, Section 16, as amended, and K.C.C. 21A.38.210 are hereby amended to read as follows:

A. The purpose of the heron habitat protection area special district overlay, which is SO-200, is to provide a means to designate areas that provide essential feeding, nesting, and roosting habitat for identified great blue heron rookeries. A district overlay will usually contain several isolated areas of known heron habitat in the general region surrounding the heron rookery.

B. The following development standards shall be applied in addition to all applicable requirements of K.C.C. chapter 21A.24 and Title 25 to development proposals located within a heron habitat protection area district overlay:

1. The following conditions shall apply to the wetland or along the main channel of the stream riparian zone containing the heron rookery (tributary streams are excluded):

a. The one-hundred-year floodplain shall be left undisturbed. Development proposals on individual lots shall require the one-hundred-year floodplain to retain the native vegetation and be placed in a county-approved conservation easement or notice shall be placed on the title of the lot. The notice shall be approved by King County and filed with the records and licensing services division. The notice shall inform the public of the presence and location of the floodplain and heron habitat on the property and that limitations on actions in or affecting the area exist. Subdivisions, short subdivisions, and binding site plans shall require the one-hundred-year floodplain to retain the native vegetation and be placed in a critical areas tract, to be dedicated to the homeowner's

association or other legal entity that assumes maintenance and protection of the tract.

Determination of the floodplain shall be done for each permit application based on actual
field survey using county-approved floodplain elevations;

b. There shall be a six-hundred-sixty-foot radius buffer maintained around the
periphery of the great blue heron rookery. If the critical areas and buffers are not adequate
to provide the radius, then the buffer shall be expanded to meet the requirement. A rookery
and its buffer shall be designated as critical area tract, easement, or noticed on title as
required in this subsection; and

c. All access shall be restricted under nest trees from February 15 to July 31 and
noted on signage at the floodplain or buffer edge, whichever is further from the rookery.
Access may be further restricted with fencing or dense plantings with native plant material
approved by the county. All developments in R-12 or higher density zones shall restrict
access and provide an interpretive sign that provides information about the stream or
wetland and its wildlife, biological, and hydrological functions. All signs shall be
consistent with critical area signage requirements and subject to review and approval of the
county;

2. Subdivisions, short subdivisions, binding site plans, site development permits,
or other commercial or ((multifamily)) multiunit permits adjacent to stream reaches and
wetlands designated on the heron habitat protection area district overlay map, shall provide
buffers that are fifty feet greater than required pursuant to K.C.C. chapter 21A.24 along
those streams and wetlands to provide habitat for herons. This additional fifty-foot buffer
shall be planted with dense native plant material to discourage human intrusion into feeding
or nesting and roosting areas. Plantings shall be reviewed and approved by the department.

If conformance with the additional buffer requirement results in an unbuildable lot, then the minimum variation necessary to accommodate the proposed development shall be determined in consultation with county biologists and be reviewed and approved by the department;

3. Along the shoreline of lakes and river corridors included in the heron habitat protection area, all subdivisions, short subdivisions, binding site plans, site development permits, or other commercial or ((multifamily)) multiunit permits shall provide a fifty-foot buffer in addition to required shoreline setbacks of K.C.C. Title 25 and chapter 21A.24.

Along the shoreline of the major rivers (Sammamish, Green, Cedar, Snoqualmie, Snohomish, Skykomish, and White rivers), the setback requirement may be waived if a special wildlife study shows no great blue heron nesting, roosting, and feeding areas on the site. These studies shall be done by a wildlife biologist and approved by county biologists. This additional fifty-foot buffer shall be planted with dense native plant material to discourage human intrusion into feeding or nesting and roosting areas. Plantings shall be reviewed and approved by the department; and

4. New docks, piers, bulkheads, and boat ramps constructed within the heron habitat protection area shall mitigate for loss of heron feeding habitat by providing enhanced native vegetation approved by the county adjacent to the development or between the development and the shoreline. Bulkheads shall be buffered from the water's edge by enhanced plantings of native vegetation approved by the county.

SECTION 333. Ordinance 19146, Section 85, as amended, and K.C.C. 21A.38.255 are hereby amended to read as follows:

15459 A. The purpose of the Bear Creek office and retail special district overlay, which is

NEW SECTION. SECTION 248335. There is hereby added to K.C.C. chapter

21A.38 a new section to read as follows:

A. The purpose of the Green Energy special district overlay, which is SO-340, is to advance the county's climate action goals by reducing barriers to generating renewable energy in King County, on properties whose location within one thousand feet of utility corridors and existing and historical waste management and mineral extraction sites makes them uniquely situated for maximizing green and renewable energy production while reducing transportation costs.

B. The standards of this title and other county codes shall be applicable to development within the special district overlay, except that the permit requirements and conditions for the uses listed below shall replace those found for these uses in K.C.C. chapter 21A.08:

1. The following uses are allowed as permitted uses:

a. non-hydroelectric generation facility, anaerobic digester, and production of biogas from waste management processes on-site, regardless of whether electricity is generated on-site from the gas; and

b. local distribution gas storage tank, only to support the biogas use in subsection B.1.a. of this section.

2. The following uses are allowed as conditional uses:

- a. production of renewable hydrogen through electrolyzing water; and
- b. only when the use supports the regional solid waste or recycling system, or the county's diversion efforts:
 - (1) energy resource recovery facility;
 - (2) transfer station;
 - (3) landfill; and
 - (4) interim recycling facility.

C. Uses and development within the mineral extraction portion of the overlay shall comply with state and county reclamation requirements.

~~NEW SECTION. SECTION 249. There is hereby added to K.C.C. chapter 21A.38 a new section to read as follows:~~

~~A. The purpose of the Fall City Rural Town Residential special district overlay is to maintain the historic character and predominant development pattern in the residential zone in Fall City Rural Town.~~

~~B. The standards of this title and other county codes shall be applicable to development within the special district overlay except as follows:~~

~~1. The maximum density is four dwelling units per acre, except manufactured home communities are allowed a maximum density of twelve dwelling units per acre;~~

~~2. The minimum density shall not apply;~~

~~3. The minimum lot area is twelve thousand five hundred square feet;~~

15801 ~~4. The minimum lot width is sixty feet;~~
15802 ~~5. The minimum street setback is fifteen feet;~~
15803 ~~6. The minimum interior setback is ten feet, except for vehicle access points in~~
15804 ~~K.C.C. 21A.12.030.B.16;~~
15805 ~~7. The maximum impervious surface is forty percent. An additional five percent~~
15806 ~~may be granted for driveway access to a detached garage set back further from the street~~
15807 ~~than the footprint of the residence;~~
15808 ~~8. The base height is twenty-five feet; and~~

15821 governed by an existing conditional use permit, special use permit, or unclassified use
15822 permit(, or planned unit development)) shall provide the same level of protection for and

SECTION 337. Ordinance 13130, Section 7, and K.C.C. 21A.42.150 are hereby amended to read as follows:

For the purposes of this chapter, a land use permit shall mean a conditional use permit, special use permit, or unclassified use permit(~~(-or planned unit development)~~).

SECTION ~~250338~~. Ordinance 11621, Section 112, as amended, and K.C.C. 21A.43.030 are hereby amended to read as follows:

A. The fee for each district shall be calculated based on the formula set out in Attachment A to Ordinance 11621.

B. The fee calculations shall be made on a district-wide basis to assure maximum utilization of all school facilities in the district used currently or within the last two years for instructional purposes.

D. The formula in Attachment A to Ordinance 11621 also provides a credit for the anticipated tax contributions that would be made by the development based on historical levels of voter support for bond issues in the school district.

E. The formula in Attachment A to Ordinance 11621 also provides for a credit for school facilities or sites actually provided by an ~~an~~ ~~((developer ((which))~~ applicant that the school district finds to be acceptable.

SECTION 25-1339. Ordinance 11621, Section 114, as amended, and K.C.C. 21A.43.050 are hereby amended to read as follows:

A. In school districts where impact fees have been adopted by county ordinance and except as provided in K.C.C. 21A.43.080, the county shall collect impact fees, based on the schedules ~~((set forth))~~ in each ordinance establishing the fee to be collected for the district, from any applicant seeking development approval from the county where such development activity requires final plat~~((PUD or UPD))~~ approval or the issuance of a residential building permit or a ~~((mobile))~~ manufactured home permit and the fee for the lot or unit has not been previously paid. ~~((No a))~~ Approval shall not be granted and ~~((no))~~ a permit shall not be issued until the required school impact fees ~~((set forth))~~ in the district's impact fee schedule contained in K.C.C. The balance of the assessed fee shall be allocated to the dwelling units in the project, and shall be collected when the building permits are issued. Residential developments proposed for short ~~((plats))~~ subdivisions shall be governed by subsection D. of this section.

15912 under ~~((the State Environmental Policy Act))~~ SEPA;

15913 5. Any development activity for which school impacts have been mitigated
15914 ~~((pursuant to))~~ in accordance with a condition of ~~plat((plat, PUD or UPD))~~ subdivision

C. The fee amount established in the schedule shall be reduced by the amount of any payment previously made for the lot or development activity in question, either as a condition of approval or ~~((pursuant to))~~ in accordance with a voluntary agreement with a school district entered into after the effective date of a school district's fee implementing ordinance.

D. After the effective date of a school district's fee implementing ordinance, whenever a development is granted approval subject to a condition that the ~~((developer))~~ applicant actually provide school sites, school facilities, or improvements to school facilities acceptable to the district, or whenever the ~~((developer))~~ applicant has agreed, ~~((pursuant to))~~ in accordance with the terms of a voluntary agreement with the school district, to provide land, provide school facilities, or make improvements to existing facilities, the ~~((developer))~~ applicant shall be entitled to a credit for the value of the land or actual cost of construction against the fee that would be chargeable under the formula provided by this chapter. The land value or cost of construction shall be estimated and documented at the time of approval ~~((, but must be documented))~~. If construction costs are estimated, the documentation shall be confirmed after the construction is completed to assure that an accurate credit amount is provided. If the land value or construction costs are less than the calculated fee amount, the difference remaining shall be chargeable as a school impact fee.

E. Impact fees may be adjusted by the county, at the county's discretion, if one of the following circumstances exist, ~~((provided that))~~ but only if the discount ~~((set forth))~~ in the fee formula fails to adjust for the error in the calculation or fails to ameliorate for the unfairness of the fee:

1. The ~~((developer))~~ applicant demonstrates that an impact fee assessment was incorrectly calculated; or

2. Unusual circumstances identified by the ~~((developer))~~ applicant demonstrate that if the standard impact fee amount was applied to the development, it would be unfair or unjust.

F. An ~~((developer))~~ applicant may provide studies and data to demonstrate that any particular factor used by the district may not be appropriately applied to the development proposal, but the district's data shall be presumed valid unless clearly demonstrated to be otherwise by the proponent.

G. Any appeal of the decision of the director or the hearing examiner with regard to imposition of an impact ~~((for))~~ fee or fee amounts shall follow the appeal process for the underlying permit and not be subject to a separate appeal process. Where no other administrative appeal process is available, an appeal may be taken to the hearing examiner using the appeal procedures for variances. Any errors in the formula identified as a result of an appeal should be referred to the council for possible modification.

H. Impact fees may be paid under protest in order to obtain a building permit or other approval of development activity, when an appeal is filed.

SECTION 253341. Ordinance 11621, Section 117, and K.C.C. 21A.43.080 are hereby amended to read as follows:

15981 A. Low~~((or moderate))~~-income housing projects, including permanent
 15982 supportive housing projects, ~~((being developed by public housing agencies or private~~
 15983 ~~nonprofit housing developers))~~, including permanent supportive housing projects, shall
 15984 be exempt from the payment of school impact fees. The amount of the school impact
 15985 fees not collected from low~~((or moderate))~~-income household development shall be paid
 15986 from public funds other than impact fee accounts. The impact fees for these units shall
 15987 be considered paid for by the district through its other funding sources, without the
 15988 district actually transferring funds from its other funding sources into the impact fee
 15989 account. The ~~((planning and community development))~~ housing, homelessness, and
 15990 community development division shall review proposed developments of low~~((or~~

 15993 the department of local services, permitting division, as to whether the project qualifies
 15994 for the exemption.

15995 B. ~~((Private developers))~~ Applicants who dedicate residential units for occupancy
 15996 by low ~~((or moderate))~~ income-households may apply to the housing, homelessness, and
 15997 community development division for reductions in school impact fees ~~((pursuant to the~~

 16001 development division shall review proposed developments of low~~((or moderate))~~-income

services, permitting division, as to whether the project qualifies for the exemption. If the housing, homelessness, and community development division recommends the exemption, the department of local services, permitting division, shall reduce the calculated school impact fee for the development by an amount that is proportionate to the number of units in the development that satisfy the adopted criteria.

C. ~~((Individual))~~ Developments for low((or moderate))-income ~~((home purchasers))~~ homeownership units (as defined pursuant to the King County Comprehensive Housing Affordability Strategy (CHAS)) who are ~~((purchasing))~~ developing homes at prices within the ~~((if))~~ eligibility limits based on standard lending criteria and meet other means tests established by rule by the housing, homelessness, and community development division are exempted from payment of the impact fee, ~~((provided))~~ except that at such time as the property in question is transferred to another owner who does not qualify for the exemption, at which time the fee shall be due and payable.

D. The housing, homelessness, and community development division is hereby instructed and authorized to adopt, pursuant to K.C.C. chapter 2.98, administrative rules to implement this section. Such rules shall provide for the administration of this program and shall:

1. Encourage the construction of housing for low~~((or moderate))~~-income households ~~((by public housing agencies or private non-profit housing developers participating in publicly sponsored or subsidized housing programs))~~;

Formatted: Strikethrough

Formatted: Strikethrough

2. Encourage the construction ~~((in private developments))~~ of housing units for low~~((or moderate))~~-income households that are in addition to units required by another housing program or development condition;

3. Ensure that housing that qualifies as low~~((or moderate))~~ cost meets appropriate standards regarding household income, rent levels or sale prices, location, number of units, and development size; and

4. Ensure that ~~((developers))~~ applicants who obtain an exemption from or reduction of school impact fees will in fact build the proposed low ~~((or moderate))~~ cost housing and make it available to low~~((or moderate))~~-income households ~~((for a minimum of fifteen years))~~.

5. Ensure that individual low~~((or moderate))~~-income purchasers meet appropriate eligibility standards based on income and other financial means tests.

E. As a condition of receiving an exemption under subsection B. or C. of this section, the ~~((owner must))~~ developer applicant shall execute and record a ~~((county-drafted lien,))~~ covenant~~((, and/or other contractual provision))~~ against the property ~~((for a period of ten years for individual owners, and fifteen years for private developers,))~~ guaranteeing that the proposed development will continue to be used for low~~((or moderate))~~-income housing. In the event that ~~((the pattern of development or))~~ the use of the development is no longer for low~~((or moderate))~~-income housing, then the owner shall pay the impact fee amount from which the owner or any prior owner was exempt. The ~~((lien,))~~ covenant~~((, or other contractual provision))~~ shall run with the land and apply to subsequent owners.

F. All school impact fee exemptions, reductions, or waivers shall be approved by the school district that would ~~collect~~ receive the school impact fee, except for fee exemptions allowed under K.C.C. 21A.43.070 and K.C.C. 21A.43.080, fee reductions based on modifications to permits after issuance, or fee waivers for construction not begun.

SECTION 342. Ordinance 11621, Section 118, and K.C.C. 21A.43.090 are hereby amended to read as follows:

A. Impact fee receipts shall be earmarked specifically and retained in a special interest-bearing account established by the county solely for the district's school impact fees. All interest shall be retained in the account and expended for the purpose or purposes identified in subsection B. of this section. Annually, the county, based in part on the report submitted by the district under K.C.C. 21A.28.152, shall prepare a report on each impact fee account showing the source and amount of all moneys collected, earned, or received, and capital or system improvements that were financed in whole or in part by impact fees.

B. Impact fees for the district's system improvements shall be expended by the district for capital improvements including but not limited to school planning, land acquisition, site improvements, necessary off-site improvements, construction, engineering, architectural, permitting, financing, and administrative expenses, relocatable facilities, capital equipment pertaining to educational facilities, and any other expenses which could be capitalized, and which are consistent with the school district's capital facilities plan.

C. In the event that bonds or similar debt instruments are issued for the advanced provision of capital facilities for which impact fees may be expended and where consistent with the bond covenants, impact fees may be used to pay debt service on such bonds or

similar debt instruments to the extent that the facilities or improvements provided are consistent with the requirements of this section.

D. Impact fees shall be expended or encumbered, which means being committed as part of the funding for a facility for which the publicly funded share has been assured, building permits applied for, or construction contracts let, by the district for a permissible use within ten years of receipt by the county, unless there exists an extraordinary and compelling reason for fees to be held longer than ten years. Such extraordinary or compelling reasons shall be identified to the county by the district. The county must prepare written findings concurring with the district's reasons, and authorizing the later encumbrance or expenditure of the fees prior to the district so encumbering or expending the funds, or directing a refund of the fees.

E. The current owner of property on which an impact fee has been paid may receive a refund of such fees if the impact fees have not been expended or encumbered within ten years of receipt of the funds by the county. In determining whether impact fees have been encumbered, impact fees shall be considered encumbered on a first in, first out basis. The county shall notify potential claimants by first-class mail deposited with the United States Postal Service addressed to the owner of the property as shown in the county tax records.

F. An owner's request for a refund must be submitted to the permitting division in writing within one year of the date the right to claim the refund arises or the date that notice is given, whichever date is later. Any impact fees that are not expended or encumbered within these time limitations, and for which no application for a refund has been made

within this one-year period, shall be retained and expended consistent with this section.

Refunds of impact fees shall include any interest earned on the impact fees.

G. Should the county seek to terminate any or all school impact fee requirements, all unexpended or unencumbered funds, including interest earned, shall be refunded to the current owner of the property for which a school impact fee was paid. Upon the finding that any or all fee requirements are to be terminated, the county shall place notice of the termination and the availability of refunds in a newspaper of general circulation at least two times and shall notify all potential claimants by first-class mail addressed to the owner of the property as shown in the county tax records. All funds available for refund shall be retained for a period of one year. At the end of one year, any remaining funds shall be retained by the county, but must be expended for the district, consistent with this section. The notice requirement in this subsection shall not apply if there are no unexpended or unencumbered balances within the account or accounts being terminated.

H. An ((developer)) applicant may request and shall receive a refund, including interest earned on the impact fees, when:

1. The ((developer)) applicant does not proceed to finalize the development activity as required by statute or county code; and

2. No impact on the district has resulted. "Impact" shall be deemed to include cases where the district has expended or encumbered the impact fees in good faith prior to the application for a refund. In the event that the district has expended or encumbered the fees in good faith, no refund shall be forthcoming. However, if within a period of three years, the same or subsequent owner of the property proceeds with the same or substantially similar development activity, the owner shall be eligible for a credit. The

owner must petition the county and provide receipts of impact fees paid by the owner for a development of the same or substantially similar nature on the same property or some portion thereof. The county shall determine whether to grant a credit, and such determinations may be appealed by following the procedures set forth in K.C.C. 21A.43.070.

I. Interest due upon the refund of impact fees required by this section shall be calculated according to the average rate received by the county or the district on invested funds throughout the period during which the fees were retained.

16555 proposal meets the needs of future residents and provides an equivalent or better quality
16556 of development.

16557 B. As a condition of development permit issuance, the department shall approve

A. As part of a complete permit application, the applicant shall submit a community preference and affirmative marketing plan. The plan shall include:

1. A tenant selection process for the affordable dwelling units that provides a preference for housing applicants with a current or past connection to the respective

subarea geography where the project is located. The plan should provide no more than and aim to provide forty percent of the affordable dwelling units to tenants that meet the requirements for community preference;

2. An advertising and outreach plan designed to provide information to and attract potential housing applicants who would otherwise be less likely to apply, without regard to protected class status as established by federal, state, and local laws. An affirmative advertising and outreach plan should generally help potential housing applicants know about vacancies, feel welcome to apply, and have the opportunity to rent units; and

3. A process for housing applicants to file an appeal regarding the tenant selection process and verification of eligibility for preference.

B. Before issuance of the building permit or subdivision approval, the community preference and affirmative marketing plan shall be reviewed and approved by the department of community and human services.

D. The department of community and human services shall provide guidance and technical assistance to the applicant to ensure the community preference and affirmative marketing plan and community preference and affirmative marketing report complies with federal, state, and local laws and regulations.

SECTION 26+359. Ordinance 19555, Section 29, and K.C.C. 21A.48.080 are hereby amended to read as follows:

A. The director may, at their discretion, approve a request for alternative compliance for the inclusionary housing requirements. Requests for such modifications shall clearly ~~((set forth))~~ state the facts upon which the request for relief is sought. Alternative compliance may include:

1. Providing affordable housing units off-site at another location within the same ~~((community service area))~~ subarea geography where the project is proposed;

2. For developments subject to K.C.C. 21A.48.020, ((P))payment to the county in lieu of constructing affordable housing units to be used to create affordable housing units within the same ~~((community services area))~~ subarea geography; or

3. Such other means proposed by the applicant and approved at the discretion of the director, consistent with the following criteria for alternative compliance.

B. Alternative compliance requests may only be approved when all of the following requirements are met:

1. The applicant demonstrates that the proposed alternative compliance method provides the same number and quality affordable housing units as those provided on-site;

2. The affordable housing units provided through the alternative compliance method will provide the same mix of rental or owner-occupied units as would have otherwise been provided on-site; and

3. In no case shall the director approve an alternative compliance request that results in zero affordable housing units being constructed on-site.

C. If an alternative compliance request is approved that includes off-site affordable housing units, any building permits required for off-site affordable housing units shall be submitted before issuance of building permits or final ~~((subdivision)) plat~~ approval for the subject property. Certificates of occupancy for off-site affordable housing units shall be issued before issuance of the final certificate of occupancy for the subject property.

Formatted: Strikethrough

D. If an alternative compliance request is approved that includes payment in lieu of constructing affordable ~~((housing)) dwelling~~ units, the formula for payments shall be established by department of community and human services through a public rule under K.C.C. chapter 2.98. ~~((The formula should be based on the cost to the county to construct and maintain an affordable dwelling unit.))~~ The payment obligation shall be paid before issuance of any building permits or final subdivision approval for the project.

Formatted: Strikethrough

E. As part of the application review process for an inclusionary housing proposal, the director may authorize modifications to the dimensional standards in K.C.C. Title

21A. Approval of modifications may only be granted if the applicant demonstrates that the subject property cannot otherwise reasonably achieve the minimum density.

F.1. As part of the application review process for an inclusionary housing proposal, the director may modify or waive the requirements for affordable dwelling units under this chapter if the applicant demonstrates that the cost of complying with this chapter would deprive the property owner of all economically beneficial use of the property or would create severe economic impact that unduly burdens the property owner.

2. Requests for such modifications shall clearly ~~((set forth))~~ state the facts upon which the request for relief is sought.

3. Review of a modification or waiver of the requirements of this subsection F. may include the director considering the following factors, at a minimum:

a. The severity of the economic impact caused by the application of the requirements of this chapter;

b. A modification under subsection E. of this section is not sufficient to alleviate the severity of economic impact caused by the application of the requirements of this chapter;

c. The extent to which alternative uses of the property or configurations of the proposed development would alleviate the need for the requested waiver or modification;

d. The extent to which any economic impact was due to decisions by the applicant or property owner; and

e. Other factors relevant to whether the burden should be borne by the property owner.

4. The waiver or modification may be approved only to the extent necessary to grant relief from the deprivation of all economically beneficial use of the property or severe economic impact.

5. The following factors, on their own, shall not be a sufficient basis for the director to grant a waiver or modification for the requirements of this chapter:

- a. decrease in property value;
- b. inability for a property owner to fully utilize the increase in residential development capacity through implementation of this chapter; or
- c. the fact that any such increase in residential development capacity, combined with the requirements of this chapter, did not leave the property owner in a better financial position than would have been the case with no increase in residential development capacity and no application of the requirements of this chapter.

SECTION 26360. Ordinance 19555, Section 30, and K.C.C. 21A.48.090 are hereby amended to read as follows:

A. The executive shall track the use of the inclusionary housing regulations in this chapter. The information shall be publicly available on a county website, and shall include, at a minimum, information describing:

1. The number and location of developments that applied to the department for approval and the number and location of developments that were subject to the requirements of this chapter;

2. The number and location of developments that applied for any alternative compliance, the number and location of developments that were granted such alternative compliance, and the terms of each alternative compliance;

_____ 3. The number of market rate units and the number of affordable units
constructed, including the location of all affordable units; and

_____ 4. The amount of revenue collected through in lieu and fractional fees for each
subarea geography, and the amount and location those fees were spent in the subarea
geography.

_____ B.1. In conjunction with the Comprehensive Plan update required by K.C.C.
20.18.060.B., ~~((excluding the 2024 Comprehensive Plan update,))~~ the executive shall
analyze the inclusionary housing regulations to determine whether the purposes of the
Comprehensive Plan and the inclusionary housing regulations are being met, and shall
propose code changes to address any recommendations from that analysis as part of the
Comprehensive Plan update to improve the efficacy of the regulations.

_____ 2. If the executive or council finds that the inclusionary housing regulations are
not effective at providing for affordable housing units, nothing in this section shall
prevent the executive from transmitting or the council from adopting an ordinance that
modifies the regulations outside of the timeline in K.C.C. 20.18.060.

_____ C. The department shall be available to brief the local services and land use
committee or its successor at least once per year on the implementation and overall
efficacy of the inclusionary housing regulations and the information required by this
section.

_____ SECTION 361. Ordinance 12627, Section 3, as amended, and K.C.C.
21A.55.030 are hereby amended to read as follows:

A. The demonstration projects set forth in this chapter are the only authorized demonstration projects. New or amended demonstration projects to carry out new or different goals or policies shall be adopted as part of this chapter.

B. Demonstration projects must be consistent with the King County Comprehensive Plan. Classification of a demonstration project and its provisions to waive or modify development standards must not require nor result in amendment of the Comprehensive Plan nor the Comprehensive Plan land use map.

C. Unless they are specifically modified or waived pursuant to the provisions of this chapter, the standard requirements of this title and other county ordinances and regulations shall govern all development and land uses within a demonstration project area. Property-specific development standards (P-suffix conditions) as provided in K.C.C. chapter 21A.38 shall supersede any modifications or waivers allowed by the provisions of this chapter.

D. Demonstration project sites should be selected so that any resulting amended development standards or processes can be applied to similar areas or developments. Similar areas could include those with similar mixes of use and zoning. Similar developments could include types of buildings such as commercial or ~~((multifamily))~~ multiunit and types of development such as subdivisions or redevelopment.

SECTION ~~262362~~. Ordinance 16650, Section 1, as amended, and K.C.C. 21A.55.101 are hereby amended to read as follows:

A.1. The purpose of the sustainable communities and housing demonstration projects is to provide affordable housing and workforce housing integrated into developments containing market rate housing and maximize sustainable development,

which includes; bike, pedestrian, and transit connections; a mix of housing types; and the use of recyclable materials. The demonstration projects will provide information on the application of these techniques to urban infill redevelopment and ~~((urban single family))~~ single detached residential development, some of which may ~~((include mixed use))~~ be mixed-use. The demonstration projects will also assist the county in refining regulations relating to zoning, subdivision, roads, and stormwater as they relate to sustainable development.

2. The demonstration projects will also enable the county to evaluate whether consolidated administrative approval of zoning and subdivision-related modifications or waivers and any subsequent hearings, if required, effectively speeds the development review process while maintaining land use coordination and environmental protection and whether that leads to administrative costs savings for project applicants and King County.

B. The expected benefits from the demonstration projects include: the use of innovative design and development techniques to promote sustainable communities; reduced impervious surface areas for site infrastructure; a greater use of recycled-content building materials and more efficient use of energy and natural resources; and the opportunity to identify and evaluate potential substantive changes to land use development regulations that support the development of sustainable and affordable housing.

C. A request by the applicant to modify or waive development standards for the development proposals shall be evaluated by the department of local services, permitting division, based on the criteria in subsection J. of this section. A request shall first be

either approved or denied administratively and may be further reviewed as described in subsection H.3. of this section. Approval or denial of the proposed modification or waiver shall not be construed as applying to any other development application either within the demonstration project area or elsewhere in the county.

D. A modification or waiver approved by the department of local services, permitting division, in accordance with this section shall be in addition to those modifications or waivers that are currently allowed by this title. The proposed modifications or waivers to development regulations that may be considered regarding sustainable communities and housing demonstration projects shall include only the following chapters and related public rules:

4. Design requirements: K.C.C. chapter 21A.14;
5. Landscaping and water use: K.C.C. chapter 21A.16 and K.C.C. 21A.60.060, a recodified by this ordinance;

NEW SECTION. SECTION 364. There is hereby added to K.C.C. 21A.55 a new section to read as follows:

A.1. The purpose of the regenerative development demonstration project is to determine whether innovative permit processing, site development, and building construction techniques can facilitate development that goes beyond sustainability and results in significant community and environmental benefits, including: net-positive energy and water use; improved ecological performance; health and wellness through walkability, social interaction, and elimination of toxic materials; and diverse, equitable, and affordable housing. The demonstration project will provide information on application of these techniques to a project with a mix of residential and commercial uses within Vashon Rural Town.

2. The demonstration project will also enable the county to evaluate whether consolidated administrative approval of modifications or waivers and any subsequent hearings, if required, effectively speeds the development review process while

maintaining land use coordination and environmental protection, and whether that leads to administrative costs savings for project applicants and King County.

B. Expected benefits from the demonstration project include: restoration and enhancement of local ecosystems, particularly ground and surface waters on site and in the watershed; greater use of non-toxic, sustainable building materials; more efficient use of energy and natural resources; improved resident wellbeing; resilience to climate change; diverse, equitable, and affordable housing; and the opportunity to identify and evaluate potential substantive changes to land use development regulations that support these goals.

C. A request by the applicant to modify or waive development standards for the development proposals shall be evaluated by the department of local services, permitting division, based on the criteria in subsection J. of this section. A request shall first be either approved or denied administratively and may be further reviewed as described in subsection H.3. of this section.
