Proposed No.: 2024-0408

#### STRIKING AMENDMENT TO PROPOSED ORDINANCE 2024-0408, VERSION 1

2	1	
3	On page 4, beginning on line 87, strike everything through page 246, line 4766, and	
4	insert:	
5	"BE IT ORDAINED BY THE COUNCIL OF KING COUNTY:	
6	SECTION 1. Findings:	<b>Commented [EA1]:</b> Additional findings will be developed f full Council striking amendment, depending on the regulations i
7	A. The Washington state Growth Management Act ("the-GMA") requires	adopted ordinance.
8	counties to include the best available science ("BAS") in developing policies and	
9	development regulations to protect the functions and values of critical areas; give special	
10	consideration to conservation or protection measures necessary to preserve or enhance	
11	anadromous fisheries; ensure no net loss of ecological functions and values; and consider	
12	critical areas regulations as part of the comprehensive plan review and evaluation	
13	required by RCW 36.70A.130.	
14	B. King County completed its statutorily required comprehensive plan update in	
15	December 2024 via Ordinance 19881-XXXX (Proposed Ordinance 2023-0440), Under	Commented [JN2]: Update 2024 KCCP ordinance number
16	the reasonable progress exception in RCW 36.70.130(7)(b), the county has until	

December 2025 to complete the associated updates to critical areas regulations. 17

**Commented [EA1]:** Additional findings will be developed for full Council striking amendment, depending on the regulations in the adopted ordinance.

18	C. King County reviewed BAS and updated its critical areas policies and	
19	development regulations. The county's current BAS review builds on the county's 2004	
20	BAS review and was informed by the GMA and state guidance documents, updated BAS	
21	for critical areas developed by state natural resources agencies, supplemental scientific	
22	literature, county experience in implementing critical area regulations since 2004,	
23	consideration of the county's unique land use context, and the need to meet sometimes	
24	competingmultiple GMA goals.	
25	D. The October 2024 Best Available Science Review and Updates to Critical	
26	Areas Protections report summarizes GMA requirements for review and inclusion of	
27	BAS in updates to Comprehensive Plan policies and critical areas regulations, describes	
28	tribal consultation and community engagement, details the approach and scope for BAS	
29	review, reviews Comprehensive Plan considerations, and identifies regulatory updates	
30	and non-regulatory actions to strengthen protection and ensure no net loss of critical areas	
31	functions and values. As required by GMA, where policies and development regulations	
32	depart from BAS, the report provides information and rationale to support departures,	
33	assesses potential risks to critical areas functions and values, and describes regulatory and	
34	nonregulatory actions to mitigate risk.	
35	E. Comprehensive Plan policies, land use designations, zoning classifications,	
36	and development regulations work in concert with non-regulatory actions, including land	
37	conservation and habitat restoration to ensure nonet loss of critical area functions and	
38	values.	
39	F. The proposed updates to critical areas regulations have the effect of	
40	strengthening protections for critical areas functions and values while advancing the	Com

**Commented [JN3]:** Streamlining of text.

41	goals of GMA, including the designation and protection of resource lands and industries,	
42	housing accommodation, protection of property rights, and prevention of urban sprawl,	
43	all within the unique land use and development context of unincorporated King County.	
44	G. To protect critical aquifer recharge areas, in accordance with chapter 36.70A	
45	RCW, the following provisions of the King County Code are determined to protect	
46	eritical aquifer recharge areas: K.C.C. chapters 9.04, 9.12, 9.14, 16.82, 21A.06, 21A.16,	
47	21A.22, and 21A.24, and K.C.C. 17.04.010. For the purposes of RCW 70A.355.030,	
48	King County declares critical aquifer recharges areas to be environmentally sensitive	
49	areas,	<b>Commented [JN4]:</b> Removes outdated information.
50	HG. The adoption of this ordinance completes all the requirements of the update	
51	required under RCW 36.70A.130.	
52	SECTION 287.	<b>Commented [JN5]:</b> This was at the bottom of the ordinance. It was moved (not shown in track changes) to the correct location.
53	A. Attachment A to this ordinance is adopted as amendments to the 2024 King	
54	County Comprehensive Plan, as adopted in Ordinance XXXXX (Proposed Ordinance	
55	<del>2024-0440)<u>19881</u>.</del>	
56	B. The elements of the 2024 King County Comprehensive Plan in Attachment A	
57	to this ordinance are hereby amended to read as set forth in this ordinance and are	
58	incorporated herein by this reference.	
59	C. The elements of the King County Shoreline Master Program in sections 4149,	
60	42 <u>50</u> , 44 <u>52.A., B.2., C.2., D., and E., 60, <del>52</del>61</u> , <del>53</del> 62, <u>63, <del>56</del>66</u> , <del>58</del> 67, <del>59</del> 68, <u>70, 60</u> 71, 72,	
61	<u>73, 63, 6781, 6882, 6983, 7084, 7185, 7286, 7387, 7488, 7589, 7690, 92, 7793, 7895,</u>	
62	7996, 8097, 8198, 8299, and 86104.B. of this ordinance are hereby amended to read as	
63	set forth in this ordinance and are incorporated herein by this reference.	

64	SECTION 32. Ordinance 15053, Section 3, as amended, and K.C.C. 16.82.051		
65	are hereby amended to read as follows:		
66	A. ((For the purposes of this section, t))The definitions in K.C.C. 16.82.020 apply	<b>C</b>	Commented [JN6]: Streamlining of text.
07		<b>F</b>	ormatted: Strikethrough
67	to the activities described in this section. If a term is not defined, then the definition in		
68	K.C.C. chapter 21A.06 shall apply ((to the activities described in this section, if the terms		
69	are not defined in K.C.C. 16.82.020)). Where definitions in K.C.C. 16.82.020 differ from		
70	the definitions in K.C.C. chapter 21A.06, the definitions in K.C.C. 16.82.020 ((shall	<b>F</b>	ormatted: Strikethrough
71	apply)) control. Where definitions in K.C.C. 16.82.020 differ from the definitions in		
72	K.C.C. chapter 21A. 06, the definitions in K.C.C. 16.82.020 shall control.	C	Commented [JN7]: Engrosses Ordinance 19881.
73	B. The activities in subsection D. of this section are exempted from the		<b>Commented [JN8]:</b> Edits made to conform the Executive's roposed language into the language adopted in Ordinance 19881.
74	requirement of obtaining a clearing or grading permit ((before undertaking forest		
75	practices or clearing or grading activities, as long as)), if but only if those activities	<b>C</b>	Commented [JN9]: Engrosses Ordinance 19881.
76	conducted in critical areas ((are in compliance)) comply with the standards in this chapter		
77	and in K.C.C. chapter 21A.24 <sub>3</sub> and are legally established. Activities $((not requiring))$		
78	exempt from obtaining a clearing and grading permit are not exempt from other code	C	Commented [JN10]: Engrosses Ordinance 19881.

E. The following conditions apply:

103 1. Excavation less than five feet in vertical depth((,)) or fill less than three feet

104 in vertical depth that, cumulatively on a single site since January 1, 2005, does not

105 involve more than one hundred cubic yards on a single site.

106 2. Grading that produces less than two thousand square feet of new impervious

107 surface on a single site added after January 1, 2005, or that produces less than two

108 thousand square feet of replaced impervious surface or less than two thousand square feet

109 of new plus replaced impervious surface after October 30, 2008. For purposes of this

110 subsection E.2., "new impervious surface" and "replaced impervious surface" are defined

111 in K.C.C. 9.04.020.

- 112 3. Cumulative clearing of <u>on a single site since January 1, 2005 shall be limited</u>
- 113 to less than seven thousand square feet on a single site since January 1, 2005, including,

Commented [JN27]: Engrosses Ordinance 19881.

114	but not limited to, collection of firewood and removal of vegetation for fire safety. This	
115	exception exemption shall not apply to development proposals:	Commented [JN28]: Engrosses Ordinance 19881.
116	a. regulated as a Class IV forest practice under chapter 76.09 RCW;	
117	b. in a critical drainage areas established by administrative rules;	
118	c. subject to clearing limits included in property-specific development	
119	standards and special district overlays under K.C.C. chapter 21A.38; or	
120	d. subject to Uurban gGrowth aArea significant tree retention standards under	Commented [JN29]: Engrosses Ordinance 19881.
 121	K.C.C. 16.82.156 and K.C.C. Title 21A.	
122	4. Not allowed within a wetland, aquatic area, or a tree containing an active	
123	nest. Otherwise, allowed for ((C))cutting firewood for personal use in accordance with a	<b>Commented [JN30]:</b> Change in the table above to not allow a permit exemption for cutting of firewood in a wetland, wetland
124	forest management plan ((or rural stewardship plan)) approved under K.C.C. Title 21A.	buffer, aquatic area or riparian area in addition to a wetland, aquatic area or tree with an active nest. This note is no longer applicable because it is removed from those cells.
125	For the purpose of this condition, personal use shall not include the sale or other	
126	commercial use of the firewood.)) Repealed.	
127	5. Limited to material at any solid waste facility operated by King County.	
128	6. Allowed to prevent imminent danger to persons or structures.	
129	7. Cumulative clearing of less than seven thousand square feet annually or	
130	conducted in accordance with an approved farm management plan((,)) or forest	
131	management plan(( <del>, or rural stewardship plan</del> )).	
132	8. Cumulative clearing on a single site since January 1, 2005, of less than seven	
133	thousand square feet and either:	
134	a. conducted in accordance with a farm management $plan((,))$ or a forest	
135	management plan((, or a rural stewardship plan)); or	
136	b. limited to removal with hand labor.	

137	9. When conducted as a Class I, II, III, or IV-S forest practice as defined in	
138	chapter 76.09 RCW and Title 222 WAC.	
139	10. If done in compliance with K.C.C. 16.82.065.	
140	11. Only when conducted by or at the direction of a government agency in	
141	accordance with the regional road maintenance guidelines and K.C.C. 9.04.050, creates	
142	less than two thousand square feet of new impervious surface on a single site added after	
143	January 1, 2005, and is not within or does not directly discharge to an aquatic area or	
144	wetland. For purposes of this subsection E.11., "new impervious surface" is defined in	
145	K.C.C. 9.04.020.	
146	12. Limited to clearing conducted by or at the direction of a government agency	
147	or by a private utility that does not involve:	
148	a. slope stabilization or vegetation removal on slopes; or	
149	b. ditches that are used by ((salmonids)) fish.	
150	13. In conjunction with normal and routine maintenance activities, if:	
151	a. there is no alteration of a ditch or aquatic area that is used by ((salmonids	
152	<del>fish;</del> )) <u>fish;</u>	<b>Commented [JN31]:</b> Drafting correction.
153	b. ((the structure, condition, or site maintained was constructed or created in	
154	accordance with law; and	
155	e.)) the maintenance does not expand the roadway, lawn, landscaping, ditch,	
156	culvert, or other improved area being maintained; and	
157	c. the maintenance does not involve the use of herbicides or other hazardous	
158	substances within critical areas or associated buffers, except for the removal of noxious	
159	weeds or invasive vegetation.	

160	14. If a culvert is used by ((salmonids)) fish or conveys water used by		
161	((salmonids)) fish and there is no ((adopted)) approved farm management plan, the		Commented [JN32]: Consistency edits.
162	maintenance is limited to removal of sediment and debris from the culvert and ((its))		Changes "adopted" to "approved" to reflect current practice.
163	associated inlet, invert, and outlet and the stabilization of the area within three feet of the		Formatted: Strikethrough
164	culvert where the maintenance disturbed or damaged the bank or bed and does not

235	otherwise requiring a permit, including, but not limited to, alterations within critical	
236	areas, as follows:	
237	a. understory clearing within fifteen feet of a residential structure containing	
238	habitable space or an attached deck;	
239	b. understory clearing and tree removal and pruning within ten feet of an	
240	installed aboveground nonportable liquefied petroleum gas tank;	
241	c. within thirty feet of a residential structure containing habitable space,	
242	understory clearing and tree pruning underneath a tree crown to provide up to ten feet of	
243	vertical clearance from the ground to remove ladder fuels. Tree pruning shall not exceed	
244	one-third of the tree height;	
245	d. within thirty feet of a residential structure containing habitable space, tree	
246	removal and pruning to provide up to fifteen feet of vertical clearance over driveways and	
247	roads used for emergency vehicle access;	
248	e. within thirty feet of a residential structure containing habitable space, tree	
249	removal and pruning to provide up to eighteen feet between tree crowns;	
1		

**Commented [JN47]:** Edits to align with the critical area alteration allowance in K.C.C. 21A.24.045. Any limitations listed in that section also apply to this section, as it limits activities (whether or not a permit is required).

Commented [JN48]: Streamlining of text.

Commented [JN49]: Engrosses Ordinance 19881.

250	f. tree removal and pruning to provide up to ten feet between tree crowns and
251	decks, chimneys, overhead communication cables and electrical wires, or other
252	structures; and
253	g. clearing may be allowed up to one hundred feet from a residential structure
254	containing habitable space if advised by a wildfire risk assessment conducted by a
255	professional holding a wildfire risk assessment certification or a forest stewardship plan
256	approved by the department of natural resources and parks that includes best management
257	practices to reduce wildfire risk. The removal and pruning of trees under this subsection
258	to provide clearance between tree crowns is limited to:
259	(1) twelve feet between tree crowns for trees between thirty and sixty feet
260	from a residential structure containing habitable space; and
261	(2) six feet between tree crowns for trees between sixty and one hundred feet
262	from a residential structure containing habitable space.
263	a. Within thirty feet of a residential structure containing habitable space, the
264	following is allowed:
265	(1) vegetation removal:
266	(a) within fifteen feet of the furthest attached exterior point of a residential
267	structure containing habitable space or a deck;
268	(b) within ten feet of an installed above ground propane or liquefied
269	petroleum gas tank; and
270	(c) underneath a tree crown to provide up to ten feet of clearance from the
271	ground to remove ladder fuels; and
272	(2) removal and pruning of trees to provide:

273	(a) ten feet of clearance from the ground to remove ladder fuels, as long as
274	pruning does not exceed one-third of tree height;
275	(b) fifteen feet of clearance over driveways for emergency vehicle access;
276	(c) eighteen feet between tree crowns; and
277	(d) ten feet between tree crowns and decks, chimneys, propane tanks,
278	liquefied petroleum gas tanks, overhead communication cables, overhead electrical wires,
279	or other structures; and
280	b. All activities in subsection E.23.a. of this section are also allowed up to one
281	hundred feet from a residential structure containing habitable space if such clearing is
282	advised in a wildfire risk assessment conducted by a professional holding a wildfire risk
283	assessment certification, or the activity is advised in a forest stewardship plan approved
284	by the department of natural resources and parks that includes best management practices
285	to reduce wildfire risk, except ((as follows:)) <u>that</u>
286	(((1))) removal and pruning of trees to provide clearance between tree crowns
287	is limited to providing:

437	5. The 2024 King County Flood Management Plan.	
438	B. The shoreline management goals and policies constitute the official policy of	
439	King County regarding areas of the county subject to shoreline jurisdiction under chapter	
440	90.58 RCW. As provided by WAC 173-26-191(2)(a), King County's local	
441	administrative, enforcement, and permit review procedures shall conform to chapter	
442	90.58 RCW but shall not be a part of the shoreline master program.	
443	C. Amendments to the shoreline master program do not apply to the shoreline	
444	jurisdiction until approved by the Washington state Department of Ecology ((as	Formatted: Strikethrough
445	provided)) in accordance with RCW 90.58.090. The department of local services,	
446	permitting division, shall, within ten days after the date of the Department of Ecology's	
447	approval, file a copy of the Department of Ecology's approval, in the form of an	
448	electronic copy, with the clerk of the council, who shall retain the original and provide	
449	electronic copies to all councilmembers, the chief of staff, and the lead staff of the local	
450	services and land use committee, or its successor.	Commented [JN60]: Drafting correction.
451	SECTION 64. Ordinance 10511, Section 7, as amended, and K.C.C. 20.36.100	
452	are hereby amended to read as follows:	
453	A. The definitions in this section apply throughout this section, as well as in	
454	K.C.C. 20.36.040 and K.C.C. 20.36.190, unless the context clearly requires otherwise.	
455	B. To be eligible for open space classification under the public benefit rating	
456	system, a property shall contain one or more qualifying open space resources and have at	

- 26 -

457	least five points as determined under this section. The department shall review each	
458	application and recommend award of credit for current use of the property. In making the	
459	recommendation, the department shall utilize the point system described in subsections	
460	C. and D. of this section.	
461	C. The following open space resources are each eligible for the points indicated:	
462	1. Active trail linkage - fifteen or twenty-five points. "Active trail linkage"	
463	means land in private ownership through which the owner agrees to allow public passage	
464	for active transportation, as defined in K.C.C. 14.01.005 xxx (((the new section created	
465	by)) Ordinance XXXXX (Proposed Ordinance 2023-0440), ((s)))Section 21 ((of this	
466	ordinance))), for the purpose of providing a connection between trails within the county's	Commented [JN61]: Engrosses Ordinance 19881.
467	regional trails system and local or regional attractions or points of interest, for trail users	
468	including equestrians, pedestrians, bicyclists, and other users. "Local or regional	
469	attractions or points of interest" include other trails, parks, waterways, or other	
470	recreational and open space attractions, retail centers, arts and cultural facilities,	
471	transportation facilities, residential concentrations, or similar destinations. The linkage	
472	shall be open to passage by the general public and the property owner shall enter into an	
473	agreement with the county consistent with applicable parks and recreation division	
474	policies to grant public access. To receive twenty-five points, the property owner shall	
475	enter into an agreement with the county regarding improvement of the trail, including	
476	trail pavement and maintenance. To receive fifteen points, the property owner shall agree	
477	to allow a soft-surface, nonpaved trail. The parks and recreation division is authorized to	
478	develop criteria for determining the highest priority linkages for which it will enter into	
479	agreements with property owners;	

- 27 -

480	2. Aquifer protection area - five points. "Aquifer protection area" means
481	property that has a plant community in which native plants are dominant and that
482	includes an area designated as a critical aquifer recharge area under K.C.C. chapter
483	21A.24 or applicable city critical aquifer recharge area regulations. At least fifty percent
484	of the enrolling open space area or a minimum of one acre of open space shall be
485	designated as a critical aquifer recharge area. If the enrolling open space area does not
486	have a plant community in which native plants are dominant, revegetation shall occur
487	subject to a revegetation plan reviewed and approved by the department;
488	3. Buffer to public or current use classified land - three points. "Buffer to public
489	or current use classified land" means land that has a plant community in which native
490	plants are dominant or has other natural features, such as streams or wetlands, and that is
491	abutting and provides a buffer to a publicly owned park, trail, or forest, to land legally
492	required to remain in a natural state, to a state or federal highway, or to a property
493	participating in a current use taxation program under chapters 84.33 or 84.34 RCW. The
494	buffer shall be at least fifty feet long and fifty feet ((in)) wide. Public roads may separate
495	the public land, or land in private ownership classified under chapters 84.33 or 84.34
496	RCW, from the buffering land, if the entire buffer is at least as wide and long as the
497	adjacent section of the road easement. Landscaping or other nonnative vegetation may
498	not separate the public land or land enrolled under chapters 84.33 or 84.34 RCW from the
499	native vegetation buffer. The department may grant an exception to the native vegetation
500	requirement for property along parkways with historic designation, upon review and
501	recommendation of the historic preservation officer of King County or the local
502	jurisdiction in which the property is located. Eligibility for this exception does not

- 28 -

503	extend to a property where plantings are required or existing plant communities are
504	protected under local zoning codes, development mitigation requirements, or other local
505	regulations;
506	4. Ecological enhancement land – eighteen points. "Ecological enhancement
507	land" means open space lands undergoing recovery of significantly degraded or lost
508	ecological function or processes. The following requirements shall be met:
509	a. A jurisdiction, natural resource agency, or appropriate organization has
510	committed to sponsoring the ecological enhancement project, with secured funding in
511	place before the application's public hearing;
512	b. The ecological enhancement project shall include removing significant
513	human-made structures, alterations, or impediments such as shoreline armoring, roads,
514	culverts, and wetland fill that are detrimental to significant wildlife or salmonid habitat.
515	The intent of the removal shall be to reestablish natural function or processes to the
516	project area;
517	c. The owner is responsible for providing and implementing an ecological
518	enhancement plan for the proposed project. The approved enhancement plan shall
519	include at least a statement of purpose, detailed description of work to be done, site map
520	of the project area, and specific timeline for the enhancement activities to be completed.
521	The enhancement plan is subject to approval by the department; and
522	d. The owner shall annually provide to the department a monitoring report
523	detailing the enhancement efforts' success for five years following enrollment. The
524	owner shall also provide any additional monitoring reports required by K.C.C. 20.36.190.
525	The monitoring report shall describe the progress and success of the enhancement project

- 29 -

526	and shall include photographs to document the success. Land receiving credit for this	
527	category may not receive credit for the ((rural stewardship land or)) resource restoration	
528	((categories)) category;	
529	5. Equestrian-pedestrian-bicycle trail linkage - thirty-five points. "Equestrian-	
530	pedestrian-bicycle trail linkage" means land in private ownership that the property owner	
531	allows the public to use as an off-road trail linkage for equestrian, pedestrian, or other	
532	active transportation, as defined in K.C.C. 14.01.005**** (((the new section created by))	
533	Ordinance XXXXX (Proposed Ordinance 2023-0440), ((s)))Section 21 ((of this	
534	ordinance))), uses, or that provides a trail link from a public right-of-way to a trail	Comment
535	system. Use of motorized vehicles is prohibited on trails receiving a tax reduction for	
536	this category, except for maintenance or for medical, public safety, or police	
537	emergencies. Public access is required only on that portion of the property containing the	
538	trail. The landowner may impose reasonable restrictions on access that are mutually	
539	agreed to by the landowner and the department, such as limiting use to daylight hours.	
540	To be eligible as an equestrian-pedestrian-bicycle trail linkage, the owner shall provide a	
541	trail easement to an appropriate public or private entity acceptable to the department.	
542	The easement shall be recorded with the King County recorder's office or its successor.	
543	In addition to the area covered by the trail easement, adjacent land used as pasture, barn,	
544	or stable area and any corral or paddock may be included, if an approved and	
545	implemented farm management plan is provided. Land necessary to provide a buffer	
546	from the trail to other nonequestrian uses, land that contributes to the aesthetics of the	
547	trail, such as a forest, and land set aside and marked for off road parking for trail users	
548	may also be included as land eligible for current use taxation. Those portions of private	

ed [JN62]: Engrosses Ordinance 19881.

- 550 Fencing and gates are not allowed in the trail easement area, except those that are parallel
- 551 to the trail or linkage;

552 6. Farm and agricultural conservation land - five points. "Farm and agricultural

553 conservation land" means land previously classified as farm and agricultural land under

554 RCW 84.34.020 that no longer meets the criteria of farm and agricultural land, or

traditional farmland not classified under chapter 84.34 RCW that has not been

556 irrevocably devoted to a use inconsistent with agricultural uses and has a high potential

557 for returning to commercial agriculture. The property shall be used for farm and

- 558 agricultural activities or have a high probability of returning to agriculture and the
- 559 property owner shall commit to returning the property to farm or agricultural activities by
- 560 implementing a farm management plan. An applicant shall have an approved farm
- 561 management plan in accordance with K.C.C. 21A.24.051 ((that is acceptable to the

562 department)) and K.C.C. 21A.30.045, if livestock is present, that is being implemented

563 according to its proposed schedule of activities before receiving credit for this category.

- 564 Farm and agricultural activities shall occur on at least one acre of the property. Eligible
- 565 land shall be zoned to allow agricultural uses and be owned by the same owner or held

under the same ownership. Land receiving credit for this category may not receive credit

567 for the contiguous parcels under separate ownership category;

568 7. Forest stewardship land - five points. "Forest stewardship land" means
569 property that is managed according to an approved forest stewardship plan and that is not
570 enrolled in the designated forestland program under chapter 84.33 RCW. The property
571 shall contain at least four acres of contiguous forestland, which may include land

Formatted: Strikethrough

**Commented [JN63]:** Consistency edits. Farm management plans on sites where the PBRS program applies already are reviewed and approved by the department. This is duplicative language.

**Commented [JN64]:** Adds a reference to the livestock management plan component of a farm management plan

572 undergoing reforestation, according to the approved plan. The owner shall have and 573 implement a forest stewardship plan approved by the department. The forest stewardship 574 plan may emphasize forest retention, harvesting, or a combination of both. Land 575 receiving credit for this category may not receive credit for the resource restoration ((or 576 rural stewardship land categories)) category; 577 8. Historic landmark or archeological site: buffer to a designated site - three 578 points. "Historic landmark or archaeological site: buffer to a designated site" means property adjacent to land constituting or containing a designated county or local historic 579 580 landmark or archeological site, as determined by King County's historic preservation officer or by a manager of a certified local government program in the jurisdiction in 581 which the property is located. A property shall have a plant community in which native 582 583 plants are dominant and provide a significant buffer for a designated landmark or archaeological site listed on the county or other certified local government list or register 584 of historic places or landmarks. "Significant buffer" means land and plant communities 585 586 that provide physical, visual, noise, or other barriers and separation from adverse effects to the historic resources due to adjacent land use; 587 9. Historic landmark or archeological site: designated site - five points. 588 589 "Historic landmark or archaeological site: designated site" means land that constitutes or contains a historic landmark designated by King County or other certified local 590 591 government program in the jurisdiction in which the property is located. Historic 592 landmarks include buildings, structures, districts, or sites of significance in the county's

593 historic or prehistoric heritage, such as Native American settlements, trails, pioneer

594 settlements, farmsteads, roads, industrial works, bridges, burial sites, prehistoric and

- 32 -

595	historic archaeological sites, or traditional cultural properties. A property shall be listed
596	on a county or other certified local government list or register of historic places or
597	landmarks for which there is local regulatory protection. Eligible property may include
598	property that contributes to the historic character within designated historic districts, as
599	defined by the historic preservation officer of King County or other certified local
600	government jurisdiction. The King County historic preservation officer shall make the
601	determination on eligibility;
602	10. Historic landmark or archeological site: eligible site - three points.
603	"Historic landmark or archaeological site: eligible site" means land that constitutes or
604	contains a historic property that has the potential of being designated by a certified local
605	government jurisdiction, including buildings, structures, districts, or sites of significance
606	in the county's historic or prehistoric heritage, such as Native American settlements,
607	pioneer settlements, farmsteads, roads, industrial works, bridges, burial sites, prehistoric
608	and historic archaeological sites, or traditional cultural properties. To be eligible, the
609	historic preservation officer of King County or other certified local government program
610	in the jurisdiction in which the property is located shall determine the property meets the
611	jurisdiction's criteria for designation and listing on the county or other local register of
612	historic places or landmarks for which there is local regulatory protection. Eligible
613	property may include contributing property within designated historic districts. Property
614	listed in the state or national Registers of Historic Places may qualify under this category;
615	11. Public recreation area - five points. "Public recreation area" means land
616	devoted to providing active or passive recreation use or that complements or substitutes
617	for recreation facilities characteristically provided by public agencies. Use of motorized

- 33 -

618	vehicles is prohibited, except for golf carts on golf courses, for maintenance, or for	
619	medical, public safety, or police emergencies. The facilities shall be open to the general	
620	public or to specific public user groups, such as youth, seniors, or people with disabilities.	
621	A property shall be identified by the responsible agency within whose jurisdiction the	
622	property is located as meeting the definition of public recreation area. The property	
623	owner shall use any best practices defined in K.C.C. chapter 21A.06. If a fee is charged	
624	for use, it shall be comparable to the fee charged by a similar public facility;	
625	12. Rural open space - five points. "Rural open space" means an area of ((ten))	<b>Formatted:</b> Stri
626	five or more contiguous acres of open space located outside of the Urban gGrowth	<b>Commented</b> [Earline]
627	Area as identified in the King County Comprehensive Plan that:	Commented [J
628	a. has a plant community in which native plants are dominant; or	
629	b. is former open farmland, woodlots, scrublands, or other lands that are in the	
630	process of being replanted with native vegetation and for which the property owner is	
631	implementing an approved farm management, ecological enhancement, forest	
632	stewardship, ((rural stewardship,)) or resource restoration plan acceptable to the	
633	department;	
634	13. ((Rural stewardship land - five points. "Rural stewardship land" means land	
635	zoned RA (rural area), A (agricultural), or F (forest), that has an implemented rural	
636	stewardship plan under K.C.C. chapter 21A.24 acceptable to the department. On RA-	
637	zoned properties, the approved rural stewardship plan shall meet the goals and standards	
638	of K.C.C. 21A.24.055. On A- and F-zoned properties, credit for this category is allowed	
639	if the plan meets the goals of K.C.C. 21A.24.055. A rural stewardship plan includes, but	
640	is not limited to, identification of critical areas, location of structures and significant	

kethrough

**A65]:** Allows smaller properties to use this ternative to the rural stewardship plans) N66]: Engrosses Ordinance 19881.

641	features, site-specific best management practices, a schedule for implementation, and a
642	plan for monitoring as provided in K.C.C. 21A.24.055. To be eligible as rural
643	stewardship land, the open space shall be at least one acre and feature a plant community
644	in which native plants are dominant or be in the process of native vegetation restoration,
645	reforestation, or enhancement. Land receiving credit for this category may not receive
646	credit for the ecological enhancement land, resource restoration, or forest stewardship
647	land categories;
648	14.)) Scenic resource, viewpoint, or view corridor – five points.
649	a. "Scenic resource" means an area of natural or recognized cultural features
650	visually significant to the aesthetic character of the county. The site shall be significant
651	to the identity of the local area, be visible to a significant number of the general public
652	from public rights-of-way, be of sufficient size to substantially preserve the scenic
653	resource value, and enroll at least ten acres of open space.
654	b. A "viewpoint" means a property that provides a view of an area visually
655	significant to the aesthetic character of the county. A site shall provide a view of a scenic
656	natural or recognized cultural resource in King County or other visually significant area,
657	allow unlimited public access, and be identified by a permanent sign readily visible from
658	a road or other public right-of-way.
659	c. A "view corridor" means a property that contributes to the aesthetics of a
660	recognized view corridor critical to maintaining a public view of a visually significant
661	scenic natural or recognized cultural resource. The site shall contain at least one acre of
662	open space that contributes to a view corridor visible to the public and that provides
663	views of a scenic natural resource area or recognized cultural resource significant to the

- 35 -

664	local area. The site shall have $((\mathbf{e}))$ significant cultural areas and contain significant	
665	inventoried or designated historic properties, as determined by the King County historic	
666	preservation officer or officer of another certified local government program in the	
667	jurisdiction in which the property is located in. Eligibility is subject to determination by	
668	the department or applicable jurisdiction;	
669	((15.)) <u>14.</u> Significant plant or ecological site - five points. "Significant plant or	
670	ecological site" means an area that meets the criteria for Element Occurrence established	
671	under the Washington Natural Heritage Program authorized by chapter 79.70 RCW. An	
672	Element Occurrence is a particular, on-the-ground observation of a rare species or	
673	ecosystem. An eligible site shall be listed as an Element Occurrence by the Washington	
674	Natural Heritage Program or be identified as a property that meets the criteria for an	
675	Element Occurrence. The identification shall be confirmed by a qualified expert	
676	acceptable to the department in order to qualify. The department shall notify the	Comr
677	Washington Natural Heritage Program of any verified Element Occurrence on an	
678	enrolling property. Commercial nurseries, arboretums, or other maintained garden sites	
679	with native or nonnative plantings are ineligible for this category;	
680	((16.)) <u>15.</u> Significant wildlife or $((salmonid))$ <u>fish</u> habitat - five points.	
681	a. "Significant wildlife or ((salmonid)) fish habitat" means:	
682	(1) an area used by animal species listed as endangered, threatened, sensitive,	
683		
	or candidate by the Washington state Department of Fish and Wildlife or Department of	
684	or candidate by the Washington state Department of Fish and Wildlife or Department of Natural Resources or used by species of local ((significance)) importance that are listed	
684 685		

Commented [JN67]: Engrosses Ordinance 19881.

686	(2) an area where the species listed in subsection C.(( <del>16.</del> )) <u>15.a.(</u> 1) of this	
687	section are potentially found with sufficient frequency for critical ecological processes,	
688	such as reproduction, nesting, rearing, wintering, feeding, or resting, to occur;	
689	(3) a site that meets the criteria for priority habitats as defined by the	
690	Washington state Department of Fish and Wildlife and that is so listed by the King	
691	County Comprehensive Plan or by the local jurisdiction in which the property is located;	
692	or	
693	(4) a site that meets criteria for a wildlife habitat conservation area as defined	
694	by the department or a local jurisdiction.	
695	b. To be eligible, the department, by its own determination or by expert	
696	determination acceptable to the department, shall verify that qualified species are present	
697	on the property or that the land fulfills the functions described in subsection $C.((16))$ <u>15</u> .a.	
698	of this section. To receive credit for ((salmonid)) fish habitat, the owner shall provide a	
699	buffer at least fifteen percent greater in width than required by any applicable regulation.	
700	Property consisting mainly of disturbed or fragmented open space determined by the	
701	department as having minimal wildlife habitat significance is ineligible;	
702	((17.)) <u>16.</u> Special animal site - three points. "Special animal site" means a site	
703	that includes a wildlife habitat network identified by the King County Comprehensive	
704	Plan or individual jurisdictions through the Growth Management Act, chapter 36.70A	
705	RCW, or a biodiversity area and corridor identified by the Washington state Department	
706	of Fish and Wildlife's priority habitats and species project as of the date of the application	
707	as identified by King County or local or state jurisdiction or by expert verification	
708	acceptable to the department or local jurisdiction. Property consisting mainly of	

Commented [JN68]: Correction.

709	disturbed or fragmented open space determined by the department to have minimal	
710	wildlife habitat significance is ineligible for this category;	
711	((18.)) <u>17.</u> Surface water quality buffer – five, eight, or ten total points. "Surface	
712	water quality buffer" means an undisturbed area that has a plant community in which	
713	native plants are dominant abutting a lake, pond, stream, shoreline, wetland, or marine	
714	waters on or abutting the property, that provides buffers beyond that required by any	
715	applicable regulation. To receive five points, the buffer shall be at least fifty percent	
716	wider than the buffer required by any applicable regulation. To receive eight points, the	
717	buffer shall be at least two times the required width. To receive ten points, the buffer	
718	shall be at least three times the required width. The qualifying buffer shall be longer than	
719	twenty-five feet and shall be preserved from clearing or maintenance, unless this area is	
720	part of a department-approved ecological enhancement, farm management, forest	
721	stewardship, ((rural stewardship,)) or resource restoration plan. Grazing use by livestock	
722	on such land is prohibited;	
723	((19.)) <u>18.</u> Urban open space - five points.	
724	a. "Urban open space" means land located within the boundaries of a city or	
725	within the <b><u>aUrban gG</u>rowth <u>aA</u>rea that has a plant community in which native plants are</b>	<b>Commented [JN69]:</b> Engrosses Ordinance 19881.
726	dominant and that under the applicable zoning is eligible for more-intensive development	
727	or use. The enrolling area shall be at least one acre, or be at least one-half acre if the land	
728	meets one of the following criteria:	
729	(1) the land conserves and enhances natural or scenic resources;	
730	(2) the land protects streams or water supply;	

- 38 -

731	(3) the land promotes conservation of soils, wetlands, beaches, or tidal
732	marshes;
733	(4) the land enhances the value to the public of adjacent parks, forests,
734	wildlife preserves, nature reservations or sanctuaries, or other open space;
735	(5) the land enhances recreation opportunities for the general public; or
736	(6) the land preserves visual quality along highways, roads, and streets or
737	scenic vistas.
738	b. Owners of noncontiguous properties that together meet the minimum
739	acreage requirement may jointly apply under this category if each property is closer than
740	seventy-five feet to one other property in the application and if each property contains an
741	enrolling open space area at least as large as the minimum zoned lot size; and
742	((20.)) <u>19.</u> Watershed protection area - five points. "Watershed protection area"
743	means property contributing to the forest cover that provides run-off reduction and
744	groundwater protection. The property shall consist of contiguous native forest or be in
745	the process of reforestation. The enrolling forested area shall consist of additional forest
746	cover beyond that required by county or applicable local government regulation and shall
747	be at least one acre or sixty-five percent of the property acreage, whichever is greater. If
748	reforestation or improvements to the forest health are necessary, the property owner shall
749	provide and implement an ecological enhancement, a forest stewardship, or resource
750	restoration((, or rural stewardship)) plan that addresses this need and is acceptable to the
751	department.
752	D. Property qualifying for an open space category in subsection C. of this section

- 39 -

may receive credit for additional points as follows:

753

754	1. Conservation easement or historic preservation easement - eighteen points.
755	"Conservation easement or historic preservation easement" means land on which an
756	easement is voluntarily placed that restricts, in perpetuity, further potential development
757	or other uses of the property. The easement is subject to approval by the department and
758	shall be recorded with the King County recorder's office or its successor. The easement
759	shall be conveyed to the county or to an organization acceptable to the department, such
760	as a land trust or conservancy. Historic preservation easements are subject to approval by
761	the historic preservation officer of King County or of the local government jurisdiction in
762	which the property is located. An easement required by zoning, subdivision conditions,
763	or other land use regulation is not eligible unless an additional substantive easement area
764	is provided beyond that otherwise required;
765	2. Contiguous parcels under separate ownership - two points.
766	a. "Contiguous parcels under separate ownership" means at least two or more
767	parcels under different ownership where either:
768	(1) the enrolling parcels and open space acreage abut each other without a
769	significant human-made barrier separating them; or
770	(2) the enrolling parcels do not abut each other, but abut a publicly owned
771	open space, without a significant human-made barrier separating the publicly owned open
772	space and the open space portion of the parcels seeking open space classification.
773	b. Award of this category requires a single application by multiple owners and
774	parcels with identical qualifying public benefit rating system resources. Only a single
775	application fee is required.

- 40 -

776	c. Contiguous parcels of land with the same qualifying public benefit rating
777	system resources are eligible for treatment as a single parcel if open space classification
778	is sought under the same application except as otherwise prohibited by the farm and
779	agricultural conservation land category. Each parcel need not meet the minimum acreage
780	requirements for a resource category so long as the total area of all enrolling land
781	combined meets any required minimum acreage requirements. The owners of each
782	parcel included in the application shall agree to identical terms and conditions for
783	enrollment in the program.
784	d. Individual parcels or portions of parcels may be withdrawn or removed from
785	open space classification, consistent with all applicable rules and regulations. The
786	continued eligibility of all parcels and associated acreage remaining in open space
787	classification accepted under the same application is dependent upon the continued
788	qualification for a resource category or categories.
789	e. Points are awarded for each participating owner above one owner and accrue
790	to all owners of a single application. The withdrawal or removal of all enrolled acreage
791	associated with an owner results in the loss of two points for each remaining owner;
792	3. Easement and access - thirty-five points. "Easement and access" means that
793	the property has at least one qualifying open space resource, unlimited public access or
794	limited public access due to resource sensitivity, and a conservation easement or historic
795	preservation easement in perpetuity in a form and with conditions acceptable to the
796	department. A property shall only be eligible in this category if it receives credit for an
797	open space category and for the conservation easement or historic easement in perpetuity
798	category. The owner shall agree to allow public access to the portion of the property

- 41 -

799	designated for public access in the easement. An easement required by zoning,	
800	subdivision conditions, or other land use regulation is not eligible, unless there is	
801	additional easement area beyond that required. Credit for this category may not overlap	
802	with the equestrian-pedestrian-bicycle trail linkage;	
803	4. Public access - points depend on type and frequency of access allowed.	
804	"Public access " means the general public is allowed access on an ongoing basis for uses	
805	such as recreation, education, or training. Access shall be allowed on the portion of the	
806	property that is designated for public access. The landowner may impose reasonable	
807	restrictions on access, such as limiting use to daylight hours, agreed to by the department.	
808	No physical barriers may limit reasonable public access or negatively affect an open	
809	space resource. A property owner shall demonstrate that the property is open to public	
810	access and is used by the public. Award of public access points for historic ((properties))	
811	properties is subject to approval by the historic preservation officer of King County or a	Con
812	certified officer of another local government jurisdiction in which the property is located.	
813	The property owner may be required to furnish and maintain signage according to county	
814	specifications.	
815	a. Unlimited public access - five points. Year-round access by the general	
816	public is allowed without special arrangements with the property owner.	
817	b. Limited public access ((because of)) due to resource sensitivity - five points.	
818	Access may be reasonably limited by the property owner due to the sensitive nature of	
819	the resource, with access provided only to appropriate user groups. The access allowed	
820	should generally be for an educational, scientific, or research purpose and may require	
821	special arrangements with the owner.	

Commented [JN70]: Technical clean-up

822	c. Seasonally limited public access - three points. Access by the public is
823	allowed only for part of the year due to due to seasonal conditions, as mutually agreed to
824	by the landowner and the department.
825	d. Environmental education access - three points. The landowner enters into
826	an agreement with a school, with an organization with 26 U.S.C. Sec. 501(c)(3) tax
827	status, or, with the agreement of the department, with another community organization
828	that allows membership by the general public to provide environmental education to its
829	members or the public at large. The department shall verify that the enrolled portion of
830	the property has value for environmental education purposes.
831	e. None or members-only - zero points. No public access is allowed or the
832	access is allowed only by members of the organization using or owning the land; and
833	5. Resource restoration – five points. "Resource restoration" means restoration
834	of an enrolling area of property benefiting an area in an open space resource category.
835	Emphasis is placed on the restoration of native vegetation associated with anadromous
836	fish rearing habitat, riparian zones, migration corridors and wildlife, forest, stream, and
837	wetland habitats. The owner shall provide and implement a restoration plan approved by
838	the department. The plan may be developed in cooperation with a natural resource expert
839	or agency. The approved restoration plan shall, at a minimum, include a purpose
840	statement, a description of restoration work to be done, a detailed site map of the area to
841	be restored, a specific timeline for the restoration activities to be completed and a
842	monitoring schedule for the restoration project's first five years. Historic resource
843	restoration is subject to approval by the King County historic preservation officer or
844	officer of another certified local government in the jurisdiction in which the property is

- 43 -

845	located and shall be accompanied by a long-term maintenance plan. The owner shall also	
846	provide to the department a yearly monitoring report for at least five years following	
847	enrollment in the public benefit rating system program. The report shall describe the	
848	progress and success of the restoration project and shall include photographs to document	
849	the success. Land receiving credit for this category may not receive credit for the	
850	ecological enhancement land((,)) or forest stewardship land((, or rural stewardship land))	
851	categories.

976	found within the surrounding ecoregion that are predicted to maintain their abundance	
977	under climate change, as identified by the department of natural resources and parks	
978	currently or formerly native to the surrounding ecoregion that are predicted to maintain	
979	their abundance under climate change.	<b>Commented [JN83]:</b> Edits to place DNRP-identification first in the definition

980	SECTION <u>1216.</u> Ordinance 10870, Section 80, as amended, and K.C.C.	
981	21A.06.200 are hereby amended to read as follows:	
982	Coal mine hazard area: an area <u>directly</u> underlain, <u>adjacent to</u> , or (( <del>directly</del> ))	
983	affected by operative or abandoned subsurface coal mine workings such as adits, tunnels,	
984	drifts, or air shafts.	
985	<u>NEW SECTION. SECTION 13.</u> There is hereby added to K.C.C. chapter 21A.06	
986	a new section to read as follows:	
987	Commercial production of agricultural products: agriculture conducted by an	
988	operator who has done one or more of the following:	
989	A. Filed IRS Schedule F for a minimum of three years;	
990	B. Obtained and currently holds a United States Department of Agriculture	
991	Organic Certification producer certificate; or	
992	C. Enrolled, and remains in good standing, in the current use classification "Farm	
993	and agricultural land", under chapter 84.34 RCW.	<b>Commented [JN84]:</b> Moved into the regulatory section of the CAO in 21A.24.051
994	SECTION 17. Ordinance 11481, Section 1, and K.C.C. 21A.06.253C are hereby	
995	amended to read as follows:	
996	Critical aquifer recharge area: an area with a critical recharging effect on aquifers	
997	used for potable water or areas where an aquifer is susceptible to reduced recharge, and	Commented [JN85]: Provides additional detail of what a CARA is and creates consistent with WAC 365-190-030
998	designated on the critical aquifer recharge area map adopted by K.C.C. 21A.24.311 ((that	Formatted: Strikethrough
999	has)). Critical aquifer recharge areas include areas with a high susceptibility to ground((	Formatted: Strikethrough
1000	))water contamination or an area of medium susceptibility to ground((_))water	Formatted: Strikethrough
1001	contamination that is located within a sole source aquifer or within an area approved in	
1002	accordance with chapter 246-290 WAC as a wellhead protection area for a municipal or	

1003	district drinking water system, or an area over a sole source aquifer and located on ((an	
1004	island surrounded by saltwater)) Vashon-Maury Island. Susceptibility to ground((	<b>Formatted:</b> Strikethrough
1005	))water contamination occurs where there is a combination of permeable soils, permeable	
1006	subsurface geology and ground((-))water close to the ground surface.	<b>Formatted:</b> Strikethrough
1007	SECTION <u>1418.</u> Ordinance 15051, Section 24, and K.C.C. 21A.06.254 are	
1008	hereby amended to read as follows:	
1009	Critical area: any area that is subject to natural hazards or a land feature that	
1010	supports unique, fragile, or valuable natural resources including fish, wildlife, or other	
1011	organisms or their habitats or such resources that carry, hold, or purify water in their	
1012	natural state. "Critical area" includes the following areas:	
1013	A. (( <del>Aquatic areas;</del>	
1014	B. Coal mine hazard areas;	
1015	C.)) Critical aquifer recharge areas;	
1016	((D. Erosion hazard areas;	
1017	E. Flood hazard areas;	
1018	F. Landslide hazard areas;	
1019	G. Seismic hazard areas;	
1020	H. Steep slope hazard areas;	
1021	I. Volcanic hazard areas;	
1022	J.)) B. Frequently flooded areas, regulated as fFlood hHazard aAreas, including;	
 1023	1. Floodplains;	
1024	2. Special flood hazard areas, as shown on the Flood Insurance Rate Map;	
1025	3. Zero-rise flood fringe;	

1026	4. Zero-rise floodways;
1027	5. FEMA floodways; and
1028	6. Channel migration zones:
1029	C. Fish and wildlife habitat conservation areas, including:
1030	1. Aquatic areas;
1031	2. Riparian areas:
1032	3. Wildlife habitat conservation areas; and
1033	4. Wildlife habitat networks;
1034	D. Geologically hazardous areas, including:
1035	1. Alluvial fan hazard areas;
1036	2. Channel migration zones;
1037	3. Coal mine hazard areas;
1038	4. Erosion hazard areas;
1039	5. Landslide hazard areas:
1040	6. Seismic hazard areas;
1041	7. Steep slope hazard areas;
1042	8. Tsunami hazard areas; and
1043	9. Volcanic hazard areas; and
1044	$\underline{E}$ . Wetlands((;
1045	K. Wildlife habitat conservation areas; and
1046	L. Wildlife habitat networks)).
1047	<u>NEW SECTION. SECTION 1519</u> . There is hereby added to K.C.C. chapter
1048	21A.06 a new section to read as follows:

1049	Critical freshwater habitat: portions of streams, rivers, wetlands, and lakes within	
1050	shorelines of the state, and floodplains designated as shorelines of the state in the	
1051	shoreline master program.	
1052	NEW SECTION. SECTION <u>1620</u> . There is hereby added to K.C.C. chapter	
1053	21A.06 a new section to read as follows:	
1054	Debris flow: a moving mass of rock fragments, soil, and mud, with where more	Commented [EA86]: Edits for readability
1055	than half of the particles being are larger than sand size.	
1056	NEW SECTION. SECTION <u>1721</u> . There is hereby added to K.C.C. chapter	
 1057	21A.06 a new section to read as follows:	
1058	Ecological professional: a person having a degree in ecology, wildlife biology,	
1059	wetland biology, fisheries, botany, soil science, environmental science, natural resource	
1060	management, or a closely related field, with a minimum of five years of professional	
1061	experience related to the subject ecological field. Professional certification in a relevant	
1062	ecological field can be substituted for two years of work-professional experience.	<b>Commented [JN87]:</b> Technical correction. Consistency with previous sentence.
1063	SECTION <u>1822.</u> Ordinance 10870, Section 123, as amended, and K.C.C.	(*)
 1064	21A.06.415 are hereby amended to read as follows:	
1065	Erosion hazard area: ((an)) a geologically hazardous area underlain by soils that	Commented [JN88]: Edits for readability
1066	((is)) are subject to severe erosion when disturbed. ((These)) Such soils include, but are	
1067	not limited to $((\overline{a}))$ :	Formatted: Strikethrough

1083	SECTION 1923. Ordinance 15051, Section 41, and K.C.C. 21A.06.451 are	
1084	hereby amended to read as follows:	
1085	Farm field access drive: a((+)) paved or impervious ((surface constructed to	
1086	provide a fixed)) route or path used for moving livestock, produce, equipment, or	
1087	supplies to and from farm fields, and farm structures for agricultural activities on a	
1088	property that is within an Agricultural Production District, enrolled in the Farmland	
1089	Preservation Program, or zoned A	 <b>Commented [JN89]:</b> This regulation is moved out of the definition and into the regulations in K.C.C. 16.82 and 21A.
1090	NEW SECTION. SECTION 2024. There is hereby added to K.C.C. chapter	
 1091	21A.06 a new section to read as follows:	
1092	Fish and wildlife habitat conservation areas:	

1093	<u>A. aA</u> reas that serve a critical role in sustaining needed habitats and species for	
1094	the functional integrity of the ecosystem, and which, if altered, may reduce the likelihood	
1095	that the species will persist over the long term. These areas may include, but are not	
1096	limited to, rare or vulnerable ecological systems, communities, and habitat or habitat	
1097	elements including seasonal ranges, breeding habitat, riparian areas, aquatic areas,	
1098	wildlife habitat network, and areas with high population density or species richness.	
1099	B. Fish and wildlife habitat conservation areas do not include artificial water	
1100	carrying features or constructs such as irrigation delivery systems, irrigation	
1101	infrastructure, irrigation canals, or drainage ditches that lie within the boundaries of, and	
1102	are maintained by, a port district or an irrigation district or company.	
1103	SECTION 25. K.C.C. 21A.06.578, as amended by this ordinance, is hereby	
1104	recodified as a new section in K.C.C. chapter 21A.06 to follow K.C.C. 21A.06.468.	
1105	SECTION 26. Ordinance 15051, Section 64, and K.C.C. 21A.06.578 are hereby	
1106	amended to read as follows:	<b>Commented [JN90]:</b> Edits to broaden definition of fish habitat from only those used salmonids to all native fish species.
1107	((Habitat, f))Fish habitat: habitat that is used by native fish species, including	Formatted: Strikethrough
1108	anadromous or resident salmonids, at any life stage at any time of the year ((including	
1109	potential habitat likely to be used by anadromous or resident salmonids)). "Fish habitat"	
1110	includes streams, wetlands, lakes, off-channel habitat, floodplains, tidal flats, tidal	
1111	channels, and potential habitat that is upstream ( $(of_3)$ ) or landward of( $(_3)$ ) human-made	Formatted: Strikethrough
1112	barriers that could be accessible to(( $\frac{1}{6}$ and)) or ((eould be)) used by(( $\frac{1}{6}$ )) fish upon removal	Formatted: Strikethrough
1112	of the homiore ((This includes off channel behitst flood refuses tide! flots tide!	Formatted: Strikethrough
1113	of the barriers. ((This includes off channel habitat, flood refuges, tidal flats, tidal	Formatted: Strikethrough
1114	channels, streams and wetlands.))	Formatted: Strikethrough

1115	NEW SECTION. SECTION 2127. There is hereby added to K.C.C. chapter	
 1116	21A.06 a new section to read as follows:	
1117	Geologically hazardous areas: areas susceptible to erosion, sliding, earthquake, or	
1118	other geological events. Areas classified as geologically hazardous areas include one or	
1119	more of the following:	Commented [JN91]: Technical correction
1120	A. Alluvial fan hazard areas;	
1121	B. Channel migration zones;	
1122	C. Coal mine hazard areas;	
1123	D. Erosion hazard areas;	
1124	E. Landslide hazard areas;	
1125	F. Seismic hazard areas;	
1126	G. Steep slope hazard areas;	
1127	H. Tsunami hazard areas; and	
1128	I. Volcanic hazard areas.	
1129	<u>NEW SECTION. SECTION 2228.</u> There is hereby added to K.C.C. chapter	
1130	21A.06 a new section to read as follows:	
1131	Geological professional: a geotechnical engineer or geologist, licensed in	
1132	Washington state and experienced in analyzing geologic, hydrologic, and ground-water	
1133	flow systems, as well as, preparing reports for the relevant geological subdisciplines.	
1134	NEW SECTION. SECTION 2329. There is hereby added to K.C.C. chapter	
1135	21A.06 a new section to read as follows:	
1136	Grazing area buffer: a designated area contiguous to a wetland or aquatic area	
1137	from which grazing-livestock are excluded.	

1138	SECTION 2430. K.C.C. 21A.06.1331, as amended by this ordinance, is hereby			
1139	recodified as a new section in K.C.C. chapter 21A.06 to follow K.C.C. 21A.06.585.			
1140	SECTION 2531. Ordinance 15051, Section 107, and K.C.C. 21A.06.1331 are			
l 1141	hereby amended to read as follows:			
1142	((Tree, hazard)) Hazard tree: any tree with a structural defect, combination of			
1143	defects or disease resulting in structural defect that, under the normal range of			
1144	environmental conditions at the site, will result in the loss of a major structural			
1145	component of that tree in a manner that will:			
1146	A. Damage a ((residential ((structure)) building, ((or)) accessory structure, or		<b>Commented [JN92]:</b> Removes "approved" for parking. Subsequent edits made for flow with the removal.	
1147	parking for a residential use, place of employment, ((or)) public assembly ((or approved	1.	Formatted: Strikethrough	٦
1147	parking for a residential use, place of employment, (( <del>or</del> )) public assembly (( <del>or approved</del>	$\sum_{i=1}^{n}$	Formatted: Strikethrough	1
1148	parking for a residential structure or accessory structure or place of employment or public		Formatted: Strikethrough	Ĵ

Ordinance 10870, Section 176, as amended, and K.C.C.</li> <li>21A.06.680 are hereby amended to read as follows:</li> <li>Landslide hazard area: an area subject to severe risk of landslide, such as:</li> <li>A. An area with a combination of:</li> <li>1. Slopes steeper than fifteen percent of inclination;</li> </ul>			

1160	B. An area that has shown movement during the Holocene epoch, which is from	
1161	ten thousand years ago to the present, or that is underlain by mass wastage debris from	
1162	that epoch;	
1163	C. Any area potentially unstable as a result of rapid stream incision, stream bank	
1164	erosion or undercutting by wave action;	
1165	D. An area that shows evidence of or is at risk from snow avalanches; or	
1166	E. An area located on an alluvial fan(( <del>, presently or potentially subject to</del> )) that is	<b>Formatted:</b> Strikethrough
1167	susceptible to episodic inundation ((by debris flows or deposition of stream transported	Formatted: Strikethrough
1168	sediments)) sedimentation, and erosional impacts.	<b>Commented [JN93]:</b> Edits to when alluvial fans are part of landslide hazard areas
1169	SECTION 2633. Ordinance 10870, Section 190, as amended, and K.C.C.	
1170	21A.06.750 are hereby amended to read as follows:	
1171	Mitigation: an action taken to compensate for <u>unavoidable ((adverse))</u>	Formatted: Strikethrough
1172	unavoidable impacts to the environment resulting from a development activity or	Commented [JN94]: Consistency edits.
1173	alteration after-all appropriate and practicable avoidance and minimization measures have	
1174	been accounted for and implemented mitigation sequencing is applied.	Commented [JN95]: Changes to use consistent terminology ("avoidance and mitigation sequencing") throughout code
1175	NEW SECTION. SECTION 2734. There is hereby added to K.C.C. chapter	
1 1176	21A.06 a new section to read as follows:	
1177	Notice of map amendment:	
1178	A. a <u>A</u> letter issued by the department of natural resources and parks indicating that	
1179	the classification of a critical area has been changed from the classification shown on a one	Commented [JN96]: Streamline language
1180	of the following critical areas maps adopted by King County ordinance or public rule:	<b>Commented [EA97]:</b> Clarifies what "adopted" means, and then specifies the maps that are officially adopted.
1181	1. Critical aquifer recharge areas;	
1182	2. Wildlife habitat networks;	
I		

1183	3. Channel migration zones; or	
1184	4. Flood hazard areas.	
1185	<b><u>B.</u></b> The notice of map amendment may indicate that an area has been reclassified,	
1186	declassified, or newly classified as a critical area.	
1187	NEW SECTION. SECTION 2835. There is hereby added to K.C.C. chapter	
1188	21A.06 a new section to read as follows:	
1189	Revegetation: the reestablishment of vegetation within an area that reflects historic	
1190	natural conditions or native vegetation types that are is well suited to thrive in the area.	<b>Commented [JN98]:</b> Broadens the definition of revegetation to any plantings. Where specific references to native vegetation types
1191	NEW SECTION. SECTION 2936. There is hereby added to K.C.C. chapter	are called out, this is done in the regulatory sections of code.
1192	21A.06 a new section to read as follows:	
1193	Riparian area: a designated area contiguous to an aquatic area that provides fish and	
1194	wildlife habitat, protects adjacent aquatic fish and wildlife species and habitat, and protects	
1195	water quality. Riparian areas protect the functions and values of aquatic areas and reduce	<b>Commented [JN99]:</b> Added language in on protection of adjacent aquatic areas
1196	impacts from adjacent land uses through various physical, chemical, or biological processes.	
1197	SECTION <u>3037</u> . Ordinance 10870, Section 243, as amended, and K.C.C.	
1198	21A.06.1015 are hereby amended to read as follows:	
1199	Salmonid: a fish native to the Puget Sound region that is a member of the fish	
1200	family Salmonidae, including(( <del>, but not limited to</del> )):	
1201	A. Chinook, coho, chum, sockeye, and pink salmon;	
1202	B. Rainbow, steelhead, and cutthroat ((salmon, which are also known as)) trout;	
1203	C. (( <del>Brown trout;</del>	
1204	D. Brook, b))Bull trout, which is ((also known as)) a type of char, and Dolly	
1205	Varden char;	

- 59 -

1206	(( <del>E.</del> )) <u>D.</u> Kokanee; (( <del>and</del>	
1207	E.)) E. Pygmy whitefish; and	
1208	<u>F. Mountain whitefish</u> .	
1209	NEW SECTION. SECTION 3438. There is hereby added to K.C.C. chapter	
 1210	21A.06 a new section to read as follows:	
1211	Special flood hazard area or area of special flood hazard: the land subject to	
1212	inundation by the base flood. Special flood hazard areas ("SFHA" or area of special	
1213	flood hazard) are designated on flood insurance rate maps with the letters "A" or "V"	Commented [EA100]: Edits for clarity
 1214	including AE, AO, AH, A1-99, and VE.	
1215	NEW SECTION. SECTION 3239. There is hereby added to K.C.C. chapter	
 1216	21A.06 a new section to read as follows:	
1217	Species of local importance: a species designated by the county in the	Commented [EA101]: Edits for readability
 1218	Comprehensive Plan to be of local concern due to their population status, sensitivity to	
1219	habitat alteration, or that are is a game species.	
1220	SECTION <u>3340.</u> Ordinance 10870, Section 288, as amended, and K.C.C.	
l 1221	21A.06.1240 are hereby amended to read as follows:	
1222	Stream: an aquatic area where surface water produces a channel, not including a	
1223	wholly artificial channel((;)) unless ((i+)) the artificial channel is:	
1224	A. Used by ((salmonids)) fish; or	
1225	B. Used to convey a stream or wetland that occurred naturally before	
1226	construction of the artificial channel.	
1227	NEW SECTION. SECTION <u>3441</u> . There is hereby added to K.C.C. chapter	
l 1228	21A.06 a new section to read as follows:	

1229	Tsunami hazard area: a geologically hazardous area susceptible to flooding,	
1230	in undation, debris impact, or mass wasting as the result of a tsunami in a reas, including, but	
1231	not limited to, those areastsunami hazard areas shown on the Washington Geological Survey	<b>Commented [JN102]:</b> Clarifies what the area on the survey i
1232	Digital Data Series 22, version 2, 01, December 2023 October 2024, and V1-V30, VE, or V	<b>Commented [JN103]:</b> Updates to the latest version as of Ma 2025.
1233	zones shown on the Flood Insurance Rate Maps.	
1234	SECTION 3542. Ordinance 10870, Section 314, as amended, and K.C.C.	
1235	21A.06.1370 are hereby amended to read as follows:	
1236	Volcanic hazard area: ((an)) a geologically hazardous area subject to pyroclastic	
1237	flows, lava flows, debris avalanche, or an inundation by debris flows, mudflows, lahars,	
1238	or related flooding resulting from volcanic activity on Mount Rainier, delineated based	
1239	on recurrence of an event equal in magnitude to the prehistoric Electron mudflow.	
1240	SECTION 43. Ordinance 10870, Section 323, and K.C.C. 21A.06.1391 are	
1241	hereby amended to read as follows:	
1242	Wetland:	
1243	A. An area that is inundated or saturated by ground or surface water at a	
1244	frequency and duration sufficient to support, and under normal circumstances does	
1245	support, a prevalence of vegetation typically adapted for life in saturated soil conditions.	
1246	B. Wetlands generally include swamps, marshes, bogs, and similar areas.	
1247	Wetlands may include those artificial wetlands intentionally created from nonwetland	
1248	areas created to mitigate conversion of wetlands.	
1249	C. Wetlands do not include those artificially created wetlands intentionally	
1250	created from nonwetlands sites, including, but not limited to:	
1251	1. Surface water conveyances for drainage or irrigation;	

	Redline provided for illustrative purposes only	
1252	2. Grass-lined swales;	
1253	3. Canals;	
1254	4. Detention facilities such as flow control facilities or wetponds;	<b>Commented [JN104]:</b> Corrects drafting error in Ordinance 19034
1255	5. Wastewater treatment facilities;	
1256	6. Farm ponds;	
1257	7. Landscape amenities; or	
1258	((9.)) 8. Those wetlands created after July 1, 1990, that were unintentionally	Formatted: Strikethrough
1259	created as a result of the construction of a road, street, or highway.	
1260	SECTION <u>3644.</u> Ordinance 10870, Section 321, and K.C.C. 21A.06.1405 are	
1261	hereby amended to read as follows:	
1262	Wetland functions: ((natural processes performed by wetlands including	
1263	functions which are important in facilitating food chain production, providing habitat for	
1264	nesting, rearing and resting sites for aquatic, terrestrial and avian species, maintaining the	
1265	availability and quality of water, acting as recharge and discharge areas for groundwater	
1266	aquifers and moderating surface and storm water flows, as well as performing other	
1267	functions including, but not limited to, those set forth in 33 CFR 320.4(b)(2), 1988)) the	
1268	physical, biological, chemical, and geologic interactions among different components of	
1269	the environment that occur within a wetland. Wetland functions include, but are not	
1270	limited to, functions that improve water quality, functions that change the water regime in	
1271	a watershed such as flood storage, and functions that provide habitat for plants and	
1272	<u>animals</u> .	
1273	NEW SECTION. SECTION <u>3745.</u> There is hereby added to K.C.C. chapter	
1274	21A.06 a new section to read as follows:	

1275	Wetland values: estimates of the worth, merit, quality, or importance of wetland		<b>Commented [JN105]:</b> Consistency edits between KCCP and 21A
1276	processes, characteristics, or attributes that are considered to benefit society. <u>Values vary</u>		
1277	by watershed or by community. Examples of wetland values include education, research,		
1278	aesthetics, and recreation.		
1279	NEW SECTION. SECTION <u>3846</u> . There is hereby added to K.C.C. chapter		
 1280	21A.06 a new section to read as follows:		
1281	Wildlife lighting: measures applied to exterior lighting designed and installed to		<b>Commented [JN106]:</b> Reorient definition from a "measure" for lighting, to the lighting itself
 1282	reduce impacts to wildlife.		(
1283	SECTION <u>3947.</u> Ordinance 10870, Section 448, as amended, and K.C.C.		
 1284	21A.24.010 are hereby amended to read as follows:		
1285	The purpose of this chapter is to implement the goals and policies of the Growth		
1286	Management Act, chapter 36.70A RCW, Washington state Environmental Policy Act,		
l 1287	chapter 43.21C RCW, and the King County Comprehensive Plan, which call for		
1288	protection of the natural environment and the public health and safety by:		
1289	A. Establishing development and alteration standards to protect functions and		
1290	values of critical areas;		
1291	B. Protecting members of the general public and public resources and facilities

1386

D. The following alteration conditions apply:

<sup>1388</sup> limitations of subsection D.3. of this section.

1389 2. ((Only allowed in a buffer of a lake that is twenty acres or larger on a lot that

1390 was created before January 1, 2005, if:

1391	a. at least seventy five percent of the lots abutting the shoreline of the lake or
1392	seventy-five percent of the lake frontage, whichever constitutes the most developable
1393	lake frontage, has existing density of four dwelling units per acre or more;
1394	b. the development proposal, including mitigation required by this chapter, will
1395	have the least adverse impact on the critical area;
1396	c. existing native vegetation within the critical area buffer will remain
1397	undisturbed except as necessary to accommodate the development proposal and required
1398	building setbacks;
1399	d. access is located to have the least adverse impact on the critical area and
1400	eritical area buffer;
1401	e. the site alteration is the minimum necessary to accommodate the
1402	development proposal and in no case in excess of five thousand square feet;
1403	f. the alteration is no closer than:
1404	(1) on a site with a shoreline environment designation of high intensity or
1405	residential, the greater of twenty-five feet or the average of the setbacks on adjacent lots
1406	on either side of the subject property, as measured from the ordinary high water mark of
1407	the lake shoreline;
1408	(2) on a site with a shoreline environment designation of rural, conservancy,
1409	resource or forestry, the greater of fifty feet or the average of the setbacks on adjacent
1410	lots on either side of the subject property, as measured from the ordinary high water
1411	mark; and

1412	(3) on a site with a shoreline environment designation of natural, the greater	
1413	of one hundred feet or the average of the setbacks on adjacent lots on either side of the	
1414	subject property, as measured from the ordinary high water mark; and	
1415	g. to the maximum extent practical, alterations are mitigated on the	
1416	development proposal site by enhancing or restoring remaining critical area buffers.))	
1417	Repealed Only structures wholly or partially supported by a tree and used as accessory	<b>Commented [JN153]:</b> Moves Condition 64 to 2 and repeals 64.
1418	living quarters or for play and similar uses described in K.C.C. 16.02.240.1, subject to the	
1419	following:	
1420	a. not allowed in wildlife habitat conservation areas, wetlands, or aquatic	
1421	areas;	
1422	b. the structure's floor area shall not exceed two hundred square feet, excluding	
1423	a narrow access stairway or landing leading to the structure;	
1424	c. the structure shall be located as far from wetlands or aquatic areas as	
1425	practical, but in no case closer than seventy-five feet from a wetland or an aquatic area;	
1426	d. only one tree-supported structure within a critical area buffer or riparian area	
1427	is allowed on a lot;	
1428	e. all construction materials for the structure, including the platform, pilings,	
1429	exterior and interior walls, and roof, shall be constructed of nontoxic material, such as	
1430	nontreated wood, vinyl-coated wood, nongalvanized steel, plastic, plastic wood,	
1431	fiberglass, or cured concrete that the department determines will not have an impact on	
1432	water quality;	
1433	f. to the maximum extent practical, the exterior of the structure shall be	
1434	camouflaged with natural wood and earth tone colors to limit visual impacts to wildlife	
1		

1435	and visibility from the critical area. The camouflage shall be maintained to retain
1436	concealment effectiveness;
1437	g. the structure shall not adversely impact the long-term health and viability of
1438	the tree. The evaluation shall include, but not be limited to, the following:
1439	(1) the quantity of supporting anchors and connection points to attach the tree
1440	house to the tree shall be the minimum necessary to adequately support the structure;
1441	(2) the attachments shall be constructed using the best available tree anchor
1442	bolt technology; and
1443	(3) an International Society of Arboriculture Certified Arborist shall evaluate
1444	the tree proposed for placement of the tree house and shall submit a report discussing
1445	how the tree's long-term health and viability will not be negatively impacted by the tree
1446	house or associated infrastructure;
1447	h. exterior lighting shall meet the following criteria:
1448	(1) limited to the minimum quantity of lights necessary to meet the building
1449	code requirements to allow for safe exiting of the structure and stairway; and
1450	(2) exterior lights shall be fully shielded and shall direct light downward, in
1451	an attempt to minimize impacts to the nighttime environment;
1452	i. unless otherwise approved by the department, all external construction shall
1453	be limited to September 1 through March 1 in order to avoid disturbance to wildlife
1454	species during typical breeding, nesting, and rearing seasons;
1455	j. trail access to the structure shall be designed in accordance with trail
1456	standards under subsection D.47. of this section;
1	

k. to the maximum extent practical, existing native vegetation shall be left	
undisturbed. Only minimal hand clearing of vegetation is allowed; and	
1. vegetated areas within the critical area buffer or riparian area that are	
temporarily impacted by construction of the structure shall be restored by planting native	
vegetation or climate-adaptive plants according to an approved mitigation plan.	
3. ((Limited to nonresidential farm structures in grazed or tilled wet meadows,	Commented [JN154]: Condition 3 is moved to condition
((or)) wetland buffers ((of wetlands)), or ((aquatic)) riparian areas where:	Formatted: Strikethrough
a. the site is predominantly used for the practice of ((agriculture)) agricultural	Formatted: Strikethrough

1806	(3) an additional, contiguous, and undisturbed critical area buffer, equal in	
1807	area to the disturbed critical area buffer area including any allowed maintenance roads, is	
1808	provided to protect the critical area;	
1809	d. to the maximum extent practical, access for maintenance is at limited access	
1810	points into the critical area buffer rather than by a parallel maintenance road. If a parallel	
1811	maintenance road is necessary, the following standards are met:	
1812	(1) to the maximum extent practical, the width of the maintenance road is	

Formatted: Strikethrough

1813 minimized and in no event greater than fifteen feet; and

- 94 -

1814	(2) the location of the maintenance road is contiguous to the utility corridor	
1815	on the side of the utility corridor farthest from the critical area;	
1816	e. the utility corridor or facility will not adversely impact the overall critical	
1817	area hydrology or diminish flood storage capacity;	
1818	f. the construction occurs during approved periods for instream work;	
1819	g. the utility corridor serves multiple purposes and properties to the maximum	
1820	extent practical;	
1821	h. bridges or other construction techniques that do not disturb the critical areas	
1822	are used to the maximum extent practical;	
1823	i. bored, drilled, or other trenchless $crossings((is))$ are laterally constructed at	
1824	least four feet below the maximum depth of scour for the base flood;	
1825	j. bridge piers or abutments for bridge crossing are not placed within the	
1826	FEMA floodway or the ordinary high water mark;	
1827	k. open trenching is only used during low flow periods or only within aquatic	
1828	areas when they are dry. The department may approve open trenching of type S or F	
1829	aquatic areas only if there is not a feasible alternative and ((equivalent or greater)) equal	Formatted: Strikethrough
1830	or better environmental protection can be achieved; and	Commented [JN185]: Consistency edits.
1831	l. minor communication facilities may collocate on existing utility facilities if:	
1832	(1) no new transmission support structure is required; and	
1833	(2) equipment cabinets are located on the transmission support structure.	
1834	35. Allowed only for new utility facilities in existing utility corridors.	

1835	36. Allowed for onsite private individual utility service connections or private
1836	or public utilities if the disturbed area is not expanded and no hazardous substances,
1837	pesticides or fertilizers are applied.
1838	37. Allowed if the disturbed area is not expanded, clearing is limited to the
1839	maximum extent practical, and no hazardous substances, pesticides, or fertilizers are
1840	applied.
1841	38. Allowed if:
1842	a. conveying the surface water into the wetland <u>buffer</u> or ((aquatic area buffer))
1843	riparian area, and discharging into the wetland buffer, ((or ((aquatic area buffer)) riparian
1844	area, or at the wetland or aquatic area edge, has less ((adverse)) impact upon the wetland
1845	(( <del>or</del> )), wetland buffer, aquatic area. <u>- or riparian area</u> (( <del>or wetland or aquatic area buffer</del> )).
1846	or riparian area than if the surface water were discharged at the buffer(('s)) or riparian
 1847	area edge and allowed to naturally drain through the buffer or riparian area;
1848	b. the volume of discharge is minimized through application of low impact
1849	development and water quality measures identified in the ((King County)) Surface Water
1850	Design Manual;
1851	c. the conveyance and outfall are installed with hand equipment where
1852	feasible;
1853	d. the outfall shall include bioengineering techniques where feasible; and
1854	e. the outfall is designed to minimize ((adverse)) impacts to critical areas.
1855	39. Allowed only if:
1856	a. there is no feasible alternative with less impact on the critical area and ((its))
1857	associated buffer;

- 96 -

1858	b. to the maximum extent practical, the bridge or culvert is located to minimize
1859	impacts to the critical area and ((its)) associated buffer;
1860	c. the bridge or culvert is not located over habitat used for salmonid rearing or
1861	spawning unless there is no other feasible crossing site;
1862	d. construction occurs during approved periods for in-stream work; and
1863	e. bridge piers or abutments for bridge crossings are not placed within the
1864	FEMA floodway, severe channel migration hazard area, or waterward of the ordinary
1865	high water mark.
1866	40. Allowed for an open, vegetated stormwater management conveyance system
1867	and outfall structure that simulates natural conditions if:
1868	a. fish habitat features necessary for feeding, cover, and reproduction are
1869	included when appropriate;
1870	b. vegetation is maintained and added adjacent to all open channels and ponds,
1870 1871	<ul> <li>b. vegetation is maintained and added adjacent to all open channels and ponds,</li> <li>if necessary to prevent erosion, filter out sediments, or shade the water; and</li> </ul>

2397	quarters, and residential accessory structures;
2398	(4) agricultural activities structures necessary to store equipment, produce, or
2399	livestock;
2400	c. conducted under an approved emergency authorization request per K.C.C.
2401	<u>16.082.065;</u>
2402	d. the emergency work is completed within thrity days of receiving a written
2403	emergency authorization;
2404	e. the emergency work is the minimum necessary bank stabilization, sediment
2405	removal, or repair of existing infrastructure to mitigate the imminent threat;
2406	<u>f. proposed in-stream work is minimized or results in the least adverse impact</u>
2407	in the short term to the ecological functions and values of the critical areas present,
2408	including special consideration for fish or fish eggs in the project area;
2409	g. downstream sediment runoff and turbidity is minimized and does not exceed
2410	the impact of the emergency event;
•	

2411	h. the applicant provides sufficient notice of work to the department for a
2412	department representative to be present at the site during work activities, if the
2413	department determines that observation is necessary;
2414	i. as part of the permitting process following the emergency authorization, the
2415	applicant proposes compensatory mitigation and additional alterations as necessary to:
2416	(1) mitigate any adverse ecological impacts of the emergency actions;
2417	(2) minimize the risk of alluvial fan hazards that could result in the necessity
2418	of future emergency actions to the maximum extent practical; and
2419	(3) minimize to the maximum extent practical the frequency and magnitude
2420	of future adverse ecological impacts that may result from future hazard mitigation
2421	activities; and
2422	j. nonemergency work required under the subsequent permit occurs during
2423	approved periods for in stream work and conforms to all other standards in this chapter.
2424	SECTION 4250. Ordinance 15051, Section 138, as amended, and K.C.C.
2425	21A.24.051 are hereby amended to read as follows:
2426	A. ((The alterations identified in K.C.C. 21A.24.045 for a))Agricultural activities
2427	((are allowed to expand within ((the buffers of)) wetland((s)) buffers, ((aquatic areas))
2428	riparian areas, and wildlife habitat conservation areas,) when an agricultural activity is
2429	currently occurring on the site and the alteration is in compliance with an approved farm
2430	management plan in accordance with)) allowed under K.C.C. 21A.24.045 shall meet the
2431	requirements of this section.

**Commented [JN243]:** This section is re-written to focus on the development standards for agricultural activities, rather than another layer of allowances/restrictions in addition to the alterations table.

The changes in this subsection A are intended to be clear on the purpose of the section and reflect the development standard focus with a cross reference to connect to alterations table in K.C.C. 21A.24.045.

This section focuses on the scope/requirements of agricultural activities, such as how agricultural activities are designated, in addition to requirements of a farm management plan. Where agricultural activities are allowed remains limited by K.C.C. 21A.24.045 (and is mentioned so in this section).

2917	of K.C.C. 21A.24.125 and 21A.24.130)).	Commented [JN312]: Removes duplication
2918	NEW SECTION. SECTION 5058. There is hereby added to K.C.C. chapter	
2919	21A.24 a new section to read as follows:	
2920	A. An applicant for a development proposal that requires geological critical area	
2921	review under K.C.C. 21A.24.100 shall submit a geological critical area report shall	
2922	meet the requirements of this section at a level of detail determined by the department to	
2923	adequately evaluate the proposal and all probable impacts.	Commented [JN313]: This subsection A. is being modified to: -Remove language and cross reference to when a geological
2924	B. The geological critical area report shall address all areas of the proposed	-Provide more detail on information required in all critical area reports in K.C.C. 21A.24.110 to state it once
2925	development site and geologically hazardous areas within three hundred feet of the site or	<ul> <li>Simplify/narrow the subsection to the contents of a geological report100, .110, and .500 cover other aspects of when a review occurs.</li> </ul>
2926	that have the potential to affect or be affected by the proposal.	
2927	C. The geological critical area report shall be prepared, stamped, and signed by a	
2928	geological professional. The geological assessment shall include a field investigation and	<b>Commented [JN314]:</b> Edits to provide additional detail.

2929	may include the use of historical aerial photo analysis, review of public records and			
2930	documentation, and interviews with adjacent property owners or others knowledgeable			
2931	about the area, as well as other methods approved by the department. The geological			
2932	assessment shall include a detailed review of the field investigations, published data and			
2933	references, data and conclusions from past geological assessments, or geotechnical			
2934	investigations of the site, site-specific measurements, tests, investigations, or studies, as			
2935	well as the methods of data analysis and calculations that support the results, conclusions,			
2936	and recommendations.			
2937	D. The geological critical area report shall contain, at a minimum, the following			
2938	information:			
2939	1. Basic information including:			
2940	a. the name and contact information of the applicant; the name, qualifications,			
2941	and contact information for the primary author or authors of the report; and a description			
2942	of the proposal; and			
2943	b. parcel number or numbers of the site;			
2944	$\pm 2$ . A description of site conditions that includes:			
2945	a. existing development including structures, impervious surfaces, wells, drain			
2946	fields, drain field reserve areas, roads, easements, and above and below ground utilities			
2947	on the site;			
2948	b. the extent, quantity and type of existing vegetation cover;			
2949	c. a description of the ground surface inclination in percent gradient; and			
2950	d. <u>a description and location of the surface and subsurface hydrology</u> ,			
2951	including, but not limited to, the location or evidence of any wetlands, aquatic areas,			

- 145 -

2952	springs, seeps, or other surface expressions of groundwater. The director may require a
2953	hydrogeologic report to accompany the geotechnical assessment if impacts are
2954	anticipated;
2955	e. identification and characterization of all critical areas and buffers and areas
2956	within the shoreline jurisdiction;
2957	63. A site plan that includes:
2958	a. the <u>existing</u> topography with vertical contour intervals of five feet or less
2959	unless the underlying project permit requires a smaller interval, for the entire site and
2960	abutting public rights-of-way, private roads, or access easements;
2961	b. significant geologic contacts, landslides, or downslope soil movement on
2962	and within three hundred feet of the site;
2963	c. all identified geologically hazardous areas, buffers, and critical area
2964	setbacks;
2965	d. exploration locations;
2966	e. locations of proposed development and clearing limits, if known, j and
2967	f. transects of any provided cross-sections;
2968	g. drainage flow characteristics including pipes, drains, catch basins, drainage
2969	structures, culverts, underdrain pipes, and other structures;
2970	24. A evaluation description of the geological conditions of the soils and
2971	bedrock site that includes:
2972	a. references to mapped geological soil and bedrock units, seismic faults,
2973	landslides, alluvial fans, potential liquefaction zones, channel migration zones, and
2974	historical coal mines;

- 146 -

2975	b. data regarding underlying geology, slope gradients, soil types, and
2976	subsurface information including boring or test pit logs describing soil stratification, and
2977	results of soil tests conducted.
2978	bc. available geotechnical reports, well logs, or other data sources within the
2979	vicinity of the site a description of the soils in accordance with the Natural Resource
2980	Conservation Service, indicating the potential for erosion;
2981	d. review of the site history regarding landslides, erosion, and prior grading;
2982	ee. geomorphological features of the site visible through site inspection, aerial
2983	photography, LIDAR imagery, or topographic contours;
2984	df. on-site soil explorations of sufficient location, distribution, and depth to
2985	adequately characterize the subsurface conditions of the site. Soils analysis shall be
2986	accomplished in accordance with accepted classification systems in use in the region;
2987	eg. engineering properties of the subsurface soils or bedrock or both-on-site
2988	and adjacent properties; and
2989	fh. identification of all existing fill areas;
2990	i. the location or evidence of seismic faults and soil conditions indicating the
2991	potential for liquefaction;
2992	35. A hazard analysis and finding of risks associated with relevant geologic
2993	hazards and the potential impacts to public safety, the hazard area, and the subject
2994	property <sub>a</sub> including, but not limited to:
2995	a. slope stability;
2996	b. <u>potential for liquefaction hazard;</u>

2997	c. debris runout, including from upslope on the site or from neighboring			
2998	properties and on down slope properties from the site and proposed development;			
2999	d. channel migration;			
3000	e. erosion rates, slope recession rates, <u>bluff retreat rates,</u> and potential impacts			
3001	to existing or proposed development from waves or currents, stream meandering, or other			
3002	erosional forces to determine the recommended solution for bank or shoreline			
3003	stabilization in conformance with K.C.C. 21A.25.170; and			
3004	f. additional information required by K.C.C. 21A.25.170, if applicable;			
3005	<u><math>64</math></u> . An evaluation of proposed development which includes:			
3006	a. <u>the</u> location and description of proposed development activity;			
3007	b. the method of drainage and locations of all existing and proposed surface			
3008	and subsurface drainage facilities and patterns, including infiltration testing or other			
3009	geological review specifics as required by the King County Surface Water Design			
3010	Manual;			
3011	c. <u>the</u> locations and methods for temporary and permanent erosion control;			
3012	d. recommendations for temporary and permanent structure siting limitations,			
3013	and foundation type and depthineluding buffers and setbacks, in accordance with the			
3014	development standards of geologically hazardous areas in this chapter;			
3015	e. recommendations on minimum buffers and setbacks for the specific			
3016	geological hazard;			
3017	f. recommendations for grading procedures, fill placement and compaction			
3018	criteria, handling contaminated soils and materials, temporary and permanent slope			

- 148 -

3019	inclinations and support, and design criteria for corrective measures and opinions and	
3020	recommendations regarding the capabilities of the site;	
3021	g. an estimate of bluff retreat rate that recognizes and reflects potential	
3022	catastrophic events such as seismic activity or one-hundred-year storm event;	
3023	eh. recommendations for engineering mitigation of hazards; and	
3024	if. recommendations for vegetation management to mitigate hazards;	
3025	57. A determination stating whether the proposed alterations minimize risks to	
3026	people and development on and off the site in accordance with the development standards	
3027	of this chapter, and rationale to support the determination based on the presented data,	
3028	analysis, and scientific and engineering practice;	
3029	8. An evaluation of how avoidance and mitigation sequencing, consistent with	
3030	K.C.C. 21A.24.125, was applied to the development proposal.	 <b>Commented [JN315]:</b> Moved from E, below with the following changes:
3031	$\frac{79}{2}$ . All subsurface exploration logs, test logs and results, and other data sources	Changes to use consistent terminology ("avoidance and mitigation sequencing") throughout code
3032	used in the analyses, and	Structured as a report requirement, rather than a project standard (which is also listed elsewhere in this code)
3033	<u><b>810</b></u> . Any other information determined by the department to be necessary to	
3034	determine compliance with this chapter, including, but not limited to, the use of LIDAR,	
3035	technical reports, soil field or laboratory testing, studies or documents related to geologic	
3036	hazards, and or models for estimating how far landslide materials will travel.	
3037	E. The department shall require a project with adverse impacts to prioritize	
3038	avoidance and minimization measures, followed by mitigation requirements of K.C.C.	
3039	21A.24.125 and 21A.24.130.	 <b>Commented [JN316]:</b> Moved to subsection 4 above and modified.
3040	NEW SECTION. SECTION 5159. There is hereby added to K.C.C. chapter	
3041	21A.24 a new section to read as follows:	

- 149 -

3042	A. An applicant for a development proposal that requires ecological critical area	
3043	review under K.C.C. 21A.24.100 shall submit an An ecological critical area report shall	
3044	meet the requirements of this sectionat a level of detail determined by the department to	
3045	adequately evaluate the proposal for all probable impacts	Commented [JN317]: This subsection A. is being modified to: -Remove language and cross reference to when a ecological
3046	B. The ecological critical area report shall address all areas of the proposed	critical area review occurs -Move level of detail information to all critical area reports in K.C.C. 21A.24.110 to state it once
3047	development site and ecological critical areas within three hundred feet of the site or that	-Simplify/narrow the subsection to the contents of a geological report100, .110, and .500 cover other aspects of when a review occurs that doesn't need to be included here
3048	have the potential to affect or be affected by the proposal. Ecological critical areas	
3049	include wetlands and all fish and wildlife habitat conservation areas.	<b>Commented [JN318]:</b> The general critical area report requirements indicate what critical area requires which type of
3050	C. The ecological critical area report shall be prepared and signed by an	critical area reports. The language is removed here to avoid duplication.
3051	ecological professional.	
3052	D. The ecological critical area report shall contain, at a minimum, the following	
3053	information:	
3054	1. <u>A-wW</u> etland, aquatic area, and riparian area delineation report that includes:	
3055	a. identification of wetlands and delineation of associated boundaries in	
3056	accordance with the approved federal wetland delineation manual and applicable regional	
3057	supplement as set forth in WAC 173-22-035, including completed data forms and data	
3058	point locations to demonstrate the presence or absence of wetland conditions;	Commented [JN319]: Streamlining of text.
3059	b. rating of wetlands in accordance with the Washington State Wetland Rating	
3060	System for Western Washington Version 2.0, Washington state Department of Ecology	
3061	publication number 23-06-009, published 2014 and updated 2023, including completed	
3062	rating forms;	
3063	c. identification of aquatic area locations, typing, and ordinary high water	
3064	marks;	
1		

- 150 -

3065	d. identification of severe channel migration hazard areas and floodplains; and
3066	e. determination of applicable wetland buffers and riparian areas;
3067	2. A wildlife study and habitat assessment that identifies any known nests or
3068	breeding sites and potential habitat for any federal or state listed endangered, threatened,
3069	sensitive, or candidate species or King County species of local importance, and delineates
3070	any known wildlife habitat conservation areas and wildlife habitat networks;
3071	3. A description of existing on_site and adjacent site conditions that includes:
3072	a. existing development, including, but not limited to, structures, roads,
3073	impervious surfaces, utilities, clearing, grading, and easements, and whether any existing
3074	development is not legally established;
3075	b. the extent and dominant species composition of existing vegetative cover;
3076	c. existing hydrologic characteristics of any wetland or aquatic areas, including
3077	sources of hydrology;
3078	d. functions and values of all critical areas foundpresent; and
3079	e. location, species, and diameter at breast height of trees three inches in
3080	diameter at breast height or larger within critical areas and associated buffers that are
3081	within the proposed clearing limits and within striking distance of the proposed
3082	development activity. The department may require tree locations to be surveyed;
3083	4. An evaluation of how avoidance and mitigation sequencing, consistent with
3084	K.C.C. 21A.24.125, was applied to the development proposal.
3085	4 <u>5</u> . If unavoidable-impacts to critical areas or buffers are proposed, an impact
3086	analysis that includes:

- 151 -

3087	a. demonstration that adverse impacts prioritized avoidance and minimization
3088	measures, followed by mitigation sequencing in K.C.C. 21A.24.125.
3089	
3090	area and buffer;
3091	eb. calculation of square footage of temporary impacts to each critical area and
3092	associated buffer, and estimation of the time required for ecological functions to be
3093	restored;
3094	dc. calculation of indirect impacts to wetlands in accordance with Wetland
3095	Mitigation in Washington State: Part 1 Agency Report and Guidance, Version 2
3096	Washington state Department of Ecology, publication number 21-06-003, published
3097	April 2021;
3098	ed. description of vegetation, habitat, functions, and values of each critical area
3099	that will be lost or modified due to the proposed impacts;
3100	$f_{\underline{c}}$ . an analysis demonstrating that the hydrology of remaining wetlands on or
3101	adjacent to the site will not be substantially impacted by the project, using the wetland
3102	hydrology protection guidelines in the King County Surface Water Design Manual; and
3103	gf. a tree risk assessment prepared by an arborist certified by the International
3104	Society of Arboriculture for any hazard trees proposed for removal within critical areas
3105	or associated buffers;
3106	56. A mitigation plan that includes:
3107	a. evaluation of on-site potential for enhancement, rehabilitation, restoration,
3108	or creation of critical areas and associated buffers for which mitigation is required;

- 152 -

3109	b. description of on-site mitigation activities proposed and justification that	
3110	impacts will be adequately offset to ensure no net loss of critical area functions and	
3111	values, including use of the credit-debit method as applicable for wetland impacts in	
3112	accordance with Washington state Department of Ecology's Calculating Credits and	
3113	Debits of Compensatory Mitigation in Wetlands of Western Washington: Final Report,	
3114	publication 10-06-011, published 2010 and updated 2012, or subsequent updates;	
3115	c. calculations of mitigation area required for permanent impacts or long-term	
3116	temporary impacts, based on the ratios specified within K.C.C. chapter 21A.24;	
3117	d. calculation of restoration area required for temporary impacts where	
3118	ecological functions are expected to be restored within one year;	
3119	e. depiction of proposed mitigation and restoration areas and example of	
3120	planting plan, including irrigation if applicable;	
3121	f. plan for installation of wildlife lighting;	
3122	g. depiction of wildlife-passable fencing and permanent critical area signs at	
3123	the edges of critical areas, associated buffers, and disturbed areas, as applicable, and	
3124	h. justificationrationale for and description of any proposed off-site mitigation,	
3125	including location, methods, quantities, and demonstration that equivalent or greaterequal	
3126	or better ecological functions will be achieved;	Commented [JN321]: Consistency edits.
3127	67. A monitoring plan that includes:	
3128	a. a monitoring schedule of <u>at least</u> five years, unless otherwise directed by the	
3129	department to address site-specific conditions such as inclination over twenty percent,	
3130	excessively drained soils, or mitigation occurs in wetland;	<b>Commented [JN322]:</b> Provides examples of when monitoring periods would be increased.

3131	b. success criteria for mitigation activities to meet at the end of each	
3132	monitoring year;	
3133	c. monitoring methods sufficient to determine if success criteria are being met	
3134	throughout the mitigation area;	
3135	d. a maintenance plan to ensure success criteria are met; and	
3136	e. a contingency plan if it is determined that mitigation fails to meet success	
3137	criteria;	
3138	7 <u>8</u> . A site plan depicting:	
3139	a. mapped locations of all on site critical areas on the site and approximated	
3140	locations of all off-site critical areas within three hundred feet of the site;	
3141	b. widths of all-buffers applied in accordance with K.C.C. chapter	
3142	<del>21A.2</del> 4 <u>widths;</u>	
3143	c. critical area setback- <u>slines applied in accordance with K.C.C. 21A.24.200;</u>	
3144	d. existing and proposed alterations, including, but not limited to, structures,	
3145	impervious surfaces, utilities, clearing, nonnative landscaping, and grading; and	<b>Commented [JN323]:</b> Clarifies that all landscaping should be shown on a site plan, not only nonnative landscaping.
3146	e. all-property lines, setbacks, and easements; and	
3147	$\frac{89}{2}$ . Additional information determined by the department to be necessary to	
3148	comply with this chapter.	
3149	SECTION 60. Ordinance 15051, Section 149, as amended, and K.C.C.	
3150	21A.24.125 are hereby amended to read as follows:	
3151	((A. An applicant for a development proposal or alteration, shall apply the	Formatted: Strikethrough
3152	following sequential measures, which appear in order of priority,)) When an alteration to	
3153	a critical area is proposed, the following avoidance and mitigation sequencing shall be	

- 154 -

	Redinic provided for musicative purposes only	
3154	applied in the following order of priority to avoid and minimize impacts to critical areas	
3155	and critical area buffers:	<b>Commented [JN324]:</b> Clarifying edits and streamlining of text.
3156	((1.)) A. Avoiding the impact or hazard by not taking a certain action;	<b>Formatted:</b> Strikethrough
3157	((2-)) B. Minimizing the impact or hazard by:	<b>Formatted:</b> Strikethrough
3158	((a.)) 1. limiting the degree or magnitude of the action with appropriate	<b>Formatted:</b> Strikethrough
3159	technology; or	
3160	((b)) 2. taking affirmative steps to avoid or reduce impacts, such as project	<b>Formatted:</b> Strikethrough
3161	redesign, relocation, or timing;	
3162	((3-)) C. Rectifying the impact ((to critical areas)) by repairing, rehabilitating, or	Formatted: Strikethrough
3163	restoring the affected critical area or its buffer;	Formatted: Strikethrough
3164	((4-)) D. Minimizing or eliminating the hazard by restoring or stabilizing the	Formatted: Strikethrough
3165	hazard area through engineered or other methods;	
3166	((5-)) E. Reducing or eliminating the impact or hazard over time by preservation	Formatted: Strikethrough
3167	or maintenance operations during the life of the ((development proposal or)) alteration;	<b>Formatted:</b> Strikethrough
3168	(( <del>6.</del> )) F. Compensating for the (( <del>adverse</del> )) impact by replacing or enhancing	Formatted: Strikethrough
3169	critical areas and their buffers or creating substitute critical areas and their buffers; and	Formatted: Strikethrough
3170	((7.)) G. Monitoring the impact, hazard, or success of required mitigation and	Formatted: Strikethrough
3171	taking (( <del>remedial</del> )) corrective action.	Commented [JN325]: Terminology update.
3172	((B. The specific mitigation requirements of this chapter for each critical area or	Commented [JN326]: Changes to better align with WAC 197- 11-768
5172	Mp. The specific initigation requirements of any enapter for each ended area of	Formatted: Strikethrough
3173	requirements determined through the resource mitigation reserves program apply when	Formatted: Strikethrough
3174	compensation for adverse impacts is required by the sequence in subsection A. of this	
3175	section.))	<b>Commented [JN327]:</b> Streamlining of text. This is addressed in K.C.C. 21A.24.130 and the sections for specific critical areas.

3176	SECTION 5261. Ordinance 10870, Section 460, as amended, and K.C.C.	
3177	21A.24.130 are hereby amended to read as follows:	
3178	A. ((If m))Mitigation ((is)) required under this chapter ((to compensate for	Formatted: Strikethrough
		Formatted: Strikethrough
3179	adverse impacts, ((unless otherwise provided, an applicant)) shall:	Formatted: Strikethrough
3180	1. ((Mitigate adverse impacts to:	<b>Commented [JN328]:</b> Streamlining of text. Mitigation for impacts are specific to each critical area and can be found in those specific sections.

3248	<u>B.</u> The department may approve mitigation that is off <u>-site</u> ((the development		
3249	site)) if an applicant demonstrates that:		
3250	1. It is not practical to mitigate on or contiguous to the development proposal		
3251	site; (((and))		Formatted: Strikethrough
3252	2. The off-site mitigation will achieve ((equivalent or greater)) equal or better		Commented [JN349]: Consistency edits.
			Formatted: Strikethrough
3253	hydrological, water quality, and ((wetland or aquatic area)) habitat functions((,)); and		Formatted: Strikethrough
			Formatted: Underline
3254	3. The off-site mitigation addresses limiting factors or identified critical needs		
3255	for critical area resource conservation based on watershed or comprehensive resource		
3256	management plans applicable to the area of impact.	1	Commented [JN350]: Moved from K.C.C. 21A.24.130 (above)
3257	B. ((When off site mitigation is authorized, t))The department shall give priority		Formatted: Strikethrough
3258	to locations within the same drainage subbasin as the development proposal site and that		
3259	meet the following:		
3260	1. Mitigation banking sites and resource mitigation reserves as authorized by		
3261	this chapter;		
3262	2. Private mitigation sites that are established in compliance with the		
3263	requirements of this chapter and approved by the department; $((and))$ or		
3264	3. Public mitigation sites that have been ranked in a process ((that has been))		
3265	supported by ecological assessments, including wetland and aquatic areas established as		
3266	priorities for mitigation in King County ((basin plans or other)) watershed plans.		

3267	C. The department ((may)) shall require ((documentation)) that the mitigation site	Commented [EA351]: Streamlining of text.
		Formatted: Strikethrough
3268	((has been)) be permanently preserved from future development or alteration that would	Formatted: Strikethrough
3269	be inconsistent with the functions of the mitigation. The applicant shall provide	
3270	documentation ((may_include, but is not limited to,)) such as a conservation easement or	Formatted: Strikethrough
3271	other agreement between the applicant and owner of the mitigation site. King County	
3272	may enter into agreements or become a party to any easement or other agreement	
3273	necessary to ensure that the site continues to exist in its mitigated condition.	
3274	D. The department shall maintain a list of sites available for use for off-site	
3275	mitigation projects.	
3276	E.1. ((The department ((and the department of natural resources and parks have	Formatted: Not Strikethrough
3277	develop a program to allow the payment of a fee in lieu of providing mitigation on a	
3278	development site.)) <u>The department may approve mitigation through the King County</u>	Commented [EA352]: Drafting correction.
3279	mitigation reserve program. The program addresses:	
3280	a. when the payment of a fee is allowed considering the availability of a site in	
3281	geographic proximity with comparable hydrologic and biological functions and potential	
3282	for future habitat fragmentation and degradation; and	
3283	b. the use of the fees for mitigation on public or private sites that have been	
3284	((ranked according to ecological criteria through one or more programs that have	
3285	included a public process)) selected using a watershed approach, in accordance with the	
3286	approved in-lieu fee program instrument.	
3287	2. The in lieu fee mitigation program shall submit a report by May 1 in the first	
3288	year of the biennial budget cycle, filed in the form of ((a paper original and)) an	
3289	electronic copy with the clerk of the council, who shall retain the original and provide an	

- 160 -

3290	electronic copy to all council members, the council chief of $staff_{\tt a}$ and the lead staff for the	
3291	transportation economy and environment committee or its successor. The report should	
3292	address the following:	
3293	a. information on the amount and source of revenues received by the program;	
3294	b. a description and rationale for projects selected for funding;	
3295	c. an accounting of budgeted and actual expenditures made; and	
3296	d. the status of all projects approved in the previous five years, and anticipated	
3297	completion date for those projects, if not yet complete.	
3298	NEW SECTION. SECTION 63. There is hereby added to K.C.C. chapter	
3299	21A.24 a new section to read as follows:	
3300	A. Revegetation in critical areas and critical area buffers shall:	<b>Commented [EA353]:</b> New section to specify what revegetation is required to include. Incorporates existing mitigation language.
3301	1. Meet the mitigation requirements under this chapter;	
3302	2. Provide equal or better ecological function compared to existing conditions;	
3303	3. Replicate the structure and function of the historic natural plant community,	
3304	except when restoring temporary impacts to a legally altered plant community;	
3305	4. Use only native or climate-adaptive plant species that are well suited to thrive	
3306	in the current and future site conditions;	
3307	5. Prioritize the selection of native vegetation, with the use of climate-adaptive	
3308	plants only when appropriate for site conditions; and	
3309	6. Include measures to restore soil and hydrologic functions when necessary.	
3310	B. The department shall consider site-specific conditions and may allow	
3311	modifications to planting plans for planting success.	
I		

3312	C.1. The department of natural resources and parks shall adopt a public rule
3313	establishing a list of climate-adaptive plants after consultation with Indian tribes and the
3314	department of local services.
3315	2. In addition to the notification procedures required by K.C.C. chapter 2.98 and
3316	under the State Environmental Policy Act, for the initial rule making under this section
3317	and each subsequent update to the public rule, the director of natural resources and parks
3318	shall:
3319	a. request comment from Indian tribes no less than 60 days before the adoption
3320	of the final rule;
3321	b. meet with and consider the comments of Indian tribes before adoption of the
3322	final rule; and
3323	c. provide, as supplemental material to the final rule, a summary of comments
3324	received from Indian tribes on the list of climate-adaptive plants, and a response to each
3325	of the comments with how the final rule addresses the comments.
3326	3. The initial public rule shall be effective no later than December 31, 2026, and
3327	the public rule shall be evaluated and updated in conjunction with the Comprehensive
3328	Plan update required by K.C.C. 20.18.030.C. or as needed to address time sensitive issues
3329	including but not limited to, substantive changes in state or local critical area regulations
3330	or substantive findings from critical area monitoring or adaptive management.
3331	SECTION 5464. Ordinance 10870, Section 464, as amended, and K.C.C.
3332	21A.24.170 are hereby amended to read as follows:
3333	A. Except as otherwise provided in subsection $((\mathbf{of}))$ C. of this section, the owner
3334	of any property containing critical areas or buffers on which a development proposal is

- 162 -

3335	submitted or any property on which mitigation is established (((as a result of		Formatted: Strikethrough
3336	development)) shall file a notice on title ((approved by King County)) with the records		<b>Commented [JN354]:</b> Mitigation may not necessarily be a result of development.
3337	and licensing services division. The notice on title shall be on a form approved by the		Formatted: Strikethrough
3338	department and inform the public of:	1	Commented [JN355]: Streamlining/flow edits
3339	1. The presence of critical areas ((or)), buffers, or mitigation sites on the		Formatted: Strikethrough
3340	property;		
3341	2. The application of this chapter to the property; ((and))		
3342	3. The possible existence of limitations on actions in or affecting the critical		
3343	areas or buffers or the fact that mitigation sites may exist; and		
3344	4. The existence of approved wetland buffer or riparian area averaging or		
3345	reductions on the property.		<b>Commented [JN356]:</b> Added to help notify future property owners of other allowances that may impact future property development
3346	B. ((The applicant for a development proposal shall submit p))Proof that the		Formatted: Strikethrough
3347	notice ((required by this section)) on title has been filed ((for public record)) shall be	1	Formatted: Strikethrough
			Formatted: Strikethrough
3348	submitted before ((King County)) the department approves any development proposal for		Formatted: Strikethrough
3349	the property or $((z))$ before recording in the case of subdivisions, short subdivisions, and		Formatted: Strikethrough
3350	binding site plans(( <del>, at or before recording of the subdivision, short subdivision, or</del>	{	Formatted: Strikethrough
3351	binding site plan)).		Commented [JN357]: Streamlining/flow edits
3352	C. The notice required under subsection A. of this section is not required if:		
3353	1. The property is a public right-of-way or the site of a permanent public		
3354	facility;		
3355	2. The development proposal does not require ((sensitive)) critical area review		
3356	under K.C.C. 21A.24.100.C_; or		

	Redine provided for inustrative purposes only	
3357	3. The property only contains a critical aquifer recharge area or an erosion	
3358	hazard area.	
3359	D. Notices on title shall run with the land regardless of ownership, use, or land	
3360	division. However, a property owner may apply to the county to have a notice on title	
3361	removed or amended, under either of the following circumstances:	
3362	1. The department, as part of a critical area review of a permit application or a	
3363	critical area designation, determines the information contained in an existing notice on	<b>Commented [EA358]:</b> Added because the notice on title can also come from a CAD, not a permit.
3364	title is no longer accurate because information about a critical area has changed, such as	Commented [JN359]: Streamlining of text.
3365	in its type or location; or	
3366	2. An ordinance adopted an updated An adopted critical areas map was updated	
3367	indicating a reclassification or declassification of one of the following critical areas on	
3368	the subject property:	
3369	a. critical aquifer recharge areas;	
3370	b. wildlife habitat network;	
3371	c. channel migration zones;	
3372	d. flood hazard areas.	<b>Commented [JN360]:</b> Lists out which maps are updated by ordinance or public rule for clarity
3373	SECTION 5565. Ordinance 10870, Section 465, as amended, and K.C.C.	
3374	21A.24.180 are hereby amended to read as follows:	
3375	A. ((The applicant)) Critical area tracts established under this section protect with	
3376	the goal of and enhancing enhance critical area functions and values, including, but not	Commented [JN361]: Streamlining of text.
3377	limited to, providing fish and wildlife habitat, and protecting the public from geologic	
3378	hazards and increased stormwater runoff. Development proposals for sSubdivisions,	
3379	short subdivisions, or binding site plans shall establish and identify critical area tracts to	Commented [JN362]: Removed as duplicative

3380	delineate and protect ((those)) the following critical areas and associated buffers ((listed	
3381	((below in development proposals for subdivisions, short subdivisions or binding site	
3382	plans)) in subsection A.1. through 7. of this section, and shall record the tracts on all	- {
3383	documents of title of record for all affected lots)):	
3384	1. ((All-1))Landslide hazard areas and buffers that are one acre or more in size;	
3385	2. ((All s))Steep slope hazard areas and buffers that are one acre or more in size;	
3386	3. ((All w))Wetlands and buffers; ((and))	
3387	4. (( <del>All a</del> )) <u>A</u> quatic areas (( <del>and buffers</del> )) <u>:</u>	
3388	5. Riparian areas;	
3389	6. Alluvial fan hazard areas that are one acre or more in size; and	
3390	7. Wildlife habitat networks.	
3391	B. A critical area tract established under subsection A. of this section shall be	
3392	held either:	
3393	<u>1.</u> (( <del>h))<u>H</u>eld<u>))</u> in an undivided interest by each owner of a building lot within the</del>	
3394	development with this ownership interest passing with the ownership of the $lot((\tau))$ ; or	
3395	<u>2.</u> ((shall be h)) <u>Held))</u> by an incorporated homeowner's association or other	
3396	legal entity that ensures the ownership, maintenance, and protection of the tract.	
3397	C. ((The long-term management goals for critical area tracts established under	
3398	subsection A. of this section are to protect and enhance critical area functions and values,	
3399	including, but not limited to, providing fish and wildlife habitat and protecting the public	
3400	from geologic hazards and increased stormwater runoff.)) The specific management	
3401	strategy for each tract shall be clearly defined before preliminary approval of the	
3402	subdivision or binding site plan.	

Formatted: Strikethrough

Commented [JN363]: Streamlining of text. Formatted: Strikethrough Formatted: Strikethrough

- 165 -

3403	D. For an off-site eritical area-mitigation area, the applicant shall place the
3404	mitigation area in a critical area tract in accordance with subsection A. of this section, or
3405	in a perpetual conservation easement as approved by the director.
3406	E. In lieu of the requirements of subsections A. and D. of this section, the director
3407	may allow an applicant to include critical areas in resource tracts established under
3408	K.C.C. 21A.14.040.B.7. The resource tract management plan shall clearly state that the
3409	purpose of the resource portion is for resource management and the purpose of the
3410	designated critical areas is for critical area protection and enhancement and protecting the
3411	public from geologic hazards and increased stormwater runoff.
3412	$((E_{-}))$ <u>F.</u> Site plans submitted as part of building permits, clearing, and grading
3413	permits, or other development permits shall include and delineate:
3414	1. ((All f))Flood hazard areas, as determined by King County in accordance
3415	with K.C.C. 21A.24.230;
3416	2. Landslide, volcanic, tsunami, coal mine, alluvial fan, and steep slope hazard
3417	areas;
3418	3. Aquatic areas, riparian areas, and wetlands;
3419	4. Wildlife habitat conservation areas and ((the)) wildlife habitat networks;
3420	5. <u>Critical area</u> $((\mathbf{B}))$ <u>b</u> uffers; and
3421	6. ((Building)) Critical area setbacks as required by K.C.C. 21A.24.200.
3422	$((F_{\cdot}))$ <u>G.</u> If only a part of the development site has been mapped, the part of the
3423	site that has not been mapped shall be clearly identified and labeled on the site plans.
3424	SECTION <u>5666.</u> Ordinance 10870, Section 467, as amended, and K.C.C.
3425	21A.24.200 are hereby amended to read as follows:

- 166 -

3426	Unless otherwise provided, ((an applicant shall set buildings and other)) structures		
3427	shall be set back a minimum distance of ((fifteen)) ten feet from the outside edges of all		<b>Commented [JN364]:</b> Reduces the critical area setback to 10 feet from 15.
3428	critical areas and critical area buffers; ((or from the edges of all critical areas ((, if no		Formatted: Strikethrough
		< <u>-</u> -	Formatted: Underline
3429	buffers are_required)))) where buffers are not required. ((When the)) If site disturbance		Formatted: Strikethrough
		57-	Commented [JN365]: Drafting correction.
3430	is within a critical area or an associated buffer, the ((building)) critical area setback		<b>Commented [JN366]:</b> Streamling of text and consistency edits.
3431	((line)) shall be measured from the ((building footprint)) edge of the structure to the edge		
3432	of the approved site disturbance. The following are allowed in the ((building)) critical		
3433	area setback area:		
3434	A. Landscaping;		
3435	B. Uncovered decks less than eighteen inches above grade;		<b>Commented [JN367]:</b> Removes language from the transmittal limiting decks to 18 inches
 3436	C. Building overhangs if the overhangs do not extend more than eighteen inches		(
3437	into the setback area;		
3438	D. Impervious ground surfaces, such as driveways and patios(( <del>, but the</del> )) <u>;</u>		
3439	however, improvements are required to meet any special drainage provisions specified in		
3440	public rules adopted for ((the various)) critical areas and the King County Surface Water		
l 3441	Design Manual;		
3442	E. Utility service connections as long as the excavation for installation avoids		
3443	impacts to the critical area or associated buffer; and		
3444	F. Minor encroachments if adequate protection of the buffer will be maintained.		
3445	SECTION <u>5867</u> . Ordinance 11621, Section 75, as amended, and K.C.C.		
3446	21A.24.275 are hereby amended to read as follows:		

3447	The following development standards apply to development proposals and	
3448	alterations on sites within channel migration zones that have been mapped and adopted	
3449	by public rule:	
3450	A. The development standards that apply to the ((aquatic area buffers)) riparian	
3451	areas in K.C.C. 21A.24.365 also apply to the severe channel migration ((zone)) hazard	
3452	areas and the portion of the moderate channel migration ((zone)) hazard areas that is	
3453	within the ((aquatic area buffer)) riparian areas. The more-restrictive standards apply	
3454	where there is a conflict;	
3455	B. Only the alterations identified in K.C.C. 21A.24.045 are allowed within a	
3456	severe channel migration hazard area; and	
3457	C. The following standards apply to development proposals and alterations	
3458	within the moderate channel migration hazard area:	
3459	1. Maintenance, repair, or expansion of any use or structure is allowed if the	
3460	existing structure's footprint is not expanded towards any source of channel migration	
3461	hazard, unless the applicant can demonstrate that the location is the least subject to risk;	
3462	2. New primary dwelling units, accessory dwelling units, or accessory living	
3463	quarters, and required infrastructure, are allowed if:	
3464	a. the structure is located on a ((separate)) legally established lot in existence	Commented [JN368]: Consistency edits.
3465	on or before February 16, 1995;	Formatted: Strikethrough
3466	b. a feasible alternative location outside of the channel migration hazard area is	
3467	not available on((-)) the site; and	<b>Formatted:</b> Strikethrough

- 168 -

3468	c. to the maximum extent practical, the structure and supporting infrastructure	
3469	is located the farthest distance from any source of channel migration hazard, unless the	
3470	applicant can demonstrate that an alternative location is:	
3471	(1) the least subject to risk; or	
3472	(2) within the outer third of the moderate channel migration hazard area as	
3473	measured perpendicular to the channel;	
3474	3. New accessory structures are allowed if:	
3475	a. a feasible alternative location is not available on-site; and	
3476	b. to the maximum extent practical, the structure is located the farthest distance	
3477	from the migrating channel; and	
3478	4. The subdivision of property is allowed within the portion of a moderate	
3479	channel migration hazard area located outside ((an aquatic area buffer)) a riparian area if:	
3480	a. All lots contain five-thousand square feet or more of net buildable ((land))	<b>Formatted:</b> Strikethrough
3481	area outside of the moderate channel migration hazard area;	Commented [JN369]: Terminology consistency edit
1 3482	b. Access to all lots does not cross the moderate channel migration hazard	
3483	area; and	
3484	c. All infrastructure is located outside the moderate channel migration hazard	
3485	area except that an on-site septic system is allowed in the moderate channel migration	
3486	hazard area if:	
3487	(1) a feasible alternative location is not available on-site; and	
3488	(2) to the maximum extent practical, the septic system is located the farthest	
3489	distance from the migrating channel.	

)

3555	critical area report)).	
	• -	

3556	1. For new structures and substantial improvements to existing structures on	
3557	sites where any portion of the steep slope hazard area extends into the coastal high hazard	
3558	area or sea level rise risk area:	
3559	a. The geological critical area report shall include an assessment of current and	
3560	future risks of sea level rise conditions anticipated to occur over the next fifty years and a	
3561	recommended buffer;	
3562	b. If a geological critical area report is not submitted to the department, the	
3563	minimum buffer shall be seventy-five feet;	
3564	2. For all other development not identified in subsection B.1. of this section:	
3565	a. If a <u>geological</u> critical area report is not submitted to <u>or required by</u> the	<b>Commented [JN379]:</b> Consistency between the landslide hazard area and steep slope hazard area sections.
3566	department, the minimum buffer shall be fifty feet; and	
3567	b. For ((building)) permits ((for)) alterations associated with single detached	Commented [JN380]: Consistent terminology
3568	dwelling units only, the department may waive the ((special study)) geological critical	
3569	area report requirement and authorize buffer reductions if the department determines that	
3570	the reduction will adequately protect the proposed development and the geological	
3571	((eritical area)) steep slope hazard area;	Formatted: Strikethrough
3572	C. Unless otherwise provided in K.C.C. 21A.24.045 or as a necessary part of an	
3573	allowed alteration, removal of any vegetation from a steep slope hazard area or buffer is	
3574	prohibited; (( <del>and</del> ))	Formatted: Strikethrough
3575	D. ((All a)) <u>A</u> lterations ((are)) may be allowed in the following circumstances:	Formatted: Strikethrough
3576	1. Slopes ((which)) that are forty percent or steeper with a vertical elevation	Formatted: Strikethrough
3577	change of up to twenty feet, if no adverse impact will result from the exemption based on

3578	King County's review of and concurrence with a ((soils))-geological critical area report		
3579	prepared by a ((geologist or geotechnical engineer)) geological professional; and		
3580	2. The approved regrading of any slope ((which)) that was created through	(	Formatted: Strikethrough
3581	previous legal grading activities. Any slope ((which)) that remains forty percent or		
3582	steeper following site development shall be subject to all requirements for steep slopes	(	Commented [JN382]: This is moved to subsection A.
3583	The risk of landsliding as a result of slope instability shall be considered to be minimized		
3584	where a slope stability analysis demonstrates the factor of safety to exceed 1.5 for static		
3585	conditions and 1.1 for seismic conditions. Except when a more detailed deformation		
3586	analysis is conducted, seismicity shall be modeled as a horizontal force equal to one half		
3587	the peak ground acceleration adjusted for site class effects, or PGAm, as given for the site		<b>Commented [JN381]:</b> Adds factor of safety requirements for steep slope hazard areas
3588	in the International Building Code and American Society of Civil Engineers 7 standard:		
3589	and		
3590	E. Alterations shall comply with the requirements and recommendations of the		
3591	geological critical area report.		
3592	SECTION <u>6071.</u> Ordinance 10870, Section 476, as amended, and K.C.C.		
3593	21A.24.290 are hereby amended to read as follows:		
3594	The following development standards apply to development proposals and		
3595	alterations on sites ((containing seismic hazard areas)) where potential seismic hazard		
3596	areas are mapped:		
3597	A. The department may approve alterations $\frac{((to mapped seismic hazard areas))}{((to mapped seismic hazard areas))}$	(	Commented [JN383]: Streamlining of text.
3598	only if:	{	Formatted: Strikethrough

3599	1. The geological critical area report containing an evaluation of site-specific		
3600	subsurface conditions shows that the ((proposed)) development proposal site (is not		Commented [JN384]: Uses defined terminology.
			Formatted: Strikethrough
3601	((located in)) does not meet the definition of a seismic hazard area; or	``	Formatted: Not Strikethrough
3602	2. The applicant implements appropriate engineering design based on the best		Commented [JN385]: Streamlining of text.
3603	available engineering and geological practices that either eliminates or minimizes the risk		
3604	of structural damage or injury resulting from seismically induced settlement or soil		
3605	liquefaction; and		
3606	B. The department may waive or reduce engineering study and design		
3607	requirements for alterations in seismic hazard areas for:		
3608	1. ((Mobile)) Manufactured homes;	<	Commented [JN386]: Updates terminology.
3609	2. Additions or alterations that do not increase occupancy or significantly affect		Formatted: Strikethrough
3610	the risk of structural damage or injury; and		
3611	3. One-story buildings with less than two-thousand-five hundred $((s))$ square feet		
3612	of floor area or roof area, whichever is greater, and that are not dwelling units or used as		
3613	places of employment or public assembly.		
3614	<u>NEW SECTION. SECTION 6472.</u> There is hereby added to K.C.C. chapter		
3615	21A.24 a new section to read as follows:		
3616	The following development standards apply to development proposals and		
3617	alterations on sites containing alluvial fan hazard areas:		
3618	A. Only the alterations identified in K.C.C. 21A.24.045 are allowed within		
3619	alluvial fan hazard areas;		
3620	B. <u>A buffer may be required from the edge of the alluvial fan hazard area</u> . To		
3621	eliminate or minimize the risk of property damage or injury resulting from inundation,		
I			

	Redline provided for illustrative purposes only	
3622	sedimentation, or erosion caused in whole or part by the development, the department	
3623	shall determine the size of the buffer based upon a geological critical area report.	Commented [JN387]: Moved from subsection D.
3624	<u>C.</u> A geological critical area report is required for development	
3625	proposalsalterations that are on an alluvial fan or within fifty feet of an alluvial fan;	Commented [EA388]: Consistency edit
3626	DC. Proposed aAlterations shall minimize and not increase the risk of inundation,	Commented [EA389]: Consistency edit
3627	sedimentation, channel migration, or erosion on adjacent properties;	
3628	D. The risk of property damage or injury on the subject property from inundation,	
3629	sedimentation, channel migration, or erosion as a result of a proposed alteration shall be	
3630	eliminated or minimized; and	Commented [JN390]: Moved to subsection B.
3631	E. Unless otherwise provided in K.C.C. 21A.24.045 or as a necessary part of an	
3632	allowed alteration, removal of any vegetation from an alluvial fan hazard area or	
3633	associated buffer is prohibited;	
3634	F. Alterations shall minimize disturbance to the alluvial fan hazard area, slope,	
3635	and vegetation unless necessary for slope stabilization; and	<b>Commented [JN391]:</b> These regulations are duplicated from the landslide hazard area regulations.
3636	$\underline{GE}$ . The proposed alteration shall not increase the frequency or magnitude of	
3637	sediment management activities or in-stream channel work that could impact fish habitat	
3638	or passage.	
3639	NEW SECTION. SECTION 6273. There is hereby added to K.C.C. chapter	
3640	21A.24 a new section to read as follows:	
3641	A. This section applies to development proposals on sites that are within tsunami	
3642	hazard areas.	
3643	B. New and substantially improved residential buildings within a tsunami hazard	
3644	area shall be designed to provide protection from inundation and debris impact according	

- 176 -

3645	to the projected hazard level. The projected hazard level shall be determined by the	
3646	county based on Washington state Department of Natural Resources tsunami inundation	
3647	maps, areas on the Flood Insurance Rate Maps indicated as Zones V1-V30, VE, or V, and	
3648	relevant requirements of the building code in K.C.C. Title 16.	
3649	C. Except for buildings that support water-oriented uses, new buildings shall be	
3650	located on portions of the parcel or parcels under contiguous ownership that are not	
3651	within the tsunami hazard area, if feasible. If no portion of the parcel or parcels under	
3652	contiguous ownership are located outside the tsunami hazard area, or if the portion	
3653	outside the tsunami hazard area is not feasible for new building purposes, new buildings	
3654	shall be located as far from the tsunami hazard area as feasible.	
3655	D. New critical facilities shall not be constructed in a tsunami hazard area if there	
3656	is a feasible alternative location outside the tsunami hazard area that would serve the	
3657	intended service area or service population. If allowed in the tsunami hazard area, the	
3658	critical facility shall be designed to minimize the risk and danger to the public health and	
3659	safety to the maximum extent practicable practical, which may include, but is not limited	
3660	to, preparation of a tsunami evacuation plan.	
3661	SECTION 74. K.C.C. 21A.24.205, as amended by this ordinance, is hereby	
3662	recodified as a new section in K.C.C. chapter 21A.24 to follow K.C.C. 21A.24.300.	
3663	SECTION 5775. Ordinance 15051, Section 158, and K.C.C. 21A.24.205 are	<b>Commented [JN392]:</b> This section was moved from above not shown in track changes here for clarity.
3664	hereby amended to read as follows:	
3665	Based upon a geological critical area report containing a coal mine hazard	
3666	assessment ((prepared in accordance with this chapter)), the department shall classify	
3667	coal mine hazard areas as follows:	

nd

3668	A. Declassified coal mine areas are those areas where the risk of catastrophic	
3669	collapse is not significant and that the hazard assessment report has determined do not	
3670	require special engineering or architectural recommendations to prevent significant risks	
3671	of property damage. Declassified coal mine areas typically include, but are not limited	
3672	to, areas underlain or directly affected by coal mines at depths of more than three hundred	
3673	feet as measured from the surface;	
3674	B. Moderate coal mine hazard areas are those areas that pose significant risks of	
3675	property damage that can be mitigated by implementing special engineering or	
3676	architectural recommendations. Moderate coal mine hazard areas typically include, but	
3677	are not limited to, areas underlain or directly affected by abandoned coal mine workings	
3678	from a depth of zero, which is the surface of the land, to three hundred feet or with	
3679	overburden-cover-to-seam thickness ratios of less than ten to one depending on the	
3680	inclination of the seam; and	
3681	C. Severe coal mine hazard areas are those areas that pose a significant risk of	
3682	catastrophic ground surface collapse. Severe coal mine hazard areas typically include,	
3683	but are not limited to, areas characterized by unmitigated openings such as entries,	
3684	portals, adits, mine shafts, air shafts, timber shafts, sinkholes, improperly filled sinkholes.	
3685	and other areas of past or significant probability for catastrophic ground surface collapse;	
3686	or areas characterized by $((, ))$ overland surfaces underlain or directly affected by	Commented [JN393]
3687	abandoned coal mine workings from a depth of zero, which is the surface of the land, to	
3688	one hundred fifty feet.	
3689	SECTION 76. K.C.C. 21A.24.210 is hereby recodified as a new section in	
3690	K.C.C. chapter 21A.24 to follow K.C.C. 21A.24.205, as recodified by this ordinance.

3]: Drafting correction

3691	SECTION 77. K.C.C. 21A.24.220 is hereby recodified as a new section in	
3692	K.C.C. chapter 21A.24 to follow section that77, as recodified by this ordinance.	
3693	SECTION 6478. Ordinance 11481, Section 2, as amended, and K.C.C.	
3694	21A.24.311 are hereby amended to read as follows:	
3695	The map entitled King County Critical Aquifer Recharge Areas, included in	
3696	Attachment H to Ordinance 17485, is hereby adopted as the designation of critical aquifer	
3697	recharge areas in King County in accordance with RCW 36.70A.170, unless a	
3698	designation is as modified by notices of map amendment prepared according toin K.C.C.	
3699	21A.24.312, in which case the notice of map amendment shall supersede the map.	Commented [JN394]: Streamlining of text.
3700	SECTION 6579. Ordinance 15051, Section 173, as amended, and K.C.C.	
3701	21A.24.312 are hereby amended to read as follows:	
3702	<u>A.</u> Upon application supported by a critical area $((s))$ report that includes a	
3703	hydrogeologic site evaluation, the department, in consultation with the department of	
3704	natural resources and parks, may determine that an area (((that is or is not elassified as a))	Formatted: Strikethrough
3705	on the critical aquifer recharge area ((on the)) map adopted under K.C.C. 21A.24.311:	Commented [JN395]: Streamlining of text.
3706	$((A_{\cdot}))$ <u>1</u> . Does not meet the criteria for a critical aquifer recharge area and	Formatted: Strikethrough
3707	declassify that area if it is classified as a critical aquifer recharge area;	
3708	$((\mathbf{B}, \mathbf{)})$ 2. Has the wrong critical aquifer recharge area classification and determine	
3709	the correct classification; or	
3710	$((C_{\cdot}))$ 3. Has not been classified as a critical aquifer recharge area and should be	
3711	so classified based on the standards of K.C.C. 21A.24.313.	
3712	B. Upon reclassification or declassification, a notice of map amendment for the	
3713	affected parcel or parcels shall be sent from the department of natural resources and parks	

3714	to the property owner, the property owner's representative applicant, if applicable, and the	Commented [EA396]: Terminology consistency edit
3715	county assessor.	
3716	SECTION <u>6680.</u> Ordinance 15051, Section 174, as amended, and K.C.C.	
3717	21A.24.313 are hereby amended to read as follows:	
3718	Critical aquifer recharge areas are categorized as follows:	
3719	A. Category I critical aquifer recharge areas include those mapped areas that	
3720	King County has determined ((are)):	
		Formatted: Strikethrough
3721	1. <u>Are ((H))highly susceptible to groundwater contamination and that are</u>	<b>Formatted:</b> Strikethrough
3722	located within a sole source aquifer or a wellhead protection area; or	
3723	2. <u>Are ((1))in an area where hydrogeologic mapping or a numerical flow</u>	Formatted: Strikethrough
3724	transport model in a Washington department of health approved wellhead protection plan	
3725	demonstrate that the area is within the one-year time of travel to a wellhead for a Group	
3726	A water system;	
3727	B. Category II critical aquifer recharge areas include those mapped areas that	
3728	King County has determined:	
3729	1. Have a medium susceptibility to ground((,))water contamination and are	Formatted: Strikethrough
3730	located in a sole source aquifer or a wellhead protection area; or	
3731	2. Are highly susceptible to groundwater contamination and are not located in a	
3732	sole source aquifer or wellhead protection area; and	
3733	C. Category III critical aquifer recharge areas include those mapped areas that	
3734	King County has determined have low susceptibility to groundwater contamination and	
3735	are located over an aquifer underlying ((an island that is surrounded by saltwater))	
3736	Vashon-Maury Island.

3805	b. ((the Seattle King County department of)) public health - Seattle & King	
3806	County determines that the systems required under subsection B.9.a. of this section will	
3807	not function on the site.	
3808	C. Except as otherwise provided in subsection H. of this section, the following	
3809	new development proposals and alterations are not allowed on a site located in a category	
3810	III critical aquifer recharge area:	
3811	1. Disposal of radioactive wastes, as defined in chapter (((43.200)) 70A.384	Com
3812	RCW;	For
3813	2. Hydrocarbon extraction;	
3814	3. Commercial wood treatment facilities located on permeable surfaces;	
3815	4. Underground storage tanks, including tanks exempt from the requirements of	
3816	chapter 173-360 <u>A</u> WAC, with hazardous substances, as defined in chapter (( $\frac{70.105}{100}$ ))	
3817	<u>70A.300</u> RCW, that do not comply with the requirements of chapter 173-360 <u>A</u> WAC and	
3818	K.C.C. Title 17;	
3819	5. Above ground storage tanks for hazardous substances, as defined in chapter	
3820	((70.105)) 70A.300 RCW, unless protected with primary and secondary containment	
3821	areas and a spill protection plan;	
3822	6. Wrecking yards; and	
3823	7. Landfills for hazardous waste, municipal solid waste, or special waste, as	
3824	defined in K.C.C. chapter 10.04.	
3825	D. The following standards apply to development proposals and alterations that	
3826	are substantial improvements on a site located in a critical aquifer recharge area:	

Commented [JN402]: Corrects citation

- 184 -

3827	1. The owner of an underground storage tank, including a tank that is exempt		
3828	from the requirements of chapter 173-360A WAC, in a category I or III critical aquifer		
3829	recharge area or a category II critical aquifer recharge area located over an aquifer		
3830	underlying Vashon-Maury Island shall either bring the tank into compliance with the		
3831	standards of chapter 173-360A WAC and K.C.C. Title 17 or properly decommission or		
3832	remove the tank; and		
3833	2. The owner of an underground storage tank in a category II critical aquifer		
3834	recharge area not located on located over an aquifer underlying Vashon-Maury Island		
3835	shall bring the tank into compliance with the standards of chapter $173-360$ <u>A</u> WAC and		
3836	K.C.C. Title 17 or shall properly decommission or remove the tank.		
3837	E. In any critical aquifer recharge area, the property owner shall properly		
3838	decommission an abandoned well.

3892

2. For purposes of this subsection A., unless the director determines a lesser

3893 level of impact is appropriate based on information provided by the applicant, the

3894 intensity of impact of the adjacent land use is determined as follows:

3895 a. High impact includes:

3896 (1) sites zoned commercial or industrial;

3897 (2) commercial, institutional, or industrial use on a site regardless of the

3898 zoning classification;

3899 (3) nonresidential use on a site zoned ((for residential use)) RA, UR, or R,

3900 such as telecommunication towers and associated equipment;

3901 (4) high-intensity active recreation use on a site regardless of zoning, such as

3902 golf courses, ((ball)) sports fields, and similar use;

Commented [JN407]: Identifies what zones are considered residential use Formatted: Strikethrough

4011	or the)) wetland functions and values from the proposed developmentalteration; and	Commented [JN423]: Clarifying edits.
4012	((b.)) (2) provides insignificant biological, geological, or hydrological buffer	
4013	functions relating to the other portion of the buffer adjacent to the wetland; and	
4014	b. the applicant provides a written evaluation that includes:	

- 194 -

4015	(1) a description of the vegetative composition, hydrologic regime,	
4016	topography, and development on both sides of the roadway;	
4017	(2) an assessment of the functions that the buffer provides on the other side of	
4018	the roadway for wildlife habitat, water quality, and water quantity; and	
4019	(3) an analysis of how the roadway will fully disconnects the buffer from	<b>Commented [JN424]:</b> Changes to present tense, as this section addresses existing roadways
4020	providing the assessed functions, and whether the disconnection will affects the entirety	
4021	of the buffer; and	
4022	5. ((If the site has an approved rural stewardship plan under K.C.C. 21A.24.055,	
4023	the buffer widths shall be established under the rural stewardship plan and shall not	
4024	exceed the standard for a low impact land use, unless the department determines that a	
4025	larger buffer is necessary to achieve no net loss of wetland ecological function; and	
4026	6. The buffer widths required for proposed land uses with)) For proposed	
4027	dwelling units For developments with residential uses, mixed-use, daycares, and social	<b>Commented [JN425]:</b> Revised to include additional uses in the UGA
4028	services within the #Urban gGrowth #Area that have are categorized as high intensity	
4029	impacts to wetlands, the buffer widths can be reduced to those required for moderate	
4030	((intensity)) impacts ((under the following conditions)) if:	Commented [JN426]: Consistent terminology
4031	a. all the following measures to minimize impacts of the proposed land uses	Formatted: Strikethrough
4032	are applied:	
4033	(1) plant an area of revegetate with dense; native vegetation or climate-smart	
4034	adaptive plants along the edge of within the remaining buffer and in any other portion of	
4035	the buffer wherever existing vegetation is sparse that is equal to or greater than the area	
4036	by which the buffer was reduced;	<b>Commented [JN427]:</b> Requires entire buffer to be revegetated when the buffer is averaged and existing vegetation is sparse.
4037	(2) install wildlife lighting and direct all light away from the wetland;	

4038	(3) locate noise-generating activities away from the wetland;	<b>Commented [EA428]:</b> Adds requirement that any noise- generating activities are located away from the wetland.
4039	(34) install wildlife passable fencing at the edge of the wetland buffer;	
4040	(45) attach critical area signs to wildlife-passable fencing every fifty to	
4041	seventy-five linear feet, as determined by the department, so that a sign is visible from	
4042	any point along the edge of the critical area or buffer;	<b>Commented [EA429]:</b> Clarifies where signs must be placed.
4043	(56) submit an integrated pest and weed management plan that prohibits the	
4044	use of pesticides, herbicides, and fungicides in the wetland or associated buffer; and	
4045	(67) demonstrate how each of the following meets the core requirements in	
4046	the King County-Surface Water Design Manual, including:	
4047	(a) stormwater runoff;	
4048	(b) change in water regime; and	
4049	(c) erosion and dust control; and	
4050	<u>b.</u> $((F))$ for wetlands that score moderate or high for habitat <u>functions</u> $((-, which$	
4051	means six points or higher, the width of the buffer can be reduced if both of the following	
4052	eriteria are met:	
4053	(1) A)) <u>a</u> relatively undisturbed vegetated corridor at least one-hundred feet	
4054	wide is protected between the wetland and ((any other Priority Habitats as defined by the	
4055	Washington state Department of Fish and Wildlife in the priority habitat and species list))	
4056	a legally-protected, relatively undisturbed and vegetated area. The corridor ((must)) shall	Formatted: Strikethrough
4057	be protected for the entire distance ((between the wetland and the ((priority habitat))	Formatted: Strikethrough
4058	legally protected vegetated area and ((legally)) recorded via a conservation easement; and	
4059	(2) Measures to minimize the impacts of different land uses on wetlands as	
4060	identified in subsection C.6.b. of this section are applied; and	

- 196 -

4061

#### b. For wetlands that score low for habitat, which means less than six points, the

- 4062 buffer width can be reduced to that required for moderate intensity impacts by applying
- 4b63 measures to minimize impacts of the proposed land uses, as follows:
- 4064

## c. the proposed project does not impact the reduced buffer.

((Disturbance	Measures to minimize impacts
Lights	Direct lights away from wetland.
Noise	Locate activity that generates noise away from wetland. If
	warranted, enhance existing buffer with native vegetation
	plantings adjacent to noise source. For activities that generate
	relatively continuous, potentially disruptive noise, such as certain
	heavy industry or mining, establish an additional ten-foot heavily
	vegetated buffer strip immediately adjacent to the outer wetland
	<del>buffer.</del>
Toxic runoff	Route all new untreated runoff away from wetland while
	ensuring wetland is not dewatered. Establish covenants limiting
	use of pesticides within 150 feet of wetland. Apply integrated
	<del>pest management.</del>
Stormwater	Retrofit stormwater detention and treatment for roads and
runoff	existing adjacent development. Prevent channelized flow from
	lawns that directly enters the buffer. Use low impact intensity
	development techniques identified in the King County Surface
	Water Design Manual.
Change in	Infiltrate or treat, detain and disperse into buffer new runoff from

Commented [JN430]: Drafting correction.

66       buffer.         67       D. The department may approve a modification to the buffers established in         68       subsection A. of this section if the wetland was created or its characterization was         69       upgraded as part of a voluntary enhancement or restoration project.         70       E. 4620	((A, -)) This section applies to the following development proposals on parcels that	 Formatted: Strikethrough Formatted: Strikethrough
4621	include a segment of the designated wildlife habitat network:	<b>_</b>
4622	1. All ((urban planned developments, fully contained communities,)) binding	 <b>Commented [JN510]:</b> Urban planned developments and fully contained communities were repealed as part of the 2024
4623	site plans, subdivisions, and short subdivisions; and	Comprehensive Plan. Technical edit to reflect the repeal. Formatted: Strikethrough
4624	2. All development proposals on individual lots unless a segment of the wildlife	
4625	habitat network in full compliance with K.C.C. 21A.24.386 already exists in a tract,	
4626	easement, or setback area, and a notice of the existence of the segment has been recorded;	
4627	B. Segments of the wildlife habitat network ((must)) shall be identified and	 Formatted: Strikethrough
4628	protected in one of the following ways:	
4629	1. In ((urban planned developments, fully contained communities)) binding site	 <b>Commented [JN511]:</b> Urban planned developments and fully contained communities were repealed as part of the 2024 Comprehensive Plan. Technical edit to reflect the repeal.
4630	plans, subdivisions, and short subdivisions, native vegetation is placed in a contiguous	Formatted: Strikethrough
4631	permanent open((-)) space tract with all developable lots sited on the remaining portion	 Formatted: Strikethrough

4632	of the ((project)) development proposal site, or the lots are designed so that required	(	Formatted: Strikethrough	
4633	setback areas can form a contiguous setback covering the network segments; or			
4634	2. For individual lots, the network is placed in a county-approved setback area.			
4635	To the maximum extent practical, existing native vegetation is included in the network.			
4636	The notice required by K.C.C. ((21A.27.170)) 21A.24.170 is required; and	[	Commented [JN512]: Co	orrect
			Formatted: Strikethrough	
4637	C. All wildlife habitat network tracts or setback areas (( <del>must</del> )) shall meet the	(	Formatted: Strikethrough	
4638	design standards in K.C.C. 21A.24.386.			
4639	SECTION 92. Ordinance 11621, Section 53, as amended, and K.C.C.			
4640	21A.24.386 are hereby amended to read as follows:			
4641	The following standards apply to development proposals and alterations on sites			
4642	containing wildlife habitat network:			
4643	A. Unless allowed as an alteration exception under K.C.C. 21A.24.070, only the			
4644	alterations identified in K.C.C. 21A.24.045 are allowed in the wildlife habitat network;			
4645	B. The wildlife habitat network is sited to meet the following conditions:			
4646	1. The network forms one contiguous tract or setback area that enters and exits			
4647	the property where the network crosses the property boundary;			
4648	2. To the maximum extent practical, the network maintains a width of three-			
4649	hundred feet. The network width shall not be less than one-hundred-fifty feet at any			
4650	point; and			
4651	3. The network is contiguous with and includes critical areas and their buffers;			
4652	4. To the maximum extent practical, the network connects isolated critical areas			
4653	or habitat; and			
I				

ts cross reference.

- 229 -

4654	5. To the maximum extent practical, the network connects with wildlife habitat	
4655	network segments, open space tracts, or wooded areas on adjacent properties, if present;	
4656	C. The wildlife habitat network tract (( <del>must</del> )) shall be permanently marked in	<b>Formatted:</b> Strikethrough
4657	accordance with this chapter;	
4658	D. An applicant proposing recreation, forestry, or any other use compatible with	
4659	preserving and enhancing the habitat value of the wildlife habitat network located within	
4660	the site ((must)) shall have an approved management plan. The applicant shall include	Formatted: Strikethrough
4661	and record the approved management plan for a binding site plan or subdivision with the	
4662	covenants, conditions, and restrictions (CCRs), if any. Clearing within the wildlife	
4663	habitat network in a tract or tracts is limited to that allowed by an approved management	
4664	<u>plan;</u>	
4665	E. If the wildlife habitat network is contained in a setback area, a management	
4666	plan is not required. Clearing is not allowed within a wildlife habitat network within a	
4667	setback area on individual lots, unless the property owner has an approved management	
4668	<u>plan;</u>	
4669	F. In ((urban planned developments, fully contained communities,)) binding site	<b>Commented [JN513]:</b> Urban planned developments and fully contained communities were repealed as part of the 2024
4670	plans, subdivisions, and short subdivisions, a homeowners association or other entity	Comprehensive Plan. Technical edit to reflect the repeal. Formatted: Strikethrough
4671	capable of long term maintenance and operation shall monitor and assure compliance	
4672	with any approved management plan;	
4673	G. The department may credit a permanent open space tract containing the	
4674	wildlife habitat network toward the other applicable requirements such as surface water	
4675	management and the recreation space requirement of K.C.C. 21A.14.180, if the proposed	
4676	uses within the tract are compatible with preserving and enhancing the wildlife habitat	

4677	value. Restrictions on other uses within the wildlife habitat network tract shall be clearly
4678	identified in the management plan; and
4679	H. The director may waive or reduce these standards for public facilities such as
4680	schools, fire stations, parks, and road projects.
4681	SECTION 7793. Ordinance 15051, Section 204, and K.C.C. 21A.24.388 are
4682	hereby amended to read as follows:
4683	In addition to the requirements in (( <del>K.C.C. 21A.24.130, 21A.24.125 and</del>
4684	21A.24.133)) this chapter, the following applies to mitigation ((to compensate)) for ((the
4685	adverse impacts associated with)) wildlife habitat conservation areas and wildlife habitat
4686	networks:
4687	A. Mitigation ((to compensate)) for ((the adverse impacts to)) a wildlife habitat
4688	conservation area (( <del>must</del> )) <u>shall</u> prevent disturbance of each protected species. On-site
4689	mitigation may include management practices, such as timing of the disturbance. Off-site
4690	mitigation is limited to sites that will enhance the ((wildlife)) habitat ((conservation area))
4691	of the species impacted;
4692	B. Mitigation ((to compensate)) for ((the adverse impacts to the)) a wildlife
4693	habitat network ((must)) shall achieve ((equivalent or greater)) equal or better biological
4694	functions, including, but not limited to, habitat complexity and connectivity functions.
4695	Specific mitigation requirements for impacts to the wildlife habitat network shall:
4696	1. Expand or enhance the wildlife network as close to the location of impact as
4697	feasible; and
4698	2. Attain the following ratios of area of mitigation to area of alteration:
4699	a. for mitigation on site:

Formatted: Strikethrough

Commented [JN514]: Change to be consistent with other changes in the transmittal (see K.C.C. 21A.24.340) Formatted: Strikethrough Formatted: Strikethrough Commented [JN515]: Streamlining of text.

4700	(1) 1.5:1 ratio for rectifying an illegal alteration to a wildlife habitat network;	
4701	and	
4702	(2) 1.5:1 ratio for enhancement or restoration; and	
4703	b. for mitigation off-site:	
4704	(1) 2:1 ratio for rectifying an illegal alteration to a wildlife habitat network;	
4705	and	
4706	(2) 3:1 ratio for enhancement or restoration;	
4707	C. For temporary ((alterations)) impacts, the department may require	<b>Commented [JN520]:</b> Consistency edits.
4708	((rectification)) rehabilitation, restoration, or enhancement of the altered wildlife habitat	Formatted: Strikethrough
4700		Commented [JN521]: Consistency edits.
4709	network;	
4710	D. The department may increase the width of the wildlife habitat network to	
4711	mitigate for risks to habitat functions;	
4712	E. To the maximum extent practical, mitigation projects involving wildlife	
4713	habitat network restoration should provide replication of the site's prealteration natural	
4714	environment including:	
4715	1. Soil type, conditions, and physical features;	
4716	2. Vegetation diversity and density; and	
4717	3. Biological and habitat functions; and	
 4718	F. The department may modify the requirements in this section if the applicant	
4719	demonstrates that greater wildlife habitat functions will be obtained in the same wildlife	
4720	habitat conservation area or wildlife habitat network through alternative mitigation	
4721	measures.	

- 232 -

4722	NEW SECTION. SECTION 94. There is hereby added to K.C.C. chapter	
4723	21A.24, to follow K.C.C. 21A.24.460, a new section to read as follows:	
4724	Violations of this chapter are enforced in accordance with K.C.C. 21A.50.035 and	
4725	K.C.C. Title 23.	
4726	SECTION 7895. Ordinance 16958, Section 31, as amended, and K.C.C.	
4727	21A.25.100 are hereby amended to read as follows:	
4728	A. The shoreline use table in this section determines whether a specific use is	
4729	allowed within each of the shoreline environments. The shoreline environment is located	
4730	on the vertical column and the specific use is located on the horizontal row of the table.	
4731	The specific uses are grouped by the shoreline use categories in WAC 173-26-241. The	
4732	specific uses are defined by those uses in K.C.C. chapter 21A.08. The table should be	
4733	interpreted as follows:	
4734	1. If the cell is blank in the box at the intersection of the column and the row,	
4735	the use is prohibited in that shoreline environment;	
4736	2. If the letter "P" appears in the box at the intersection of the column and the	
4737	row, the use may be allowed within the shoreline environment;	
4738	3. If the letter "C" appears in the box at the intersection of the column and the	
4739	row, the use may be allowed within the shoreline environment subject to the shoreline	
4740	conditional use review procedures specified in K.C.C. 21A.44.100;	
4741	4. If a number appears in the box at the intersection of the column and the row,	
4742	the use may be allowed subject to the appropriate review process in this section, the	
4743	general requirements of this chapter and the specific development conditions indicated	

**Commented [JN522]:** Connects the critical area chapter to violations chapter.

4744	with the corresponding number in subsection C. of this section. If more than one number
4745	appears after a letter, all numbers apply;
4746	5. If more than one letter-number combination appears in the box at the
4747	intersection of the column and the row, the use is allowed in accordance with each letter-
4748	number combination;
4749	6. A shoreline use may be allowed in the aquatic environment only if that
4750	shoreline use is allowed in the adjacent shoreland environment; and
4751	7. This section does not authorize a land use that is not allowed by the
4752	underlying zoning, but may add additional restrictions or conditions or prohibit specific
4753	land uses within the shoreline jurisdiction. When there is a conflict between the allowed
4754	land uses in K.C.C. chapter 21A.08 and shoreline uses in this section, preference for
4755	shoreline uses shall first be given to water-dependent uses, then to water related uses, and
4756	finally to water enjoyment uses. All uses in the shoreline jurisdiction shall comply with
4757	all relevant county code provisions and with the King County $((S))$ <u>s</u> horeline $((M))$ <u>m</u> aster
4758	((P))program.

4759 B. Shoreline uses.

4760	C. Development conditions:
4761	1. In the $((\mathbf{N}))$ <u>n</u> atural <u>shoreline</u> environment, limited to low intensity agriculture,
4762	such as livestock use with an animal unit density of no more than one per two acres in the
4763	shoreline jurisdiction, seasonal hay mowing and related activities, and horticulture not to
4764	exceed twenty percent of the site area located within the shoreline jurisdiction.
4765	2.a. The supporting infrastructure for aquaculture may be located landward of
4766	the aquaculture operation, subject to the limitations of K.C.C. Title 21A.
4767	b. The aquaculture operation shall meet the standards in K.C.C. 21A.25.110.
4768	c. In aquatic areas adjacent to the residential shoreline environment, net pen
4769	facilities shall be located no closer than one thousand five hundred feet from the ordinary
4770	high water mark of this environment, unless the department allows a specific lesser
4771	distance that it determines is appropriate based upon a visual impact analysis. Other
4772	types of floating culture facilities may be located within one thousand five hundred feet
4773	of the ordinary high water mark if supported by a visual impact analysis.
4774	d. In aquatic areas adjacent to the rural shoreline environment, net pen
4775	facilities shall be located no closer than one thousand five hundred feet from the ordinary
4776	high water mark of this environment, unless the department allows a specific lesser
4777	distance that it determines is appropriate based upon a visual impact analysis.
4778	e. In the natural shoreline environment and aquatic areas adjacent to the natural
4779	shoreline environment, commercial net pens are prohibited, and other aquaculture
4780	activities are limited to activities that do not require structures, facilities, or mechanized
4781	harvest practices and that will not alter the natural systems, features, or character of the
4782	site.

- 243 -

4783	f. Farm-raised geoduck aquaculture requires a shoreline substantial	
4784	development permit if a specific project or practice causes substantial interference with	
4785	normal public use of the surface waters.	
4786	g. A conditional use permit is required for new commercial geoduck	
4787	aquaculture only, consistent with WAC 173-26-241(3)(b). All subsequent cycles of	
4788	planting and harvest shall not require a new conditional permit.	
4789	3.a. New marinas are not allowed along the east shore of <u>Vashon-Maury</u> Island,	
4790	from Piner Point to Point Robinson.	
4791	b. Marinas shall meet the standards in K.C.C. 21A.25.120.	
4792	4. Water-Water-dependent general-personal services land uses in K.C.C.	
4793	21A.08.050 are allowed. Nonwater-dependent general-personal services land uses in	
4794	K.C.C. 21A.08.050 are only allowed on sites that are not contiguous with the ordinary	
4795	high water mark or on sites that do not have an easement that provides direct access to	
4796	the water.	
4797	5.a. Water-dependent general personal services land uses in K.C.C. 21A.08.050	
4798	are allowed.	
4799	b. Nonwater-dependent general personal services land uses in K.C.C.	
4800	21A.08.050 are only allowed as part of a shoreline mixed-use development that includes	
4801	water-dependent uses.	
4802	c. Nonwater-oriented general personal service((s)) land uses shall provide a	Commented [JN534]: Engrosses Ordinance 19881.
4803	((significant)) public benefit by ((helping to achieve)) achieving one or more of the	Formatted: Not Strikethrough
4804	following shoreline master program goals:	
4805	(1) economic development for water-dependent uses;	

- 244 -

4806	(2) public access;
4807	(3) water-oriented recreation;
4808	(4) conservation of critical areas, scenic vistas, aesthetics, or fish and wildlife
4809	habitat; (( <del>and</del> )) <u>or</u>
4810	(5) protection and restoration of historic properties.
4811	6. Water-dependent business services uses in K.C.C. 21A.08.050 are allowed.
4812	Water-related business service((s)) uses are only allowed as part of a shoreline mixed-use
4813	development and only if they support a water-dependent use. The water-related business
4814	service((s)) uses shall comprise less than one-half of the square footage of the structures
4815	or the portion of the site within the shoreline jurisdiction.
4816	7.a. Water-dependent retail uses in K.C.C. 21A.08.050 are allowed.
4817	b. Nonwater-dependent retail uses in K.C.C. 21A.08.050 are only allowed as
4818	part of a shoreline mixed-use development if the nonwater-dependent retail use supports
4819	a water-dependent use. Nonwater-dependent uses shall comprise less than one-half of the
4820	square footage of the structures or the portion of the site within the shoreline jurisdiction.
4821	c. Nonwater-oriented retail uses shall provide a significant public benefit by
4822	helping to achieve one or more of the following shoreline master program goals:
4823	(1) economic development for water-dependent uses;
4824	(2) public access;
4825	(3) water-oriented recreation;
4826	(4) conservation of critical areas, scenic vistas, aesthetics, or fish and wildlife
4827	habitat; and
4828	(5) protection and restoration of historic properties.

- 245 -

4829	8. Water-dependent retail uses in K.C.C. 21A.08.050 are allowed. Nonwater-
4830	dependent retail uses in K.C.C. 21A.08.050 are only allowed if the retail use provides a
4831	significant public benefit by helping to achieve one or more of the following shoreline
4832	master program goals:
4833	a. economic development for water-dependent uses;
4834	b. public access;
4835	c. water-oriented recreation;
4836	d. conservation of critical areas, scenic vistas, aesthetics, or fish and wildlife
4837	habitat; and
4838	e. protection and restoration of historic properties.
4839	9.a. Water-dependent government services in K.C.C. 21A.08.060-055 are Commented [JN535]: Engrosses Ordinance 19881.
4840	allowed.
4841	b. Nonwater-dependent government services in K.C.C. 21A.08.060-055 are only Commented [JN536]: Engrosses Ordinance 19881.
4842	allowed as part of a shoreline mixed-use development if the nonwater-dependent
4843	government use supports a water-dependent use. Nonwater-dependent uses shall
4844	comprise less than one-half of the square footage of the structures or the portion of the
4845	site within the shoreline jurisdiction. Only low-intensity water-dependent government
4846	services are allowed in the $((\mathbb{N}))$ <u>n</u> atural environment.
4847	10. The following standards apply to government services uses within the
4848	((A)) <u>aquatic environment:</u>
4849	a. Stormwater and sewage outfalls are allowed if upland treatment and
4850	infiltration to groundwater, streams, or wetlands is not feasible and there is no impact on
4851	critical saltwater habitats, salmon migratory habitat, and the nearshore zone. However,

- 246 -

stormwater and sewage outfalls are not allowed in the Maury Island Aquatic Reserve,

4852

4853	except from Piner Point to Point Robinson;	
4854	b. Water intakes shall not be located near fish spawning, migratory, or rearing	
4855	areas. Water intakes shall adhere to Washington state Department of Fish and Wildlife	
4856	fish screening criteria. To the maximum extent practical, intakes should be placed at	
4857	least thirty feet below the ordinary high water mark;	
4858	c. Desalinization facilities shall not be located near fish spawning, migratory,	
4859	or rearing areas. Intakes should generally be placed deeper than thirty feet below the	
4860	ordinary high water mark and shall adhere to Washington state Department Fish and	
4861	Wildlife fish screening criteria. Discharge of desalination wastewater or concentrated	
4862	mineral is not allowed in the Maury Island Aquatic Reserve, except that outside the Inner	
4863	and Outer Harbormaster Harbor, discharge may be considered if there is no impact on	
4864	critical saltwater habitats, salmon migratory habitat, and the nearshore zone;	
4865	d. ((C))eable crossings for telecommunications and power lines shall:	 Commented [JN537]: Drafting corrections
4866	(1) be routed around or drilled below aquatic critical habitat or species;	Formatted: Not Strikethrough
4867	(2) be installed in sites free of vegetation, as determined by physical or video	
4868	seabed survey;	
4869	(3) be buried, preferably using directional drilling, from the uplands to	
4870	waterward of the deepest documented occurrence of native aquatic vegetation; and	
4871	(4) use the best available technology;	
4872	e. ((O))eil, gas, water, and other pipelines shall meet the same standards as	 Formatted: Not Strikethrough
4873	cable crossings and in addition:	

- 247 -

4874	(1) pipelines shall be directionally drilled to depths of seventy feet or one half	
4875	mile from the ordinary high water mark; and	
4876	(2) use the best available technology for operation and maintenance;	
4877	f. ((B))breakwaters are not allowed within the Maury Island Aquatic Reserve	<b>- F</b> c
4878	or within the $((A))\underline{a}$ quatic environment adjacent to the $((C))\underline{c}$ onservancy and $((N))\underline{n}$ atural	
4879	shorelines.	
4880	11. In the $((N))$ <u>n</u> atural <u>shoreline</u> environment, limited to low intensity forest	
4881	practices that conserve or enhance the health and diversity of the forest ecosystem or	
4882	ecological and hydrologic functions conducted for the purpose of accomplishing specific	
4883	ecological enhancement objectives. In all shoreline environments, forest practices shall	
4884	meet the standards in K.C.C. 21A.25.130.	
4885	12. Manufacturing uses in the shoreline environment shall give preference first	
4886	to water-dependent manufacturing uses and second to water-related manufacturing uses:	
4887	a. $((\mathbb{N}))\underline{n}$ onwater-oriented manufacturing uses are allowed only:	
4888	(1) as part of a shoreline mixed-use development that includes a water-	
4889	dependent use, but only if the water-dependent use comprises over fifty percent of the	
4890	floor area or portion of the site within the shoreline jurisdiction;	
4891	(2) on sites where navigability is severely limited; or	
4892	(3) on sites that are not contiguous with the ordinary high water mark or on	
4893	sites that do not have an easement that provides direct access to the water; and	
4894	(4) all nonwater-oriented manufacturing uses shall also provide a significant	
4895	public benefit, such as ecological restoration, environmental clean-up, historic	
4896	preservation, or water-dependent public education;	

Formatted: Not Strikethrough

- 248 -

4897	b. public access is required for all manufacturing uses unless it would result in
4898	a public safety risk or is incompatible with the use;
4899	c. shall be located, designed, and constructed in a manner that ensures that
4900	there are no significant adverse impacts to other shoreline resources and values;
4901	d. restoration is required for all new manufacturing uses; and
4902	e. boat repair facilities are not allowed within the Maury Island Aquatic
4903	Reserve, except as follows:
4904	(1) engine repair or maintenance conducted within the engine space without
4905	vessel haul-out;
4906	(2) topside cleaning, detailing, and bright work;
4907	(3) electronics servicing and maintenance;
4908	(4) marine sanitation device servicing and maintenance that does not require
4909	haul-out;
4910	(5) vessel rigging; and
4911	(6) minor repairs or modifications to the vessel's superstructure and hull
4912	above the waterline that do not exceed twenty-five percent of the vessel's surface area
4913	above the waterline.
4914	13. The water-dependent in-stream portion of a hydroelectric generation facility,
4915	wastewater treatment facility, and municipal water production are allowed, including the
4916	upland supporting infrastructure, and shall provide for the protection and preservation, of
4917	ecosystem-wide processes, ecological functions, and cultural resources, including, but not
4918	limited to, fish and fish passage, wildlife and water resources, shoreline critical areas,
4919	hydrogeological processes, and natural scenic vistas.

- 249 -

4920	14. New in-stream portions of utility facilities may be located within the	
4921	shoreline jurisdiction if:	
4922	a. there is no feasible alternate location;	
4923	b. provision is made to protect and preserve ecosystem-wide processes,	
4924	ecological functions, and cultural resources, including, but not limited to, fish and fish	
4925	passage, wildlife and water resources, shoreline critical areas, hydrogeological processes,	
4926	and natural scenic vistas; and	
4927	c. the use complies with the standards in K.C.C. 21A.25.260.	
4928	15. Limited to in-stream infrastructure, such as bridges, and shall consider the	
4929	priorities of the King County Shoreline Protection and Restoration Plan when designing	
4930	in-stream transportation facilities. In-stream structures shall provide for the protection	
4931	and preservation of ecosystem-wide processes, ecological functions, and cultural	
4932	resources, including, but not limited to, fish and fish passage, wildlife and water	
4933	resources, shoreline critical areas, hydrogeological processes, and natural scenic vistas.	
4934	16. Limited to hatchery and fish preserves.	
4935	17. Mineral uses:	
4936	a. shall meet the standards in K.C.C. chapter 21A.22;	
4937	b. shall be dependent upon a shoreline location;	
4938	c. shall avoid and mitigate ((adverse)) impacts to the shoreline environment	Commented [JN538]: Consistent terminology.
4939	during the course of mining and reclamation to achieve no net loss of shoreline ecological	Formatted: Strikethrough
4940	function. In determining whether there will be no net loss of shoreline ecological	
4941	function, the evaluation may be based on the final reclamation required for the site.	

- 250 -

4942	Preference shall be given to mining proposals that result in the creation, restoration, or
4943	enhancement of habitat for priority species;
4944	d. shall provide for reclamation of disturbed shoreline areas to achieve
4945	appropriate ecological functions consistent with the setting;
4946	e. may be allowed within the active channel of a river only as follows:
4947	(1) removal of specified quantities of sand and gravel or other materials at
4948	specific locations will not adversely affect the natural processes of gravel transportation
4949	for the river system as a whole;
4950	(2) the mining and any associated ((permitted)) allowed activities will not
4951	have ((significant adverse)) impacts to habitat for priority species nor cause a net loss of
4952	ecological functions of the shoreline; and
4953	(3) if no review has been previously conducted under this subsection C.17.e.,
4954	before renewing, extending, or reauthorizing gravel bar and other in-channel mining
4955	operations in locations where they have previously been conducted, the department shall
4956	require compliance with this subsection C.17.e. If there has been prior review, the
4957	department shall review previous determinations comparable to the requirements of this
4958	section C.17.e. to ensure compliance with this subsection under current site conditions;
4959	and
4960	f. shall comply with K.C.C. 21A.25.190.
4961	18. Only water-dependent recreational uses are allowed, except for public parks
4962	and trails, in the $((H))\underline{h}$ igh $((I))\underline{h}$ intensity <u>shoreline</u> environment and shall meet the

Commented	[JN539]:	Consistent terminology.	
			1

- Formatted: Strikethrough
- **Commented [JN540]:** Consistent terminology.
- Formatted: Strikethrough

- 251 -

4964	19. Water-dependent and water-enjoyment recreational uses are allowed in the	
4965	$((\mathbb{R}))$ <u>r</u> esidential, $((\mathbb{R}))$ <u>r</u> ural, and $((\mathbb{F}))$ <u>f</u> orestry <u>shoreline</u> environments and shall meet the	
4966	standards in K.C.C. 21A.25.140 for public access and K.C.C. 21A.25.150 for recreation.	
4967	20. In the ((C))conservancy shoreline environment, only the following	<b>Formatted:</b> Strikethrough
4968	recreation uses are allowed and shall meet the standards in K.C.C. 21A.25.140 for public	
4969	access and K.C.C. 21A.25.150 for recreation:	
4970	a. parks; and	
4971	b. trails.	
4972	21. In the $((\mathbf{N}))$ <u>n</u> atural <u>shoreline</u> environment, only passive and low-impact	
4973	recreational uses are allowed.	
4974	22. Single detached residences shall be located outside of the ((aquatic area	
4975	buffer)) riparian area and set back from the ordinary high water mark to the maximum	
4976	extent practical.	
4977	23. Only allowed as part of a water-dependent shoreline mixed-use development	
4978	where water-dependent uses comprise more than half of the square footage of the	
4979	structures on the portion of the site within the shoreline jurisdiction.	
4980	24. Residential accessory uses shall meet the following standards:	
4981	a. docks, piers, moorage, buoys, floats, or launching facilities shall comply	
4982	with the standards in K.C.C. 21A.25.180;	
4983	b. residential accessory structures located within the ((aquatic area buffer))	
4984	riparian area shall be limited to a total footprint of one-hundred fifty square feet; and	
4985	c. accessory structures shall be sited to preserve visual access to the shoreline	
4986	to the maximum extent practical.	

- 252 -

4987	25. New highway and street construction is allowed only if there is no feasible
4988	alternate location. Only low-intensity transportation infrastructure is allowed in the
4989	((N)) <u>n</u> atural environment.
4990	26. Utility facilities are subject to the standards in K.C.C. 21A.25.260.
4991	27. Only bed and breakfast guesthouses.
4992	28. Only in a marina.
4993	29. Transportation facilities are subject to the standards in K.C.C. 21A.25.280.
4994	30. Only solid waste transfer stations and subject to K.C.C. 21A.25.260.
4995	SECTION 7996. Ordinance 16985, Section 32, as amended, and K.C.C.
4996	21A.25.110 are hereby amended to read as follows:
4997	An applicant for an aquaculture facility shall use the sequential measures in
4998	K.C.C. 21A.25.080. The following standards apply to aquaculture:
4999	A. Unless the applicant demonstrates that the substrate modification will result in
5000	an increase in native habitat diversity, aquaculture that involves little or no substrate
5001	modification shall be given preference over aquaculture that involves substantial
5002	substrate modification and the degree of proposed substrate modification shall be limited
5003	to the maximum extent practical.
5004	B. The installation of submerged structures, intertidal structures and floating
5005	structures shall be limited to the maximum extent practical.
5006	C. Aquaculture proposals that involve substantial substrate modification or
5007	sedimentation through dredging, trenching, digging, mechanical clam harvesting, or other
5008	similar mechanisms, shall not be allowed in areas where the proposal would adversely
5009	impact critical saltwater or critical freshwater habitats.

- 253 -

5010	D. Aquaculture activities that after implementation of mitigation measures would
5011	have a significant adverse impact on natural, dynamic shoreline processes, or that would
5012	result in a net loss of shoreline ecological functions shall be prohibited.
5013	E. Aquaculture should not be located in areas that will result in significant
5014	conflicts with navigation or other water-dependent uses.
5015	F. Aquaculture facilities shall be designed, located, and managed to prevent the
5016	spread of diseases to native aquatic life or the spread of new nonnative species.
5017	G. Aquaculture practices shall be designed to minimize use of artificial chemical
5018	substances and shall use chemical compounds that are least persistent and have the least
5019	impact on plants and animals. Herbicides and pesticides shall be used only in
5020	conformance with state and federal standards and to the minimum extent needed for the
5021	health of the aquaculture activity.
5022	H. Noncommercial native salmon net pen facilities that involve minimal
5023	supplemental feeding and limited use of chemicals or antibiotics as provided in
5024	subsection G. of this section may be located in King County marine waters if they are
5025	consistent with subsections S. and Y. of this section and are:
5026	1. Native salmon net pens operated by Indian tribes with treaty fishing rights;
5027	2. For the limited penned cultivation of wild salmon stocks during a limited
5028	portion of their lifecycle to enhance restoration of native stocks; or
5029	3. For rearing to adulthood in order to harvest eggs as part of a captive brood
5030	stock recovery program for endangered species.
5031	I. If uncertainty exists regarding potential impacts of a proposed aquaculture
5032	activity and for all experimental aquaculture activities, unless otherwise provided for, the

- 254 -

5033	department may require baseline and periodic operational monitoring by a county-
5034	approved consultant, at the applicant's expense, and shall continue until adequate
5035	information is available to determine the success of the project and the magnitude of any
5036	probable ((significant)) adverse environmental impacts. Permits for such activities shall
5037	include specific performance measures and provisions for adjustment or termination of
5038	the project at any time if monitoring indicates ((significant,)) adverse environmental
5039	impacts that cannot be adequately mitigated.
5040	J. Aquaculture developments approved on an experimental basis shall not exceed
5041	five acres in area, except land-based projects and anchorage for floating systems, and
5042	three years in duration. The department may issue a new permit to continue an
5043	experimental project as many times as it determines is necessary and appropriate.
5044	K. The department may require aquaculture operations to carry liability insurance
5045	in an amount commensurate with the risk of injury or damage to any person or property
5046	as a result of the project. Insurance requirements shall not be required to duplicate
5047	requirements of other agencies.
5048	L. If aquaculture activities are authorized to use public facilities, such as boat
5049	launches or docks, King County may require the applicant to pay a portion of the cost of
5050	maintenance and any required improvements commensurate with the use of those
5051	facilities.
5052	M. New aquatic species that are not previously cultivated in Washington state
5053	shall not be introduced into King County saltwaters or freshwaters without prior written
5054	approval of the Director of the Washington state Department of Fish and Wildlife and the

- 255 -

Director of the Washington state Department of Health. This prohibition does not apply

5055

5056	to((÷)) Pacific, Olympia, Kumomoto, Belon, or Virginica oysters; Manila, Butter, or
5057	Littleneck clams; or Geoduck clams.
5058	N. Unless otherwise provided in the shoreline permit issued by the department,
5059	repeated introduction of an approved organism after harvest in the same location shall
5060	require approval by the county only at the time the initial aquaculture use permit is
5061	issued. Introduction, for purposes of this section, shall mean the placing of any aquatic
5062	organism in any area within the waters of King County regardless of whether it is a native
5063	or resident organism within the county and regardless of whether it is being transferred
5064	from within or without the waters of King County.
5065	O. For aquaculture projects, overwater structures shall be allowed only if
5066	necessary for the immediate and regular operation of the facility. Overwater structures
5067	shall be limited to the storage of necessary tools and apparatus in containers of not more
5068	than three feet in height, as measured from the surface of the raft or dock.
5069	P. Except for the sorting or culling of the cultured organism after harvest and the
5070	washing or removal of surface materials or organisms before or after harvest, no
5071	processing of any aquaculture product shall occur in or over the water unless specifically
5072	approved by permit. All other processing and processing facilities shall be located
5073	landward of the ordinary high water mark.
5074	Q. Aquaculture wastes shall be disposed of in a manner that will ensure strict
5075	compliance with all applicable governmental waste disposal standards, including, but not
5076	limited to, the Federal Clean Water Act, Section 401, and chapter 90.48 RCW, Water
5077	Pollution Control. No garbage, wastes, or debris shall be allowed to accumulate at the
5078	site of any aquaculture operation.

- 256 -

5079	R. Unless approved in writing by the National Marine Fisheries Service or the
5080	U.S. Fish and Wildlife Service, predator control shall not involve the killing or
5081	harassment of birds or mammals. Approved controls include, but are not limited to,
5082	double netting for seals, overhead netting for birds, and three-foot high fencing or netting
5083	for otters. The use of other nonlethal, nonabusive predator control measures shall be
5084	contingent upon receipt of written approval from the National Marine Fisheries Service
5085	or the U.S. Fish and Wildlife Service, as required.
5086	S. Finfish net pens and rafts shall meet the following criteria in addition to the
5087	other applicable regulations of this section:
5088	1. Finfish net pens shall not be located in Quartermaster Harbor. For the
5089	purposes of this subsection, "Quartermaster Harbor" means the area of Puget Sound north
5090	of a straight line drawn from the southwest tip of Vashon-Maury Island, which is Piner
5091	Point, to the southeast tip of Vashon-Maury Island, which is Neill Point;
5092	2. Finfish net pens shall meet, at a minimum, state approved administrative
5093	guidelines for the management of net pen cultures. In the event there is a conflict in
5094	requirements, the more restrictive requirement shall prevail;
5095	3. Finfish net pens shall not occupy more than two surface acres of water area,
5096	excluding booming and anchoring requirements. Anchors that minimize disturbance to
5097	substrate, such as helical anchors, shall be employed. Such operations shall not use
5098	chemicals or antibiotics;
5099	4. Aquaculture proposals that include new or added net pens or rafts shall not be
5100	located closer than one nautical mile to any other aquaculture facility that includes net
5101	pens or rafts. The department may authorize a lesser distance if the applicant

- 257 -

5102	demonstrates to the satisfaction of the department that the proposal will be consistent
5103	with the environmental and aesthetic policies and objectives of this chapter and the
5104	shoreline master program. The applicant shall demonstrate to the satisfaction of the
5105	department that the cumulative impacts of existing and proposed operations would not be
5106	contrary to the policies and regulations of the program;
5107	5. Net cleaning activities shall be conducted on a frequent enough basis so as
5108	not to violate state water quality standards. When feasible, the cleaning of nets and other
5109	apparatus shall be accomplished by air drying, spray washing, or hand washing; and
5110	6. In the event of a significant fish kill at the site of a net pen facility, the finfish
5111	aquaculture operator shall submit a timely report to public health – Seattle & King
5112	County, environmental health division, and the department of local services, permitting
5113	division, stating the cause of death and shall detail remedial actions to be implemented to
5114	prevent reoccurrence.
5115	T. All floating and submerged aquaculture structures and facilities in navigable
5116	waters shall be marked in accordance with United States Coast Guard requirements.
5117	U. The rights of treaty tribes to aquatic resources within their usual and
5118	accustomed areas shall be addressed through direct coordination between the applicant
5119	and the affected Indian tribes through the permit review process.
5120	V. Aquaculture structures and equipment shall be of sound construction and shall
5121	be so maintained. Abandoned or unsafe structures and equipment shall be removed or
5122	repaired promptly by the owner. Where any structure might constitute a potential hazard
5123	to the public in the future, the department shall require the posting of a bond
5124	commensurate with the cost of removal or repair. The department may abate an

- 258 -

5125	abandoned	or unsafe struc	ture in acco	ordance with	K.C.C. Title 23

5126	W. Aquaculture shall not be approved where it will adversely impact eelgrass and
5127	macroalgae.
5128	X. Commercial salmon net pens and nonnative marine finfish aquaculture are
5129	prohibited.
5130	Y. Finfish net pens shall be consistent with the applicable aquaculture regulations
5131	in this section and shall meet the following criteria and requirements:
5132	1. Each finfish net pen application shall provide a current, peer-reviewed
5133	science review of environmental issues related to finfish net pen aquaculture;
5134	2. The department shall only approve a finfish net pen application if the
5135	department determines the scientific review demonstrates:
5136	a. that the project construction and activities will achieve no net loss of
5137	ecological function in a manner that has no ((significant)) adverse short-term impact and
5138	no documented adverse long-term impact to applicable elements of the environment,
5139	including, but not limited to, habitat for native salmonids, water quality, critical saltwater
5140	or critical freshwater habitat, eel grass beds, other aquaculture, other native species, the
5141	benthic community below the net pen or other environmental attributes; and
5142	b. that the finfish net pen does not involve significant risk of cumulative
5143	adverse effects, including, but not limited to, risk of interbreeding with wild salmon or
5144	reduction of genetic fitness of wild stocks, parasite or disease transmission, or other
5145	adverse effects on native species or threatened or endangered species and their habitats;
5146	3. The department's review shall:
5147	a. include an assessment of the risk to endangered species, non-endangered

- 259 -

5148	species, and other biota that could be affected by the finfish net pen; and	
5149	b. evaluate and model water quality impacts utilizing current information,	
5150	technology, and assessment models. The project proponent shall be financially	
5151	responsible for this water quality assessment;	
5152	4. Finfish net pens shall be designed, constructed and maintained to prevent	
5153	escapement of fish in all foreseeable circumstances, including, but not limited to, tide,	
5154	wind and wave events of record, floating and submerged debris, and tidal action;	
5155	5. Finfish net pens shall not be located:	
5156	a. within three hundred feet of an area containing eelgrass or a kelp bed;	
5157	b. within one thousand five hundred feet of an ordinary high water mark; or	
5158	c. in a designated Washington state Department of Natural Resources aquatic	
5159	reserve;	
5160	6. A finfish net pen may not be used to mitigate the impact of a development	
5161	proposal; and	
5162	7. For finfish net pens that are not noncommercial native salmon net pens, the	
5163	conditional use permit for the net pen shall be renewed every five years. An updated	
5164	scientific review shall be conducted as part of the renewal and shall include a new risk	
5165	assessment and evaluation of the impact of the operation of the finfish net pen during the	
5166	previous five years.	
5167	Z. Geoduck aquaculture shall be consistent with WAC 173-26-241(3)(b).	
5168	SECTION 8097. Ordinance 3688, Section 415, as amended, and K.C.C.	
5169	21A.25.150 are hereby amended to read as follows:	
5170	Recreational development ((must)) shall meet the following standards:	<b>Formatted:</b> Strikethrough
I		

- 260 -

5171	A. The recreational development ((must be)) is permitted in the underlying zone;	<b>Formatted:</b> Strikethrough
5172	B. Recreational uses in the ((N)) <u>n</u> atural <u>shoreline</u> environment (( <del>must)) shall</del> be	Formatted: Strikethrough
 5173	water-oriented;	
5174	C. Swimming areas shall be separated from boat launch areas and marinas, to the	
5175	maximum extent practical;	
5176	D. The development of underwater sites for sport diving shall not:	
5177	1. Take place at depths of greater than eighty feet;	
5178	2. Constitute a navigational hazard; and	
5179	3. Be located in areas where the normal waterborne traffic would constitute a	
5180	hazard to those people who may use such a site;	
5181	E. The construction of swimming facilities, docks, piers, moorages, buoys, floats,	
5182	and launching facilities below the ordinary high water mark shall be governed by the	
5183	regulations relating to docks, piers, moorage, buoys, floats, or launching facility	
5184	construction in K.C.C. 21A.25.180;	
5185	F. Public boat launching facilities or marinas shall be governed by K.C.C.	
5186	21A.25.120;	
5187	G. Campgrounds in the $((\mathbf{N}))$ <u>n</u> atural <u>shoreline</u> environment shall meet the	
5188	following conditions:	
5189	1. Campsites shall be located outside the shoreline jurisdiction if possible, and if	
5190	not, be located outside of critical area((s)) and associated buffers;	
5191	2. Restrooms and parking shall be located outside the shoreline jurisdiction; and	
5192	3. Removal of vegetation shall be limited to the maximum extent practical;	

5193	H. Public contact with unique and fragile areas shall be permitted where it is	
5194	possible without destroying the natural character of the area;	
5195	I. Water viewing, nature study, recording, and viewing shall be accommodated	
5196	by open space, platforms, benches, or shelter, consistent with public safety and security;	
5197	J. Public recreation shall be provided on county-owned lands consistent with this	
5198	chapter unless the director determines public recreation is not compatible with other uses	
5199	on the site or will create a public safety risk; and	
5200	K. To the maximum extent practical, proposals for non water oriented active	
5201	recreation facilities shall be located outside of the shoreline jurisdiction and shall not be	
5202	permitted where the non((_)) water oriented active recreation facility would have an	Formatted: Strikethrough
5203	adverse impact on critical saltwater or critical freshwater habitats.	
5204	SECTION 8498. Ordinance 16985, Section 39, as amended, and K.C.C.	
5205	21A.25.160 are hereby amended to read as follows:	
5206	A. The shoreline modification table in this section determines whether a specific	
5207	shoreline modification is allowed within each of the shoreline environments. The	
5208	shoreline environment is located on the vertical column and the specific use is located on	
5209	the horizontal row of the table. The specific modifications are grouped by the shoreline	
5210	modification categories in WAC 173-26-231. The table should be interpreted as follows:	
5211	1. If the cell is blank in the box at the intersection of the column and the row,	
5212	the modification is prohibited in that shoreline environment;	
5213	2. If the letter "P" appears in the box at the intersection of the column and the	
5214	row, the modification may be allowed within the shoreline environment;	

- 262 -

5215	3. If the letter "C" appears in the box at the intersection of the column and the
5216	row, the modification may be allowed within the shoreline environment subject to the
5217	shoreline conditional use review procedures specified in K.C.C. 21A.44.100;
5218	4. If a number appears in the box at the intersection of the column and the row,
5219	the modification may be allowed subject to the appropriate review process indicated in
5220	this section and the specific development conditions indicated with the corresponding
5221	number immediately following the table, and only if the underlying zoning allows the
5222	modification. If more than one number appears at the intersection of the column and
5223	row, both numbers apply;
5224	5. If more than one letter-number combination appears in the box at the
5225	intersection of the column and the row, the modification is allowed within that shoreline
5226	environment subject to different sets of limitations or conditions depending on the review
5227	process indicated by the letter, the specific development conditions indicated in the
5228	development condition with the corresponding number immediately following the table;
5229	6. A shoreline modification may be allowed in the aquatic environment only if
5230	that shoreline modification is allowed in the adjacent shoreland environment; and
5231	7. This section does not authorize a shoreline modification that is not allowed
5232	by the underlying zoning, but may add additional restrictions or conditions or prohibit
5233	specific modifications within the shoreline jurisdiction. All shoreline modifications in
5234	the shoreline jurisdiction shall comply with all relevant county code provisions and with
5235	the King County shoreline master program.
5236	B. Shoreline modifications.

C. Development conditions.

- 265 -

5238	1. New and replacement shoreline stabilization, including bulkheads, shall meet	
5239	the standards in K.C.C. 21A.25.170((;;)).	 Formatted: Strikethrough
5240	2.a. Flood protection facilities shall be consistent with the standards in K.C.C.	 Formatted: Underline
5241	chapter 21A.24, goals, objectives, guiding principles, and policies of the 2024 King	 Commented [JN541]: Engrosses Ordinance 19881.
5242	County Flood Management Plan; and the Integrated ((Stream)) Streambank Protection	
5243	Guidelines (Washington state ((4))Departments of Fish and Wildlife, Ecology, and	
5244	Transportation, (( <del>2003)) 2002</del> ). New structural flood hazard protection measures are	 <b>Commented [JN542]:</b> Technical correction. This document was adopted in 2002.
5245	allowed in the shoreline jurisdiction only when the applicant demonstrates by a scientific	Formatted: Strikethrough
5246	and engineering analysis that the structural measures are necessary to protect existing	
5247	development, that nonstructural measures are not feasible and that the impact on	
5248	ecological functions and priority species and habitats can be successfully mitigated ((so	
5249	as)) to assure no net loss of shoreline ecological functions. New flood protection	
5250	facilities designed as shoreline stabilization shall comply with the standards in K.C.C.	
5251	21A.25.170.	
5252	b. Relocation, replacement, or expansion of existing flood control facilities	
5253	within the $((N))$ <u>n</u> atural <u>shoreline</u> environment are allowed, subject to the requirements of	
5254	the King ((c))County Flood ((Hazard)) Management Plan and consistent with the	 Commented [EA543]: Engrossing 19820 and 19881
5255	((Washington State Aquatic Guidelines Program's)) Integrated Streambank Protection	 Formatted: No underline Commented [JN544]: Deleting, as this is mentioned in Sub a. with different agencies
5256	Guidelines and bioengineering techniques used to the maximum extent practical. New	Formatted: Strikethrough
5257	facilities would only be allowed consistent with an approved watershed resources	
5258	inventory area (WRIA) salmon recovery plan under chapter 77.85 RCW.	
5259	3. Docks, piers, moorage, buoys, floats, or launching facilities shall comply with	
5260	the standards in K.C.C. 21A.25.180((;)).	 Formatted: Strikethrough

5261	4.a. Filling shall comply with the standards in K.C.C. 21A.25.190.	
5262	b. A shoreline conditional use permit is required to:	
5263	(1) Place fill waterward of the ordinary high water mark for any use except	
5264	ecological restoration or for the maintenance and repair of flood protection facilities; and	
5265	(2) Dispose of dredged material within shorelands or wetlands within a	
5266	channel migration zone;	
5267	c. ((F))fill shall not be placed in critical saltwater or critical freshwater habitats	<b>Formatted:</b> Strikethrough
5268	except when all ((of)) the following conditions are met:	<b>Formatted:</b> Not Strikethrough
5269	(1) the public's need for the proposal is clearly demonstrated and the proposal	
5270	is consistent with protection of the public trust, ((as embodied)) in accordance with RCW	Commented [JN545]: Consistent terminology.
5271	90.58.020;	Formatted: Strikethrough
5272	(2) avoidance of impacts to critical saltwater or critical freshwater habitats by	
5273	an alternative alignment or location is not feasible or would result in unreasonable and	
5274	disproportionate cost to accomplish the same general purpose;	
5275	(3) the project including any required mitigation, will result in no net loss of	
5276	ecological functions associated with critical saltwater or critical freshwater habitats; and	
5277	(4) the project is consistent with the state's interest in resource protection and	
5278	species recovery; and	
5279	d. In a channel migration zone, any filling shall protect shoreline ecological	
5280	functions, including channel migration.	
5281	5.a. Breakwaters, jetties, groins, and weirs:	

- 267 -

(1) are only allowed where necessary to support water dependent uses, public	
access, approved shoreline stabilization, or other public uses, as determined by the	
director;	
(2) are not allowed in the Maury Island Aquatic Reserve except as part of a	
habitat restoration project or as an alternative to construction of a shoreline stabilization	
structure;	
(3) shall not intrude into or over critical saltwater or critical freshwater	
habitats except when all ((of)) the following conditions are met:	Formatted: Not Strikethrough
(a) the public's need for the structure is clearly demonstrated and the	
proposal is consistent with protection of the public trust, ((as embodied)) in accordance	Formatted: Strikethrough
with RCW 90.58.020;	Commented [JN546]: Consistent terminology.
(b) avoidance of impacts to critical saltwater or critical freshwater habitats	
by an alternative alignment or location is not feasible or would result in unreasonable and	
disproportionate cost to accomplish the same general purpose;	
(c) the project including any required mitigation, will result in no net loss of	
ecological functions associated with critical saltwater or critical freshwater habitats; and	
(d) the project is consistent with the state's interest in resource protection	
and species recovery.	
b. Groins are only allowed as part of a restoration project sponsored or	
cosponsored by a public agency that has natural resource management as a primary	
function.	
c. A conditional shoreline use permit is required, except for structures installed	
to protect or restore shoreline ecological functions.	
	director;  (2) are not allowed in the Maury Island Aquatic Reserve except as part of a habitat restoration project or as an alternative to construction of a shoreline stabilization structure;  (3) shall not intrude into or over critical saltwater or critical freshwater habitats except when all ({of}) the following conditions are met: (a) the public's need for the structure is clearly demonstrated and the proposal is consistent with protection of the public trust, [(as embodied)) in accordance with RCW 90.58.020; (b) avoidance of impacts to critical saltwater or critical freshwater habitats by an alternative alignment or location is not feasible or would result in unreasonable and disproportionate cost to accomplish the same general purpose; (c) the project including any required mitigation, will result in no net loss of ecological functions associated with critical saltwater or critical freshwater habitats; and (d) the project is consistent with the state's interest in resource protection and species recovery. b. Groins are only allowed as part of a restoration project sponsored or cosponsored by a public agency that has natural resource management as a primary function. c. A conditional shoreline use permit is required, except for structures installed

- 268 -

5305	6. Excavation, dredging, and filling shall comply with the standards in K.C.C.	
5306	21A.25.190. A shoreline conditional use permit is required to dispose of dredged	
5307	material within shorelands, wetlands, or side channels within a channel migration zone.	
5308	7.((a. If the department determines)) Limited to projects where the primary	<b>Formatted:</b> Strikethrough

5678	SECTION 105. By December 31, 2027, the executive shall transmit an ordinance	<b>Commented [JN602]:</b> To address aquifer vulnerability designation in the critical aquifer recharge area maps.
5679	that updates mapping for critical aquifer recharge areas, based on the best available	
5680	science when it was previously adopted. The ordinance required by this section shall be	
5681	electronically filed with the clerk of the council, who shall retain an electronic copy and	
5682	provide an electronic copy to all councilmembers, the council chief of staff, and the lead	
5683	staff to the local services and land use committee or its successor.	
5684	SECTION 89106. The executive shall submit sections 49, 50, 52.A., B.2., C.2.,	
5685	D., and E., 60, 61, 62, 63, 66, 67, 68, 70, 71, 72, 73, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90,	
5686	<u>92, 93, 95, 96, 97, 98, 99, and 104.B.</u> 41, 42, 44, 52, 53, 56, 58, 59, 60, 63, 67, 68, 69 <u>83</u> ,	
1		

5687	70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, and 86 of this ordinance to the state
5688	Department of Ecology for its approval, as provided in RCW 90.58.090.
5689	SECTION 90107. Sections 49, 50, 52.A., B.2., C.2., D., and E., 60, 61, 62, 63,
5690	66, 67, 68, 70, 71, 72, 73, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 92, 93, 95, 96, 97, 98, 99,
5691	and 104.B.91, 42, 44, 52, 53, 56, 58, 59, 60, 63, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77,
5692	78, 79, 80, 81, 82, and 86 of this ordinance take effect within the shoreline jurisdiction
5693	fourteen days after the state Department of Ecology provides written notice of final
5694	action stating that the proposal is approved, in accordance with RCW 90.58.090. The
5695	executive shall provide the written notice of final action to the clerk of the council.
5696	SECTION 94108. Severability. If any provision of this ordinance or its
5697	application to any person or circumstance is held invalid, the remainder of the ordinance
5698	or the application of the provision to other persons or circumstances is not affected."
5699	
5700	Strike Attachment A, Critical Areas Comprehensive Plan Updates, and insert Attachment
5701	A, 2025 Update to 2024 King County Comprehensive Plan, dated August 2025. The
5702	clerk of the council is instructed to engross changes from any adopted amendments and
5703	correct any scrivener's errors. Upon final adoption, council staff is instructed to reflect the
5704	enactment number throughout Attachment A, incorporate adopted changes into the King
5705	County Comprehensive Plan, modify all Comprehensive Plan and technical maps in
5706	Attachment A to reflect the changes in any adopted amendments, update the tables of
5707	contents as necessary, update footnote numbers as necessary, and provide an electronic
5708	copy of each to the executive.

5709

- 286 -

EFF	ECT prepared by J. Ngo: Striking Amendment S1 would make the following
chan	ges:
Gene	eral Changes
1.	
2.	Addresses technical corrections, clarifying edits, drafting errors, code reviser
	notes, and engrosses changes from other ordinances.
3.	Adds a cross reference to K.C.C. 21A.50.035 and K.C.C. Title 23 for violations in
	critical areas.
4.	Removes a finding that identifies various county code sections as protection for
	critical aquifer recharge areas. No code sections are removed as part of this
	change.
5.	
6.	
	plans are required only for those applicable to the activity.
Clea	ring and Grading Exemptions (K.C.C. chapter 16.82)
7.	
/.	wetland buffers, aquatic areas, riparian areas and severe channel migration hazard
	areas. (Conditions 4, 23)
8.	
0.	areas to those to prevent imminent danger to person or structures (Condition 6)
9.	
9.	critical areas, limits the permit exemption to only those done with hand
	equipment, minimal grading, no clearing, and equipment is removed when work
10	is completed (Conditions 1, 2, 22)
10	Farm field access drives: limits the permit exemption to properties in the A zone,
	Agricultural Production District, or Farmland Preservation Program, has an
	approved farm management plan, meet applicable best management practices in
	an approved farm plan, creates less than 2,000 sf of new impervious surface,
	access is less than 14 feet wide, there is no other alternative location with less
	impacts to critical areas and associated buffers is available, complies with the
	farmland dispersion requirements in the King County Surface Water Design
	Manual, is sited in an area least subject to channel migration, obtains a floodplain
	development permit and state and federal permits when required.
11	. Where required, clarifies that farm management plans are to be approved.
~ •	
	eline Master Program (K.C.C. chapter 20.12.200)
12	
	alluvial fan hazard area development standards (Section 72 of the ordinance) and
	tsunami hazard area development standards (Section 73 of the ordinance) into the
	Shoreline Master Program.
13	. Changes the effective date to the date of the ordinance.
Publ	ic Benefit Rating System (PBRS) (K.C.C. 20.36.100)

5755	14.	Under farm and agricultural conservation land, requires a farm management plan
5756		for livestock to be in accordance with K.C.C. 21A.30.045.
5757	15.	Lowers the threshold for the rural open space category from a 10-acre contiguous
5758		open space area minimum to 5 acres.
5759		
5760		Environmental Policy Act (SEPA) (K.C.C. 20.44.040)
5761	16.	Adds language from WAC 197-11-800 that limits SEPA exemptions to exclude
5762		proposals undertaken on lands covered by waters, requiring a license governing
5763		discharges to water or emissions to air not exempt under state law, or requiring a
5764		non-SEPA-exempt land use decision.
5765	17.	Clarifies the thresholds are up to a certain number (for example, "up to" twenty
5766		dwelling units), rather than exactly a certain number.
5767	18.	Broadens the residential exemption to any structure with a certain number of
5768		dwelling units, not only residential structures, consistent with state law.
5769	19.	Exempts any fill or excavation necessary for the construction of a project that is
5770		otherwise exempt from SEPA, consistent with state law.
5771	20.	Lowers the SEPA exemption for code violations in steep slope, landslide, or
5772		alluvial fan hazard areas from 500 cubic yards to the standard exemption of 100
5773		cubic yards.
5774		
5775	Defini	tions (K.C.C. chapter 21A.06)
5776	21.	Agricultural products: removes specific tree types in the list of agricultural
5777		products
5778	22.	Aquatic areas: streamlines the definition of aquatic areas, integrates the definition
5779		of "impoundments" into this definition.
5780	23.	Aquatic area functions: adds a new definition and examples.
5781	24.	Buffer: reverts the definition back to a designated area that is contiguous to a
5782		critical area. Specifies that a buffer is integral to the functions and values of a
5783		critical area.
5784	25.	
5785		Modified parameters to determine commercial production for critical areas are
5786		added to K.C.C. 21A.24.051.
5787	26.	
5788		an aquifer is susceptible to reduced recharge, consistent with state law.
5789	27.	Farm field access drives: removes regulatory language from the transmittal that
5790		limits farm field access drives to properties in the A zone, Agricultural Production
5791		District, or Farmland Preservation Program.
5792	28.	Fish habitat: broadens the definition from only habitats used by salmonids to all
5793		native fish species, revises potential habitat to include upstream or landward of
5794		human-made barriers, and revises the examples of fish habitat.
5795	29.	Hazard tree: removes language that a parking area, road, or utility facility within
5796		striking distance of a structurally deficient tree must be approved to qualify.
5797	30.	Landslide hazard area: revises language that a landslide hazard area includes areas
5798		located on alluvial fan that is susceptible to episodic inundation, sedimentation,
5799		and erosional impacts.

- 288 -

5800	31.	Impoundments: repeals this definition and incorporates language into the
5801		definition of aquatic areas.
5802	32.	Mitigation: modifies the definition of mitigation to state that it is an action to
5803		compensate for unavoidable impacts after avoidance and mitigation sequencing is
5804		applied.
5805	33.	Notice of map amendment: identifies which maps are adopted and can be
5806		modified through a notice of map amendment.
5807	34.	Revegetation: revises the definition of climate-adaptive plants as plant species
5808	5.11	identified by DNRP as current or formerly native to the surround ecoregion and
5809		that are predicted to maintain their abundance under climate change.
5810	35.	Riparian area: identifies that riparian areas protect the functions and values of
5811	55.	aquatic areas.
5812	36.	Tsunami hazard area: updates the Washington Geological Survey to the current
5813	50.	available edition and names the areas on the map.
5814	37.	Wetlands: corrects a past code revising error.
5815	38.	Wetland values: adds language describing wetland values as estimates of the
5816	50.	worth, merit, quality, or importance of wetlands, identifies that values vary by
5817		watershed or community, and provides examples.
5818	39.	Wildlife lighting: clarifies that it is exterior lighting, rather than applied measures
5819	57.	to the exterior lighting, that are designed and installed to reduce impacts to
5820		wildlife.
5821		whene.
5822	Purnos	se (K.C.C. 21A.24.010)
5823	40.	Clarifies that avoidance and mitigation sequencing includes mitigation of impacts.
5823 5824	41.	Clarifies that no net loss, rather than preventing overall loss, is the measure for
5825	71.	wetlands, aquatic areas, and riparian area functions and values.
5826	42.	Adds a purpose statement for providing clear and objective development
5827	72.	standards, application requirements, and review processes for the administration
5828		of critical areas protections.
5829		or entited areas protections.
5830	Applic	ability (K.C.C. 21A.24.020)
5831	43.	Removes proposed language that if an area or site contains more than one critical
5832	ч.Э.	area or natural resource land designation, all designations apply. All designations
5833		on a site would still apply, consistent with chapter K.C.C. 21A.24 and state law.
5834		on a site would still appry, consistent with enapter R.C.C. 217.24 and state law.
5835	Critics	Il Area Alteration (K.C.C. 21A.24.045)
5836		Adds moderate channel migration hazard areas as a critical area where all
5837		alterations are allowed, with conditions.
5838	45.	Provides additional instruction on how to interpret the critical area alteration
5839	ч.Э.	table.
5840	46.	
5841	<b>+</b> 0.	a. Condition 64 is renumbered to Condition 2
5842		b. Condition 60 is renumbered to Condition 29
5843		c. Condition 57 is renumbered to Condition 56
5843 5844		d. Condition 58 is renumbered to Condition 57
J044		
5845		e. Condition 58 is renumbered to Condition 57

5846		f. Condition 29 is renumbered to Condition 59
5847		g. Condition 3 is renumbered to Condition 60
5848		h. Condition 59 is renumbered to Condition 64
5849	47.	Consolidation of certain conditions:
5850		a. Conditions 11 and 12 are consolidated into Condition 10
5851		b. Condition 23 is consolidated into Condition 58 (which is renumbered to
5852		condition 57)
5853		c. Condition 52 is consolidated into Condition 51
5854		d. Condition 56 is consolidated into Condition 55
5855	48.	Repeal of certain conditions: Condition 11, 12, 23, 52, 59.
5856	49.	Remove proposed condition 70.
5857	50.	Maintenance or repair of existing structures:
5858	50.	a. Applies Condition 6 in severe channel migration hazard areas and alluvial
5859		fan hazard areas. This condition would limit existing primary structures to
5860		no increase in the footprint and would not constitute substantial
5861		improvement, and limit accessory structures to a 1,000 square foot
5862		addition and no expansion towards an alluvial fan or channel migration
5863		hazard.
5864	51.	Expansion or replacement of existing structure: Splits this alteration in two, with
5865		the following:
5866		a. Expansion of existing structures:
5867		<ul> <li>Prohibits this alteration in a landslide hazard area or steep slope</li> </ul>
5868		hazard area (no change from existing code)
5869		<ul> <li>Allows this alteration in severe channel migration hazard areas and</li> </ul>
5870		alluvial fan hazard areas with limitations under Condition 6 (see
5871		above for description).
5872		<ul> <li>Allows this alteration in a wetland, wetland buffer, aquatic area,</li> </ul>
5873		riparian area, wildlife habitat network, and wildlife habitat
5874		conservation area, subject to Condition 7. Condition 7 is modified
5875		so the alteration must be on an existing impervious surface, lawn
5876		or landscaping area, farm field, or grazed area with limitations on
5877		original establishment, location, revegetation and/or footprint
5878		expansion.
5879		b. Replacement of existing structures:
5880		<ul> <li>Allows this alteration in a landslide hazard area or steep slope</li> </ul>
5881		hazard area for existing legally established structures in areas
5882		where the hazard poses little to no risk of injury, and the risk of
5883		landsliding or slope instability is low under Condition 5.
5884		<ul> <li>Allows this alteration in a wetland, wetland buffer, aquatic area,</li> </ul>
5885		
5886		riparian area, wildlife habitat network, and wildlife habitat
		conservation area, subject to Condition 8. Condition 8 is modified
5887		so the alteration is within an existing footprint or has the least
5888		impact on the critical area, does not expand the total footprint of all
5889		structures and impervious surfaces, is on an existing impervious
5890		surface, lawn or landscaping area, farm field, or grazed area, and
5891		includes revegetation.

- 290 -

5892	52.	Construction/maintenance/repair of a pier or dock:	
5893		a. Allows this alteration in a Category II, III, or IV wetland or wetland	
5894		buffer, subject to Condition 9. Condition 9 is clarified to state that the	
5895		alteration is only to provide access to an aquatic area and to remove a	
5896		condition specific only to aquatic areas.	
5897		b. Allows this alteration in an aquatic area or riparian area, subject to	
5898		Condition 10. Condition 10 is modified prohibit the alteration in a	
5899		salmonid spawning area and requires compliance with K.C.C. 21A.25.180	
5900		in type S or F aquatic areas.	
5901	53.	Grading: allows grading in critical areas when addressing an emergency in an	
5902		alluvial fan hazard area, subject to Condition 14.	
5903	54.	Cutting of firewood: prohibits cutting of firewood in severe channel migration	
5904		hazard area, aquatic area, riparian area, wetland, and wetland buffer. Reverts back	
5905		to limiting the cutting of firewood for only personal use.	
5906	55.	New road in unimproved right-of-way: prohibits new roads in unimproved right-	
5907		of-way as allowed alteration.	
5908	56.	Horticulture activities, grazing of livestock, and commercial fish farms:	
5909		a. For existing activities, adds clarity for uses established after January 1,	
5910		2005 and continuous existence for transfer of ownership, sale, or leasing	
5911		(Condition 53).	
5912		b. Allows for the conversion of existing land to other agricultural products,	
5913		expansion of existing activities and establishment of new agricultural	
5914		activities on sites where ethe primary activity is agriculture, with a farm	
5915		management plan, and outside of areas cleared under a forest practice	
5916		permit, an aquatic area, a wetland that is not a grazed or tilled wet	
5917		meadow, wetland buffers or riparian areas with predominantly native	
5918		plants (Condition 54).	
5919	57.	Livestock manure storage facility, livestock heavy use area, farm pads: allowed if	
5920		associated with a horticulture or livestock grazing activity, in an existing grazed,	
5921		tilled or impervious area, consistent with a farm management plan, subject to	
5922		conditions, and outside of areas cleared under a forest practice permit, an aquatic	
5923		area, a wetland that is not a grazed or tilled wet meadow, wetland buffers or	
5924		riparian areas with predominantly native plants.	
5925	58.	Nonresidential buildings: allows nonresidential buildings only on sites where the	
5926		primary use of the site is one that qualifies as horticulture or grazing livestock	
5927		activities, subject to other conditions.	
5928	59.	Farm field access drives: allows farm field access drives on sites with horticulture	
5929		or grazing livestock activity, complies with the Surface Water Design Manual, and	
5930		subject to other conditions.	
5931			
5932	<u>Agricu</u>	Iltural activities development standards (K.C.C. 21A.24.051)	
5933	60.	Establishes criteria for proof of agricultural activities or commercial production of	
5934		agricultural products, including 1 year of IRS filing, a USDA organic	
5935		certification, enrollment or eligibility for enrollment in the current use	
5936		classification, or other comparable documentation. These criteria would only	

5937		apply to the critical area regulations, not other parts of the Code where	
5938		agricultural activities are regulated.	
5939	61.	Requires modifications to farm management plans if impacts to critical areas or	
5940		associated buffers are identified with monitoring.	
5941	62.		
5942		areas until approved by the County.	
5943	63.		
5944		management plan as part of a program offered or approved by King County.	
5945			
5946	Public	Rules for Farm Management Plans (K.C.C. 21A.24.061)	
5947	64.	Adds requirements and procedures for adopting a public rule for farm	
5948		management plans, including an adoption deadline of December 31, 2026.	
5949			
5950	Critica	al area alteration exceptions/reasonable use exceptions (K.C.C. 21A.24.070)	
5951	65.	Splits critical area alteration exceptions into public agency/utility exceptions and	
5952		private development exceptions.	
5953	66.		
5954		shoreline variances.	
5955	67.		
5956	07.	habitat to fish habitat.	
5957	68.	Removes language that an applicant can apply for a reasonable use exception	
5958	00.	without first having to apply for an alteration exception if relief from development	
5959		standards are requested.	
5960		standards are requested.	
5960 5961	Dicala	osure (K.C.C. 21A.24.090)	
5962	<u>69.</u>	Removes the requirement for an applicant to disclose whether they have been	
5962 5963	09.	found in violation of K.C.C. chapter 21A.24 for any property in King County.	
		found in violation of K.C.C. chapter 21A.24 for any property in King County.	
5964	Cuitia	And Designations (K.C.C. 21A 24 500)	
5965		al Area Designations (K.C.C. 21A.24.500)	
5966		Reverts critical area designations from a parcel to a site.	
5967	71.		
5968	72.	Specifies which adopted maps that may modify the effectiveness of a critical area	
5969		designation.	
5970	a		
5971		al Area Review (K.C.C. 21A.24.100)	
5972	73.	Development that does not involve site disturbance, clearing, or grading and only	
5973		requires a permit or approval in K.C.C. chapters 16.04 or 17.04 in alluvial fans	
5974		are not exempt from critical area review.	
5975			
5976	Critica	al Area Reports (K.C.C. 21A.24.110 and Sections 58 and 59)	
5977	74.	Clarifies that the critical area report requirements may be modified or limited in	
5978		scope as determined by the Department of Local Services.	
5979	75.	Identifies what type of critical area report, geological or ecological, applies to	
5980		each critical area.	
5981	76.		
5982		documentation in a geological assessment for a geological critical area report.	

5983 5984	77.	Adds and revises requirements for a geological critical area report, such as basic information, description of hydrology, geological conditions, hazard analysis, and	
5985		recommendations for proposed development.	
5986	78.	Revises requirements for an ecological critical area report, such as monitoring	
5987		plans and site plans.	
5988			
5989	Critica	al Area Mitigation (K.C.C. 21A.24.125 and K.C.C. 21A.24.130)	
5990	79.	Updates avoidance and mitigation sequencing to match state law.	
5991	80.	Prioritizes, instead of requires, mitigation to occur on-site.	
5992	81.	When monitoring identifies deficiencies in predicted impact or a failure in	
5993		mitigation, requires an extension of the monitoring period by at least 2 years	
5994	82.	Requires all development proposals, rather than only access for developments, to	
5995		minimize impacts and comply with avoidance and mitigation sequencing.	
5996			
5997	Reveg	etation (Section 63)	
5998	83.	Changes terminology of "climate-smart plants" to "climate-adaptive plants"	
5999	84.	Establishes a new section for revegetation requirements in critical area and critical	
6000		area buffers, including providing equal or better ecological function compared to	
6001		existing conditions, replicating the structure and function of historic natural plant	
6002		communities, using native or climate-adaptive plants, prioritizing the use of native	
6003		plants first, and restoring soil and hydrologic functions when necessary.	
6004	85.	Allows modification to planting plans based on site-specific conditions.	
6005	86.	Adds requirements and procedures for adopting a public rule for the climate-	
6006		adaptive plant list, including an adoption deadline of December 31, 2026.	
6007			
6008	Notice	e on Title (K.C.C. 21A.24.170)	
6009	87.		
6010	88.	Clarifies that a notice on title may be removed or amended as part of a critical	
6011		area designation or a critical areas map update including critical aquifer recharge	
6012		areas, wildlife habitat networks, channel migration zones, or flood hazard areas.	
6013			
6014		al Area Setbacks (K.C.C. 21A.24.200)	
6015		Reduces the critical area setback from 15 feet to 10 feet.	
6016	90.	Removes a proposed 18" height limitation for uncovered decks in critical area	
6017		setbacks.	
6018	<b>C1</b>		
6019		el Migration Zones (K.C.C. 21A.24.275)	
6020	91.	Clarifies that new primary dwelling units, accessory dwelling units or living	
6021		quarters, and required infrastructure are allowed if located on a legally established	
6022		lot in existence on or before February 16, 1995.	
6023	C = 1		
6024		gically Hazardous Areas	
6025		lide and Steep Slope Hazard Areas (K.C.C. 21A.24.280 and K.C.C. 21A.24.310)	
6026	92.	Requires alterations on slopes greater than 40% to not decrease slope stability on contiguous properties and the risk of property damage or injury from landsliding	
6027 6028		is eliminated or minimized	
0070			

<ul> <li>94. Requires alterations to comply with a geological critical area report.</li> <li>95. Recodifies K.C.C. 21A.24.310.</li> <li>Alluvial Fan Hazard Areas (Section 72)</li> <li>96. Allows for buffers from alluvial fan hazard areas if needed.</li> <li>97. Requires alterations in alluvial fan hazard areas if needed.</li> <li>98. Prohibits vegetation removal from an alluvial fan hazard area or associated buffer except as part of an allowed alteration.</li> <li>99. Requires alterations to minimize disturbance to alluvial fan hazard area, slope, and vegetation unless necessary for slope stabilization.</li> <li>90. Requires alterations to minimize disturbance to alluvial fan hazard area, slope, and vegetation unless necessary for slope stabilization.</li> <li>100. Updates mining to mineral extraction to reflect land uses in K.C.C. chapter 21A.08.</li> <li>100. Updates mining to mineral extraction to reflect land uses in K.C.C. chapter 21A.08.</li> <li>101. Requires a property owner to implement all recommended measures to prevent saltwater intrusion into a well.</li> <li>102. 6047saltwater intrusion into a well.6048102. Adds a requirement to transmit updated critical aquifer recharge area maps by6049December 31, 2027.605060516051Wetlands (K.C.C. 21A.24.335, 340, 342)6052103. Reclassifies moderate-intensity active recreation or open space and passive6053recreation inside the Urban Growth Area as moderate and low impact land uses,6054respectively.6055104. When buffer averaging is proposed, requires revegetation where native vegetation6056does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a6058corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area,6060which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement6065(E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and606620:1 E consistent with Department of Ecology guidance.6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested6068and shrub wetlands into emergent wetlands from 4.5:1 to 6:1		
6048102. Adds a requirement to transmit updated critical aquifer recharge area maps by December 31, 2027.6050Wetlands (K.C.C. 21A.24.335, 340, 342)6051Wetlands (K.C.C. 21A.24.335, 340, 342)6052103. Reclassifies moderate-intensity active recreation or open space and passive recreation inside the Urban Growth Area as moderate and low impact land uses, respectively.6055104. When buffer averaging is proposed, requires revegetation where native vegetation does not current exist and requires no net loss of wetland functions and values.6056105. Requires all wetland complexes inside the Urban Growth Area to include a corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area, which have a high intensity impact designation, to be lowered to moderate impacts if certain conditions are met. Revises the measure to require revegetation along the edge of the buffer and where existing vegetation is sparse and requires noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement (E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and 20:1 E consistent with Department of Ecology guidance.6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.		
6049December 31, 2027.605060516052103.Reclassifies moderate-intensity active recreation or open space and passive6053recreation inside the Urban Growth Area as moderate and low impact land uses,60546055104.When buffer averaging is proposed, requires revegetation where native vegetation60566057105.Requires all wetland complexes inside the Urban Growth Area to include a60586059106.Allows mixed-use, daycares, and social services within the Urban Growth Area,6060which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107.Increases the wetland reestablishment or creation (R/C) and wetland enhancement6065(E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and606620:1 E consistent with Department of Ecology guidance.60676068and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.		
6050Wetlands (K.C.C. 21A.24.335, 340, 342)6051Wetlands (K.C.C. 21A.24.335, 340, 342)6052103. Reclassifies moderate-intensity active recreation or open space and passive6053recreation inside the Urban Growth Area as moderate and low impact land uses,6054respectively.6055104. When buffer averaging is proposed, requires revegetation where native vegetation6056does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a6058corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area,6060which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement6065(E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and606620:1 E consistent with Department of Ecology guidance.6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested6068and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.	6048 102.	
6051Wetlands (K.C.C. 21A.24.335, 340, 342)6052103. Reclassifies moderate-intensity active recreation or open space and passive recreation inside the Urban Growth Area as moderate and low impact land uses, respectively.6053104. When buffer averaging is proposed, requires revegetation where native vegetation does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area, which have a high intensity impact designation, to be lowered to moderate impacts if certain conditions are met. Revises the measure to require revegetation along the edge of the buffer and where existing vegetation is sparse and requires noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement (E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and 20:1 E consistent with Department of Ecology guidance.6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.	6049	December 31, 2027.
6052103. Reclassifies moderate-intensity active recreation or open space and passive recreation inside the Urban Growth Area as moderate and low impact land uses, respectively.6053104. When buffer averaging is proposed, requires revegetation where native vegetation does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area, which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation along the edge of the buffer and where existing vegetation is sparse and requires noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement (E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and 20:1 E consistent with Department of Ecology guidance.6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.		
6053recreation inside the Urban Growth Area as moderate and low impact land uses,6054respectively.6055104. When buffer averaging is proposed, requires revegetation where native vegetation6056does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a6058corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area,6060which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement6065(E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested6068and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.		
6054respectively.6055104. When buffer averaging is proposed, requires revegetation where native vegetation6056does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a6058corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area,6060which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107. Increases the wetland reestablishment or creation (R/C) and wetland enhancement6066(E) ratio for Category I forested wetlands from 1:1 R/C and 16:1 E to 1:1 R/C and6067108. Increases the rehabilitation ratio for permanent conversion of Category I forested6068and shrub wetlands into emergent wetlands from 4.5:1 to 6:1.	6052 103.	
6055104. When buffer averaging is proposed, requires revegetation where native vegetation6056does not current exist and requires no net loss of wetland functions and values.6057105. Requires all wetland complexes inside the Urban Growth Area to include a corridor if buffers do not connect.6059106. Allows mixed-use, daycares, and social services within the Urban Growth Area, which have a high intensity impact designation, to be lowered to moderate6061impacts if certain conditions are met. Revises the measure to require revegetation6062along the edge of the buffer and where existing vegetation is sparse and requires6063noise-generating activities to be sited away from the wetland.6064107. 6070 Aquatic Areas and Riparian Areas (K.C.C. 21A.24.355, .358, .365, .380)		tic Areas and Riparian Areas (K.C.C. 21A.24.355358365380)
6071 109. Revises the typing for aquatic areas to match the state water typing system in		
6072 WAC 222-16-030.		
6073 110. Standardizes the riparian area width for all Type S and F riparian areas in the		
6074 Urban Growth Area to 180 feet.		

- 294 -

6075 6076	111.	Requires revegetation where native vegetation does not current exist when buffer
6070	112	averaging is proposed. Prohibits clearing and other site disturbances from May 1 to October 1 in aquatic
6078	112.	areas or riparian areas. Allows modifications or restrictions when required by a
6078		state or federal period.
6080	113	Requires projects to minimize the potential for recreational hazards when large
6080	115.	wood is proposed in a Type S aquatic area.
6082	114	Requires mitigation plans to include native or climate-adaptive plant species
6083	117.	comparable to a nearby relatively undisturbed riparian area.
6084	115	Requires mitigation for riparian areas to include restoration or creation.
6085		For alternative mitigation ratios:
6086	110.	a. Increases the ratio for Type S, F, or N riparian areas with impacts to non-
6087		woody vegetation or unvegetated areas from 1:1 to 1.5:1.
6088		b. Increases the ratio for Type O riparian areas with impacts to woody
6089		vegetation.
6090		c. Allows primary actions in lieu of secondary actions where impacts occur
6091		to non-woody vegetation or unvegetated areas
6092		d. Revises a secondary action for replanting a riparian area addition to
6093		adding more riparian area with replanting.
6094		e. Adds a secondary action option for removal of a fish passage barrier that
6095		is required as part of a development permit.
6096	117.	Revises the mitigation ratio for illegal alterations to 3:1.
6097		
6098	Wildli	fe Habitat Networks (K.C.C. 21A.24.385)
6099		Removes references to urban planned developments and fully contained
6100		communities.
6101		
6102	Grazin	g livestock (K.C.C. 21A.30)
6103		For sites with farm management plans:
6104		a. Requires the livestock management component to comply with the farm
6105		management plan requirements in K.C.C. 21A.24.051.
6106		b. Clarifies that grazed wet meadows have no grazing area buffer.
6107		c. Clarifies that grazing area buffers may be modified consistent with the
6108		farm management plan public rule.
6109		d. Clarifies that clearing of lands cannot occur in wetlands, wetland buffers,
6110		or riparian areas with predominantly native cover.
6111		e. Clarifies that clearing of land for new grazing areas must comply with
6112		critical area widths or buffer widths.
6113		f. Removes special requirements to submit a final farm management plan
6114		with a livestock component to the County.
6115		g. Removes a hearing examiner appeal process of farm management plans to
6116		reflect current practice.
6117		h. Identifies measurement methods for grazing area widths.
6118	120.	For sites without farm management plan:
6119		a. Revisions to the section to be applicable to any site with livestock without
6120		a farm management plan;

6121		b. Removes a 50-foot grazing area buffer for Category IV wetland and
6122		maintains the 25-foot grazing area buffer.
6123		c. Clarifies that grazed wet meadows have no grazing area buffer.
6124		d. Removes a 25-foot grazing area buffer reduction where there is existing
6125		diverse, mature vegetation.
6126		e. Clarifies that clearing of lands cannot occur in wetlands, wetland buffers,
6127		or riparian areas with predominantly native cover.
6128		f. Removes an allowance for manure storage on tilled wet meadows.
6129		g. Identifies measurement methods for grazing area widths.
6130		
6131	Develo	ppment Permit Fees (K.C.C. 27.10.130)
6132	121.	Modifies fees for critical area designations based on site size.
6133		
6134	Compr	ehensive Plan (Attachment A)
6135	122.	In Chapter 3, adds a policy exploring implementation of a Voluntary Stewardship
6136		Program within the Snoqualmie Valley Agricultural Production District.
6137	123.	In Chapter 5, adds a policy recognizing Indigenous Knowledge as an important
6138		aspect in developing rules, regulations, projects, and programs for the protection
6139		of critical areas.
6140	124.	In Chapter 5, adds lead-in text regarding supporting critical area protections and
6141		the long-term viability of agriculture and Voluntary Stewardship Programs. Adds
6142		a policy on exploring adaptive management techniques within or adjacent to
6143		agricultural activities, such as enrollment through the Voluntary Stewardship
6144		Program, collection of data, engagement with Indian tribes, the King
6145		Conservation District, farmers, and other interested parties.
6146	125.	In Chapter 5, adds a policy on consideration of species and habitats of cultural
6147		importance to Indian tribes in planning, development review, and capital projects.
6148	126.	In the Glossary, modifies the definition of habitat, wetland functions and wetland

6149 values for consistency with K.C.C. chapter 21A.06.
