CLERK'S ALERT

New Page Count Fee

Starting **October 1, 2026**, the Clerk's Office will charge a non-refundable \$10 fee for each page count request. Page count requests occur when Clerk's Office staff need to research how many pages are in a record.

Many older records are still on microfilm. When a customer orders a copy of one of these records, staff first need to make a digital version so they can count the pages in the record. This step is called the "page count process." A page count tells us how many pages are in a record so we can calculate the total cost of the copies.

Customers may apply for a fee waiver through the [Clerk's Office Fee Waiver](#) process.

Important Notes:

- The \$10 fee per case is non-refundable.
- The fee cannot be used toward the cost of an order. It is separate from any document fees.
- The fee supports the staff time needed to complete page count work.
