

Clean Water Plan

Making the Right Investments at the Right Time

MWPAAC Monthly Update

March 25, 2020

Clean Water Plan

Making the right investments at the right time

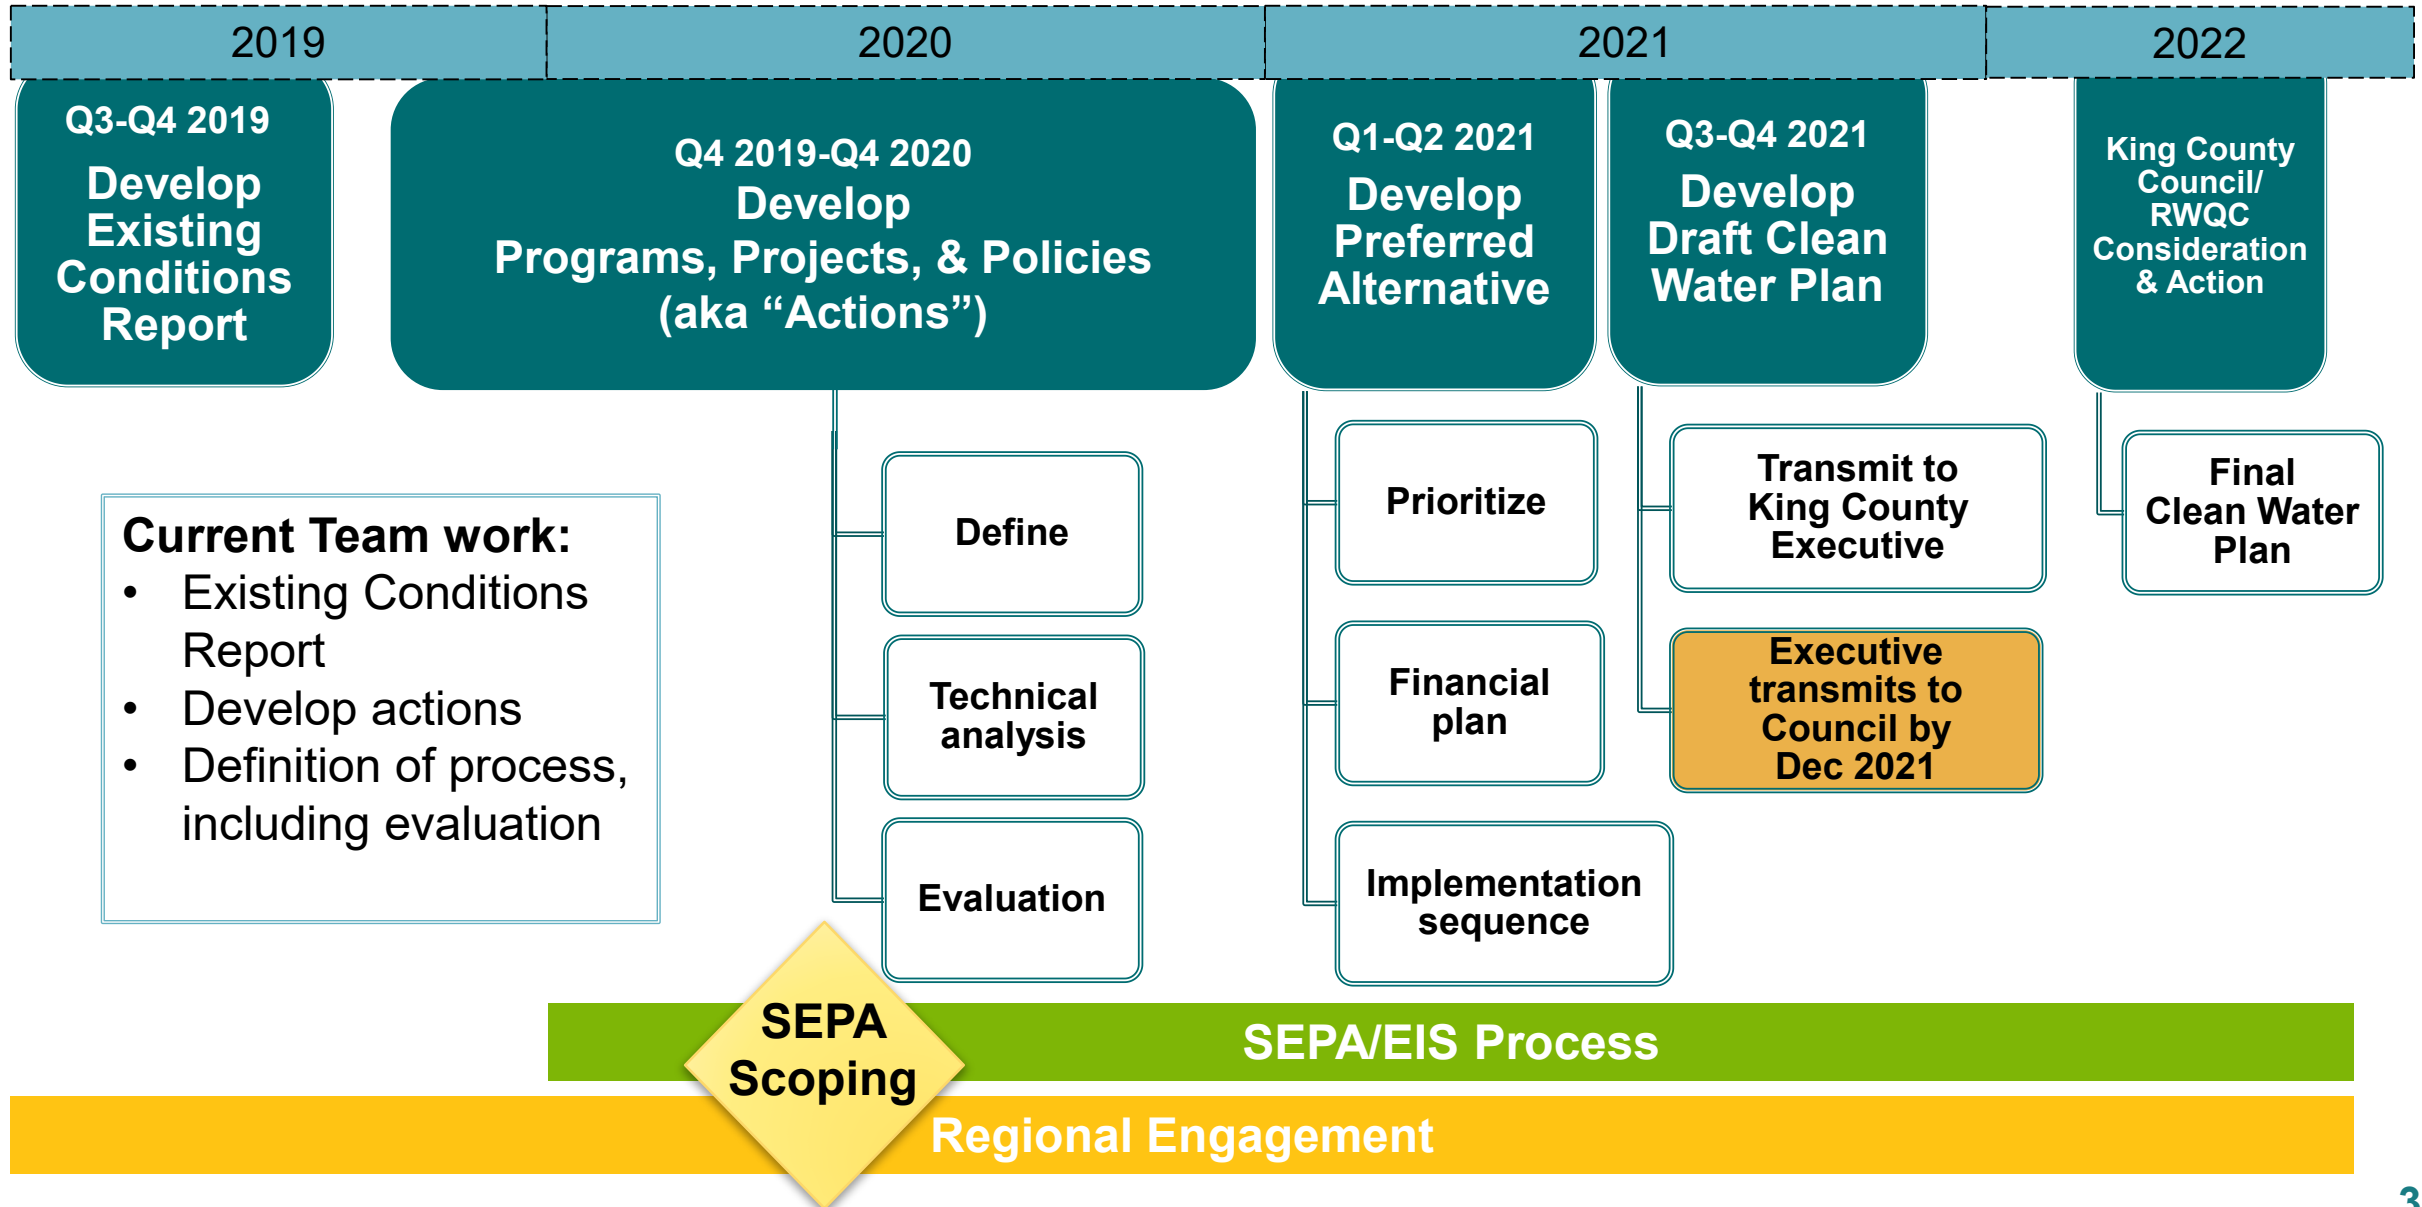

King County

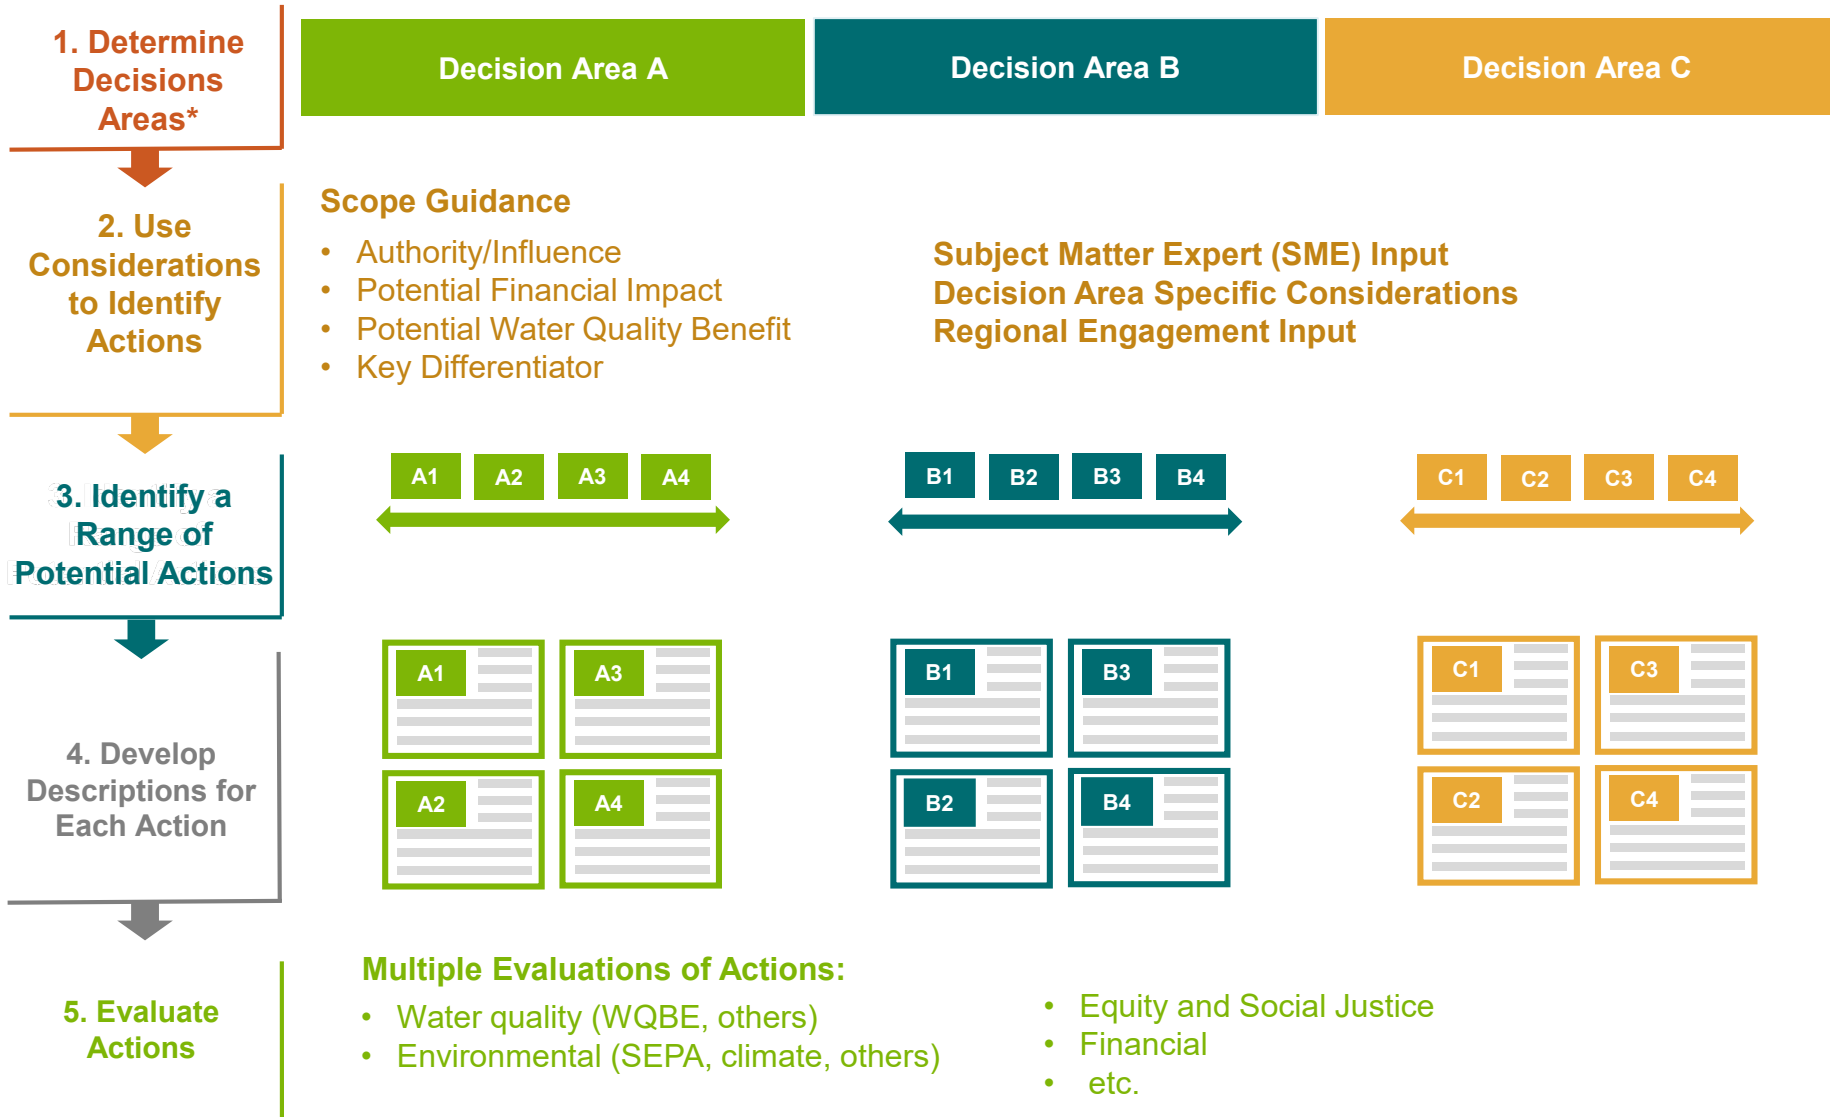

Department of Natural Resources and Parks
Wastewater Treatment Division

What is the most appropriate path to ensure we direct the right public investments to the right actions at the right time for the best water quality outcomes?

Planning Process Overview

Overview of Planned 2020 Clean Water Plan Tasks

Current Focus of Team Work: →

Key Decision Areas

Treatment Plants

**Pollutant Source Control /
Product Stewardship**

**Stormwater and Combined
Sewer Overflows**

Wastewater Conveyance System

**Asset Management, Resiliency,
and Redundancy**

Legacy Pollution

Resource Recovery

Finance

SEPA Scoping

- The State Environmental Policy Act (SEPA) process identifies and analyzes environmental impacts associated with governmental decisions.
- Environmental review of Clean Water Plan under SEPA is anticipated to be a non-project, or Programmatic, Environmental Impact Statement (EIS) on the Plan.
- SEPA scoping will occur in May and June 2020. Scoping is a required element of the EIS process. The purpose of scoping is to invite comments on the scope of the Programmatic EIS for the Clean Water Plan.
- Regional Engagement Activities currently planned.
 - ▶ Online open house
 - ▶ Mail/email distribution of informational content

MWPAAC Technical Taskforce

- **Membership:** Jack Broyles, Mike Johnson, Josh Pantzke, Gary Schimek, Leslie Webster, Kyle Wong
- **First Meeting:**
 - ▶ Date will likely be in late April 2020.
 - ▶ Discussion at the first meeting will focus on an Overview of the Discussion Areas and how the taskforce wants to take up those topics.

Regional Engagement Activities

- 3/24 – External Advisory Group Meeting
- 3/25 – WTD Wastewater System webinar
