

Class A Biosolids Ordinance proposal

Erika Kinno Policy & Research Unit Supervisor Resource Recovery, King County WTD

King County Resource Recovery

What would Class A ordinance do?

- Authorize the production and marketing of **both** Class A and Class B biosolids
 - Code currently limits
 production to Class B
- Strike the requirement for biosolids compost use in County projects

service area, the county shall require that local sponsors using the products secure any permits required by the local government body.

BP-8: King County shall work cooperatively with statewide organizations on biosolids issues.

BP-9: King County shall seek to minimize the noise and odor impact associated with processing, transporting and applying of biosolids, consistent with constraints of economic and environmental considerations and giving due regard to neighboring communities.

BP-10: Where cost-effective, King County shall beneficially use methane produced at the treatment plants for energy and other purposes. (Ord. 13680 § 9, 1999).

Why is this change needed?

- Loop® Class A compost pilot scheduled to be operational by early next year
- Keep up with new technology and industry standards, provides option to diversify products
- Code cleanup to align with recent updates specifying compost use of any feedstock
