

# Using Commercial Compost to Improve Organic Matter on County Managed Farms

Rick Reinlasoder, King County Agriculture Program

King County farmland access and  
partnering with King County SWD

Problem: Low organic  
content in soils

Solution: add commercial compost  
(funded by King County SWD)

Application challenge

A green tractor is pulling a red trailer filled with dark mulch in a field. The tractor is moving from right to left, and the mulch is being discharged from the trailer. The background shows a clear blue sky and green trees. The text "Solution (funded by WA State Conservation Commission)" is overlaid on the left side of the image.

Solution (funded by WA State Conservation Commission)
