Week of 9 August

- Continue high visibility silt fence installation for erosion control
- Continue high visibility fence installation at construction limits
- Continue to remove and salvage existing trail fixtures
- Begin to remove and salvage chain link fencing
- Begin chain link gates removal
- Continue clear and grub activity

Construction Notes.

To identify specific locations along the trail, there are station numbers listed every 100-ft on the trail centerline on the construction plans. When communicating upcoming construction activities, station numbers will be used. You can match the location of your property to the adjacent station number so that you can find out what, when, and where a construction activity will be performed based on the weekly construction update. If you need assistance, please contact the project hotline. The construction plans are available for your information on the project website.
