

## TECHNICAL MEMORANDUM

DATE: May 9, 2017  
TO: Jenny Bailey  
FROM: Alex Atchison, PE  
SUBJECT: Lake to Sound Trail - Segment C: Traffic Analysis  
CC: Michael Russu, EIT  
PROJECT NUMBER: 554-1521-151  
PROJECT NAME: Lake to Sound Trail Segment C

### INTRODUCTION

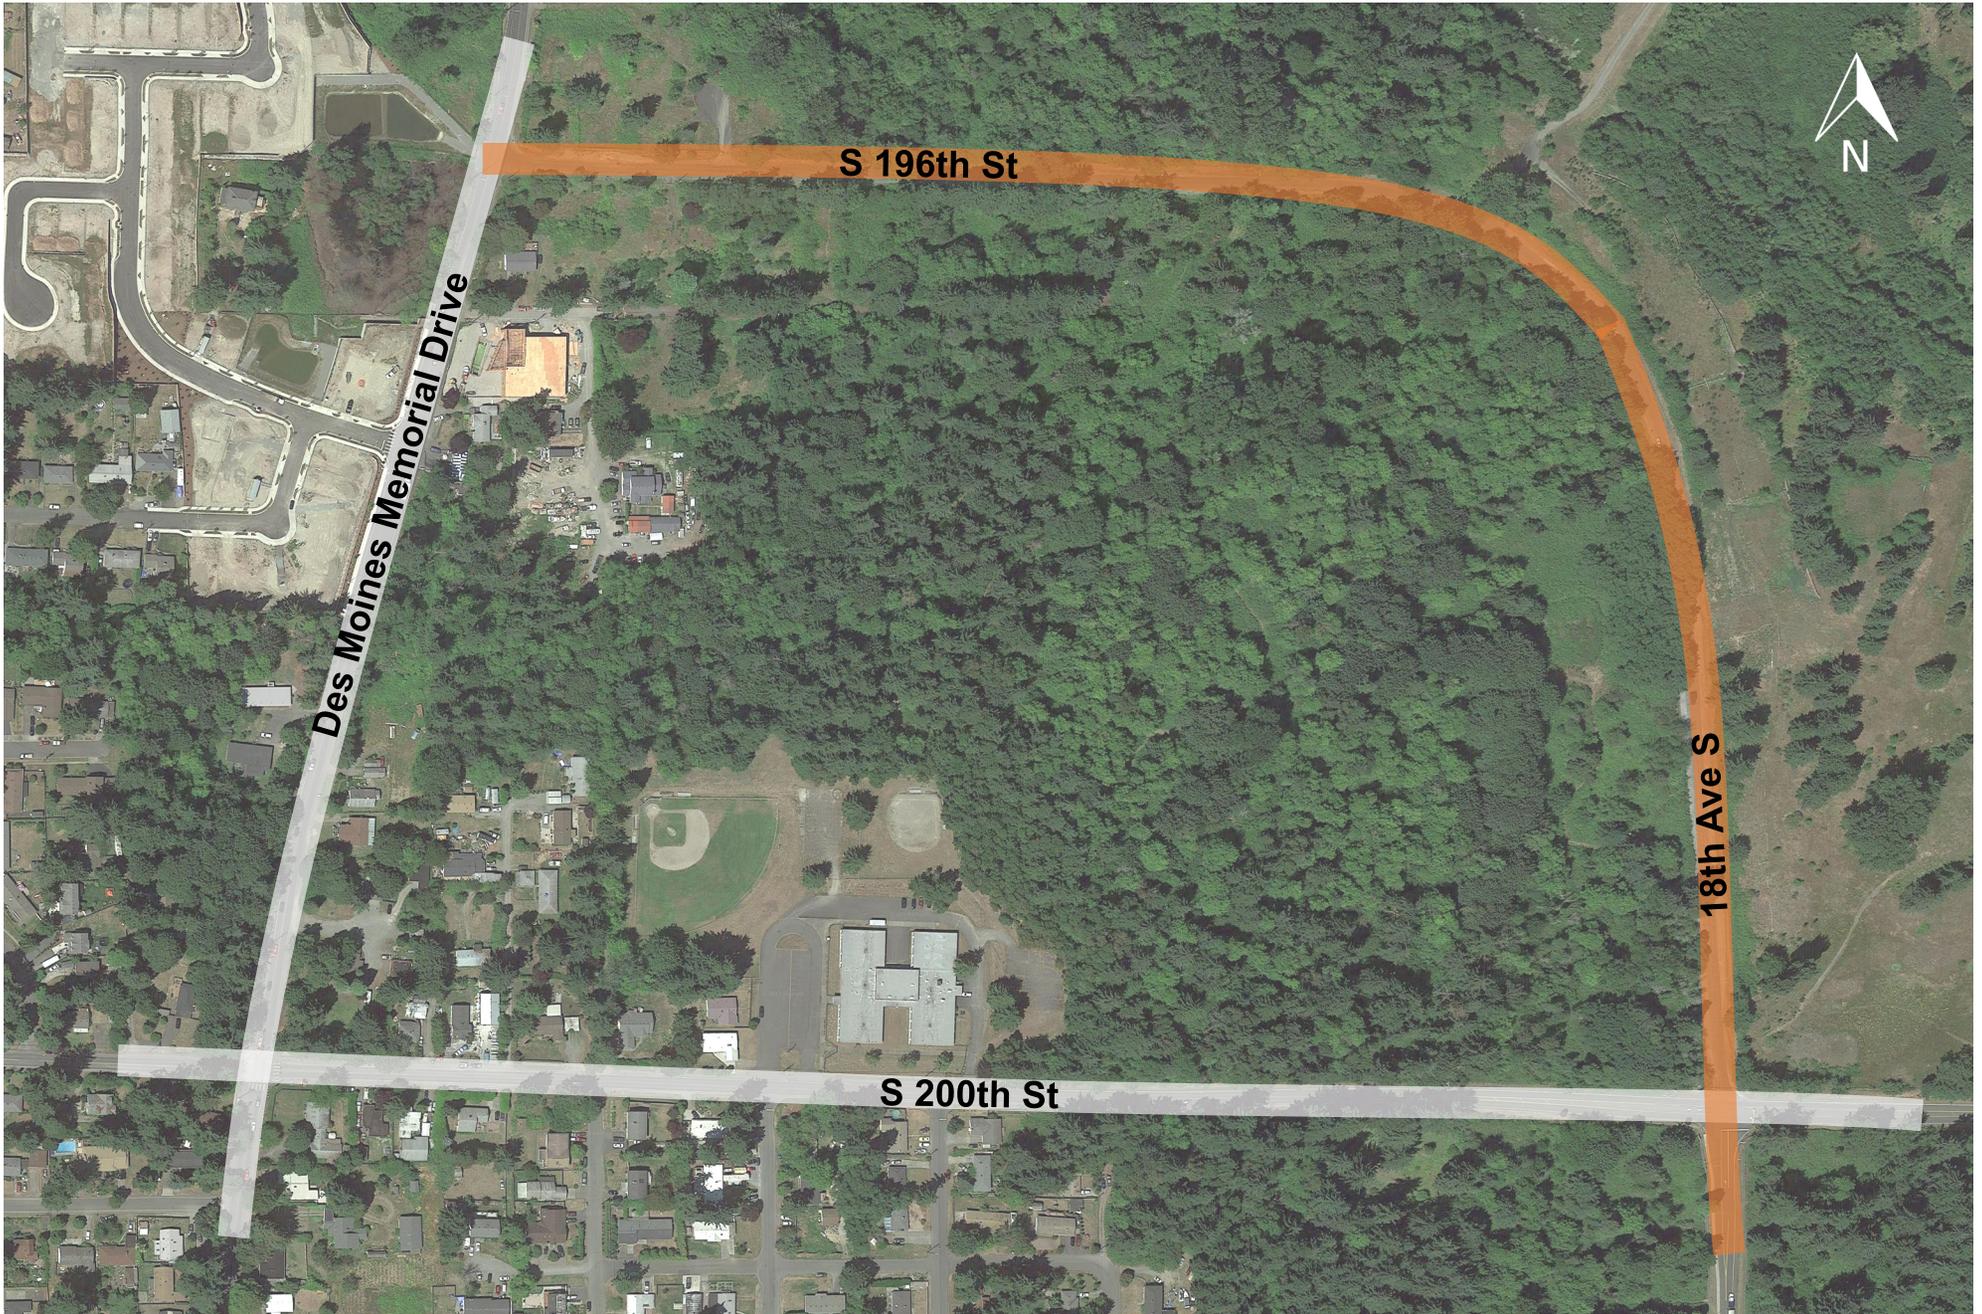

The Lake to Sound Trail—Segment C project is an approximately 2.2-mile (11,420 linear feet) component of what will ultimately be the 16-mile Lake to Sound Trail. Segment C would connect the southern terminus of the Lake to Sound Trail—Segment B (near the southwest corner of Seattle-Tacoma International Airport) with the Des Moines Creek Trail, located at S 200th Street in the cities of Burien and SeaTac, Washington.

This memorandum analyzes traffic impacts of three alternative trail alignments along S 196th Street and 18th Avenue S. Project engineers have designed three alternative alignments for the trail: Alternatives 1, 2, and 3. Each alignment is described in the following section. The sections that follow present the expected traffic impacts of each of the proposed alignments.

### ALIGNMENT DESCRIPTIONS

**Figure 1** depicts the study area for this alternatives analysis. The three alternative alignments differ for the trail in their location relative to existing roadways (S 196th Street and 18th Avenue S):

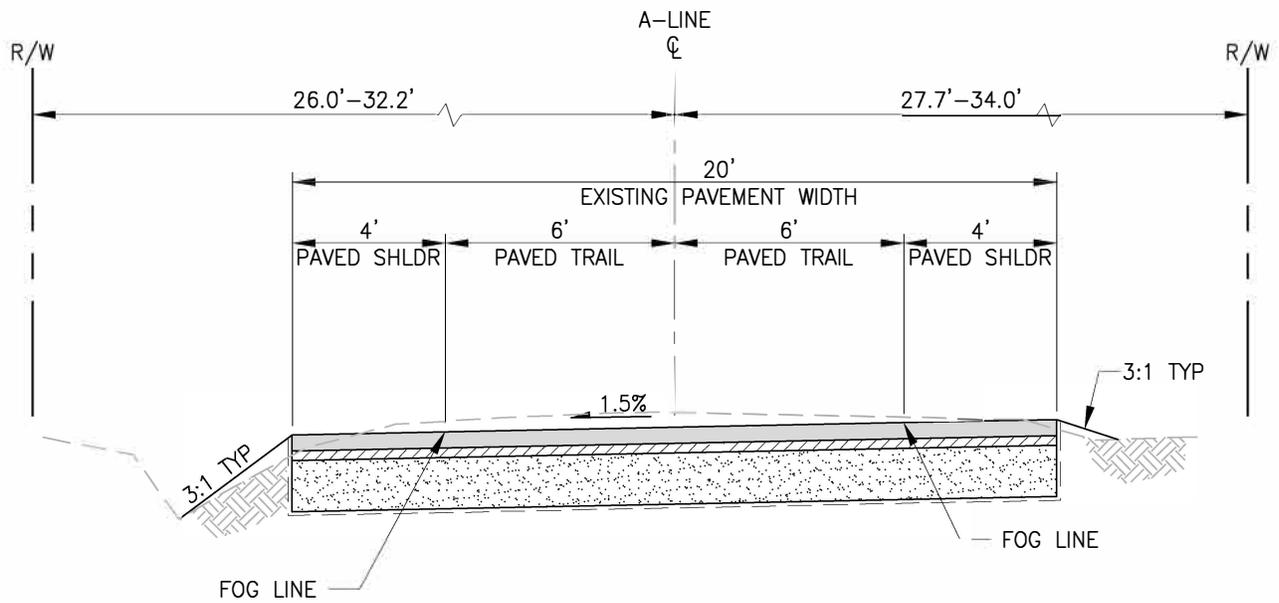

- Alternative 1 is located primarily within the existing paved surface of S 196th Street and 18th Avenue S (**Figure 2**). This alternative assumes both streets would be vacated (i.e., closed to motor vehicular traffic) within the study area.
- Alternative 2 is located partially within the paved surface and partially north of S 196th Street and east of 18th Avenue S (**Figure 3**). This alternative assumes that both streets would be changed to accommodate a single 11-foot-wide lane for motor vehicular traffic in one direction (i.e., w on 18th Avenue S and west on S 196th Street). Any existing shoulder on the west and south side of the road is unchanged.
- Alternative 3 is located entirely off the existing paved surface, north of S 196th Street and east of 18th Avenue S (**Figure 4**). This alternative assumes that both streets would continue to operate with 2-way traffic (i.e., no changes to existing motor vehicular use); however, the shoulder on the east and north side of the road would be eliminated.

## TRAFFIC IMPACTS

### Baseline Conditions

Des Moines Memorial Drive is a two-lane, north-south arterial with a speed limit of 35 miles per hour (mph). There are approximately 5 feet to 7 feet of paved shoulder width on the east and west sides of the street. Des Moines Memorial Drive intersects with S 200th Street and is signal-controlled with marked crosswalks at each of the four approaches. South 200th Street is a two-lane, east-west arterial with a speed limit of 25 mph. There are approximately 4 feet to 8 feet of paved shoulder width on the north and south sides of the street.

18th Avenue S intersects with S 200th Street approximately 2,300 feet east of Des Moines Memorial Drive. This intersection is a two-way stop-controlled intersection with no marked crosswalks. A paved sidewalk exists along the west side of 18th Avenue S, south of S 200th Street, at the southwest corner of the intersection.

South 196th Street is approximately 1,500 feet north of S 200th Street, intersecting with Des Moines Memorial Drive. South 196th Street and Des Moines Memorial Drive is a two-way stop-controlled intersection and has no marked crosswalks or sidewalks on either side of the street. South 196th Street, running in the east-west direction, merges with 18th Avenue S, running in the north-south direction, and is a two-lane non-arterial street with a speed limit of 25 mph. There is approximately 3 feet to 5 feet of gravel shoulder width on each side of the street.

Traffic volume data were provided by King County. Existing PM peak hour traffic volumes were collected on January 24, 2017 at the intersection of Des Moines Memorial Drive and S 200th Street. Additionally, 24-hour/7-day counts were collected the week of January 24 to January 30, 2017 on S 196th Street, east of Des Moines Memorial Drive for 7 days, including the same day as the PM peak hour counts were collected.

Average weekday (Tuesday through Thursday) daily volumes on S 196th Street are 2,000 vehicles, with trucks making up approximately 21 percent of total daily volumes. Average weekend daily volumes were 630 vehicles, with 16 percent truck traffic.

Future traffic growth was estimated at the study intersection for the year of opening (2018) with an estimated 1 percent annual average growth rate. **Figure 5** summarizes the 2018 forecasted PM peak hour traffic.

Figure 5. Study Intersection Forecasted PM Peak Hour Volume and Non-Arterial Volume

Calculations for PM peak hour traffic operations for the year of opening were calculated at the study intersection based on methodologies described in the Highway Capacity Manual. Traffic operations are often measured by an approach called intersection level of service (LOS). LOS is a scale ranging from A to F in which rankings are based on the overall delay at a given intersection. LOS A represents the best conditions with minimal amount of delay, and LOS F represents the worst conditions with severe congestion and delay. **Table 1** lists the intersection LOS delay thresholds for signalized intersections. At signalized intersections, LOS is calculated based on the delay of all vehicles entering the intersection.

Table 1. Level of Service Thresholds

Level of Service	Average Delay per Vehicle (seconds)
	Signalized Intersections
A	≤ 10
B	> 10 and ≤ 20
C	> 20 and ≤ 35
D	> 35 and ≤ 55
E	> 55 and ≤ 80
F	> 80

Note: The LOS criteria are based on control delay, which includes initial deceleration delay, queue move-up time, stopped delay, and final deceleration delay.

Source: Transportation Research Board 2000

The 2018 PM peak hour LOS and delay for Des Moines Memorial Drive and S 200th Street intersection evaluated is shown in **Table 2**. This intersection is forecasted to operate at LOS B.

**Table 2. 2018 PM Peak Hour LOS**

Intersection	Approach	LOS	Delay (seconds/vehicle)	Overall LOS	Overall Delay (seconds/vehicle)
Des Moines Memorial Drive/ S 200th Street	Eastbound	B	17.1	B	11.6
	Westbound	B	15.3		
	Northbound	A	6.5		
	Southbound	B	10.6		

### Traffic Impacts of Proposed Alignments

Three trail alignment alternatives were evaluated to determine if a full or partial street vacation would affect traffic operations in the study area. The three alignment alternatives would include the following changes to traffic flow on S 196th Street and 18th Avenue S:

- Alternative 1 -Full vacation of S 196th Street and 18th Avenue S; no vehicular traffic allowed
- Alternative 2 - Northbound/westbound vehicular traffic only allowed on S 196th Street and 18th Avenue S
- Alternative 3 – No road vacation

Under each alignment alternative, vehicular traffic restricted from using S 196th Street and 18th Avenue S was rerouted instead through the intersection of Des Moines Memorial Drive and S 200th Street. **Table 3** summarizes the traffic volumes for the three alignment alternatives; changes from baseline conditions are highlighted.

**Table 3. PM Peak Hour Volumes at Des Moines Memorial Drive/S 200th Street**

Alternative	Southbound Approach Southbound			Westbound Approach Westbound			Northbound Approach Northbound			Eastbound Approach Eastbound		
	Right	Through	Left	Right	Through	Left	Right	Through	Left	Right	Through	Left
1	14	669	120	210	126	47	24	339	20	127	175	19
2	14	669	120	53	126	47	24	339	20	127	175	19
Existing / Alt 3	14	669	73	53	126	47	24	339	20	127	175	19

The PM peak hour LOS and delay for the study area intersection for existing conditions and the three alignment alternatives are shown in **Table 4**. The intersection of Des Moines Memorial Drive and S 200th Street is forecasted to operate at LOS B under all proposed alignments. LOS worksheets are included in the attachments

Table 4. PM Peak Hour LOS for Existing and Alternatives Network

Alternative	Description	Overall LOS	Overall Delay (seconds/vehicle)
Existing	2018 Existing Conditions	B	11.6
1	Full Vacation	B	17.6
2	Northbound/Westbound Traffic Only	B	13.3
3	No road vacation	B	11.6

### Trucks

Trucks accounts for approximately 25 percent of the total traffic volumes on S 196th Street and 18th Avenue, with the majority of trucks being smaller delivery-type trucks. Rerouted truck volumes were included in the traffic analysis for Alternatives 1 and 2.

Vehicle tracking analysis using AutoTurn was used to evaluate the existing turning radii at the intersection of Des Moines Memorial Drive / S 200<sup>th</sup> Street to determine if trucks rerouted under Alternatives 1 and 2 could be accommodated. Two different truck types were evaluated using AutoTurn: the most common truck observed, a 2A-4T(basic box-type delivery truck) and the largest vehicle observed a 6H-MT (six-axle multi-trailer truck). The 2A-4T trucks make up approximately 20 percent of daily traffic volumes on S 196<sup>th</sup> Street and 6H-MT trucks make up less than 1 percent of daily traffic. Traffic volume counts are included in the attachments.

Under Alternatives 1 and 2, southbound to eastbound traffic would be rerouted. Results of the AutoTurn analysis, included in the attachments, show both truck types analyzed are able to make the southbound to eastbound turn within the existing radii.

Under Alternative 1 only, westbound to northbound traffic would be rerouted. The AutoTurn analysis does show that a 6H-MT truck will have difficulty making the westbound to northbound turn within the existing radii at the intersection of Des Moines Memorial Drive / S 200<sup>th</sup> Street. It should be noted that under Alternative 2 and Alternative 3 proposed design changes at the intersection of 18<sup>th</sup> Avenue S / S 200<sup>th</sup> Street may also make the westbound to northbound turn difficult for 6h-MT trucks. The percentage of large trucks making the westbound to northbound turn at this location accounts for less than 1 percent of daily traffic.

# Basic Axle Classification Report: 17-0001

**Station ID : 17-0001**

Info Line 1 : 18 AVE S

Info Line 2 : S 200 ST

GPS Lat/Lon :

DB File : 17-0001.DB

Last Connected Device Type Unic-L

Version Number : 1.30

Serial Number :

Number of Lanes : 1

Posted Speed Limit :

## Lane #1 Configuration

#	Dir.	Information	Vehicle Sensors	Sensor Spacing	Loop Length	Comment
1.	NB		Ax-Ax	4.0 ft	6.0 ft	

## Lane #1 Basic Axle Classification Data From: 00:00 - 01/24/2017 To: 00:59 - 01/31/2017
