

Evaluation Criteria for 2023 King County Parks Grants

Healthy Communities and Parks Fund (Tier 1)

Program Goals: Increase access to recreation and use of parks, open spaces, and recreational facilities in underserved areas and communities.

Evaluation and Award Process: A Parks review panel will evaluate and make award recommendations for Tier 1 grant applications. Review panel members bring their expertise and a diversity of perspectives to the evaluation process.

- Review panel members independently evaluate and score eligible applications on a scale based on the evaluation criteria below, with the highest scores reflecting the indicators of a competitive application.
- Each applicant's final score will be weighted as follows:
 - 50% Project Overview
 - 30% Equitable Access and Partnerships
 - 20% Budget and Resources
- Final scores will be a key factor in the review panel's decision-making process to develop award recommendations.

The panel's award recommendations are approved by DNRP (do not require approval by the King County Executive or Council). Upon DNRP approval and authorization of the grant awards, Parks will execute and manage contracts with the awarded organizations.

Healthy Communities and Parks Fund (Tier 1) Evaluation Criteria

APPLICATION QUESTIONS	INDICATORS OF A COMPETITIVE APPLICATION	MAXIMUM POINTS
Project Overview (50%)		
Project details	Project for this specific funding aligns with the goals of the grant program.	5
Outcomes	Project outcomes benefit the community.	5
Evaluation	Proposal identifies what success would look like for the project and how the project would measure success.	2
Project implementation and funding ¹	There is a vision for how the eventual project will be implemented and funded, including timeline, funding sources, and (if applicable) long-term operations and maintenance.	1
Public access ²	Project site includes public access, and/or the project plans to develop/restore the project site to enhance public access.	2
Project sustainability ³	Long-term operations and management of the project/facility is being planned for and funded.	2
Project readiness ³	Proper steps have been completed and/or are anticipated to prepare for breaking ground.	2
Areas served: - Cities/towns - Unincorporated areas	Project serves South King County and/or unincorporated areas of King County that historically lack open space resources.	2
Equitable Access & Partnerships (30%)		
Populations of focus ⁴	Project is focused on underserved communities that experience inequitable access to open space.	2
Improving access	Project addresses barriers for underserved communities to improve access to parks, green spaces, and/or recreation.	2
Budget & Resources (20%)		
Budget template	Budget is complete, aligns with proposed activities, and is reasonable based on the scope of the project.	5
Budget narrative		

¹ Applies to Feasibility Study project type only

² Applies to Capital – Construction, Planning & Design, and Acquisition project types only

³ Applies to Capital – Construction and Planning & Design project types only

⁴ Applies to Program project type only
