

Black Diamond Sewer Upgrade

King County
Wastewater
Treatment

King County Wastewater Treatment Division is designing the Black Diamond Sewer Upgrade Project. This project will increase capacity for 6 miles of regional sewer pipe between the cities of Black Diamond and Covington. It will help us treat more wastewater to meet the needs of the growing community.

We want to hear from you!

We want to share project information and gather early input on potential construction impacts, community interests, and communication preferences.

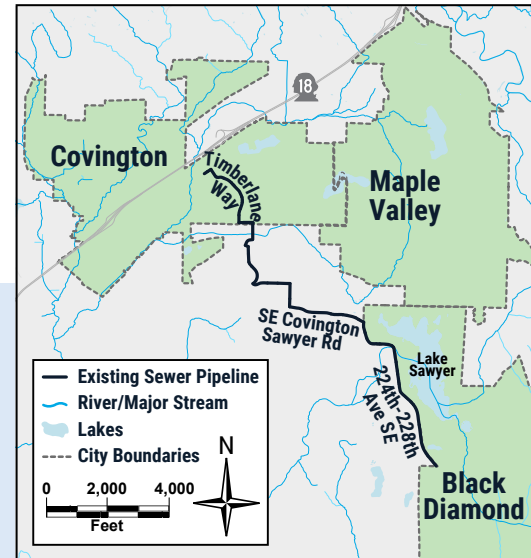

Visit publicinput.com/t62485 or scan the QR code to take a 3-5 minute survey, share your thoughts, and learn more about the project.

This survey is also available in Spanish at publicinput.com/bdtrunkspanish.

To request a paper copy of the survey, please contact Annie Plumley at aplumley@kingcounty.gov or 206-263-3203.

Your privacy is important to us. To respect and protect your privacy, we will not collect any personal information in this survey. All responses will be anonymous.
