

# COAL CREEK SEWER UPGRADE

December 17, 2019

## Minor maintenance activity in Coal Creek Parkway tomorrow, December 18

Last week, King County learned that the lid to a monitoring well in the southbound curb lane of Coal Creek Parkway needs to be replaced. Crews placed a temporary patch over the well by installing cold mix asphalt over the well opening until a plan could be put in place to repair the lid.

Monitoring wells are small covered openings typically installed to take samplings of soil and groundwater conditions below the road surface to help inform project design and construction.

**Starting as early as 9:30 a.m. tomorrow morning, December 18, crews will close south bound traffic in the curb lane of Coal Creek Parkway to replace the lid.**

Three wells along Coal Creek Parkway were installed earlier this summer to help to inform design of the Coal Creek Sewer Upgrade Project.

### What to expect during the work

- **Activities will occur within south-bound curb lane on Coal Creek Parkway between Forest Drive and the Upper West Trail Head**
- **Work will begin as early as 9:30 a.m. and take approximately 2 hours to complete.**
- **Traffic control and flaggers will direct drivers around a one lane closure by the work area, as needed.**
- **Watch for warning signs prior to the lane closure in each direction!**

### Contact us with questions or concerns:

The County is ready to work with you every step of the way and meet you where you are. **If you have questions or want to learn more, please contact Monica Van der Vieren at 206-477-5502 or [monica.vandervieren@kingcounty.gov](mailto:monica.vandervieren@kingcounty.gov).**

### About the project

King County WTD is designing a new sewer line to replace an existing line that runs under the Coal Creek Natural Area. The existing 2.5-mile long pipe provides service to Bellevue and Newcastle and is nearing maximum capacity during large rain events. The new design will move the pipeline away from the natural area and serve Bellevue and Newcastle communities for another 50 years or more.
