

# COAL CREEK SEWER UPGRADE

March 23, 2020

## Planned Coal Creek Natural Area surveying at the end of March and in early April

King County Wastewater Treatment Division (WTD) will be working in the Natural Area in the end of March and early April to inform project design and environmental review. Starting at the end of March, crews will:

- Survey background noise near planned work areas to understand current noise levels.
- Survey the creek and other sites to gather data on current environmental conditions.

Surveys will not impact access to the Upper West Trailhead parking lot or Natural Area trails.

### What to expect

- **Noise surveys** will start the week of March 27 lasting about three days.
- **Creek surveys** will start the second week of April and last about four weeks.
- Crews will work weekdays from 7 a.m. to 7 p.m.
- Crews will be marked in bright clothing and will use handheld survey equipment.

### About the project

King County WTD is designing a new sewer line to replace an existing line that runs under the Coal Creek Natural Area. The existing 2.5-mile long pipe provides service to Bellevue and Newcastle and is nearing maximum capacity during large rain events. The new design will move the pipeline away from the natural area and serve Bellevue and Newcastle communities for another 50 years or more.

### Contact us with questions or concerns

The County is ready to work with you every step of the way, especially during uncertain times. We are currently following the direction of King County and Seattle Public Health and limiting in-person meetings. **If you have questions, please contact Monica Van der Vieren at 206-477-5502 or [monica.vandervieren@kingcounty.gov](mailto:monica.vandervieren@kingcounty.gov).**

*Survey crews will use handheld survey equipment to gather data along the Creek.*
