**About the project:**  
King County’s regional wastewater system protects public health, local waterways, and supports our economy. The Coal Creek Sewer Upgrade Project will provide needed wastewater capacity needed for Newcastle and part of Bellevue. This project also provides designers the opportunity to move much of the active sewer pipe away from a flood prone creek in a popular recreational area.

September 2020

Finding creative ways to connect with you during a challenging time

King County’s Coal Creek Sewer Upgrade Project is in final design. During this busy phase of the project everyone on the team contributes to completing the design and getting ready for construction. Check the schedule on page 3 to see where we are at with the project!

Throughout our projects, community engagement is a priority for King County. Our teams work hard to meet people where they are at, talking through the project in person at meetings small and large, events, and fairs and festivals.

King County is following public health guidelines and avoiding in-person meetings or events. However, we are just as committed to sharing information and discussing the project in other ways.

**Thank you!**

King County’s team extends a special “thank you” to Coal Creek Natural Area visitors. Our crews appreciate your patience as they completed a necessary maintenance hole protection project! Your efforts to keep everyone safe during the Upper West Trailhead closure are much appreciated.

# Project Highlight: Welcoming people of all abilities to remote meetings and events!

On July 26, 2020, the United States celebrated the 30th anniversary of the signing of Americans with Disabilities Act (ADA) into law. WTD's Coal Creek team celebrated #ADA30 with a new video.

Visit the project website to learn how you can make video calls and remote meetings more accessible for everyone in your workplace, community, and organization!

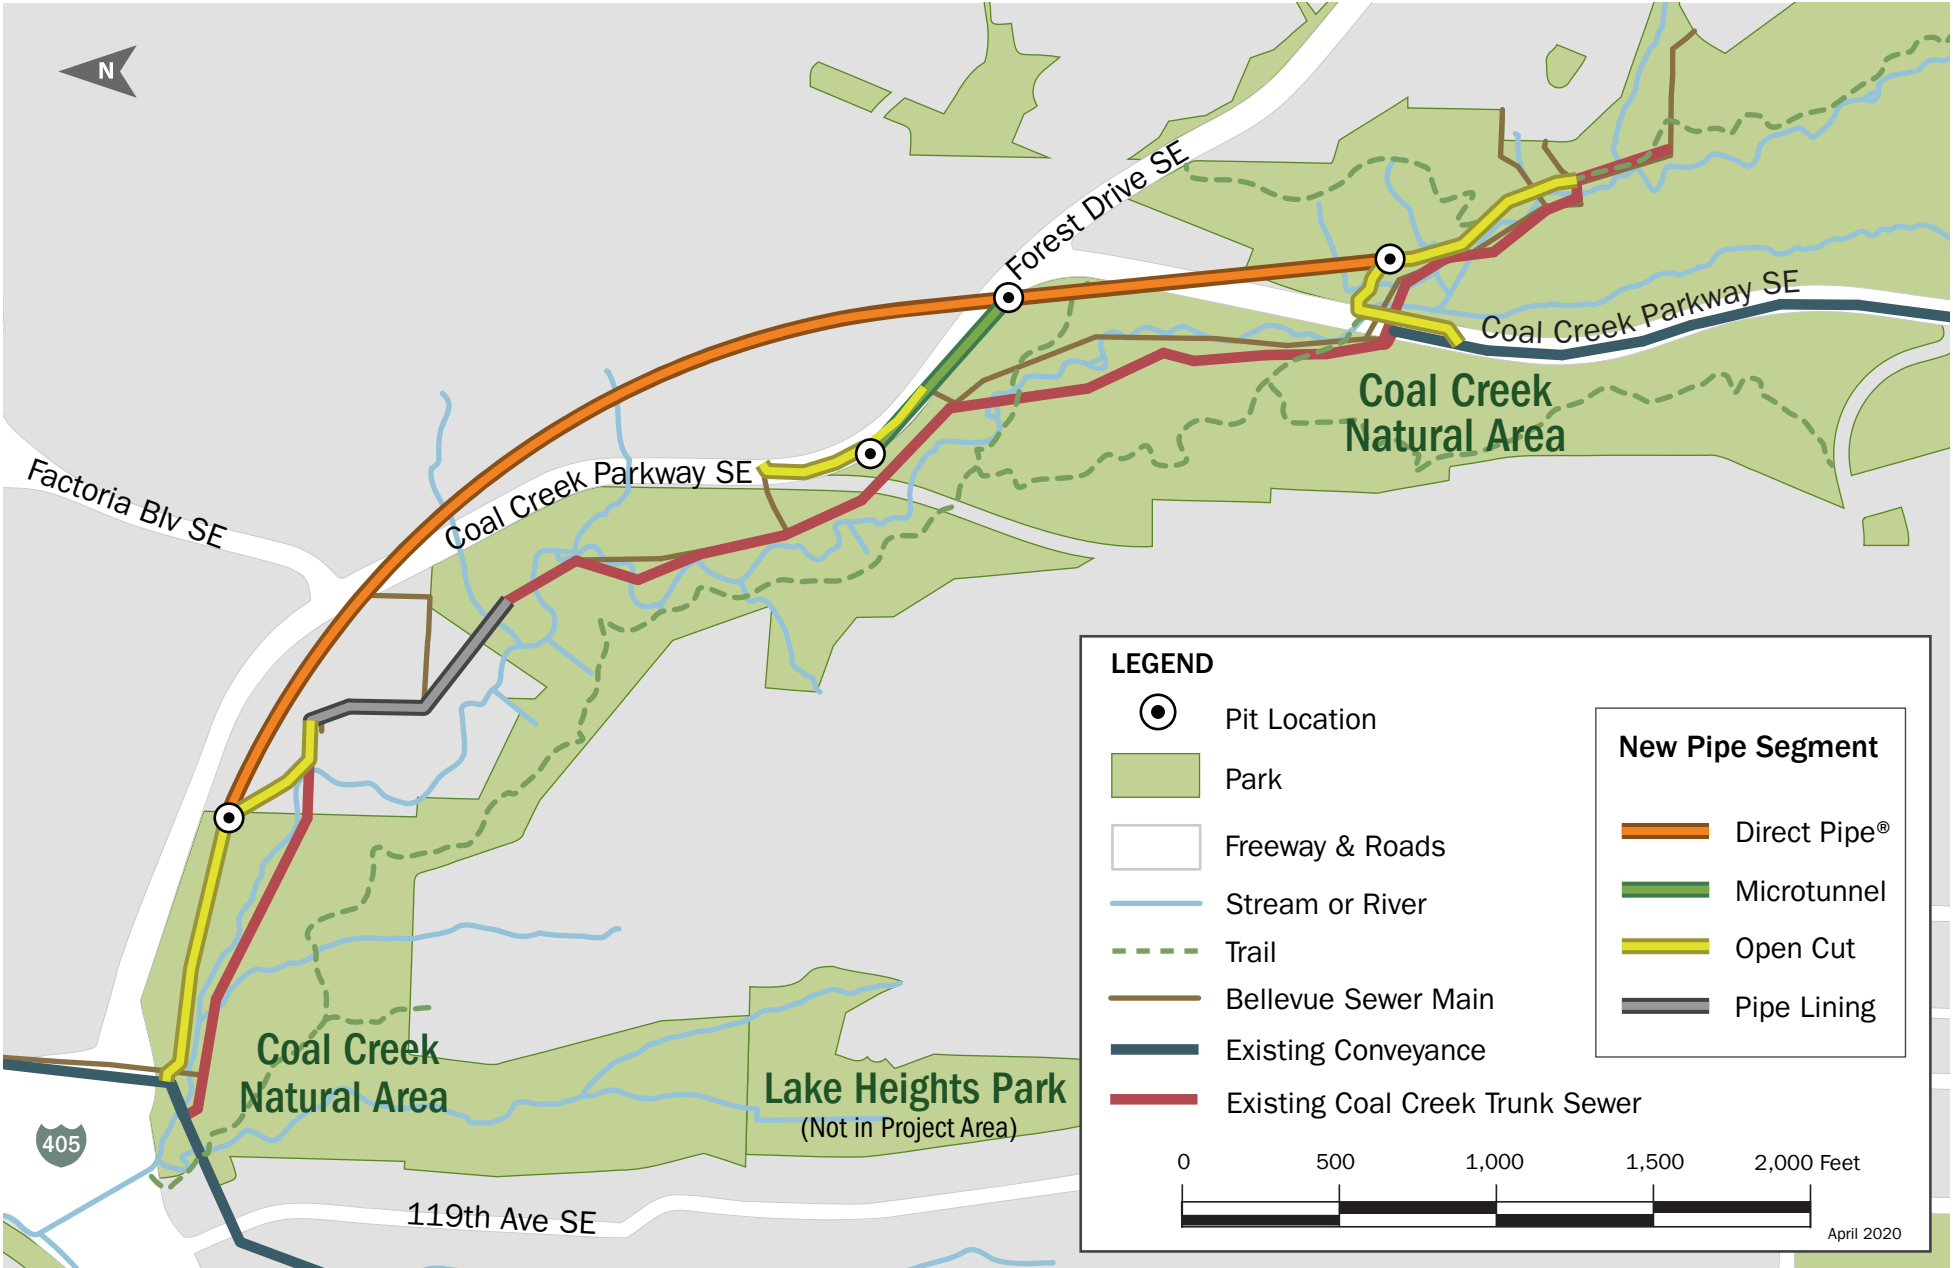

## Summer 2020 online meeting series

In June 2020, King County hosted an online meeting series about the Coal Creek Sewer Upgrade. During the meeting, participants learned about:

- Different construction techniques and work areas
- Protections for the environment and people during construction
- Environmental and trailhead restoration.

You can view recordings of both meetings in accessible formats on the “public involvement” tab on our project webpage. Visit our project webpage.

## Upcoming opportunities to ask questions, share your thoughts, and talk to us!

- Stop by our Online Open House**  
During September, you can drop in to an online open house as many times as you like to learn about the project.
- Take a self-guided project tour in the Coal Creek Natural Area**  
Visitors to the Upper West/Red Cedar Trailhead will find signs describing the project at the start of the trail. This is the area where most work will occur.
- Let us know how we can meet with you and your group**  
If your community group or organization would like a briefing, we can host a remote meeting or join yours!
- Call or email!**  
We may not be in the office, but we're still available to discuss the project and answer your questions.
- Discuss the project with us through an interpreter**  
If you or someone you know would like to speak with a project team member through a language interpreter, please contact us using the contact information on page 4.
