

# COAL CREEK SEWER UPGRADE

March 1, 2021

## Upcoming geotechnical surveying near 130th Ave SE

King County's Coal Creek Sewer Upgrade Project is in final design. The project team has been conducting field work in the project area over the past two years to inform design. Starting as early as March 8, crews will use equipment to probe below the surface of the roadway (see map on reverse) and collect soil and groundwater information. This work will help the project team refine the project design.

### What to expect:

- Work is expected to take place on Monday, March 8 from 9 a.m. to 4 p.m.
- Equipment in the roadway; please pay close attention to signs and barriers.
- One lane of traffic will be closed near the work area to make space for equipment.
  - Flaggers will direct people travelling around the work area
- Noise typical of a construction site
- Watch for warning signs prior to the lane closure in each direction!

*Example of typical equipment used for geotechnical surveys.*

### Help keep our crews safe

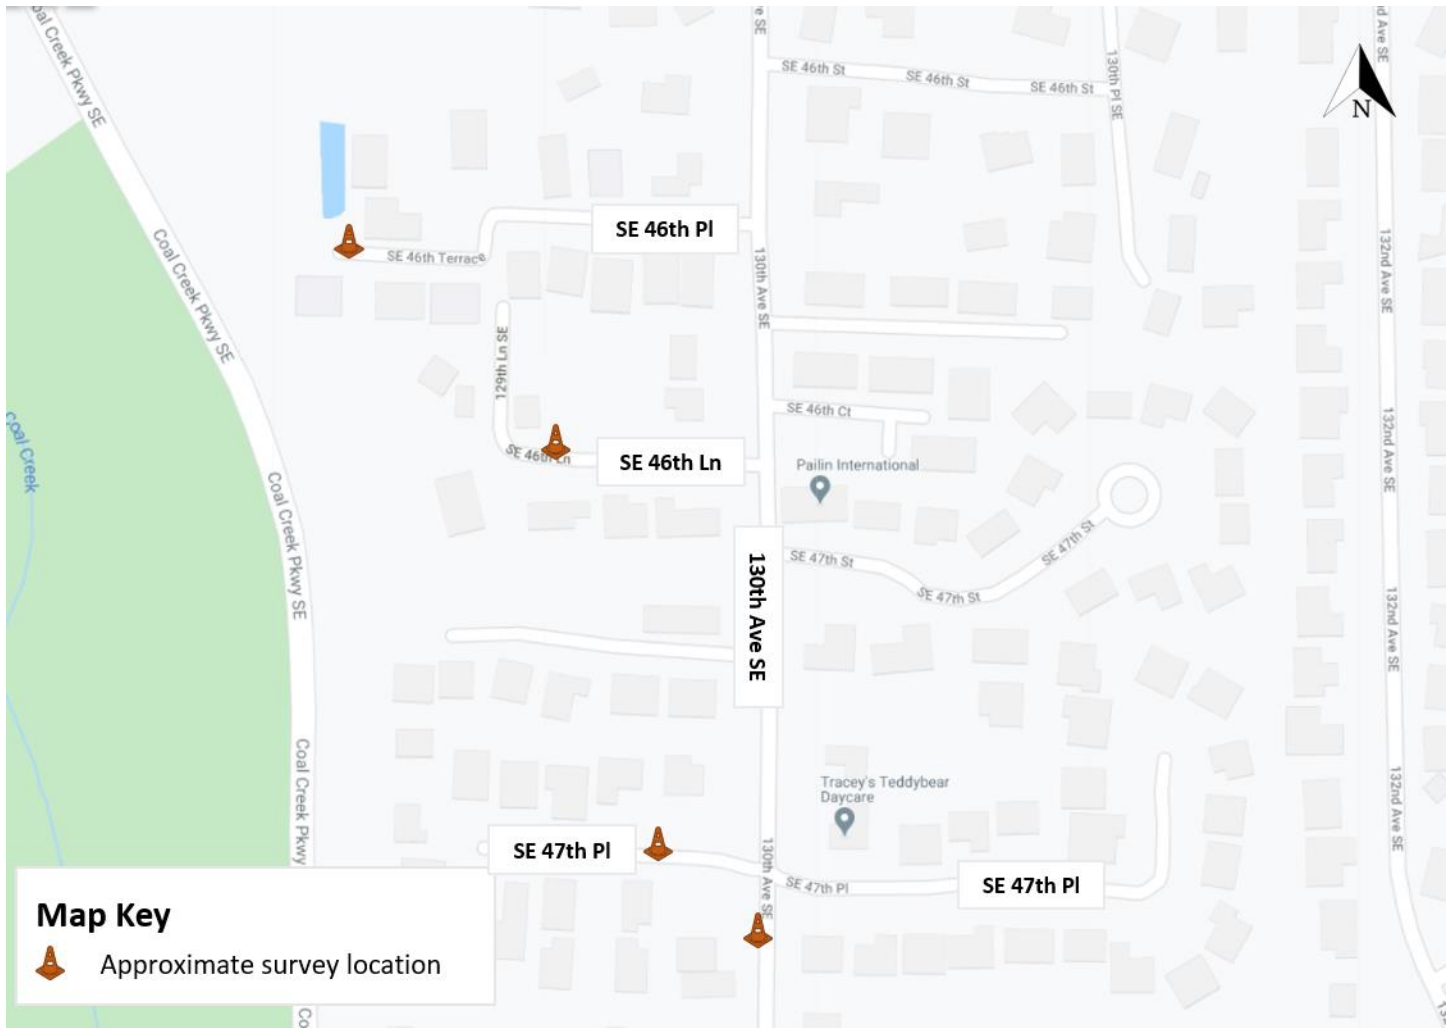

Crews continue working with approved permits and safety plans that include public health guidance for social distancing. Please help keep our essential workers safe by avoiding crews in the field. If you have questions, please feel free to contact us by email or phone. We are available to answer your questions and hear your comments and concerns.

### About the project

King County's regional wastewater system is an essential service that protects public health, local waterways, and supports our economy. This clean water project will provide increased capacity needed to carry wastewater from Newcastle and part of Bellevue to King County's South Treatment Plant in Renton. The Coal Creek Sewer Upgrade also provides the opportunity to move much of the active pipe away from the creek in the popular Coal Creek Natural Area.
