Glossary of terms

- **Sewage:** Used water that goes down drains and/or toilets in homes and businesses.
- **Stormwater:** Rain or snow that washes off roofs, streets and parking lots.
- **Combined sewer system:** Sewer pipes that carry both stormwater and sewage.
- **Combined sewer overflow (CSO):** Release of excess stormwater and sewage into water bodies from a combined sewer system that is caused by heavy rain or snowmelt.

- **Wet weather treatment station:** A facility that cleans sewage and stormwater before it enters water bodies.
- **Advanced primary treatment:** Advanced primary treatment has more advanced solids settling technology as compared to standard primary treatment. Coagulants and flocculants are added to the treatment process to accelerate the solids settling process.

Upcoming meeting dates

**All meetings will be held at South Seattle College Georgetown Campus, 6737 Corson Ave South, Building C, Room C110/111*

Design Advisory Group Meeting #3
