

GEORGETOWN

Wet Weather Treatment Station

King County

Protecting Our Waters

Doing our part on rainy days

King County is planning to build a wet weather treatment station in Georgetown to help protect the Duwamish River from future pollution. During heavy rainstorms, the new wet weather treatment station will clean excess sewage and stormwater before it enters the Duwamish.

We want to hear from you!

The project team will host meetings and be out in the community to share project information and gather input on design concepts for the station from the community.

PROJECT MEETINGS

In-Person Open House

Tuesday, June 23, 2015, 6 – 8 p.m.
South Seattle College Georgetown Campus,
