Project Schedule

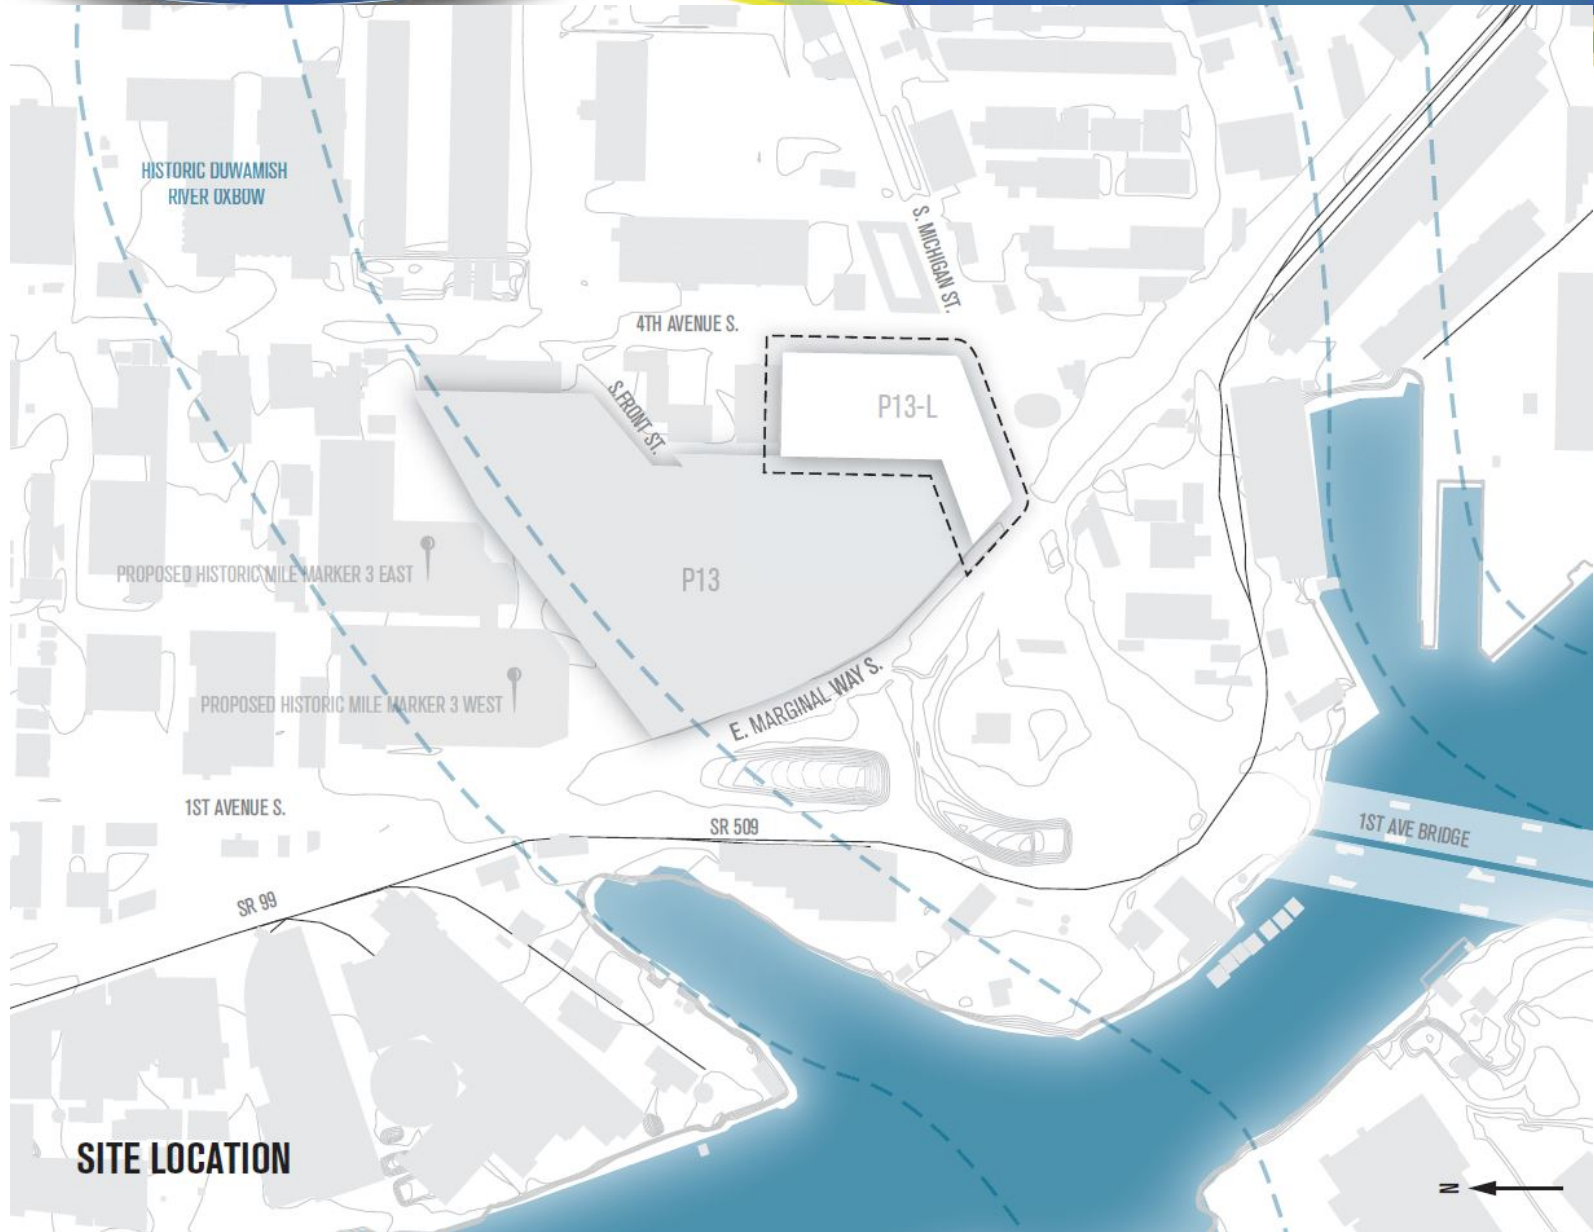

Design Guidelines

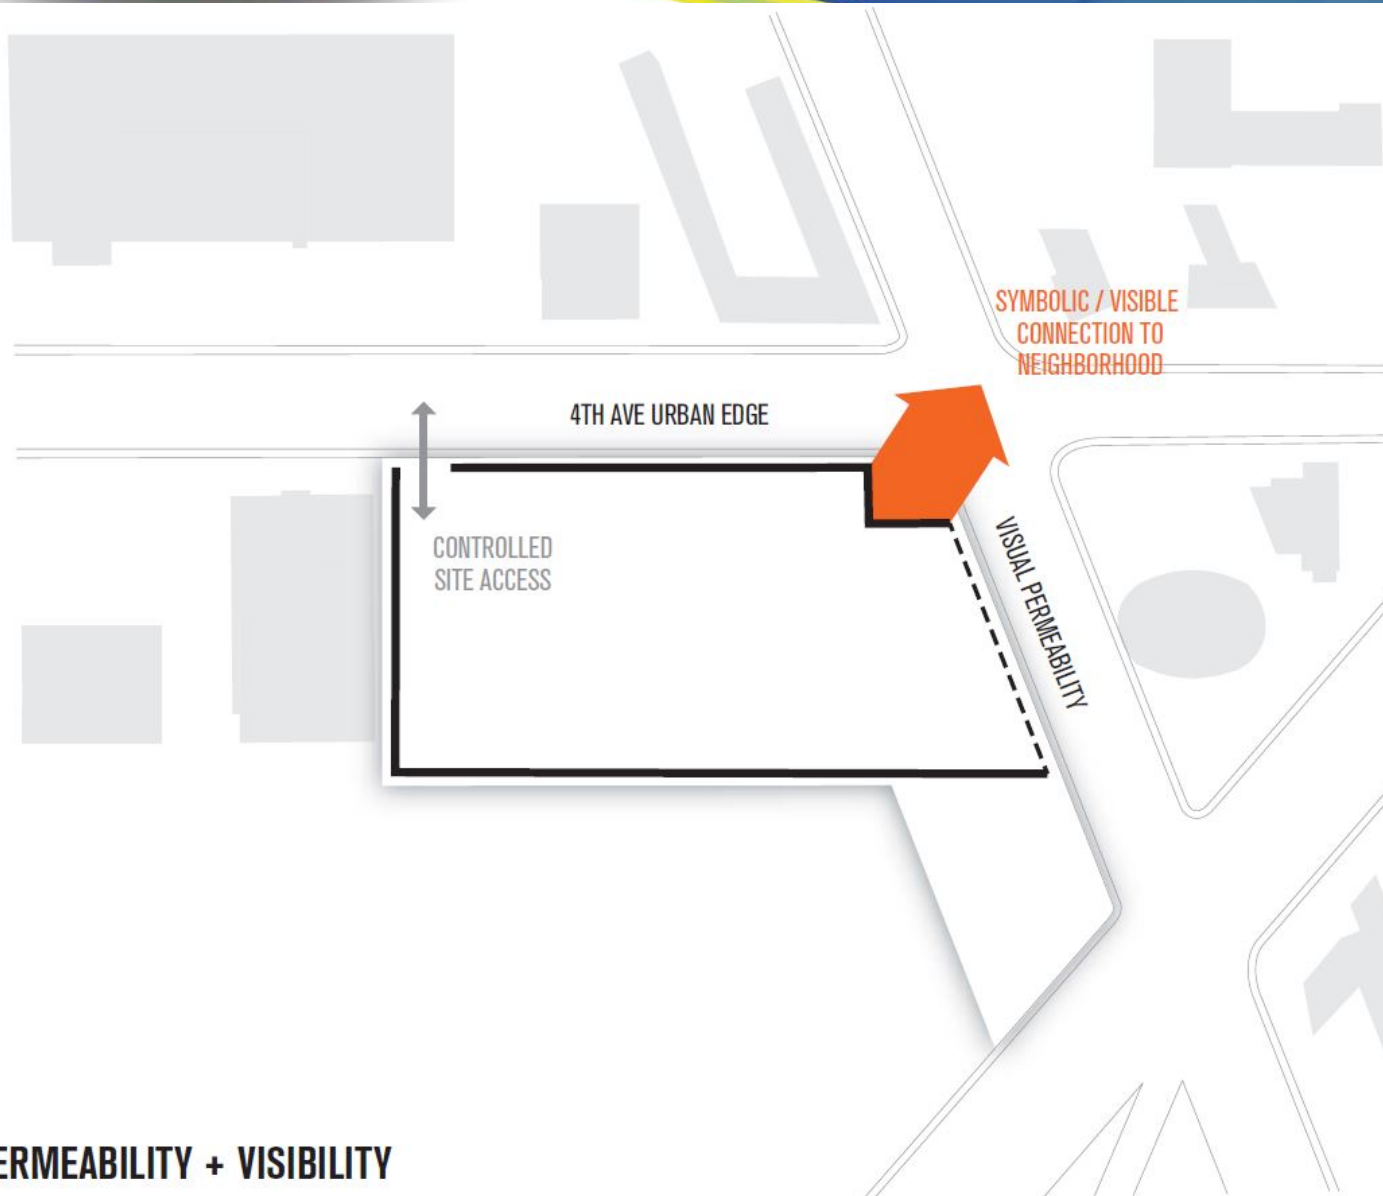

- Reflect the individual character of the neighborhood; from whimsical to hard working, industrial to residential, and hand made to natural systems.
- Enhance air and water quality while making both natural and treatment processes visible.
- Enhance the understanding of public wastewater infrastructure through education and employment opportunities.
- Balance the public and private spaces to meet the needs of the utility and the community.
- Acknowledge the place, history, color palette, and transformations over time in Georgetown.
- Humanize the design by expressing craft, grit, and elegance at all scales, resulting in a place of neighborhood pride.
- Create a facility that is economically, environmentally, and socially sustainable through conservation, efficiency and stewardship.
