**Glossary of terms**

- **Sewage:** Used water that goes down drains and/or toilets in homes and businesses.
- **Stormwater:** Rain or snow that washes off roofs, streets and parking lots.
- **Combined sewer system:** Sewer pipes that carry both stormwater and sewage.
- **Combined sewer overflow (CSO):** Release of excess stormwater and sewage into water bodies from a combined sewer system that is caused by heavy rain or snowmelt.
- **Wet weather treatment station:** A facility that cleans sewage and stormwater before it enters water bodies.

- **Advanced primary treatment:** Advanced primary treatment has more advanced solids settling technology as compared to standard primary treatment. Coagulants and flocculants are added to the treatment process to accelerate the solids settling process.
