

Construction Update

October 2020

Georgetown Wet Weather Station Project Update

King County's Wastewater Treatment Division (WTD) is building a new wet weather treatment station in Georgetown, at the corner of Fourth Avenue South and South Michigan Street. WTD is also building connecting pipes from the station to the outfall. Crews completed the construction of the outfall in March. Read below for updates, recent highlights, and information about upcoming work.

Test Your Wastewater Treatment Knowledge!

Fill in the blank

The Brandon Street _____ will help control the influent (untreated wastewater) and effluent (treated wastewater) flows in the sewer system.

- a.) Regulator Station
- b.) Pump Station
- c.) Flow Station
- d.) Sewer Station

Conveyance

Crews are in the process of conducting restoration work in the right of way on East Marginal Way South. Additional construction work to install the pipes along South River Street is planned, and we will let the community know when that is scheduled.

Landscaping and restoration work between East Marginal Way and the SR-99 onramp.

Treatment Station

In the coming weeks, roofing work and in-wall plumbing will finish at the station's mechanical and operations building.

Additional work at the treatment site during the month of October included:

- Finalizing work on the regulator structure's roof
- Starting electrical connection work for the site's UV disinfection building

What to expect during construction:

- Project team available by phone to brief and update community groups, business owners, and residents about construction activities and next steps for construction
- Noise and vibrations typical of construction
- Security fencing and erosion and sediment control around the project sites
- Active 24/7 construction hotline: 206-205-9286

A skylight installed at treatment station's operations building
