

24/7 sidewalk closure on 4th Ave S and S Michigan Street starting on Thursday, June 3

The closure is anticipated to last about eight to ten weeks for utility improvements

Crews will close a portion of the sidewalk starting on June 3, 2021, to upgrade utilities as part of the Georgetown Wet Weather Treatment Station project. As part of this work, crews will need to remove and replace the sidewalk to access the existing utilities below. To keep people traveling near the work area safe during this time, the sidewalk will be closed 24/7 until a new sidewalk has been installed (approximately 8-10 weeks).

What to expect:

- 24/7 sidewalk closure on the west side of 4th Avenue South and the north side of South Michigan Street (see enclosed map)
- Work is expected to take approximately eight to ten weeks to complete
- People walking will be redirected around the sidewalk closure
 - Please pay attention to signage and flaggers for your safety and the safety of our crews
- Currently, there are no anticipated lane closures for people driving near the work area.
 - We will send additional notification if traffic adjustments or reroutes are needed
- There are no anticipated bus reroutes
- Noise and lighting will be typical of a construction site
