

## Project update

July 8, 2021

### **Lane closures on 4th Avenue S on Saturday, July 10, 2021**

Saturday July 10 south bound curb lane closure expected to last from 6 a.m. to 3 p.m.

On Saturday, July 10th, crews will close a portion of 4th Avenue South continue making progress on the Georgetown Wet Weather Treatment Station site. This closure will give crews space to access built structures onsite and the space to continue electrical work in an area which is currently restricted by the construction fencing.

A traffic control plan during this timeframe has been approved.

#### **The sidewalk closure that started on June 3rd is anticipated to last about 8 to 10 weeks for utility improvements**

Crews closed a portion of the sidewalk starting on June 3, 2021, to upgrade utilities as part of the Georgetown Wet Weather Treatment Station project. As part of this work, crews will need to remove and replace the sidewalk to access the existing utilities below. To keep people traveling near the work area safe during this time, the sidewalk will be closed 24/7 until a new sidewalk has been installed (approximately 8-10 weeks).

#### **What to expect:**

- 24/7 sidewalk closure on the west side of 4th Avenue South and the north side of South Michigan Street is expected to take approximately 8 to 10 weeks to complete (see map above)
- Curb lane closure on Saturday, July 10 will last from 6 a.m. to 3 p.m.
- People walking will be redirected around the sidewalk closure. Please pay attention to signage and flaggers for your safety and the safety of our crews
- We will send additional notification if traffic adjustments or reroutes are needed
- There are no anticipated bus reroutes
- Noise and lighting will be typical of a construction site
