

Weekend work planned for October 15 through 17

Crews will complete utility work on 4th Avenue South and South Michigan Street

Starting as early as Friday, October 15, 2021, crews will be working on 4th Ave. S. and S. Michigan St. from 7 p.m. to 5 a.m., Friday through Sunday.

Work will involve concrete foundation for lighting, electrical work, and curb and sidewalk restoration near Georgetown Wet Weather Treatment Station project. The project will construct a new facility that will clean excess sewage and stormwater during heavy rains. This project will reduce untreated wastewater entering the Duwamish River by 95 percent.

If you live or work near the treatment station site, you may have received our summer newsletter which shares an update on our progress and highlights how the community helped create the treatment station. Check out our summer 2021 newsletter.

What to expect:

- Work hours between 7 p.m. and 5 a.m., Friday through Sunday
- Work is expected to take approximately two working days.
- The sidewalk on the northwest corner of S. Michigan St. and 4th Ave. S. will be closed
- The far-right lane traveling northwest on S. Michigan St. will be closed between 4th Ave. S. and E. Marginal Way S.
- The lane closure will begin on Friday night and remain through Monday morning to allow the new sidewalk to cure
- People walking will be redirected depending on the location of active construction
- Please pay attention to signage and flaggers for your safety and the safety of our crews
- Noise and lighting will be typical of a construction site

Updated hotline hours

Starting in October 2021, our new hotline hours are from **8 a.m. to 5 p.m., Monday through Friday**. If you have questions or need assistance, please call us at **206-205-9286**. The 24/7 hotline will remain open during overnight and weekend work.

Additional Progress at the Treatment Station

As of August 2021, construction of the treatment station is over 90 percent complete! Over the past couple of weeks, crews have made progress on the following activities:

- Completing pipe connections on site.
- Installing sidewalks on 4th Ave. S.
- Making electrical connections for indoor and outdoor lighting.
- Building planter areas which will be the home of native plants in the future plaza.

Did you know?

King County's Wastewater Treatment Division is among the many clean-water utilities nationwide exploring ways to include green infrastructure in long-term plans to reduce pollution and protect water quality. Native plants and other vegetation at the station will help slowly filter water from rain through the soil and remove potentially hazardous pollutants, protecting the Puget Sound!
