

Project Update

November 17, 2021

Night and weekend work planned in November

Crews will pave the driveway to the treatment station on 4th Avenue South and continue making electrical connections in coordination with SDOT/Seattle City Light on South Michigan Street

Starting as early as Friday, November 19, 2021, crews will be working on the weekend on 4th Ave. S. and S. Michigan St. from 7 p.m.

Work will involve pouring the concrete driveway for the station on 4th Ave. S. and coordinating with SDOT/Seattle City Light to upgrade a utility pole on S. Michigan St.

What to expect:

- Work is expected to begin at 7 p.m. on Friday night and continue through the day on Saturday
- Lane closures on S. Michigan St. between 4th Ave. S. and E. Marginal Way S. for utility pole work
- Work is expected to take approximately two days
- Sidewalk closures on 4th Ave. S. and on the northwest corner of S. Michigan St.
- Pedestrians will be redirected depending on the location of active construction.
 - Please pay attention to signage and flaggers for your safety and the safety of our crews.
- Noise and lighting will be typical of a construction site.

Additional Progress at the Treatment Station

Construction of the treatment station is over 90 percent complete! Over the past couple of weeks, crews have made great progress on indoor construction which will be used in the future for the treatment station's operations.

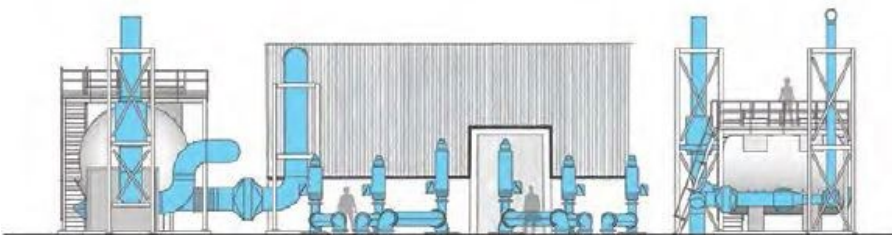

Did you know?

Once complete, people will be able to tell when the treatment station is at work in the following ways.

- Special lights along the building will light up when the station is working
- Passersby will be able to see what's going on inside through the fencing and the building itself
- Colored pipes will show water's path through the station
- Interpretive signs posted in areas open to the public
- One of the station's operation buildings will have space available for Wastewater Treatment Division educational and training events with local schools and other educational partners

A look at construction progress inside the treatment station.

NORTH ELEVATION

Pipes will be colored to show water's path through the building.
