

Project update

Lake Hills Sewer Relining Project: Post-construction survey

December 20, 2023

Survey is now extended to **January 26, 2024**. Thank you so much for those who have responded so far. Please share your views about your experiences with the project by using this [SURVEY LINK](#).

We appreciate your feedback!

November 22, 2023

The King County Wastewater Treatment Division has completed the Lake Hills Sewer Interceptor Phase II rehabilitation in the vicinity of Bel-Red Road in the Spring District of Bellevue, between Bel-Red Road and Northrup Way. Now the pipe is now in full service. The construction crew will complete the street restoration work in few locations when the weather is favorable.

Thank you to our project neighbors! Your input during design and your patience during construction are deeply appreciated.

Being a good neighbor is very important to King County. Please share your views about your experiences with the project by using this [SURVEY LINK](#). Survey is now open through December 31, 2023.

Thanks in advance for taking a few minutes of your day to fill out our post-construction survey. We appreciate your feedback.
