

Lake Hills and NW Lake Sammamish Sewer Upgrade Project

Community Survey

King County Wastewater Treatment Division (WTD) has collected and treated wastewater for 50 years – half a century! The water you use wherever you live, work, socialize, or recreate in Lake Hills and Redmond travels through your pipes, the local sewer system and, finally, through the County’s pipes to an award-winning treatment plant.

After decades of service, it is time for some of the County’s pipes in Redmond to be replaced. The new section of pipeline will provide service for your community for the next 50 to 60 years.

King County welcomes your comments as we consider community input during the design phase of the Lake Hills and NW Lake Sammamish Sewer Upgrade Project. Please take a moment to fill out this survey.

Project Area Map:

1. Where do you live?

- Redmond
- Bellevue
- Other

2. How do you use the project area? (Check all that apply)

- Live
- Work
- Attend school
- Recreate
- Commute by car
- Commute by bike
- Commute by public transportation
- None of the above

See reverse side for additional questions
