

King County

Lake Hills and NW Lake Sammamish Sewer Upgrade Project

Geotechnical work begins June 23 in Idylwood for King County's sewer upgrade project in Redmond

King County's Lake Hills and NW Lake Sammamish Sewer Upgrade Project field investigations are in full swing! Survey crews continue to map property boundaries, utilities, and wetland areas, and geotechnical crews will begin soil investigations in Idylwood on June 23. Geotechnical investigations will help the project team evaluate soil and groundwater conditions along the new pipeline alignment.

Typical truck-mounted drill rig for work in streets.

What you can expect

- **Equipment.** Crews will use drill rigs to perform borings at points along the alignment. Different drill rigs will be used depending on the boring location.
- **Crew members or signs directing traffic.** Please use caution and drive slowly in the work area.
- Crews will work **up to one working day** in each location.
- **Limited work hours** in some locations:
 - Residential areas: 7 a.m. to 3:30 p.m.
 - Northeast 24th Street: 9:30 a.m. to 3 p.m.
 - West Lake Sammamish Parkway: 9 a.m. until 3 p.m.
- **Noise close to the work area.** You may hear equipment motors during drilling and intermittent banging noise during sampling at any given time and for no more than 2-3 minutes.
- **Staff will return** to each boring location a week after performing borings and then once every three months to measure groundwater levels.

Locations for geotechnical work in June

**This schedule may change and will be updated throughout field work.*

June 23- Borings will occur in the right of way on NE 21st Street by 177th Avenue Northeast and 179th Avenue Northeast close to NE 24th Street. Traffic will be directed around the work.
