## Soil sampling on 180th Ave. N.E. continues September 6

Crews working for King County's Lake Hills and NW Lake Sammamish Sewer Upgrade Project are continuing field work activities to support final design for the Lake Hills and NW Lake Sammamish Sewer Upgrade Project. On September 6, crews will return to 180th Ave. N.E. to take soil samples at one additional location. We expect work will take one day to complete.

### Location:

Crews will work on the corner of 180th Avenue N.E. and N.E. 30th Street across from Audubon Elementary School. See map on reverse for locations.

### What you can expect during soil investigations:

- Work hours 9:30 a.m. to 2:30 p.m.
- Sidewalk closure and pedestrian detour at boring locations
- Flaggers, signage and cones will be in place to safely direct you around the work zone
- Increased noise when the drill rig is in use
- A drill rig will be used to drill a small hole, approximately 8-inches in diameter at the sampling location
- Each sampling location will be restored after work is complete

Crews will use a track rig to take soil samples at 180th Avenue N.E. and N.E. 30th Street.

**Please watch for equipment and signs in the area, travel slowly to stay safe, and follow direction from flaggers.**

### About the project:

We plan to conduct additional field work this fall, including utility investigations and groundwater tests. We'll update the project website, send text and email updates, and distribute fliers to near neighbors in advance of all fieldwork activities.
