

King County

## Lake Hills and NW Lake Sammamish Sewer Upgrade Project

August 31, 2017

### Soil sampling in ravine scheduled to begin as early as September 7

As early as September 7, crews working for King County's Lake Hills and NW Lake Sammamish Sewer Upgrade Project will be taking soil samples in your neighborhood to support final design for the Lake Hills and NW Lake Sammamish Sewer Upgrade Project.

#### Location:

Sampling will take place on properties in the ravine off of NE 24th St. and 177th Pl. N.E. (see map on reverse for locations). King County is coordinating directly with homeowners on whose property work will take place.

#### What you can expect during soil investigations:

- Work will last two days total
- Work hours 7 a.m. to 7 p.m. daily, weekdays only
- A drill rig on tracks will be used to make an 8-inch diameter hole at each sampling location
- Clearing of some vegetation for equipment access and setup
- Increased noise when the drill is in use
- Each sampling location will be restored after work is complete

*Crews will use a track drill rig to take soil samples on private property.*

#### Upcoming fieldwork:

We plan to conduct additional field work this fall, including utility investigations and groundwater tests. We'll update the project website, send text and email updates, and distribute fliers to near neighbors in advance of all fieldwork activities.

#### About the project:

King County needs to upgrade about 4.5 miles of sewer line between NE 85th Street and the Idylwood neighborhood to meet the needs of the growing Redmond and Bellevue communities as the existing sewer line nears the end of its service life. Construction for the pipeline is scheduled to begin in 2020.
