

October 9, 2017

Expect increased noise and activity in Luke McRedmond Landing starting as early as Oct. 16

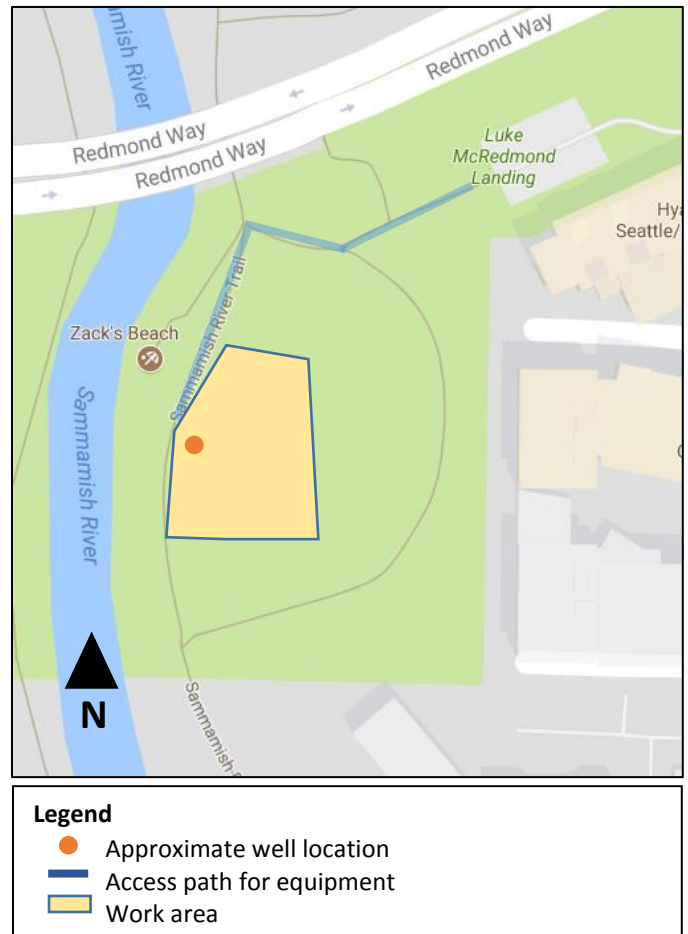

Starting as early as October 16, crews working for King County's Lake Hills and NW Lake Sammamish Sewer Upgrade Project will install a well in Luke McRedmond Landing. The well will be used to conduct a groundwater test during the week of Oct. 23. The results of the groundwater test will help the design team to better understand groundwater conditions where the sewer pipe will be installed.

Installation of the well and groundwater testing will take up to two weeks to complete. **The work area will be sectioned off for safety while work is underway, but the park and Sammamish River Trail will remain open.** Once testing is complete, the work area will be restored and the one-foot-wide well will be capped. The well will remain in place until project completion.

Location: Crews will drill one well in Luke McRedmond Landing, just south of Redmond Way. *See map to the right for more information.*

What you can expect October 16 - 20:

- Work hours 7 a.m. to 7 p.m. daily, weekdays only
- A tall cable drill rig will be used to install the well and will be stored on site overnight
- Increased noise when the drill rig is in use
- Luke McRedmond Landing and the Sammamish River Trail will remain open
- Cones and signage will be in place to safely separate the work zone from the rest of the park

King County

Lake Hills and NW Lake Sammamish Sewer Upgrade Project

What you can expect during the week of October 23 - 27:

- Groundwater testing will take three days to complete
- **A small generator and pump will run continuously during testing (day and night)**
- Two crew members will be on site at all times to monitor the pump
- Water will be pumped to a storage tank on site during testing and safely discharged into the sewer
- Temporary lighting will be used at night. Lights will be pointed away from residential areas
- Site restoration and removal of equipment will take place between 7 a.m. and 7 p.m. daily, weekdays only
- Luke McRedmond Landing and the Sammamish River Trail will remain open
- Cones and signage will be in place to safely separate the work zone from the rest of the park

Crews will use a cable tool drill rig to install the well and perform testing.

About the project:

King County needs to upgrade about 4.5 miles of sewer line between NE 85th Street and the Idylwood neighborhood to meet the needs of the growing Redmond and Bellevue communities as the existing sewer line nears the end of its service life. Construction for the pipeline is scheduled to begin in 2020.

Crews will use a tank to store groundwater during testing before discharging back into the sewer.
