NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

August 2023

Preparation activities for final repaving on residential streets will begin as early as August 28.

Grinding and permanent paving starting as early as September 5.

Expect a single lane alternating traffic and driveway impacts on Southeast 22nd Street, 78th Avenue Southeast, and Southeast 24th Street:

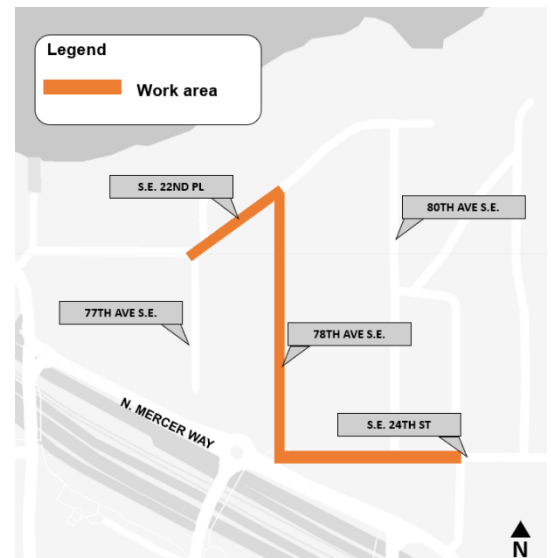

Crews plan to begin paving activities described below on S.E. 22nd St. at the intersection with 77th Avenue Southeast. Paving activities will then move onto 78th Ave S.E., and S.E. 24th St. This plan is tentative and may change based on site conditions. **Please drive slowly and pay attention to signage and flaggers.**

Starting as early as August 28, crews will begin preparing the roadway in areas where pipe was installed for final repaving.

Starting as early as September 5, crews will begin grinding the pavement to create a flat surface for repaving. Grinding will take approximately two days. **During this time, the roadway will be rough and unfinished. Please drive slowly!**

Starting as early as September 7, crews will begin paving the road in areas where pipe was installed. Permanent paving will take approximately two days.

Following repaving, work will continue for approximately two more weeks in this area. During this time, expect to see flaggers directing single lane, alternating traffic. This work includes work on utilities, cleaning up the roadway, removing construction materials, and installing landscaping.

Map of permanent paving work area.

Paving restores the road for safe passage after construction.

Permanent pavement needs a few hours to cure. **During paving, crews may need to close the road and re-direct traffic around the area. During this time, driveways will be temporarily inaccessible while the pavement is curing. We expect driveways to be closed for about three to four hours while pavement is curing.**

If you are planning to leave your home during permitted hours from 7 a.m. to 7 p.m. September 7 and 8, consider parking at the Mercer Island Park and Ride. If you have access concerns, please contact the Community Services team at 425-305-3578 or NMEsewer@kingcounty.gov.

Driveway apron restoration:

During design, our project team determined that some driveway aprons (the segment of driveway that connects to the street or sidewalk) along the east side of 78th Ave S.E. would need to be restored prior to repaving. Driveway aprons that are being restored are located in the area where our contractor excavated and installed the new sewer pipe. Crews will restore all driveway aprons on the side of the road where sewer pipe was excavated.

What to expect:

- Typical work hours are 7 a.m. to 7 p.m. Monday to Friday and 9 a.m. to 6 p.m. on Saturday for the duration of this work.*
- There is no planned overnight work for permanent repaving in this area.
- Nearby residents can expect noise, dust and vibrations typical of construction sites.
 - Grinding will create additional noise and vibrations.
- All work will be in the public right-of-way.
- Crews will place no parking signs on both sides of the roadway for the duration of this work.
- Flaggers and single-lane alternating traffic during work hours.
- Emergency vehicle access will be maintained.
- There will be parking restrictions on both sides of the roadway.
- School buses will be detoured on 80th around the work area onto 80th and 81st Avenues Southeast.
- Garbage, recycling, composting, and mail service should be maintained.
 - If services are interrupted, please call the project hotline at 425-305-3587. Nearby residents can expect noise, dust and vibrations typical of construction sites.

*Construction schedules can change based on factors such as site conditions, weather, and crew/material availability. We will notify you in advance of any major changes to the planned schedule.
