

NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

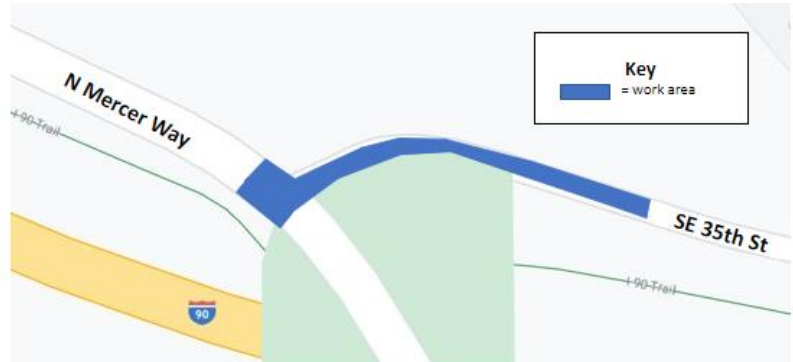

May 2023

Work begins at North Mercer Way and Southeast 35th Street as early as May 31

There will be one lane of alternating traffic through the intersection:

As early as May 31st, we will begin installing a new sewer pipe and maintenance holes in the intersection of North Mercer Way and Southeast 35th Street. These pipes will connect to the pipes we have installed on the I-90 trail.

Flaggers will direct one lane of alternating traffic on North Mercer Way and S.E. 35th St during permitted working hours. After permitted work hours, access to both lanes will be restored.

Map of work area

Planned construction activities:

We will begin installing pipe in the intersection this week. We are using a construction technique called “open cut” for this work. During open cut construction, crews dig from the surface to the pipe depth. Then they lay the pipe, cover it, and restore the surface.

What to expect:

- Permitted work hours are 7 a.m. to 7 p.m. Monday to Friday and 9 a.m. to 6 p.m. on Saturday.
- Flaggers will direct traffic during work hours. After work hours regular access will be restored.
- There will be noise, dust, and vibrations typical of an active construction project.
- Emergency vehicle access and pedestrian access will be maintained.

Crews install pipe deep underground via "open cut" construction.
