

NORTH MERCER ISLAND/ENATAI Sewer Upgrade Project

Survey work on Mercer Island January 8-12 Expect delays along North Mercer Way

King County Wastewater Treatment Division is continuing field investigations to inform design of a sewer upgrade project in Mercer Island and Bellevue. In December, crews completed potholes to locate underground utilities including gas, sewer, power, water and telecommunication lines. Now, crews will return to pothole locations to conduct survey work. This work will confirm the horizontal and vertical location of specific utilities along the alignment.

See map on reverse for exact survey locations.

What you can expect

- Flaggers will direct vehicle and pedestrian traffic around the work site, as necessary.
- Bike path access will be maintained.
- Work hours 7:30 a.m. to 3:30 p.m. Monday to Friday.
- Each location will take approximately one hour to complete.
- All work is expected to be complete by January 12, depending on field conditions.
- Survey crews will use a tripod and handheld survey equipment at each location.

Crews will use total stations and other handheld equipment to take survey readings.

Please watch for equipment and signs in the area, travel slowly to stay safe, and follow direction from flaggers.
