

Hello,

King County Wastewater Treatment Division (WTD) is contacting you as a neighbor of the Sammamish Plateau Diversion Project. The team is preparing for field work in the project area this summer, which will likely require temporary single-lane closures along East Lake Sammamish Parkway Northeast near your home.

You may also experience turn lane closures and lane shifts by your home. During this work, geologists/geotechnical engineers will be drilling to sample soil and install groundwater monitoring wells along East Lake Sammamish Parkway Northeast to better understand the soil and groundwater conditions under the surface of the road.

We will update the community when permits are issued and details are confirmed.

Stay Updated!

Exact dates and closure locations have not yet been confirmed for this work. To stay updated, visit our website and sign up for email updates and text notifications:

What To Expect

A map of the general work area is located on page 2. During this work, you can expect:

- Lane reductions in the work area
- Message signs on East Lake Sammamish Parkway Northeast with advance notice
- Flaggers to direct drivers travel through the area
- Local and emergency access to homes
- Noise, dust, and vibrations typical of a construction site at the drilling site
- Geotechnical drilling equipment in the work area

About the Sammamish Plateau Diversion Project

For over 50 years, King County Wastewater Treatment Division (WTD) has protected public health and the environment by collecting and cleaning wastewater for the Puget Sound region. Operating a regional system allows flexibility to adapt our service to meet community needs as our region grows. Now, WTD is working on a program to send more wastewater flows in the future from the growing Eastside to Brightwater Treatment Plant in Woodinville. The Sammamish Plateau Diversion Project will help make that happen.

Location of work activities

We anticipate that crews will temporarily close a single lane or turn lane along East Lake Sammamish Parkway Northeast near your home. This map shows the approximate closure and drilling locations.

Contact Us

If you have questions or concerns, or would like to discuss the project, contact Monica Van der Vieren at monica.vandervieren@kingcounty.gov or 206-477-5502. Visit the project website to sign up for email updates at: kingcounty.gov/SammamishPlateauDiversion
