

WASTEWATER BACKUP PROTECTION FOR SOUTH PARK

King County

Protecting Our Waters

We share your concern about sewer backups!

King County Wastewater Treatment Division is looking ahead, thinking about climate change, and working on short-term and long term solutions to reduce the risk of wastewater backups in South Park.

Here's what we've done so far:

- ▶ Homes that have reported sewer backups in the past now have protective equipment installed.
- ▶ We've made changes to our system to reduce the risk of backups.

If you have had a sewer backup in your house and do not have a protective device, please let us know.

To learn more, visit: kingcounty.gov/wtdsouthpark.

Here's what we're doing:

- ▶ We're looking at how to adapt our system to protect South Park from future sewer backups as high tides and storms get bigger.
- ▶ We are staying coordinated with Seattle Public Utilities (SPU) as we plan.
- ▶ We are listening and would like to join community meetings and events to hear your hopes and concerns.

Sometimes unexpected things happen. If you are experiencing a flood or sewer backup, please call the SPU 24/7 Operations Response Center at (206) 386-1800. SPU will coordinate with King County WTD on wastewater issues. **For emergencies, always call 9-1-1.**
