

Dear community members,

Thank you for taking King County's recent [Thornton Creek Basin Sewer Study and Upgrade Project](#) survey that was sent to you in early September. We appreciate you taking the time to share your feedback, which is helping us to determine where we can make investments to improve the King County regional sewer system and reduce overflows.

Project next steps:

- In-person sewer inspections are now underway and will continue into early 2022. The work includes inspecting maintenance holes and examining sewer main pipes in public rights of way.

Sign up for project updates:

- Do you want to stay in the know about this project? If you haven't done so, please sign up to receive our email updates on our [project website](#) and click "Sign up here." You can opt out from these emails at any time.

We appreciate your help as we all work together towards a clean water future.

Sincerely,

Bibiana Ocheke-Ameh
