

**December 12, 2023**

**Help shape art at the West Duwamish Wet Weather Storage Facility project by responding to this survey before January 26, 2024.**

Help shape the facility's public appearance by sharing your perspectives about the Duwamish River valley! Fencing designed by Seattle artist [Ann Marie Schneider](#) will ring the new facility. Input from the community will be incorporated into the fence panels art. **We would love to learn** how you see this dynamic river valley landscape can be integrated into the facility fencing appearance to reflect our commitment to stewardship in concert with the resiliency of our river.

Please share your input by using this [SURVEY LINK](#).

Thanks in advance for taking a few minutes to share your views for the fencing panel art.
