

Soil sampling on Alpha Hill planned for April 10

Trail users in the South Trails Area may see King County's contractor collecting soil samples on Alpha Hill on Wednesday, April 10. King County is gathering information for a project that will improve water quality in nearby salmon-bearing streams. The purpose of this soil sampling work is to help the project team understand the soil characteristics on the hillside.

What trail users may expect:

- Work will take place on April 10 for approximately three hours.
- People will use hand tools to collect soil samples on Alpha Hill (area shown on the map).
- No trail disruption is expected from this soil sampling work.
