

# Don't miss out on what you love.

## Get vaccinated against fall & winter viruses!

COVID continues to change. That's why everyone 6 months and older needs an **updated COVID-19 vaccine this fall.** Protect against serious illness and long COVID.

Are you age 60 and older or 32-36 weeks pregnant? Talk to your doctor or a pharmacist to find out if you need an **RSV vaccine.**

A **flu shot** protects you during the flu season, which can last through spring. Recommended for everyone 6 months and older, every year.
