**Health Advisory: Measles case associated with international travel
in a King County infant, April 22, 2025**

Actions Requested

Be aware of a new confirmed measles case in an infant who traveled internationally.

- Secondary cases would most likely occur between **April 22 – May 11, 2025**
- **MMR vaccination remains the most important tool for preventing measles infections and spread from imported cases**
- Refer to [Measles Guidance for Healthcare Providers](#) for more details on immediate isolation, notification, testing, and management of patients with suspected measles.
- Refer to the [4/17/2025 Health Advisory](#) for previous measles case and exposure locations

Background

Public Health is investigating a case of measles in an infant with exposure during international travel. This is the 5th case of measles in a Washington resident in 2025, three of which have been infants. The infant was at the following locations during their infectious period:

Date	Time	Location
