Choosing a Septic System Professional

Hiring the right septic professional is essential to ensure your system functions properly and meets all county requirements. We recommend obtaining at least three bids and thoroughly evaluating your options. We also recommend being present during inspections and work on your septic system. This helps you better understand your system and ensures the work is completed as expected. Use these questions to help ensure you are making an informed decision about who to hire for your septic system needs.

General Questions for All Service Providers

- **How long is the bid valid, and what does it include?**
 - Does the cost include King County fees?
- **Does the price include uncovering the septic tank lid(s)?**
 - If not, how much is charged per tank lid?
- **What is your estimated schedule for completing the work?**
- **Do you assist with filing a Notice on Title if required?** *Note: A Notice on Title is a document acknowledging that the property is served by a septic system and the owner is responsible for its maintenance.*
- **Do you guarantee your work?**
 - What is the warranty period?
 - Will you perform follow-up repairs if issues arise?
- **What is your typical response time for phone calls and emails?**
- **Do you offer any discounts (e.g., for seniors or first-time customers)?**

Additional Questions for Installers

- What is the full cost of the installation?
- Does the price include:
 - Electrical work?
 - King County fees?
 - Final inspection?

- Backfill labor and materials?
- The as-built package?
- Filling the tanks with water post-installation?

- Do you prioritize scheduling weather-sensitive system installations?

Additional Questions for Maintainers

- What does the OSM inspection include? *For example: checking baffles, identifying leaks, cleaning filters, assessing structural integrity and drainfield function?*
- When will the inspection report be available in OnlineRME?
- If repairs are required:
 - Can your company perform them?
 - Do you handle electrical repairs or work with an electrician?

Additional Questions for Pumpers

- If the tank is over 1,000 gallons, is there an additional fee?
- When will the pumping report be entered in OnlineRME?
- Does the cost include inspecting and cleaning inlet and outlet baffles?
- Is there an extra charge if the tank has an unusual amount of scum or sludge (requiring more water or time)?
