

OSS TAC MEETING

Location: Virtual Zoom

Date: April 23, 2024

Time: 9am-10:30am

Purpose: Share language shift. Review code revisions.

Agenda

9:00- 9:10 am

- Welcome & Check in (in chat)
- Where we are in the work plan
- Website is LIVE
- Please reach out to schedule a 1-on-1

9:10- 9:20

- Change in language & approach
- Thoughts? How will this fit in your community?

9:20-9:30 - Topic chosen by TAC - what do you need to discuss?

9:30- 9:45 am (Kelly)

Code Review 1

Summary of change	Reason for change	Code section
Keep existing requirements for nitrogen reduction instead of using alternative approach in revised WAC Table XII	Currently Title 13 references KCC 21A and is very protective of groundwater quality. WAC Table XII is very complex, and we anticipate having issues with implementing it. Refer to KCC 21A24.510 Septic system design and critical area designation. KCC21A.24.510(13a) Critical aquifer recharge areas; apply development standards county wide, more restrictive than WAC Table XII	13.24

9:45-10:00 am (Harry)

Code Review 2

Summary of change	Reason for change	Code section
Clarify requirements for quality and clarity of record drawings	Quality of record drawings submitted is inconsistent, some do not meet the intent of having a clear record of OSS location and design. May be able to address with a memo/design guidance	13.56

10:00 - 10:25

Share out from County staff on where they are with language, codes, outreach & next steps.

- Checking back on past codes, updates
- Staff outreach plans

10:25-10:30 am

- Public comment (or debrief)

Next meetings:

May 28, 2024, from 9:00am-10:30am

Thank you!
