Premium Assistance Program

Public Health
Seattle & King County

Access & Outreach
Inclusive. Responsive. Equitable.

About the Program

This program is intended to improve access to care by helping eligible King County residents lower the cost of insurance purchased through WaHealthPlanFinder.org. Funding for this program is provided by the Department of Community & Human Services (DCHS) and is administered by the Community Health Access Program (CHAP) at Public Health Seattle & King County.

Must Meet the Following Eligibility Criteria

- King County Resident
- Ineligible for Advanced Premium Tax Credits and Apple Health
- Not be a sponsored immigrant
- Have Gross Monthly Income below 100% of the Federal Poverty Level (see table below)

Total People in Household	1	2	3	4	5	6
Gross Monthly Income	$1,304	$1,762	$2,220	$2,679	$3,137	$3,595

How it Works

Funding is limited and enrollment is on a first-come, first-served basis. Clients must work directly with a certified Health Insurance Navigator employed by Public Health to review their information. The navigator will determine eligibility. If eligible, client will need to choose a Cascade Care Plan with one of the following health insurance companies: Ambetter, Community Health Plan of WA, or Molina. A Cascade Care Plan provides more coverage outside the deductible. Eligibility does not guarantee enrollment as the program may run out of funds. Enrolled clients will have their premiums paid by Public Health. Clients must agree to complete short surveys on their health and experience using their insurance to help Public Health identify and address barriers to health care services.
