

Regional Crisis Response

RLSJC Presentation
Chief Kelly Park

Combining Efforts between the Deputy and MHP

What is Co-Response?

- The Co-Responder model is a partnership between LE and MHP (Navigator)
- A Navigator is a licensed Mental Health Professional that rides with LE to calls for service.
- A Navigator also provides follow-up to earlier crisis calls for service referrals

What is Co-Response?

- Crisis calls have historically ended in one of two ways... the hospital or jail
- This leads to a “quick fix” in the moment but often results in the “revolving door”
- Our system is not broken, but there is room for improvement through better partnership

What is Co-Response?

- The First Co-Responder model was established in 1964... so this is not a new concept.
- Partnership between MHP and LE
- Results in long term solutions
- Benefits us and the community

RADAR City of Shoreline

RADAR, established by Shoreline Police department in 2016, was an effort by local LE to address the rights and needs of individuals with behavioral health issues and/or developmental disabilities.

Response Awareness De-escalation And Referral

RADAR City of Shoreline

The **unique inter-jurisdictional nature** of the RADAR program recognized that people often move throughout a region, and capitalizes on economies of scale in staffing and administration.

The Five RADAR Agencies

RADAR is a regional approach serving 5 Police Departments in North King County

RADAR to Regional Crisis Response (RCR)

Original grant funding:

- DOJ
- WASPC Initiative for Smart Policing
- MIDD (\$780,000 for 2021-2022)
- WASPC (\$75,000)
- Participating Municipalities

RADAR

Goals and Successes of RADAR...

- **Decrease** uses of force on BH/DD calls *(This was backed by early analysis by George Mason University)*
- **Increase** officer safety on BH/DD calls (Response Plans)
- **Decrease** repeat 911 calls
- **Decrease** the inappropriate use of 911
- **Connection** to services through the MHP (Navigator)
- **Reduction** with the “revolving door”

- *“This is not the normal patrol culture of touch it once, clear the call on CAD, and move on! This requires multiple touches.”*

RADAR

Response Plans...

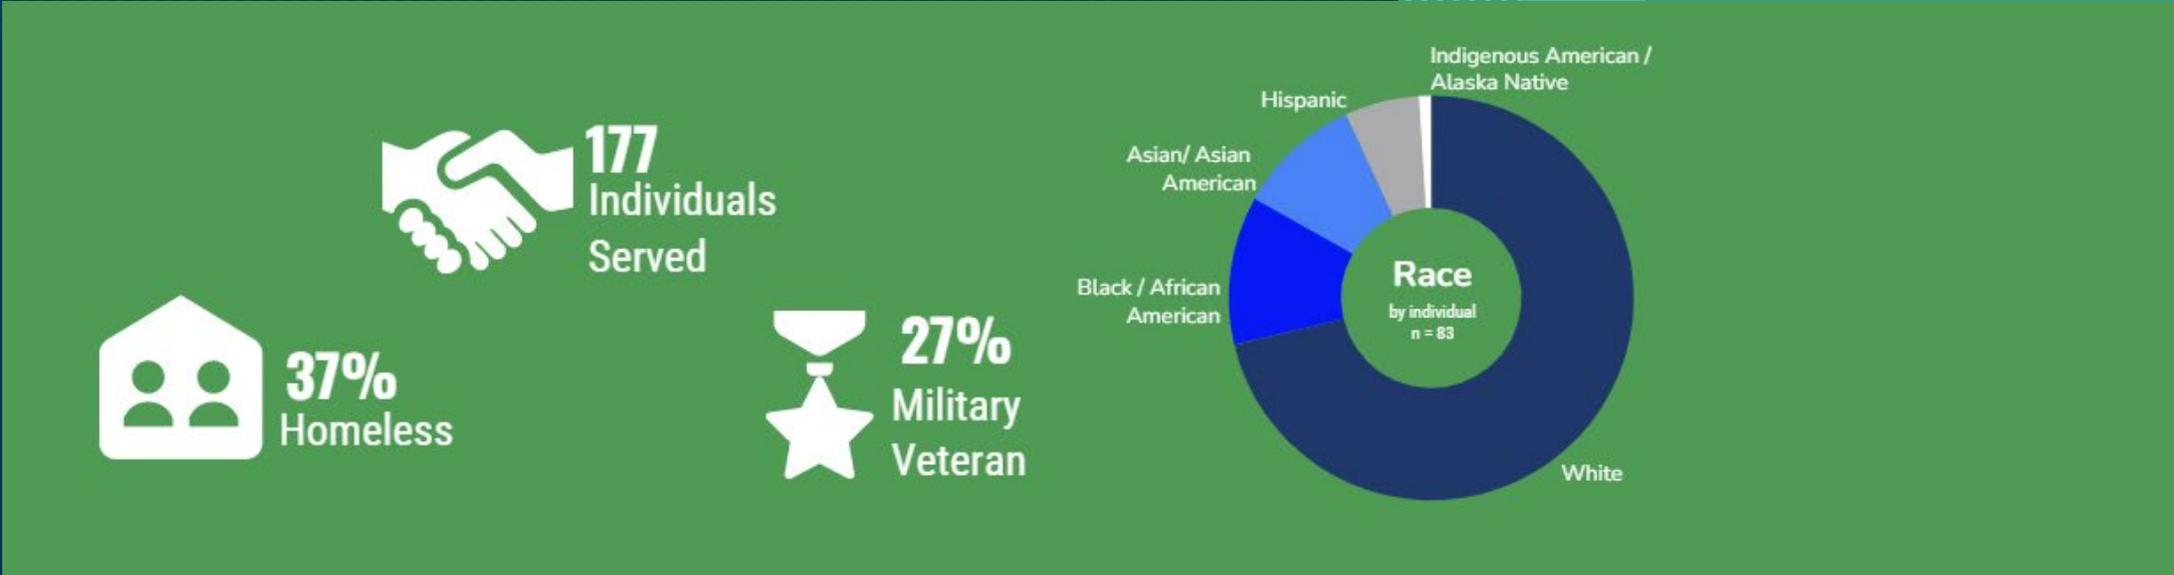

- Documentation of BEHAVIORS, not HIPPA
 - Hooks
 - Triggers
 - NO diagnosis
 - NO medications
- CAD ACCESS
 - This is a “work in progress”
 - Shoreline/Kenmore are the closest
 - PW = address only
 - Hyperlink attached
 - RADAR access needed
 - Bothell is getting there
 - Technology is there
 - Would link to the person, not just the address

The image shows a document titled "RADAR: Response Plan". It contains several fields for data entry, including "Subject Name", "Address", "RADAR: Response Plan", "All Other Applicable Organizations", "Responsible for Address", "Notes", "Comments", and "RADAR: Response Plan".

Success in Shoreline! 2022

emergency department visits down
✓ **4%**

adult jail bookings down
✓ **67%**

behavioral health crisis events down
✓ **60%**

14% started behavioral health services
