TODAY'S AGENDA

10:05 am **Welcome & Introductions**

10:15 am **Opening Remarks**

10:25 am **Recap of October 2021 Meeting**

10:30 am **Technology Awards**

10:45 am **#Let'sCreateTheFuture...TOGETHER**

11:05 am **SAC Members Advice and Q&A**

11:50 am **Final Comments**

12:00 pm **SAC Virtual Social**

OPENING REMARKS

Dwight Dively | Chief Operating Officer

PRIORITIES

- SAC members appreciation and thank you
- Welcome New Members
- Plan for the future: Lead with 2023-24 policy priorities and investments
 - More equitable and racially just King County
 - Environment: Strategic Climate Action / Clean Water, Healthy Habitat
 - Cost Management through innovation & leveraging our collective, and constrained resources
- The financial situation is murky given uncertainty about the war, inflation, COVID, and labor contracts
- Federal and state infrastructure funds may be of great value to the County, including to expand broadband access
- Technology can greatly help us to advance these priorities

OPENING REMARKS

Claudia Balducci | King County Council Chair

OCTOBER 2021 MEETING

Zlata Kauzlaric | IT Governance Manager

October 15, 2021 SAC Meeting

2021 Update

FUTURE READY IT PLAN

The county's business leaders provided their video messages describing how IT is helping them be responsive to changing customer and employee needs.

SAC ADVICE:

What is Possible? What business service improvements should we consider in the near term?

**Connected
Communities**

**Connected
Data**

**Connected
Government**

Looking Forward

FUTURE OF WORK IS NOW

The County's technology experts provided their video messages about the technologies and service delivery improvements that are helping us in this mission.

SAC ADVICE:

What other technologies should the County consider investing in to continue delivering great experiences, while improving equity and inclusion?

**Making Valuable
Investments**

**Delivering Great
Experiences**

**Transforming
Our Delivery**

**With Equity and
Inclusion For All**

TECHNOLOGY AWARDS

Award Nominated Projects

Adult and Juvenile Detention

- Jail Management System

Judicial Administration

- Digital Protection Order Office

Community and Human Services

- Integrated Managed Care

Community and Human Services/Public Health

- Data Integration
- Mass Vaccine Management
- COVID-19 Response: Dashboards and PPE Distribution

Executive Services

- Procurement Modernization
- PeopleSoft Migration to Cloud Infrastructure

Human Resources

- Digital Human Resources

Executive Services, King County Information Technology

- Technology Recycling

King County Superior Court

- Courtroom Video System

Metro

- Transit Business Intelligence Resource Data (TBIRD)
- Transit Operator Comfort Stations
- Transit Operators Automated Sign-In

King County Information Technology

- Puget Sound Emergency Radio Network
- High Volume Data – Scientists/Engineers Working from Home
- Digital Equity through Affordable Internet
- Enterprise Data Catalog

**#Let'sCreateTheFuture
TOGETHER**

“

We are now faced with the fact that tomorrow is today. We are confronted with the **fierce urgency of now**. In this unfolding conundrum of life and history, there is such a thing as being too late. This is no time for apathy or complacency. This is a time for vigorous and positive action.

Martin Luther King Jr.

BEYOND WHAT'S NEXT

Create Anywhere • Connect Everywhere • Reach Beyond

COVID RESPONSE & RECOVERY

PUBLIC SAFETY

HOMELESSNESS & AFFORDABLE HOUSING

RACIAL JUSTICE

A vibrant, sun-dappled forest scene. In the foreground, a small stream flows over mossy rocks, creating white rapids. A large, moss-covered fallen log lies across the left side of the frame. In the background, a wooden bridge with railings spans a small gap in the forest. The trees are tall and slender, with sunlight filtering through the dense canopy, creating a warm, golden glow. The overall atmosphere is serene and natural.

CLIMATE ACTION & SUSTAINABILITY

REGIONAL MOBILITY

Create Anywhere

Powerful technology solutions that help us overcome barriers enable our business partners to innovate quickly

- Modern workplace solutions
- Transforming communications
- Reliable, scalable, modern applications
- High powered computing resources

- Leading through change

Open Mic SAC Members Discussion

What have you found successful in leading your organization through enormous change these last couple of years?

SAC MEMBERS ADVICE

DIGITAL EQUITY

Wade Powell | AWS, Principal Account Manager,
Sr. Sales Manager Higher Ed

What is Digital Equity?

“A condition in which all individuals and communities have the information technology capacity needed for full participation in our society, democracy, and economy.”

Digital equity is typically used when referring to education, but it's relevant in any industry or community where tech, and specifically internet access, is essential for success.

*National Digital Inclusion Alliance (NDIA)

What does digital equity look like?

The NDIA explains that the mission of digital or internet inclusion incorporates five elements of Information and Communication Technologies (ICTs). Everyone needs access to these elements to be truly included in an equitable digital society:

1. Affordable, robust broadband internet service
2. Internet-enabled devices that meet the needs of the user
3. Access to digital literacy training
4. Quality technical support
5. Applications and online content designed to enable and encourage self-sufficiency, participation and collaboration.

King County

The County has done great work on starting to build-out its Digital Equity

Digital Equity Through Affordable Internet

- 27,000 households enrolled in program to provide up to \$50/mo toward internet

Planning for Eastrail Fiber Infrastructure

- A 28-mile area including Woodinville, Kirkland, Redmond, Bellevue, Renton, and unincorporated parts of King County

What Are Others Doing?

Harris County, TX

- \$30M award – through Federal Communications Commission (FCC) Emergency Connectivity Fund (ECF)
- T-Mobile and Google are providing 15,000 Chromebooks and 40,000 hotspots
- Worked through the Library system to fund and provide the devices

Sacramento, CA – Unified School District

- Private wireless (5G/LTE) network
- Provided >90 Mbps down, 4.5 Mbps up
- 1200 students in pilot <\$3/student/mo

What Are Others Doing?

Nonprofit EducationSuperHighway leverage FCC grants to deploy free WiFi networks in low-income apartment building

- Working in Oakland CA to deploy free WiFi in 127 buildings using city's WiFi network

Dallas County, TX and Dallas Independent School District

- Deploying Private LTE/5G
- 10 Mobile towers in schools to date, and recent approval of \$18M to expand

Challenges and Roadblocks

- Cross Jurisdiction issues
 - County, City, Schools, non-profits etc.
 - Who will fund, own, maintain
- Funding and Budgets remain an issue, but resources are out there
 - FCC ECF has committed 4.7B to date.
\$2.5B remains budgeted

What's Next in this Space?

- Continued deployment of private LTE/5G networks over the shared spectrum space – most cost effective way to expand internet coverage
- Creating a Technology Pipeline
- E2W (Education to Workforce) initiatives
 - AWS Academy – Providing Higher Ed institutions with curriculum for tech focused jobs
 - ASU (Arizona State University) Smart City Cloud Innovation Center
 - AWS Skill Center – open to the public free technology training center

How does King County Prepare for the Future?

- Press forward on piloting various connectivity options including Private LTE/5G network
- Continue to press on Private organizations to partner through investments in the community
- If not in place, create a tactical team to aggressively seek grant dollars toward these efforts

Q & A

Q & A

CONNECTED COMMUNITIES

THE COUNTY'S POSITION

Gretchen Peri | Slalom, Senior Director

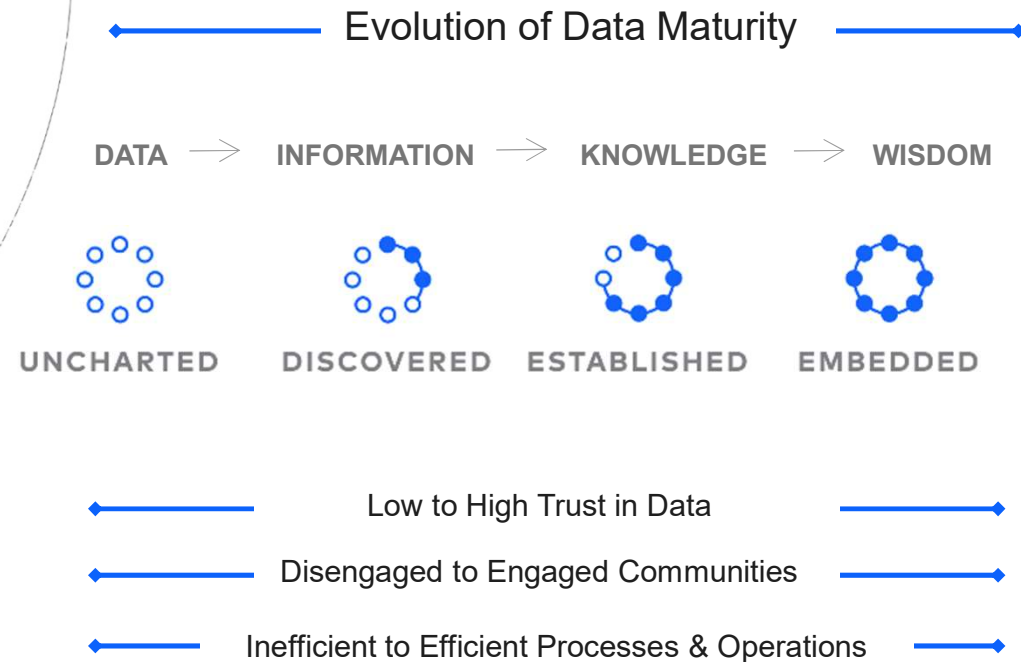

slalom

Connected Data

Builds & Shares
Wisdom

Connected data requires us to mature our data capabilities, and grow a culture where data leads to wisdom.

Improved Outcomes

Removing bias from
justice and public
safety systems

Reducing homelessness
through systemwide,
holistic care

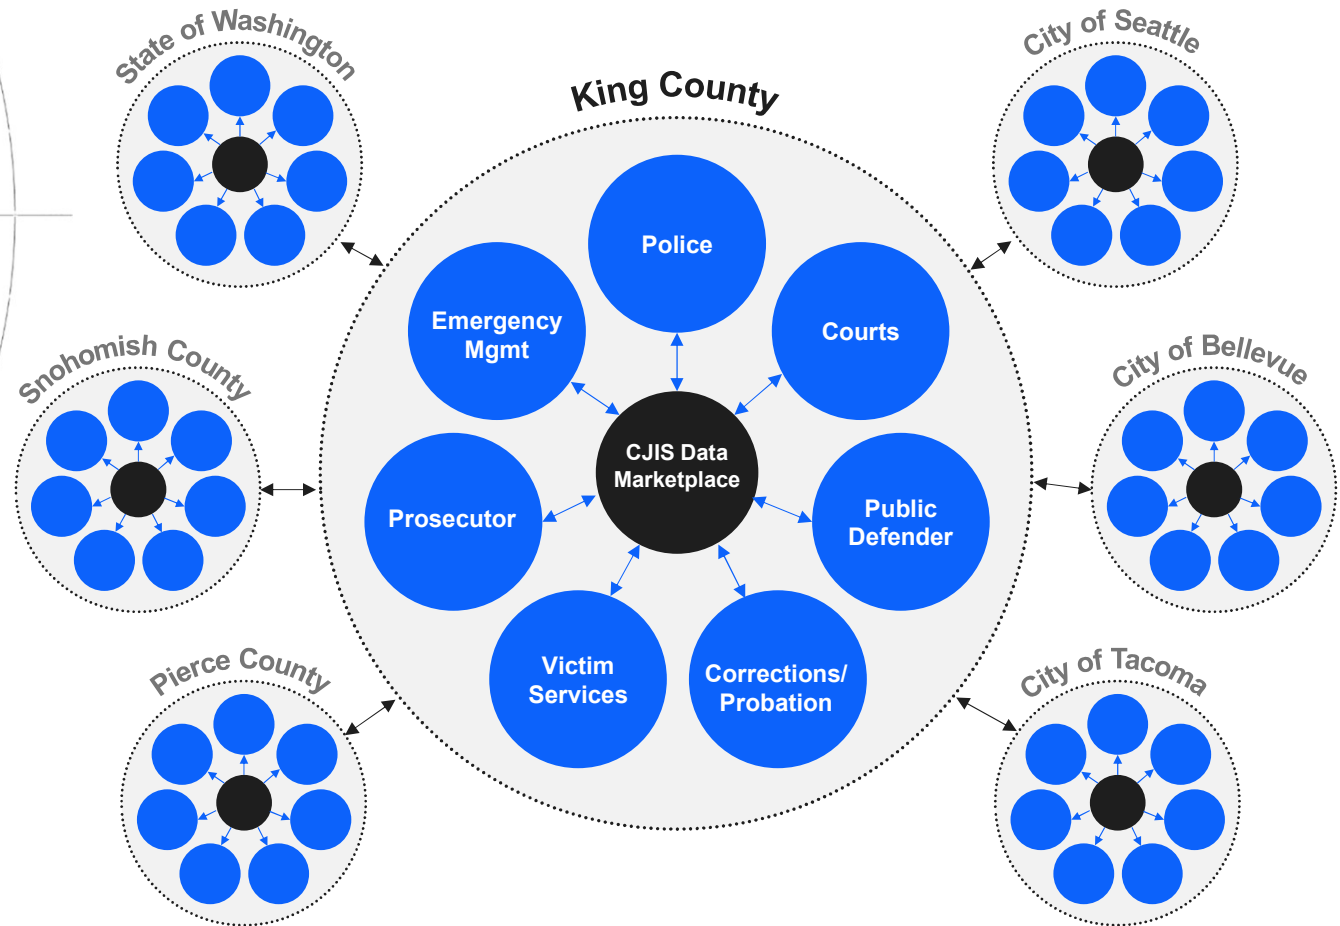

Addressing the
community's current
and evolving needs

Connected Government

Transforms &
Modernizes
Service Delivery

Imagine an integrated justice system that delivers the right information to the right people at the right time... to achieve the right outcomes.

slalom

Connected Communities

Enables Resilient,
Equitable, &
Sustainable Places
to Live and Work

‘Connected Community’ Examples

01 Creating police transparency and trust with data

The Oakland Police Department, which has been under federal oversight for 17 years, moved their data into a cloud “data hub” and built public-facing dashboards to transparently visualize police activity—stops, uses of force, and complaints—combined with early intervention data, thereby increasing citizens’ trust in policing.

» [Link to Case Study and Agency Website](#)

02 Growing the future workforce via cross-sector collaboration

Private, public, and nonprofit organizations came together to identify workforce gaps and build partnerships that address a regional talent supply shortage with local data centers, invest in workforce development programs, and promote inclusive economic growth and talent sources.

» [Link to Case Study](#)

03 Connecting families with services for life’s challenges

Implementing a new provider directory that connects families impacted by autism with services that help them endure life’s challenges. The platform helps case workers personalize service referrals based on specific customer needs and connects families 83% faster with critical services.

» [Link to Case Study](#)

04 Connecting data drives stronger neighborhoods

The University of Southern California (USC) Center for Social Innovation provides a platform that puts invaluable neighborhood-level data in the hands of Los Angeles community groups and policy makers and enables social justice efforts across the County.

Connected Communities

Enables Resilient, Equitable, & Sustainable Places to Live and Work

Ways King County Can Create More Connected Communities

01

Ensure all King County communities have digital connectivity and residents can access digital services

02

Identify additional barriers to digital participation and leverage technology, where possible, to remove them

03

Strengthen the workforce of today through human capital investments that help attract and retain talent

04

Help build King County's future workforce locally, through strategic community partnerships

05

Assess current service delivery models based on success meeting the community's needs and adjust for greater impact

06

Continue leading the way with customer-centric, innovative solutions that connect data and government and lead to connected communities

Q & A

Open Mic SAC Members Discussion

Where else should the County focus
as we look to build our future together?
