Online: MyBuidingPermit.com (MBP)	<ul style="list-style-type: none"> • Go to Welcome to MBP MBP • Search by your permit number and then follow the prompts to enter inspection code and other details.

Scheduling Inspections:

- You can request building, mechanical, and fire permit inspections up to five days in advance.
- To request a building or mechanical inspection for the next business day, the request must be received before 3 p.m. the business day prior.
- Occasionally, the number of requests exceeds the amount staff can perform in a given day. Staff will call you at the contact number you provide if we need to re-schedule your inspection.

 **Building inspections:** You may check [online](#) after 8 a.m. on the inspection date to confirm your inspection and get an estimated inspection arrival time (2 hour window) for your inspection. If you provide a contact phone number in your inspection request, you may also receive an automated phone message with your estimated inspection time.

 **Fire inspections:** Your inspection request is not confirmed until you receive a call from the assigned Fire Inspector. You will receive a return call in the following business days to schedule a specific date and time.

 **Critical Areas Inspections:** When a project requires inspections related to critical areas, those inspections must be scheduled with a Permitting Ecologist directly – not using the methods listed above. Read permit conditions for instructions. Please allow up to two weeks advance notice for critical areas inspections.

Ensure your construction site is fully accessible throughout your scheduled inspection day.
