<b>VIII - Finance Plan</b> .....	<b>30</b>
<b>IX - Summary of Changes to June 2024 Capital Facilities Plan</b> .....	<b>34</b>
<b>X - Appendices</b> .....	<b>35</b>

## I - Executive Summary

This Six-Year Capital Facilities Plan has been prepared by the Kent School District as the organization's capital facilities planning document, in compliance with the requirements of Washington's Growth Management Act, King County Code K.C.C. 21A.43 and Cities of Kent, Covington, Renton, Auburn, Black Diamond, Maple Valley, and SeaTac. This annual Plan update was prepared using data available in the spring of 2024 for the 2023-2024 school year. This annual update of the Plan reflects no new major capital projects.

This Plan is consistent with prior long-term capital facilities plans adopted by the Kent School District. This Plan is not intended to be the sole planning document for all the District's needs. The District may prepare interim and periodic Long-Range Capital Facilities Plans consistent with Board Policies, considering a longer or shorter period, other factors and trends in the use of facilities, and other needs of the District as may be required.

Prior Capital Facilities Plans of the Kent School District have been adopted by Metropolitan King County Council and Cities of Kent, Covington, Auburn, and Renton and included in the Capital Facilities Plan element of the Comprehensive Plans of each jurisdiction. This Plan has also been submitted to the cities of Black Diamond, Maple Valley, and SeaTac for their information and inclusion in their Comprehensive Plans.

In order for impact fees to be collected in the unincorporated areas of Kent School District, the Metropolitan King County Council must adopt this Plan and a fee- implementing ordinance for the District. For impact fees to be collected in the incorporated portions of the District, the cities of Kent, Covington, Renton and Auburn must also adopt this Plan and their own school impact fee ordinances.

This Capital Facilities Plan establishes a standard of service in order to ascertain current and future capacity. While the State Superintendent of Public Instruction establishes square footage guidelines for capacity, those guidelines do not account for local program needs in the District. The Growth Management Act, King County and City codes and ordinances authorize the District to make adjustments to the standard of service based on specific needs for students of the District.

This Plan includes the standard of service as established by Kent School District. Functional capacity is based on an average capacity and updated to reflect changes to special programs served in each building. Portables in the interim capacity calculation use the same standard of service as the permanent facilities.

The capacity of each school in the District is calculated based on the District's standard of service and the existing inventory of permanent facilities. The District's program capacity of permanent facilities reflects program changes and the state's mandated reduction of class size to meet the standard of service for Kent School District. Portables provide additional interim capacity.

Kent School District is the fifth largest (FTE basis) district in the state. Enrollment is electronically reported monthly to the Office of the Superintendent of Public Instruction ("OSPI") on Form P-223. Although funding apportionment is based on Annual Average Full Time Equivalent (AAFTE), enrollment on October 1 is a widely recognized "snapshot in time" that is used to report the District's enrollment for the year as reported to OSPI (*See Table 1*).

The District's standard of service, enrollment history and projections, and use of interim facilities are reviewed in detail in various sections of this Plan. The District plans to continue to satisfy concurrency requirements through the interim use of portables.

This Plan currently represents projects in process funded primarily by the Kent School District's 2016 Bond, as well as the 2018 Capital Levy. Additional information about these projects can be found on the District's capital projects homepage ([link](#)). Additionally, project updates sent to our community of stakeholders can be accessed on the KSD website ([link](#)).

Based on revised student generation rates, our capacity and enrollment projections, the District will stay current with non-collection of student impact fee rate for the coming year. For a short overview, see Section IX (Summary of Changes to the June 2024 Capital Facilities Plan).

<sup>1</sup> This number indicates actual births in King County 5 years prior to enrollment year as updated by Washington State Department of Health, Center for Health Statistics. Kent School District percentage based on actual Kindergarten enrollment 5 years later.								
<sup>2</sup> Enrollment reported to OSPI on Form P-223 generates basic education funding and excludes Early Childhood Special Education ("ECSE" & "B2" or Birth to 2 Preschool Inclusive Education) and excludes College-only Running Start students.								

## II - Six - Year Enrollment Projection

For capital facilities planning, enrollment growth projections are based on cohort survival and student yield from documented residential construction projected over the next six years (*See Table 2*). For this Plan, the District relied substantially on the results from Dr. Les Kendrick's study of long-range enrollment forecasts for the Kent School District in the winter of 2022.

King County live births and the District's relational percentage average were used to determine the number of kindergartners entering the system (*See Table 2*). 7.24% of 24,337 King County live births in 2018 is projected for 1,761 students expected in Kindergarten for October 1, 2023. This is a decrease of 937 live births in King County over the previous year.

Early Childhood Education students (also identified as "ECE"), "Early Childhood Special Education ("ECSE") students are forecast and reported to OSPI separately on Form P-223H for Special Education Enrollment. Capacity is reserved to serve students in the ECE programs at elementary schools.

In addition to live birth data, enrollment projections for October 1, 2024 going forward rely upon the results of the enrollment study by Dr. Kendrick, utilizing the "low growth" methodology.

Within practical limits, the District has kept abreast of proposed developments. The District will continue to track new development activity to determine impact to schools. Information on new residential developments and the completion of these proposed developments in all jurisdictions will be considered in the District's future analysis of growth projections.

The Kent School District serves eight permitting jurisdictions: unincorporated King County, the cities of Kent, Covington, Renton, and Auburn and smaller portions of the cities of SeaTac, Black Diamond, and Maple Valley.

## STUDENT GENERATION FACTOR

"Student Factor" is defined by King County code as "the number derived by a school district to describe how many students of each grade span are expected to be generated by a dwelling unit" based on district records of average actual student generated rates for developments completed within the last ten years.

Following these guidelines, the student generation rate for Kent School District is as follows:

<b>Single Family</b>	Elementary	.229
	Middle	.087
	High	<u>.113</u>
	<b>Total</b>	<b>.429</b>
<b>Multi-Family</b>	Elementary	.109
	Middle	.037
	High	<u>.054</u>
	<b>Total</b>	<b>.200</b>

The student generation factor is based on 2,062 new SFD (Single Family Detached) units built between 2017 and 2022. The student generation factor is based on 1,709 new MF (Multi-Family) units built during the same period. The multi-family units consisted of 1,379 apartment units and 330 townhome units.

The District sees an average of 43 students for every 100 single family units that are built and an average of 20 students for every 100 multi-family units that are built. The rate for apartment units is higher than for townhome units. The District sees an average of 23 students for every 100 apartment units and only 6 students for every 100 townhome units.

The student generation rate also varies among apartment developments, based on the number of bedrooms in the unit. Units with three plus bedrooms have much higher student generation rates than units that have two or fewer bedrooms. Noting these differences can help the District when planning for future growth from housing.

In preparing the 2023-2024 to 2029-2030 Capital Facilities Plan the District contracted with Educational Data Solutions, LLC led by Dr. Les Kendrick, a noted expert in demographic studies for school districts, to analyze and prepare the student generation factor.

Within the District's borders there are several income-based and multi-family housing projects coming on-line in 2023/2024. Once developed with occupancy occurring the District does recognize that the student generation for multi-family housing may impact future Capital Facilities Plan updates. At the start of the 2023-24 school year, 2 apartment complexes; Alexan Gateway and Station by Vintage have been excluded from the available multi-family units because the units have not been completed and/or have not been released to be rented.

### III - Current Kent School District "Standard of Service"

In order to determine the capacity of facilities in a school district, King County Code 21A.06.1225 references a "standard of service" that each school district must establish in order to ascertain its overall capacity. The standard of service identifies the program year, the class size, the number of classrooms, students and programs of special need, and other factors determined by the district which would best serve the student population.

This Plan includes the standard of service as established by Kent School District. The District has identified schools with significant special needs programs as "impact" schools and the standard of service targets a lower-class size at those facilities. Portables included in the capacity calculation use the same standard of service as the permanent facilities.

The standard of service defined herein will continue to evolve in the future. Kent School District is continuing a long-term strategic planning process combined with review of changes to capacity and standard of service. This process will affect various aspects of the District's standard of service and future changes will be reflected in future capital facilities plans.

#### ***Current Standards of Service for Elementary Students***

- Class size ratio for grades K - 3 is planned for an average of 23 students per class, not to exceed 26.
- Class size ratio for grades 4 - 5 is planned for an average of 27 students per class, not to exceed 29.

Some special programs require specialized classroom space and the program capacity of some of the buildings housing these programs is reduced. Some students, for example, leave their regular classroom for a short period of time to receive instruction in special programs and space must be allocated to serve these programs.

Students may also be provided with music instruction and physical education in a separate classroom or facility.

Some identified students will also be provided educational opportunities in classrooms for special programs such as those designated as follows:

Career and Technical Education (CTE) – State Program  
Closing Educational Achievement Gaps (Title I – Part A) - Federal Program  
Highly Capable Students (HiCap) - State Program

Learning Assistance Program (LAP) – State Program  
Multilingual Education (MLE) - State Program

Inclusive Education Service for Elementary and Secondary students with disabilities may be provided in a separate or self-contained classroom sometimes with a capacity of 10-15 students, depending on the program.

***Current District Standards of Service for Secondary Students***

The standards of service outlined below reflect only those programs and educational opportunities provided to secondary students which directly affect the capacity of the school buildings per the negotiated collective bargaining agreement with KEA.

- The average class size ratio for grades 6–8 is 30 students per class and 143 students per day, with a maximum daily class load/enrollment of 150 based on five class periods per day.
- The average class size ratio for grades 9-12 is 32 students per class and 153 students per day, with a maximum daily class load/enrollment of 160 based on five class periods per day.

Like Inclusive Education Programs listed above, many other secondary programs require specialized classroom space which can reduce the functional capacity of the permanent school buildings, such as technology labs, performing arts activities, a variety of career and technical education programs, and other specialized programs.

Space or Classroom Utilization

As a result of scheduling conflicts for student programs, the need for specialized rooms for certain programs, and the need for teachers to have a workspace during their planning periods, it is not possible to achieve 100% utilization of regular teaching stations at secondary schools. Based on the analysis of actual utilization of classrooms, the Kent School District has determined that the standard utilization rate is 66% for secondary schools. Functional capacity at elementary schools reflects 56% utilization at the elementary level.

## IV - Inventory and Capacity of Existing Schools

Currently, the District has permanent functional capacity to house 35,494 students and interim (portable) capacity to house 4,238. This capacity is based on the District's Standard of Service as set forth in Section III. Included in this Plan is an inventory of the District's schools by type, address and current capacity (*See Table 3*). The ratio between permanent capacity and portable capacity is 89% - 11%.

The functional capacity is periodically updated for changes in the programs, additional classrooms, and new schools. Functional capacity has been updated in this Plan to reflect program changes implemented in the fall of 2023.

Calculation of Elementary, Middle School and High School capacities are set forth in Appendices A, B, and C. Maps of existing schools are included.

For clarification, the following is a brief description of some of the non-traditional programs for students in Kent School District:

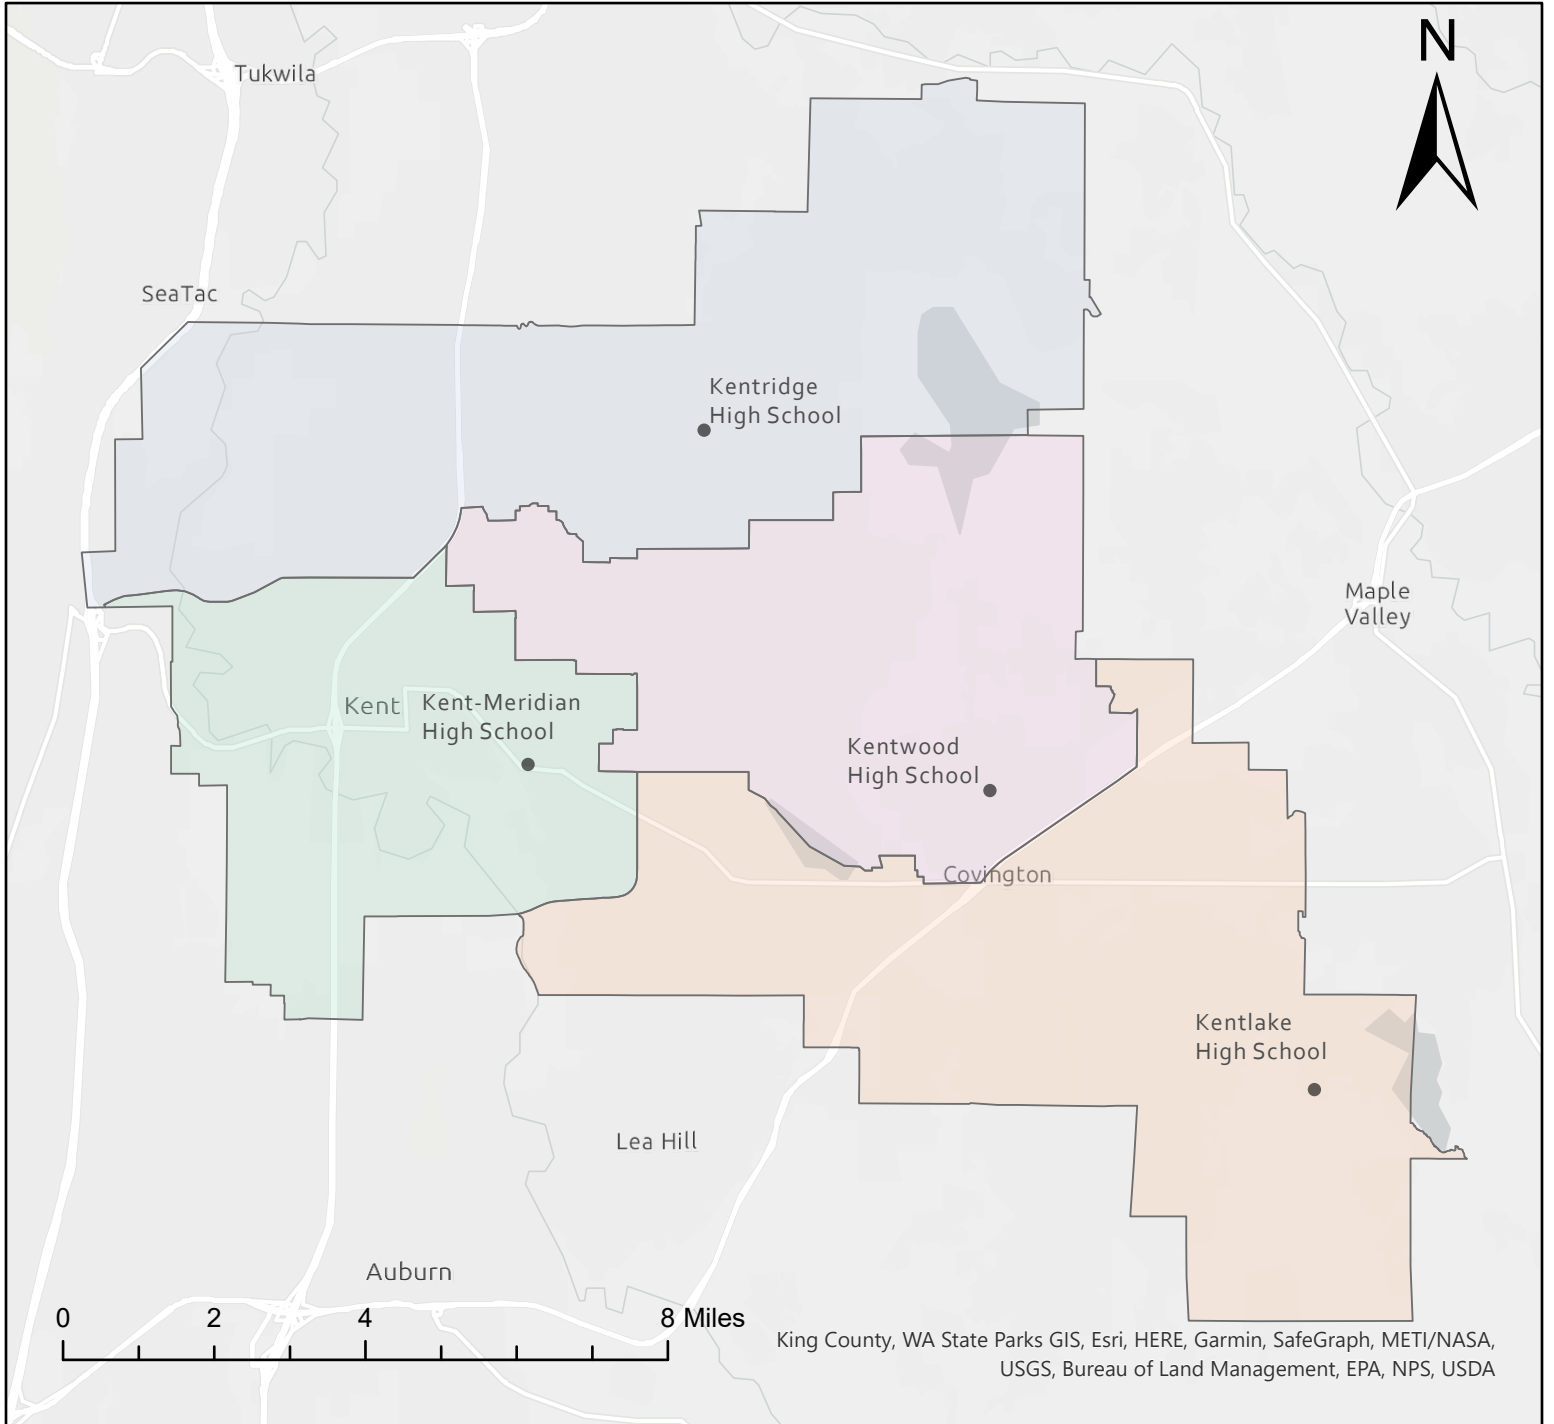

iGrad - Kent School District has developed the Individualized Graduation and Degree Program or "iGrad". iGrad is an Open Door (Drop-out Reengagement) School that offers a second plus chance to students aged 16-21 who have dropped out of high school or are at risk of not earning a high school diploma by age 21. iGrad is not included in this Capital Facilities Plan, because it is served as a leased space at the Kent Hill Plaza Shopping Center. Over the past three years, enrollment in the iGrad program has averaged over 434 students.

Kent Virtual Academy - The Kent Virtual Academy is open to grades 6-12 and is currently serving 108 students. The virtual school offers a flexible learning experience designed to engage students when and where they work best. Each school day includes a combination of live (synchronous) virtual instruction and on-demand (asynchronous) learning opportunities outside of a traditional bell schedule. Students can attend live virtual lessons with their teachers and classmates, participate in live virtual class or small group discussions, check-in or meet with teachers, watch recorded video lessons, work independently on projects and lessons, participate in learning experiences outside the school setting for credit or to meet competencies. Virtual school students may also attend their boundary school for select classes and services.

## V - Six-Year Planning and Construction Plan

In November [2016](#), the voters of the Kent School District approved a bond measure for \$252 million. This bonding authority provided for the replacement of Covington Elementary school, which opened in August of 2018, the new River Ridge Elementary school, and our new Kent Laboratory Academy, which both opened in August 2021.

As a critical component of capital facilities planning, county and city planners and decision-makers are encouraged to consider safe walking conditions for all students when reviewing applications and design plans for new roads and developments. This should include sidewalks for pedestrian safety to and from schools and bus stops, as well as bus pull-outs and turn-arounds.

Included in this Plan is an inventory of potential projects and sites identified by the District which are potentially acceptable site alternatives in the future (*See Table 4 & Sitemap*).

Voter approved bond issues have included funding for the purchase of sites for future schools and district use; the sites acquired to date are included in this Plan. Some funding is secured for the purchase of additional sites but may also be funded with impact fees as needed. Not all undeveloped properties meet current school construction requirements, and some property may be traded or sold to meet future facility needs.

The Board will continue an annual review of standards of service and those decisions will be reflected in each update of the Capital Facilities Plan.

Our District went out for a Bond Measure in April of 2023 and did not receive enough votes for approval. We reevaluated the District needs and looked at next steps to align with the Strategic Plan which continues to make it a priority to revitalize, rejuvenate and rebuild our aging schools as well as begin a process to remove interim classroom portables and find room or create permanent structures to reduce and eventually eliminate the more than 166 portable classrooms in our District. We will continue to determine capacity versus enrollment as well as programs to ensure this goal to reduce and or eliminate all portables in our District is obtained in the next several years.

As a part of the planning process, the District has been tracking a few major development projects which have affected enrollment and will continue to increase students' forecasts. On Meeker Street in Kent, we have seen several major apartment complexes, ETHOS and Midtown 64 Apartments. These continue to have an impact on enrollment as they fill up their newly built facilities. The Alexian Gateway Project is located on the corner of Military Road and Veterans Drive in Kent and has begun occupying its 283 units in 2023-2024.

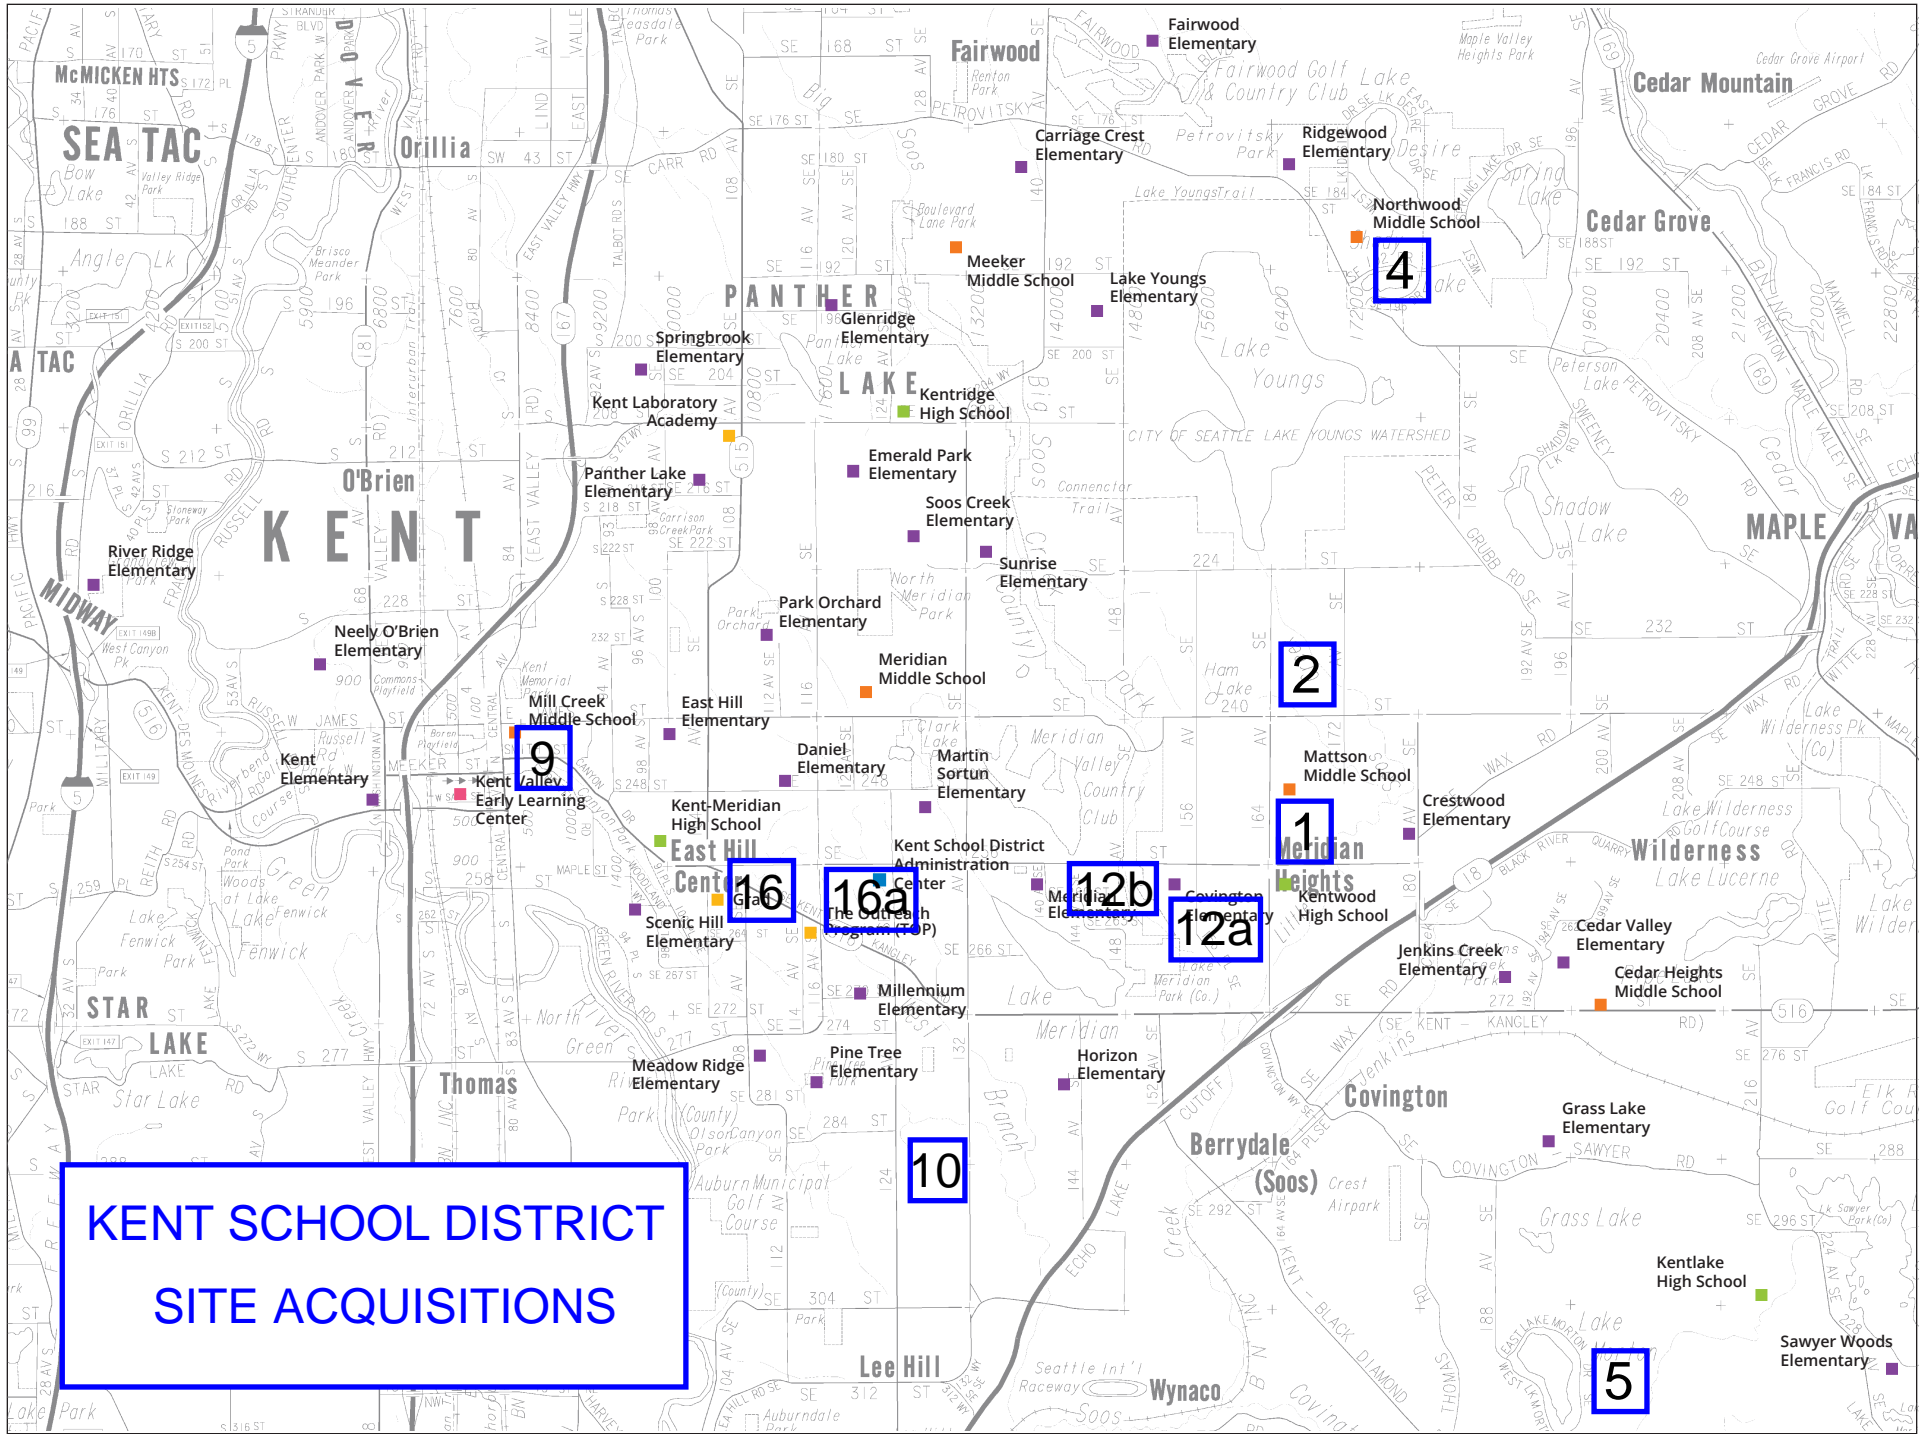

In Covington, we are tracking a multi-family house development which has been approved and construction has begun. The 1700-unit Lakepointe Urban Community will fall within our

enrollment boundary and proposed completion of Phase 4 is shown to be 2027. Construction in the Kent School District boundaries have been steadily rising over the last four years and planned communities are now being recognized through the planning teams in multiple city and county jurisdictions we serve.

## Master Development Plan

January 30, 2017  
 Updated September 15, 2021

## VI - Portable Classrooms

The Plan references use of portables as interim capacity for facilities.

Currently, the District utilizes portables to house students more than functional capacity and for program purposes at some school locations (*Please see Appendices A, B, C*).

Based on enrollment projections, implementation of full day kindergarten programs, lower state mandated class sizes, functional capacity, and no need for additional interim capacity, the District anticipates no need to purchase or lease additional portables during the next six-year period to ensure capacity requirement (Noted in section V. Six Yr. Planning Construction).

During the time period covered by this Plan, the District does not anticipate that all of the District's portables will be replaced by permanent facilities. During the useful life of some of the portables, the school-age population may decline in some communities and increase in others, and these portables provide the flexibility to accommodate the immediate needs of the community.

Portables may be used as interim facilities:

1. To prevent overbuilding or overcrowding of permanent school facilities.
2. To cover the gap between the times of demand for increased capacity and completion of permanent school facilities to meet that demand.
3. To meet unique program requirements.

Portables currently in the District's inventory are continually evaluated and maintained. The District's goal is to reduce the number of portables so we may provide an equitable learning environment for all.

The Plan projects that the District will use portables to accommodate interim housing needs for the next six years and beyond. The use of portables, their impacts on permanent facilities, life cycle and operational costs, and the interrelationship between portables, emerging technologies, and educational restructuring will continue to be examined.

## VII - Projected Six-Year Classroom Capacity

As stated in Section IV, the functional capacity study is periodically updated for changes in special programs and reflects class size requirements, class size fluctuations etc. As shown in the Inventory and Capacity chart in Table 3, the functional capacity is also reflected in the capacity and enrollment comparison charts (*See Tables 5 & 5 a-b-c*).

Enrollment is electronically reported to OSPI on Form P-223 on a monthly basis and funding apportionment is based on Annual Average FTE (AAFTE). The first school day of October is widely recognized as the enrollment “snapshot in time” to report enrollment for the year.

Kent School District continues to be the fifth largest district (both FTE and headcount basis) in the State of Washington. The P-223 Headcount for October 2023 was 24,442 with kindergarten students counted at 1.0 and excluding ECSE and college-only Running Start students.

In October 2023, there were 1087 students in 11th and 12th grade participating in the Running Start program at different colleges and receiving credits toward both high school and college graduation. Of these students, 560 attended classes only at the college (“college-only”) and are excluded from FTE and headcount for capacity and enrollment comparisons. Kent School District has one of the highest Running Start program participation rates in the state.

Based on the enrollment forecasts, permanent facility inventory and capacity, current standard of service, portable capacity, and future additional classroom space, the District plans to continue to satisfy required capacity through the interim use of portables (*See Table 5 and Tables 5 a-b-c*).

While the District currently shows available capacity to address projected need on a purely statistical basis, there are variety of extenuating factors that need to be considered. The Kent School District currently makes significant use of portables, which we do not consider as part of our permanent standard of service. We have included portable space in our interim capacity figures, and we do not count that as a permanent space solution. Kent is unusual in that it incorporates neighborhoods intersecting with at least 6 municipalities, including Kent, Auburn, Black Diamond, Maple Valley, Renton, and SeaTac. The district covers 73 square miles and includes over 40 schools. Within this large geographic area, we expect to have pockets of localized capacity need that are not necessarily reflected in the aggregate figures. As one example, the Lakepointe Urban Village development in Covington may require new classroom capacity even as space may exist in schools on the far other end of the District’s boundaries.

## VIII - Finance Plan

The finance plan shown on *Table 6* demonstrates how the Kent School District plans to finance improvements for the years 2023-2024 through 2029-2030. The financing components include secured and unsecured funding and impact fees. The plan is based on future bond issues, state school construction assistance, collection of impact fees under the State Growth Management Act and voluntary mitigation fees paid pursuant to State Environmental Policy Act.

In November 2016, the District held a special election to approve the authorization of \$252,000,000 in bonding authority. The projects described below are part of this authorization. The first series of bonds (\$80 million) were issued in February 2017, which funded the Covington Elementary Replacement School, as well as other infrastructure projects. Impact fees were used at both River Ridge Elementary School and Kent Laboratory Academy projects due to escalation in construction pricing across the Pacific Northwest.

According to RCW 82.02.090, the definition of an impact fee is ". . . a payment of money imposed upon development as a condition of development approval to pay for public facilities needed to serve new growth and development, and that is reasonably related to the new development that creates additional demand and need for public facilities, that is a proportionate share of the cost of the public facilities, and that is used for facilities that reasonably benefit the new development. 'Impact fee' does not include a reasonable permit or application fee." Mitigation or impact fees can be calculated on the basis of "unhoused student need" or "the maintenance of a district's level of service" as related to new residential development.

A mitigation/impact fee may be imposed based upon a determination of insufficient existing permanent and/or interim portable school space or to pay for permanent and/or newly acquired interim portable school space previously constructed as a result of growth in the district. A district's School Board must first approve the application of the mitigation or impact fees and, in turn, approval must then be granted by the other general government jurisdictions having responsibility within the district, counties, cities and towns (Kent, Covington, Renton, Auburn, Black Diamond, Maple Valley, SeaTac, and Unincorporated King County).

Though the current enrollment projections increase for both elementary and secondary schools are relatively flat, the ongoing need to provide permanent instructional facilities to house students is a driving need as the shifts in our family populations continue, due to ongoing development. Previously collected impact fees may be used to support and address the challenges related to the number of interim instructional facilities currently in use, the replacement of some of these aged facilities, the maintenance of the district's level of services, and the potential expansions to existing facilities in future years.

The Kent School District 2023-2024 CFP update includes continued execution of the 2016 Capital Bond Projects, the 2018 Levy Projects, and the data collection and review of our Facility Assessment Reports. The District Facilities and Capital Planning Teams had come together and joined the Capital

Bond Planning Task Force (CBPTF) which included District personnel, design professionals, teaching staff, student voices, as well as community members who collaborated and discussed the District’s needs. The initial plan revealed priorities including school replacement due to age, and the need for added permanent facilities to (1) reduce and eliminate our need for portables and (2) accommodate future growth as housing in the Kent region continues to expand. We started with a list of 2 billion in needs and through itemizing and prioritizing, we brought the list of essential projects to 495 million. This list was brought before the District’s Board of Directors for comments, discussion, and approval. A Capital Bond Measure followed and went out to vote in April 2023 and did not pass with voter approval.

After the failure to pass the 2023 Bond, we re-evaluated needs and for next steps. Surveys went out to the community to see what people would like to prioritize from the list of needed projects. A new list of projects was presented through the 2023 Levy in November. This levy did not pass. This list was again taken and revised to prioritize projects that are critical to operations and life safety within our buildings. In April we set forth our 2024 Levy to a vote, which also did not receive the needed support to pass.

Future updates to this Capital Facilities Plan will include details of any adopted planning. With the opening of Canyon Ridge Middle School, our sixth grade moving from elementary to middle school, and our boundary change, we have advanced opportunities to even out capacity at each site to accommodate our programs, district-wide site capacity, and student-based needs.

For the Six-Year Finance Plan, costs of future schools are based on estimates from Kent School District Capital Planning Team. Please see pages 13-14 for a summary of the cost basis.

**Cost Basis Summary**

For impact fee calculations, construction estimated costs are based on the last elementary school built in Kent, adjusted for inflation, and projected cost future elementary school, as well as average pricing of nearby school districts recently built new middle and new high school projects.

Project	Projected Cost
New Elementary School	\$68,000,000
New Middle School	\$155,000,000
New High School	\$220,000,000

**Site Acquisition Cost**

The site acquisition cost is based on an average cost of sites purchased or built on within the last ten years. Please see Table 7 for a list of site acquisition costs and averages.

**District Adjustment**

The impact fee calculations on Appendix B & C result in a zero-dollar impact fee total for this year but may be adjusted if needed per RCW 36.70A.130(2)(b) provision.

## **IX - Summary of Changes to June 2024 Capital Facilities Plan**

The Capital Facilities Plan (the "Plan") is updated annually based on previous Plans in effect since 1993. The primary changes from the June 2023 Plan are summarized here.

Capacity changes continue to reflect fluctuations in class size ratio and program changes. Changes in portables or transitional capacity reflect use, lease or purchase, sale, surplus and/or movement between facilities.

The District moved to a K-5 Elementary and 6-8 Middle School model beginning at the 2023-2024 school year. Capacity has been added at the middle school level by reopening the original Sequoia Junior High (now Canyon Ridge Middle School).

The District worked with Educational Data Solutions, LLC to update student generation factors. The updated rates are included in the body of the Plan.

The District expects to receive some State Funding Assistance (formerly called "state matching funds") for projects in this Plan and tax credit factors are updated annually. Unfunded site and facility need will be reviewed in the future.

The impact fees for 2024 calendar year will result in no collection of impact fees for both Single-Family and Multi-Family due to the capacity study completed in spring 2024.

## X - Appendices

Changes to Impact Fee Calculation Factors Include:

ITEM	Grade /Type	FROM	TO	Increase/ Decrease	Comments
