

# 03/14/2024

## SEPA ENVIRONMENTAL CHECKLIST

### **Purpose of checklist**

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

### **Instructions for applicants**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use “not applicable” or “does not apply” only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

### **Instructions for lead agencies**

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

### **Use of checklist for nonproject proposals**

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the [Supplemental Sheet for Nonproject Actions \(Part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in “Part B: Environmental Elements” that do not contribute meaningfully to the analysis of the proposal.

**A. Background** [Find help answering background questions](#)

**1. Name of proposed project, if applicable:**

Vashon Maury Community Food Bank – Clearing and Grading

**2. Name of applicant:**

Vashon Maury Community Food Bank: Emily Scott (Director)

**3. Address and phone number of applicant and contact person:**

Applicant Address: PO Box 1205 Vashon, WA 98070; Applicant Phone: (206) 463-6332

Contact: Graham Baba Architects, 1507 Belmont Ave, Suite 200, Seattle, WA 98122

Contact Phone: (206) 323-9932

**4. Date checklist prepared:**

September 2023, Revised March 2024

**5. Agency requesting checklist:**

King County DPER

**6. Proposed timing or schedule (including phasing, if applicable):**

The project is anticipated to begin construction in Spring 2024 and be complete as early as Summer 2025.

**7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

Associated Building Permit #ADDC23-0418 work which is categorically exempt from SEPA review per King County Title 20.44.040. No further additions or expansions planned.

**8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

Geotechnical Engineering Evaluation, Adapt Consulting, October 2022

**9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

No

**10. List any government approvals or permits that will be needed for your proposal, if known.**

King County Clearing and Grading Permit #GRDE23-0060.

**11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

Site clearing, excavation, fill and site improvements on a 1.86 acre site for the construction of a new Food Bank building, fire truck turnaround, existing parking re-paving and landscaping.

The full project scope (under building permit #ADDC23-0418) includes construction of a new +/- 3,400 sf 1-story Food Bank building (M & S-2 occupancy).

**12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

The project address is 17928 Vashon Highway SW, Vashon, WA 98070. See permit plans for site plan, legal description, and vicinity map.

## B. Environmental Elements

### 1. Earth [Find help answering earth questions](#)

#### a. General description of the site:

The site generally slopes from west to east at approximately 2-3%. The soils anticipated to be encountered are silty sand with gravel, cobbles and organics with underlying dense to very dense glacial till soils. Groundwater was encountered in one of three exploratory boring approximately 9 feet below grade.

Circle or highlight one: **Flat**, rolling, hilly, steep slopes, mountainous, other:

#### b. What is the steepest slope on the site (approximate percent slope)?

The steepest existing and proposed slope is 3:1 or 33%.

#### c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Alderwood gravelly sandy loam

#### d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

#### e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Excavation of approximately 1,000 cubic yards will occur for establishing the building pad and excavation for the proposed underground stormwater infrastructure. Approximately 1,500 cubic yards of fill will be placed to establish grade around the proposed building and fire lane modifications. Fill materials will be imported to the site from an undetermined approved earthwork supplier.

#### f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

Minor amounts of erosion could occur on site in limited areas as a result of exposed soils during construction. Erosion control measures will be installed on site during construction and be kept in place in working condition until final site stabilization has been achieved.

#### g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

After project construction the impervious surface coverage will be up to 60%.

**h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

The site will be constructed implementing temporary erosion and sediment control BMPs as noted on approved TESC plans and supplemented as necessary to prevent erosion during construction. Proposed measures include BMPs such as inlet protection, interceptor swales, plastic sheeting, silt fence, straw wattles, stormwater settling tanks, etc.

## 2. Air [Find help answering air questions](#)

**a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

During construction there will be a short-term increase in emissions from construction equipment and trucks, dust and paint fumes. Traffic traveling to and from the site after the work of associated building permit #ADDC23-0418 is complete will be a permanent emission.

**b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No

**c. Proposed measures to reduce or control emissions or other impacts to air, if any.**

Construction activities and equipment will follow EPA emission standards, and be in compliance with applicable codes and regulations.

## 3. Water [Find help answering water questions](#)

**a. Surface Water:** [Find help answering surface water questions](#)

**1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

No

**2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

No

**3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

None

**4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

No

**5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

No

**6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

No

**b. Ground Water:** [Find help answering ground water questions](#)

**1. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

No groundwater will be withdrawn from a well, and no water is proposed to be discharged to groundwater.

**2. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

No waste materials are proposed to be discharged into the ground.

**c. Water Runoff (including stormwater):**

**a) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

Stormwater runoff from this project will be collected in roof drains and area drains or catch basins on site. Surface water from pollution generating surfaces (such as parking lots or drive aisles) will be routed to a water quality facility meeting King County treatment requirements. Stormwater from the site will be routed to a detention facility sized to meet King County requirements, where flows will be discharged to an existing drainage ditch on site. Stormwater from this site ultimately discharges to the Puget Sound.

**b) Could waste materials enter ground or surface waters? If so, generally describe.**

No waste materials are anticipated to enter ground or surface waters as a result of this project.

**c) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

No, the proposed project will continue to discharge stormwater to the existing point of discharge for this site matching existing drainage patterns.

**d) Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any.**

Disturbed project areas will be mitigated with stormwater detention and water quality treatment for pollution generating surfaces as required by King County.

#### 4. Plants [Find help answering plants questions](#)

**a. Check the types of vegetation found on the site:**

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- orchards, vineyards, or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

**b. What kind and amount of vegetation will be removed or altered?**

13 trees will be removed. Please see Existing Tree Schedule on L1.10 of the permit plans for additional information on all existing trees at the site and those to be removed.

Existing areas of lawn will be removed for construction of the building and for new required landscaping.

**c. List threatened and endangered species known to be on or near the site.**

None known to be on or near the site.

**d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.**

See L3.10 and L3.20 for proposed planting plan and schedule. A diverse palette of drought-tolerant and native plants will be incorporated in the new landscape design. Landscape has been designed to comply with King County Title 21.

**e. List all noxious weeds and invasive species known to be on or near the site.**

Himalayan blackberry (*Rubus bifrons*) is present on the site, and will be removed from within the project limits.

#### 5. Animals [Find help answering animal questions](#)

**a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds:** hawk, heron, eagle, songbirds, other:
- **Mammals:** deer, bear, elk, beaver, other:
- **Fish:** bass, salmon, trout, herring, shellfish, other:

Deer

**b. List any threatened and endangered species known to be on or near the site.**

None

**c. Is the site part of a migration route? If so, explain.**

No

**d. Proposed measures to preserve or enhance wildlife, if any.**

None

**e. List any invasive animal species known to be on or near the site.**

None

**6. Energy and Natural Resources** [Find help answering energy and natural resource questions](#)

**1. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

No energy is required to meet the completed Clearing and Grading project's energy needs.

Electric energy will be used for the completed associated building permit #ADDC23-0418 project's energy needs. Electricity will be used for heating/cooling, water heating, product refrigeration/freezers, lighting and receptacles. A propane back-up generator will be used in emergencies only.

**2. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

No

**3. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

No energy conservation features or measures are possible or proposed for this Clearing and Grading project.

Associated building permit #ADDC23-0418 project will use the following energy conservation features and measures:

- Dedicated Outdoor Air Systems
- Variable refrigerant flow (VFR) heat pump systems for heating and cooling
- Low-flow plumbing fixtures
- New high-performance windows with low-e coatings

**7. Environmental Health** [Find help with answering environmental health questions](#)

**a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

No

**1. Describe any known or possible contamination at the site from present or past uses.**

None

**2. Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

None

**3. Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

None

**4. Describe special emergency services that might be required.**

None

**5. Proposed measures to reduce or control environmental health hazards, if any.**

None

**b. Noise**

- 1. What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

None

- 2. What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

Typical construction noise (trucks, equipment, etc.) will occur on a short-term basis while the project is being built.

- 3. Proposed measures to reduce or control noise impacts, if any.**

Construction noise will occur only during designated work hours per King County code.

**8. Land and Shoreline Use** [Find help answering land and shoreline use questions](#)

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

The site is currently used as a Place of Religious Worship by the Vashon United Methodist Church. Adjacent properties to the north, east and south are residential use. Uses to the west, across Vashon Highway SW, are residential and retail. The proposal will not affect current land uses on nearby or adjacent properties.

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?**

The project site has not been used as working farmlands or working forest lands. No agricultural or forest land will be converted to other uses.

- 1. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

No

- c. Describe any structures on the site.**

1. Vashon United Methodist Church building: Approximately 4,809 sf, wood frame Church. Constructed in 1908 and expanded in 1934. An addition was added in 2000 to add a fellowship library, larger sanctuary and new kitchen (permit B99C0027).

2. Parsonage Building: Approximately 1,525 sf wood frame house constructed in 1952.
3. Education Building: Approximately 3,513 sf, wood frame, 1-story gable-roofed building constructed in 1964.

**d. Will any structures be demolished? If so, what?**

No structures will be demolished for this project.

**e. What is the current zoning classification of the site?**

CB-P-SO (Community Business)

**f. What is the current comprehensive plan designation of the site?**

RT (Rural Town)

**g. If applicable, what is the current shoreline master program designation of the site?**

Not applicable.

**h. Has any part of the site been classified as a critical area by the city or county? If so, specify.**

No

**i. Approximately how many people would reside or work in the completed project?**

For completed associated building permit #ADDC23-0418, approximately 10 employees and 20 volunteers will work at the Food Bank on a daily basis.

**j. Approximately how many people would the completed project displace?**

None

**k. Proposed measures to avoid or reduce displacement impacts, if any.**

Not applicable.

**l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

For completed associated building permit #ADDC23-0418, the proposed land use is a Social Service use as a Food Bank. Social Service uses are permitted in the projects Commercial Business zone.

**m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any.**

There are no impacts to agricultural or forest lands anticipated.

**9. Housing** [Find help answering housing questions](#)

**a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

No new housing units proposed.

**b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

No housing units will be eliminated.

**c. Proposed measures to reduce or control housing impacts, if any.**

None

## 10. Aesthetics [Find help answering aesthetics questions](#)

### a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

For completed associated building permit #ADDC23-0418, the tallest height of the proposed structure is twenty-five (25) feet. The principal exterior building material is proposed to be painted fibercement siding.

### b. What views in the immediate vicinity would be altered or obstructed?

No views in the immediate vicinity would be altered or obstructed.

### c. Proposed measures to reduce or control aesthetic impacts, if any.

A twenty (20) foot deep landscape buffer of evergreen trees and shrubs will be planted on the south and southeast property line adjacent to the new development in order to screen it from adjacent residentially-zoned properties.

For completed associated building permit #ADDC23-0418, the new Food Bank building will be sited to the east of the existing Church building and will be predominantly not be visible from Vashon Highway SW. The Church's primary facades are to the west, south and north, and these facades will remain unobstructed by the new development. The horizontal siding, trim and paint color scheme of the new Food Bank will complement the existing Church and Education Building's materials and character.

## 11. Light and Glare [Find help answering light and glare questions](#)

### a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

Exterior lighting will use LED lamps. Parking Lot lighting will be Dark Sky Compliant. Lighting will mainly turn on at night via lighting control panel with timeclock and photocell.

### b. Could light or glare from the finished project be a safety hazard or interfere with views?

Lighting should not be a safety hazard or interfere with views. Glare from lighting shall be minimal and lumen output shall be only enough to provide sufficient lighting in specific areas only.

### c. What existing off-site sources of light or glare may affect your proposal?

Existing off-site sources of light should not affect the proposal.

### d. Proposed measures to reduce or control light and glare impacts, if any.

Reduce light spill to adjacent properties to be below 0.3 footcandles or lower. Parking lot pole mounted fixtures will be Dark Sky compliant and have reduced height to reduce potential glare angles.

**12. Recreation** [Find help answering recreation questions](#)

**a. What designated and informal recreational opportunities are in the immediate vicinity?**

None

**b. Would the proposed project displace any existing recreational uses? If so, describe.**

No

**c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any.**

None

**13. Historic and Cultural Preservation** [Find help answering historic and cultural preservation questions](#)

**a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

1. The existing Vashon United Methodist Church building which is on the site and adjacent to the proposed project was constructed in 1908 and expanded in 1934. An addition was added in 2000, altering the eastern portion of the Church in order to add a fellowship library, larger sanctuary and new kitchen (permit B99C0027). It may be eligible for listing as a King County Landmark or on another register. No alterations to the Church are proposed in this Clearing and Grading project or associated building permit project #ADDC23-0418. The new Food Bank building has been sited to the east of the Church's 2000 addition in order to keep the historic western, southern and northern facades unobstructed, particularly from Vashon Highway SW.
2. The existing Parsonage building in the northeastern corner of the site was constructed in 1952. We do not believe this building is eligible for listing as a King County Landmark or on another register because it is owned by a religious institution and does not meet any of the criteria for designation (20.62.040.C). No alterations to the parsonage building are proposed in this Clearing and Grading project or associated building permit project #ADDC23-0418.
3. The existing Education building in the center of the site was constructed in 1964. We do not believe this building is eligible for listing as a King County Landmark or on another register because it does not meet any of the criteria for designation (20.62.040.C). No alterations to the Education building are proposed in this Clearing and Grading project or associated building permit project #ADDC23-0418.

**b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

No

**c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

Consultation with Tribal Officials as part of securing funding from the State of Washington.

**d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None

#### **14. Transportation** [Find help with answering transportation questions](#)

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

The project site is bounded to the west by Vashon Highway SW. The existing curb cut on Vashon Highway SW will be maintained and remain the access point for vehicular traffic. Reference the permit plans for additional information.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

King County Metro bus routes 118 and 119 provide public transportation to the site. The nearest transit stop is approximately 300 feet north of the site on the eastern side of Vashon Highway SW.

- c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

A small portion of the existing concrete sidewalk will require demolition and replacement to connect a new water line for an on-site fire hydrant. Reference C1.00 and C3.00 in the permit plan set.

- d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

Access to Vashon Island is limited to the Washington State Ferry System. Off-island employees, volunteers and visitors will need to use the ferry system to access the Food Bank. For a short period of time during construction, any materials or workers from off-island will use the ferry to access the site.

- e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

The completed clearing, grading and landscaping work of Clearing and Grading project #GRDE23-0060 will not generate vehicular trips.

- f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No, the proposal will not interfere with, affect or be affected by the movement of agricultural or forest products.

- g. Proposed measures to reduce or control transportation impacts, if any.**

No measures are proposed.

## **15. Public Services** [Find help answering public service questions](#)

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

An increase to public services is not anticipated for the Clearing and Grading project.

For completed associated building permit #ADDC23-0418, an increase to public services is not anticipated because the Food Bank currently operates on Vashon Island. An increase in the use of public transportation may occur given the projects proximity to bus routes.

- b. Proposed measures to reduce or control direct impacts on public services, if any.**

For associated building permit #ADDC23-0418, the Food Bank building will have new fire hydrant coverage.

## **16. Utilities** [Find help answering utilities questions](#)

- a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

Electricity, natural gas, water, refuse service, telephone, sanitary sewer are currently available at the site.

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**

Water services will be provided by Water District 19, the proposed domestic water service connection and new fire hydrant will be connected to existing water mains. Sanitary sewer service is provided by Vashon Sewer District, the proposed sewer service will connect to an existing sanitary sewer manhole on site. Electrical and natural gas services are provided by Puget Sound Energy. Telephone service is provided by local communications providers.

**C. Signature** [Find help about who should sign](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X *ESC*

**Type name of signee:** Emily Scott

**Position and agency/organization:** Executive Director/Vashon Food Bank

**Date submitted:** 3.12.24

**D. Supplemental sheet for nonproject actions** [Find help for the nonproject actions worksheet](#)

**IT IS NOT REQUIRED** to use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

**1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

- Proposed measures to avoid or reduce such increases are:

**2. How would the proposal be likely to affect plants, animals, fish, or marine life?**

- Proposed measures to protect or conserve plants, animals, fish, or marine life are:

**3. How would the proposal be likely to deplete energy or natural resources?**

- Proposed measures to protect or conserve energy and natural resources are:

**4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

- Proposed measures to protect such resources or to avoid or reduce impacts are:

**5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

- Proposed measures to avoid or reduce shoreline and land use impacts are:

**6. How would the proposal be likely to increase demands on transportation or public services and utilities?**

- Proposed measures to reduce or respond to such demand(s) are:

**7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**
