

# SEPA ENVIRONMENTAL CHECKLIST

## **Purpose of checklist**

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

## **Instructions for applicants**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use “not applicable” or “does not apply” only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

## **Instructions for lead agencies**

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

## **Use of checklist for nonproject proposals**

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the [Supplemental Sheet for Nonproject Actions \(Part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in “Part B: Environmental Elements” that do not contribute meaningfully to the analysis of the proposal.

## A. Background [Find help answering background questions](#)

1. Name of proposed project, if applicable:

[Providence Dairy Tank Project \(Permit Application NONB25-0032\)](#)

2. Name of applicant:

Ryan Mensonides

3. Address and phone number of applicant and contact person:

23423 DE 464<sup>th</sup> ST  
Enumclaw WA, 98022

4. Date checklist prepared:

[9/22/25](#)

5. Agency requesting checklist:

[King County Department of Local Services, Permitting Division](#)

6. Proposed timing or schedule (including phasing, if applicable):

Build immediately depending on permit timeline

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

[No](#)

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

[See the attached critical areas study, which was required by King County for this project.](#)

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

[There are no additional proposals for projects.](#)

10. List any government approvals or permits that will be needed for your proposal, if known  
[King County permit for a non-residential agricultural structure.](#)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

The proposed project is to install an above ground waste storage tank at a commercial dairy farm, in Enumclaw, WA. This tank will provide additional storage for livestock manure. It will be installed next to the existing waste storage ponds. This is an NRCS project and the installation and specifications will meet NRCS federal standards. It will be 23.84ft. high and 97.91 ft. wide. It will hold a total maximum of 1,286,610 gallons.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

This project will be located on parcel 342006-9035. The street address is: 23423 SE 464TH St., Enumclaw, WA 98022.

## B. Environmental Elements

### 1. Earth [Find help answering earth questions](#)

#### a. General description of the site:

This is an agricultural property, operated as a commercial dairy farm. The tank will be located next to the existing waste storage pond, on disturbed land that has been historically used for agriculture. The area vegetation is a mix of grasses and weeds.

Circle or highlight one: **Flat**, rolling, hilly, steep slopes, mountainous, other:

#### b. What is the steepest slope on the site (approximate percent slope)?

The planned location has a zero percent slope.

#### c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Buckley gravelly silt loam, 0-3% slopes. This project will be placed adjacent to that farmland that is in continuous use.

#### d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No.

#### e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Crushed rock fill from Enumclaw quarry, 7,542 square feet

#### f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

No

#### g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

The tank will create 7,543 square feet of impervious surface.

#### h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.

Compaction

## 2. Air [Find help answering air questions](#)

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Emissions from telehandler on site

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

N/A

c. Proposed measures to reduce or control emissions or other impacts to air, if any.

no

## 3. Water [Find help answering water questions](#)

a. Surface Water: [Find help answering surface water questions](#)

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

There is an unnamed ditch along the eastern property border, that has seasonal flows. It does not have year-round flows. It is approximately 600 feet away (southeast) from the planned tank location. From this property, it flows half a mile southward into the White River.

There are currently no mapped wetlands on the property. A recent critical areas study concluded that "due to the presence of existing man-made conditions, a naturally occurring wetland is not located within 75 feet from the existing waste storage tank pad".

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

N/A

4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.

No.

5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.  
No.

6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No.

b. Ground Water: [Find help answering ground water questions](#)

1. Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.

No.

2. Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. **There will be no discharge directly into the ground from this project.**

c. Water Runoff (including stormwater):

a) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

**There will be no risk of water runoff from the above ground storage tank. The overflow from this tank will be directed into the adjacent waste storage pond, which serves as additional storage capacity.**

b) Could waste materials enter ground or surface waters? If so, generally describe.

**No. The above-ground tank will have an impenetrable base, with all liquid overflow directed into the adjacent storage pond.**

c) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d) Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any.

**The measures are to use the additional ponds for overflow.**

#### 4. Plants [Find help answering plants questions](#)

a. Check the types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- orchards, vineyards, or other permanent crops.
- wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

The vegetation in this location is dominated by common chickweed, perennial rye grass, creeping bentgrass, fragrant bedstraw, and red dead nettle.

c. List threatened and endangered species known to be on or near the site.

No.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

No.

e. List all noxious weeds and invasive species known to be on or near the site.

There are no noxious weeds at the planned building location.

#### 5. Animals [Find help answering animal questions](#)

a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Examples include:

- Birds: hawk, heron, eagle, songbirds, other:
- Mammals: deer, bear, elk, beaver, other:
- Fish: bass, salmon, trout, herring, shellfish, other:

b. List any threatened and endangered species known to be on or near the site.

N/A

c. Is the site part of a migration route? If so, explain.

N/A

d. Proposed measures to preserve or enhance wildlife, if any.

None.

e. List any invasive animal species known to be on or near the site.

N/A

**6. Energy and Natural Resources** [Find help answering energy and natural resource questions](#)

1. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Gas for the telehandler

2. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

3. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

None

**7. Environmental Health** [Find help with answering environmental health questions](#)

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.

No.

1. Describe any known or possible contamination at the site from present or past uses.

There are no known sources of possible contamination at the planned location in the farm field.

2. Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

No known hazards at the planned location.

3. Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4. Describe special emergency services that might be required.

None

5. Proposed measures to reduce or control environmental health hazards, if any.

None

**b. Noise**

1. What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

There is no noise nearby that would effect this project.

2. What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?

Gas telehandler noise very quiet 8am-5pm

3. Proposed measures to reduce or control noise impacts, if any.

None

**8. Land and Shoreline Use** [Find help answering land and shoreline use questions](#)

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

This is a commercially operated dairy farm that has been historically operated as a dairy for several generations. The adjacent properties are agricultural properties that are actively farmed.

This will not impact land uses on this farm or adjacent farms. It will increase the long-term viability of the farm.

- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

This is a working farm. No active farmland of commercial significance will be lost due to this project. This project will improve the commercial significance of this farm, by adding vital capacity for the dairy operation. The tank is part of the farm use, and will be a total of 0.17 acres.

1. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?

No, it will be located on associated ag land (historically grazed), but not currently in use. The current farmable acreage (pastures and hayland) will not be impacted. It will improve the longevity of the farm, by adding additional storage capacity for livestock manure.

**c. Describe any structures on the site.**

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

A35 and the Farmland Preservation Program.

f. What is the current comprehensive plan designation of the site?

N/A

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, see the attached critical areas study, that was required by King County, for this project.

i. Approximately how many people would reside or work in the completed project?

N/A

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

N/A

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

This project will be part of the continued commercial farm operation and farming at this location.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any.

N/A. This project will benefit the long-term goal to maintain a sustainable commercial dairy operation at this farm.

## 9. Housing [Find help answering housing questions](#)

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high,

middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any.

N/A

**10. Aesthetics** [Find help answering aesthetics questions](#)

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

The height of the tank will be 23.84 feet. The exterior building material will be steel.

- b. What views in the immediate vicinity would be altered or obstructed?

There will be no obstructed views.

- c. Proposed measures to reduce or control aesthetic impacts, if any.

N/A

**11. Light and Glare** [Find help answering light and glare questions](#)

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

None

- b. Could light or glare from the finished project be a safety hazard or interfere with views?

No

- c. What existing off-site sources of light or glare may affect your proposal?

None

- d. Proposed measures to reduce or control light and glare impacts, if any.

N/A

**12. Recreation** [Find help answering recreation questions](#)

- a. What designated and informal recreational opportunities are in the immediate vicinity?

None

- b. Would the proposed project displace any existing recreational uses? If so, describe.

No

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any.

N/A

**13. Historic and Cultural Preservation** [Find help answering historic and cultural preservation questions](#)

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

None of the building have been recommended for listing.

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

J. Todd Scott, Preservation Architect, with King County determined that there were no identified historic, cultural, or archaeological resources in the project area and approved the project for issuance. The U.S.D.A. Natural Resource Conservation Service (NRCS) also completed a study at this farm.

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

An NRCS Cultural Resources Report on the Mensonides Waste Storage Project was completed by, Dr. Munsell, which he submitted on 8/21/21 to DAHP and the Muckleshoot Tribe as part of S. 106 consultation process.

Dr. Munsell's Report states that he did not identify any cultural resources during his 8/19/21 field survey of the APE; he consequently made a finding/determination of "No Historic Properties Affected" and recommended the Project proceed as planned.

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

A plan was not needed, as two different agencies determined that there are not cultural resources at risk at this planned project location.

**14. Transportation** [Find help with answering transportation questions](#)

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The farm is located on SE 464<sup>th</sup> St., Enumclaw.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No.

- c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

- d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

- e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

None.

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

g. Proposed measures to reduce or control transportation impacts, if any.

N/A

**15. Public Services** [Find help answering public service questions](#)

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

No.

**16. Utilities** [Find help answering utilities questions](#)

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None

**C. Signature** [Find help about who should sign](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X

Type name of signee: Michael Baldwin

Position and agency/organization: Contractor

Date submitted: 9/23/2025

## **D. Supplemental sheet for nonproject actions** [Find help for the nonproject actions worksheet](#)

**IT IS NOT REQUIRED** to use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

**1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

- **Proposed measures to avoid or reduce such increases are:**

**2. How would the proposal be likely to affect plants, animals, fish, or marine life?**

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

**3. How would the proposal be likely to deplete energy or natural resources?**

- **Proposed measures to protect or conserve energy and natural resources are:**

**4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

**5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

**6. How would the proposal be likely to increase demands on transportation or public services and utilities?**

- **Proposed measures to reduce or respond to such demand(s) are:**

**7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**
